A sufficient number of written acceptances having been received for Simplified Practice Recommendation No. 52, Staple Vitreous China Plumbing Fixtures, recently reaffirmed by the Advisory Committee without change, the Division of Simplified Practice, of the Department of Commerce, has announced that the project is now in effect, subject to annual revision or reaffirmation by the industry. Eighty per cent of the known manufacturers, distributors, and organized users, by volume of output must accept the recommendation in writing before it can be placed in effect by the Department of Commerce. Information, presented to the Advisory of standing Committee for the simplification, indicated a very satisfactory degree of adherence to the recommendation.

Larsen Construction Reports

Issued every business day of the year. Furnishes advance information on work projected and contracts awarded for all classes of building, street, sewer and highway projects, bridges, dams and harbor works, machinery, etc. Send for rates in your territory, advising class of work in which you are interested.

Applying time - proved methods of insula- tion to modern day needs

Russian Peasant Women Placing Straw
Around Their Dwelling to Keep the
Cold Out

NO one knows the value of building insulation as do the inhabitants of either extreme cold or extreme hot climates. These natives have realized for hundreds of years the value of insulation—particularly straw insulation. These people, not having a complete scientific knowledge of heat and cold values, made their selection of an insulating material by actual test. After their many crude experiments on different products—straw was finally chosen as their most perfect means of protection against heat and cold.

And today, this time-proved method of insulation is offered in a perfected form—INSO BOARD—manufactured in sturdy panels 7/16" thick, 4 feet wide and any length desired. It has many structural insulation uses such as—(1) Plaster Base, (2) Sheathing under stucco, brick or wood exterior, (3) Roof Insulation, (4) Under Flooring, (5) Wall and Ceiling finishing panels, (6) Sound Deadener, and (7) Insulating inner Walls.

DEALERS will find INSO BOARD a profitable connection, combined with the sales and advertising co-operation which will be WHOLLY AT OUR EXPENSE. Write today for particulars.

Congress of March 3, 1879.

STEEL INSTITUTE WILL PLACE TEN FIELD ENGINEERS

In an effort to promote sound engineering practice and the welfare of the structural steel industry, the American Institute of Steel Construction has recently organized, and will shortly place in active service, a staff of ten district field engineers.

The field engineers will establish contact with engineers, architects, contractors, public officials and technical schools throughout the United States. Data concerning the latest developments in steel construction, leading to a more effective and economical use of the material, will be made available to all charged with the selection of materials and to all responsible for proper design and construction.

To bring about a wider use of structural steel for bridges and buildings will be one of the chief objectives of the field representatives of the Institute. Their efforts in this direction, however, will be confined entirely to arousing a better appreciation of the advantages to be gained by the selection of steel for such structures.

A training school was opened in Cleveland, Ohio, on May 15, under the direction of Lee H. Miller, the Institute's Chief Engineer. There the engineers will be thoroughly instructed in the aims and policies of the Institute before taking up work in the territories assigned to them. Their activities in the field will be supplemented by a more extensive preparation of educational literature to be distributed from the New York office.

The country has been divided into ten districts, with one field engineer assigned to each. District No. 10 will cover the states of Washington, Oregon, Idaho, Utah, Nevada, Arizona and California. W. E. Emmett, formerly structural engineer with the Moore Drydock Co., of Oakland, will be the Pacific Coast District Engineer with headquarters at San Francisco.

ENGLISH PRIORY OF 12th CENTURY RESTORED IN AMERICA

A most interesting story attaches to the restoration in America of an old English Priory originally constructed in the 12th century at Warwick, England. This building, now a home in Richmond, Virginia, was bought at auction in England by Mr. Alexander W. Weddell, Consul General in Mexico of the United States.

The Priory once purchased was brought to America and with the assistance of Mr. Henry G. Morse, well known architect from New York City, was re-erected in Windsor Farms, Richmond, Virginia.

The Priory as purchased was in reality in three parts. There was a section belonging to the 12th century, another part representing Elizabethan period, and the third obviously Georgian. When brought to Richmond the material was rebuilt into a design which faithfully restores portions of three historic English houses. The main body of "Virginia House", as Mr. Weddell names his home, is identical with the Elizabethan part of the Priory. The entrance tower is a reproduction from "Wormleighton" the home of Lord Spencer. The wing to the west of the main entry door is a copy of the original part of Sulgrave Manor where George Washington's ancestors lived in England. This part of the building has been occupied by the Virginia Historical Society which it is planned will eventually take over the entire building.

An interesting feature of this restoration work is its departure from the age old method of numbering building materials part by part as the ancient edifice is dismantled and then re-assembling by reference to these identifying marks. Mr. Morse made numerous photographs and sketches of the buildings as they stood in England. The houses were then wrecked and the material stowed aboard freighters destined for the new location in America. In the meantime drawings of the construction planned in America had been prepared, best obtainable workmen secured, and everything made ready for immediate use of materials. In this way a good deal of the cost and time necessary for re-assembling piece by piece was obviated without any sacrifice to architectural faithfulness to the original.

A. S. M. E. NOMINATE OFFICERS FOR YEAR 1929

Nominations of officers of The American Society of Mechanical Engineers for 1929 were announced at a recent meeting of the Nominating Committee held at Pittsburgh, Pa., during the Spring Meeting. Election will be by letter ballot of the entire membership, closing on September 25, 1928.

The nominees, as presented by the Regular Nominating Committee of the Society are: President, Elmer A. Sperry, Chairman, Bd. of Dir., Sperry Gyroscope Co., Brooklyn, N. Y.; Vice-Presidents—William Elmer, Special Engineer, Pennsylvania Railroad, Philadelphia, Pa.; Robert L. Daugherty, Prof. Mech. & Hyd. Engrg., California Institute of Technology, Pasadena, Calif.; Charles E. Gorton, Chairman, American Uniform Boiler Law Society, New York, N. Y.; Managers—Chas. M. Allen, Prof. of Hyd.

OAKLAND SCHOOL APPRENTICES GET PAINT EXAMINATION

Examinations by master painters were given to boys in the apprenticeship classes in painting and decorating of the Oakland public schools May 16.

The boys had to prepare the surface by puttying and sanding, matching color, painting the surface and cleaning the brushes. They were rated on the time used, the technique of procedure and the quality of workmanship.

The judges were Harry McManus and Bert Johnson, master painters; Herbert Albers, journeyman painter, David M. Schindler, Oakland Paint and Varnish club; L. B. Travers, assistant director of vocational education, W. C. Matthews, director of apprentice school; and L. W. Lawrence, apprentice instructor.

Great interest is being shown in the revival of apprenticeship in the building trades, according to Matthews. The employers send their boys to the apprentice classes held either in day or evening school.

Many of the apprentices are legally indentured to the employer for a four-year term. The apprenticeship is guaranteed training in workmanship and technical knowledge. After a limited time in preliminary training in the school under expert workmen as teachers, the boys are hired as apprentices and return to school from four to eight hours a week for technical schooling.

Oakland's apprenticeship training is rated by experts as the best in the west.

STATE MASTER PLUMBERS ELECT

Lou J. Kruse of Oakland was elected president of the California State Master Plumbers' Association which recently held its annual convention in San Francisco. Fred W. High, Fresno plumbing supply dealer and contractor, was elected vice-president. Others elected were: Clause Hickman, San Pedro, treasurer, and Lawrence D. Stuffer, Los Angeles; R. W. Timmons, Richmond, and W. J. Young, San Francisco, members of the executive committee.

\$40,000,000 TUNNEL PROJECTED

Plans for the elimination of the mountain barrier between Puget Sound and the Inland Empire by driving a low-level tunnel of 27 miles length, which would give to Seattle and Puget Sound an equal advantage with Portland and the Columbia river route in matters of East and West transit, have been outlined to the Seattle Chamber of Commerce by Judge Austin E. Griffiths who is president of the Cascade Tunnel Association. The cost of construction is estimated at \$40,000,000.

CONCRETE ROAD YARDAGE

There is given below a tabulation of concrete pavement yardage awarded during April, 1928, together with the total number of square yards awarded for the year to April 28, 1928, as prepared by the Portland Cement Association. The figures represent awards in the United States only:

	Square Yards Awarded During April, 1928	Square Yards Awarded From Jan. 1, 1928 to April 28, 1928
Roads	12,722,131	31,186,651
Streets	4,780,219	11,680,140
Alleys	285,154	727,793
Totals	17,787,504	43,594,584

BIDS ASKED FOR \$8,000,000 HOSPITAL AT L. A.

Bids will be considered by the Los Angeles County Board of Supervisors on July 2 for the general contract, electrical work, heating plumbing, ventilating and refrigeration for the new general hospital building to be erected at the county hospital site. The general contract will include the concrete work for the building, interior concrete partitions, exterior windows and doors, cast stone work, ornamental iron, retaining walls, bridge and viaduct to connect with present buildings, etc.

The plumbing, electric, heating, ventilating and refrigerating contracts will include the work which is necessary to be done while the general contract is being executed.

Bids will be taken later for finishing the interior of the building. The present work which is being advertised will amount to about \$4,500,000. The total cost of construction is estimated at \$8,000,000.

Bids will be taken later on interior

partitions, interior finish, plastering marble and tile work, and for final plumbing, heating, ventilating, etc., on portions of the building at a time.

The building will be an eleven-story structure of steel frame construction with reinforced concrete floors, filler walls and roof.

Plans were prepared by Architects Edwin Bergstrom, Myron Hunt, Sumner Hunt, Pierpont Davis and William Richards.

The sketch above shows how the new \$8,000,000 county general hospital for the county of Los Angeles will look upon completion. The structure will be thirteen stories in height of Class A, steel frame and reinforced concrete construction with basement, sub-basement and two roof stories. There will be 82 typical wards, 560 rooms, kitchens, closets, utility rooms, etc. The structure will cover a ground area of 600 by 400 feet. (Cut, courtesy of Los Angeles Journal of Commerce).

HIGH BUILDING IN WASHINGTON MEETING OPPOSITION

The zoning commission of Washington, D. C., is considering a regulation limiting to 130-feet the extreme height of buildings to be erected in the future. This was proposed by the National Capitol Park and Planning Commission and is being opposed by local building. The present limit for building heights is 130 ft., but pent houses, spires, domes, towers, minarets, smokestacks, shafts and tanks are permitted to extend above the limit. The new regulation, if it is adopted, will bring these appurtenances below the line. Opposition to tall buildings is based on two arguments: That congestion will be increased by the use of skyscrapers and that the dome of the Capitol should be the dominant architectural feature of the city.

IRON-STEEL EXPORTS DECREASE DURING APRIL

Preliminary figures covering the foreign trade of the United States in iron and steel products during April show exports totaling 215,184 gross tons, 6,750 tons less than in March, and imports amounting to 72,329 tons, or 1,799 tons less than in the preceding month, according to a statement by the Iron and Steel Division of the Department of Commerce. An abstract of the statement follows: Average daily export for April (7,173 tons) exceeded that of March (7,159 tons) however, as did that for imports, 2,411 tons and 2,391 tons. Principal products exported, in point of tonnage, were scrap (40,616 tons), heavy rails (23,513), tin plates (19,809 tons), and plain shapes (13,653 tons). Largest imports during the month were those of pig iron (20,815 tons), shapes (16,577 tons), and cast iron pipe (6,566 tons), and "other" pipe (6,211 tons).

MONOLITH CEMENT COMPANY HAS BRANCH IN HONOLULU

Rapid progress is being made by the Monolith Portland Cement and Monolith Portland Midwest companies in their expansion activities to keep pace with a steadily increasing demand for cement, according to Coy Burnett, president, who has returned from Honolulu, where he made arrangements to establish branch offices. After a careful survey of building progress and development in the Hawaiian Islands, during recent years, and a number of trips to look over the ground personally, Mr. Burnett decided some time ago that this territory should be included as an integral part of the Monolith program. Capt. A. Bullock-Webster, who has been associated with the Monolith companies for several years, is now making his headquarters in Honolulu to direct the Monolith activities on the islands.

BERKELEY BUILDERS' EXCHANGE SEEKS ADOPTION OF LICENSE LAWS

To control operations of "fly-by-night" contractors and to facilitate enforcement of the building code and housing act the Berkeley Builders' Exchange is preparing contractors' license ordinance which it will seek to have adopted by the Berkeley City Council. The first draft of the proposed ordinance was read at a recent meeting of the exchange and was favorably received.

The proposed ordinance provides that no construction shall be undertaken by any contractor not licensed by the Bureau of Licenses. The only exceptions are minor repairs costing not to exceed \$50 and owners "erecting single family or duplex dwellings for his own occupancy in whole or in part" may build such structures without retaining a licensed contractor.

Contractors now operating in Berkeley, under the terms of the proposed ordinance, may obtain licenses without examination within 30 days after the ordinance becomes effective. However, after that date applications for licenses must be made to the Board of Examiners, and applicants must post a bond as a guarantee that applicant will perform and complete his contracts in accordance with laws and ordinances pertaining thereto, and to indemnify the city on account of any violation of the building code, and to indemnify any person suffering damage by reason of any violation of the building code. It is provided that any person damaged by such a violation may sue and recover on this bond in his own name.

Licenses will be granted to four classes of work as follows:

Class A. Building contractors engaged in constructing, reconstructing, altering or repairing structures of unlimited class or value of a public nature including theatres and lodge rooms, with a seating capacity of 100 persons; office buildings of 4 stories; hotels; apartment building containing 12 apartments or more; or any buildings of a public nature seating 100 persons or more such as schools, churches, grandstands, etc. For this class a penal bond in the sum of \$10,000 is required.

Class B. Building contractors engaged in constructing, reconstructing, altering or repairing buildings of any unlimited class or value, except public buildings as described in Class A. A penal bond in the sum of \$5000 is required.

Class C. Building contractors engaged in constructing, reconstructing, altering or repairing structures costing not to exceed \$15,000, except buildings of a public nature as described in Class A. A penal bond in the sum of \$2500 is required.

Class D. Building contractors engaged in constructing, reconstructing, altering or repairing structures not to exceed \$5,000. A penal bond of \$1000 required.

After the 30 day period of grace, licenses will be issued only in the class or classes recommended by the Board of Examiners.

In case a licensed contractor wishes to have his license transferred from one class to another, or for a license in an additional classification, he will not be granted the license until the Board of Examiners certify he is qualified for that particular work.

Board of Examiners

The Board of Examiners, as provided by the ordinance, is well balanced. The board shall consist of five members—a registered architect, a registered structural engineer, two building contractors, each of whom have had at least five years' experience in the city of Berkeley, and one building owner. Members will serve without pay and shall hold office for one year. The inspector of Buildings would act as secretary of the board.

Members are appointed by the council.

Before building permits are issued, it must be established by the owner that the work will be handled by a contractor whose name appears on the list of licensed contractors to be furnished to the building inspector by the Bureau of Licenses. Such a provision is the essence of the ordinance.

In the way of punishment for violations the proposed ordinance provides that "the Inspector of Buildings . . . shall suspend any license issued . . . and stop all work for the wilful violation on any building law or ordinance or for gross incompetency."

Upon conviction it also provides for a fine of not less than \$10 nor more than \$500 or for imprisonment for not less than 10 days nor more than six months, or both fine and imprisonment.

Another section provides that:

"The inspector of buildings may file a report of his action in suspending any such license with the council, stating his reasons therefor, and apply for revocation of the license of any such licensee. A copy of such report and application shall be served upon the licensee and he shall be notified of the time and place of hearing. At such hearing the council may revoke any such license, refer to the board for recommendation or impose any terms upon its continuation which it may deem advisable. In the event of revocation there shall be returned to the licensee an amount of money equal to the unexpired term of the license and any permit or permits issued by the Bureau of Buildings to said licensee shall be cancelled. No license issued under this ordinance shall be suspended or revoked on account of faulty plans and specifications which may have been issued or approved by the Bureau of Buildings."

It is provided that any building contractor refused certification by the Board of Examiners may appeal to the city council. The council has the power to affirm, overrule or modify the Board of Examiners. It is also provided that "any persons aggrieved by the inspector of buildings" may appeal to the city council for relief.

The Berkeley exchange is continuing a study of the proposed law and another meeting will be held in the near future at which further discussion may be held. It was the general consensus of opinion that violations of the building codes of large cities are easily covered up by builders who desire to "skin the job," it being economically impossible for a city building department to employ enough building inspectors to actually prevent violations. The proposed ordinance would give the city power to take away from fraudulent contractors the right to do business.

The proposed ordinance is designed to relieve the building industry of the depredations of the "fly-by-night" and "irresponsible" builder, to give owners a more substantial safeguard than is now afforded them, and to facilitate enforcement by the building inspector of the building laws and ordinances.

THE PRICE CUTTER

There is only one way to make money in the construction business. That way is sell construction service at a profit. The fact that there are contractors today who are making a profit proves that knowledge and self-restraint are not without their rewards. It takes courage to resist the temptation to shade a nickel or a dime on the job that is slipping away. Nevertheless there are contractors who have displayed that courage year in and year out. True, they may not be flooded with jobs, but on the other hand, they are not drowned in red ink.

EMPLOYMENT SERVICE ENGINEERING SOCIETIES

Further information regarding positions listed in this column is obtainable from Newton D. Cook, Room 715, 57 Post Street, San Francisco, (Phone Sutter 1684).

R-1647-S ESTIMATOR AND DETAILER of reinforcing steel. Must have both inside and outside experience and be able to do rapid work. Salary open. Location, San Francisco.

R-1666-S STRUCTURAL ENGINEER, 32-35, pref. technical grad. with good record of experience on structural steel work for sales promotion to architects and contractors. Sales experience preferred, but not required. Salary open. Apply by letter. Location, San Francisco.

R-1681-S SALES ENGINEER, young man with knowledge of reinforced concrete construction and acquaintance with local contractors. Permanent opportunity. Salary open. Location, San Francisco.

K-66-X-4918-C-S WOODWORKING ENGINEER, graduate with several years' experience in manufacture of furniture thoroughly familiar with designing plant layouts and wood-working machinery. Should have general knowledge of manufacturing costs. Apply by letter, giving age, and details of education and experience. Location, Middlewest.

K-61-X-4809-C-S CIVIL ENGINEER, to teach steel and reinforced concrete design. May also give some graduate courses in structural engineering. Term 10 months. Apply by letter. Location, South.

R-1654-S SALESMAN, preferably with some training or experience in combustion of fuels to sell standard lines of oil burner equipment to owners and architects. Commission only. Location, San Mateo County.

R-1660-S JUNIOR ENGINEER, under 25, single, not necessarily college graduate, willing to travel for several years collecting data for insurance maps. Salary to start about \$125 mo. Headquarters, San Francisco.

CORRECTIVE SUGGESTIONS

In speaking before the fourth annual convention of the Iron, Steel and Allied Industries at Del Monte, Calif., in "Steel Points the Way," Frank C. Mortimer, vice-president of the Citizens National Bank and Citizens Trust and Savings Bank of Los Angeles, offered eight corrective suggestions to the conference as a prescription for their business. They were:

1. Continue your research and educational work. Find new uses for steel and inform the public how to apply them.

2. Watch costs more carefully. Reduce overhead and distribution expense where possible.

3. Manufacture or contract in quantities sufficient to supply the requirements of regular customers and such additional quantities as can be sold at a good profit. Tighten up on execution and enforcement of contracts.

4. Consolidate some plants, if economical to do so. Disregard excess plant capacity, and discontinue unprofitable volume.

5. Maintain sales volume in proper relation to demand.

6. Put a price on products that will permit a continuance of good wages to employees and good returns to stockholders.

7. Take or follow the lead in further and more effective moves for closer cooperation and better understandings in the industry.

8. Earnestly and sincerely adhere to your present code of ethics, or to such revised practices as may be decided upon for the betterment of conditions.

THE OBSERVER

What He Hears
and Sees
On His Rounds

Dr. George K. Burgess, director of the United States Bureau of Standards, recently complimented brick manufacturers on the comprehensive study that is being made of the scientific phases of their product. The tests so far show that the average brick wall has been capable of bearing two or three times the weight usually calculated, and that danger from freezing or absorption of moisture is practically negligible. Brick loses far less heat than ordinarily estimated and is the best material for fire resistance. The Common Brick Manufacturers' Association points out in this connection that in 1749, Thomas Penn, son of William Penn, imposed as a requirement in an auction that all houses built on the land in question must be of either brick or stone; no frame houses would be allowed on account of fire hazard. The land auctioned was in Reading, Pa., where, the association says, brick homes are still unusually popular.

Most contractors get as much of a kick out of attending a letting as a farmer does in going to a sale, but there's a difference. The farmer's traveling expenses amounts to about fifteen cents worth of gasoline and he gets his crackers, cheese and cider free at the sale. If he doesn't happen to pick up a Jersey cow dirt cheap, he isn't much out but his time anyway. The contractor bidding on work has railroad fare, auto hire and hotel bill and has to buy his own cider, or whatever liquid refreshment appeases his palate. No matter how much he enjoys the social side of the letting, expenses are there just the same. The cost of bidding is a legitimate item of the expense of running a contractor's business and should be included as a part of the overhead when figuring the cost of a job.

Architects planning apartment houses in Portland, Ore., in the future may provide for automobile storage in such buildings if not more than eight autos are to be stored in any one unit and providing a one-way standard sprinkling system is installed, according to a ruling made recently by the Board of Appeals in conference at the Portland City Hall. H. E. Plummer, inspector of buildings, also said that since the board of appeals has gone on record relative to such storage in apartment houses, which ruling holds true, he said, with similar storage of cars in hotel basements and sub-basements, he would draft an amendment to the building code covering this situation and would submit this draft to the board at an early date.

Senate Bill 4186, by Mr. Copeland of New York, proposes to regulate the use of spray painting compressed air machines. In speaking of this bill, the Service Bulletin of the National Association of Builders' Exchanges, says: This Bill if passed, would be most detrimental to various elements of the building industry, and you are urged to get in back of your representative by wire or letter, and tell him that your Association does not favor this Bill, and if he would please his many friends in your organization, he will vigorously oppose the Bill when it comes up for hearing. This Bill, like all bills of similar nature offered in Congress, may not be finally considered at this session, but it will be vigorously pushed by its sponsors at the next session—and it always finds an early echo in your state legislature—watch for it in your 1928 or 1929 sessions.

The 4.1-mile irrigation tunnel of the Nevada Irrigation District connecting the waters of the Middle Yuba river with the South Yuba has been successfully holed through. The tunnel is 9 by 9 ft., in section and 21,652-ft. long. The cost is placed at approximately \$1,500,000.

Awal Specialties, Inc., 109 Lafayette St., New York, N. Y., manufacturers of attractive new reflection signs which are illuminated by a process of reflected light and require no lighting attachment of any description, which to appoint sole selling agents in this territory.

Initiative petitions for the proposed \$40,000,000 bond issue to finance construction of the projected "California Fast Highway" from Tracy to Los Angeles will be circulated at once. The proposed road will be a two-way highway, thirty feet wide on each side, with ample space between the two roads. Will be about 400 miles in length, of which 250 miles will be straight roadway.

An investigation to determine how much labor and material enters into buildings of all classes is sought by the United States Bureau of Labor Statistics. This inquiry has started in Washington and will be extended to other cities. Cincinnati and Decatur have already been selected.

Brick shipments during March of the current year were greater than those in the preceding month and the same month last year. Orders on the books April 1, 1928, were about nine per cent higher than on March 1, but were considerably lower than a year ago. Stocks of burned brick were smaller than a month and a year ago and unburned brick stocks on hand were only slightly larger.

Numerous cases are being brought to the State Real Estate Department almost daily where persons have accepted employment which was offered not on a bona fide basis but as a flimsy inducement to get them to buy property, according to Stephen Barnson, Real Estate Commissioner, who has issued a general warning for the avoidance of these arrangements.

Cement production and shipments both increased during April, compared with March, 1928, but a decrease from April, 1927, totals were shown. Stocks on hand at the end of April were about 1 per cent larger than a month ago and about 16 per cent ahead of last year. There has been more cement produced in 1928 than during the first four months of last year and shipments during the same period have been lower in 1928.

Enrique Farre, P. O. Box 2738, Manila, P. I., an established building contractor, accepting the construction of bridges, aqueducts, tunnels, concrete and wooden frame buildings, is anxious to secure prices and catalogs on second-hand construction machinery (commercial tracks and cars, portable hoisting machines, cranes, derricks, dredges, portable excavators, wheelbarrows, concrete mixers, shovels, steel cables, chains, compressed air drills, riveters, pumps, etc.) Also on construction materials, such as: Portland cement, bricks, reinforcing steel bars, tiles, galvanized iron sheets, plumbing materials, electrical materials and supplies, galvanized wire, wire fencing, zinc sheets for roofing. He prefers quotations to be c.i.f. Manila, P. I.

Revenue from the electrical department has been sufficient to pay all cost of the Modesto Irrigation District in the construction of the new transmission line and the new Don Pedro dam units and as a result the \$236,000 issue of bonds voted to install the new units, will not be sold at this time. This became known following the submission of a progress report to the district directors by B. W. Creim, electrical engineer. In accepting Creim's report, the board adopted a resolution expressing satisfaction with his work and co-operation. Only about \$60,000 will be required to complete the installation of the units and the erection of the direct transmission line from Don Pedro to Modesto, Creim reported, and this amount will be paid out of revenue. A total of about \$324,000 already has been provided out of the electrical department's revenue for construction work on the line and on the units.

To aid needy engineering students the engineering council at the University of California has tendered a gift of \$300 to the university regents. This sum, which represents the profits from the annual Engineers' Day, held on the campus last April, is to be used as a nucleus for a loan fund for fellow students who find themselves in financial straits. "We feel that there is a need for such a fund available specifically to engineering students, who, because of the long hours of study required in the engineering colleges, are less able to carry on outside work than most of the other students in the university," declared members of the council in making the gift.

Specifications and prices for a new patented paving process have been filed with the Oakland city council, marking the entry of a new pavement in the East Bay field. The patented process is called "Curcrete" and consists of a method of curing concrete pavements. The cost of the preparation is 38 cents a gallon delivered on the job. The holder of the patent is given as O. G. Hopkins of 521 California St., San Francisco.

Sixty-seven localities in the State are in need of laborers, according to a survey just completed by the research department of the San Francisco Community Chest for the employment section of the organization. Thirty-six of the districts need men to handle seasonal crops. Of the other sections reporting need of laborers twenty-five are in Northern and six in Southern California. This information has been placed at the disposal of agencies endeavoring to solve permanently the problem of unemployment.

Five men have been named by Mayor Baker of Portland, Ore., to compose the board to examine contractors for licensing and bonding under provisions of the new city ordinance on that line which is to become effective July 1. Those named are Harrison A. Whitney, architect; A. H. T. Williams, engineer; Carl Stebinger and A. J. Matot, contractors, and John B. Yeon, building owner. The ordinance requires that each member of the examining board shall have had 10 years' experience in the line of business he follows. All the appointees of the mayor have had many years more than ten in their chosen professions.

While Boston wage agreements expired April 1, and no new agreements have been reached, negotiations are still under way without any strikes having been called. Conferences are being held in an attempt to devise a plan for the arbitration of local jurisdictional disputes.

Pacific Lumber Company of Scotia, Humboldt County, has been granted permission by the State Department of Public Works, Division of Water Rights, to appropriate water from the Eel River in connection with a \$3,000,000 construction program which includes the construction of a 150-ton pulp and paper mill.

Projects in which electrical apparatus will hold an important place show marked activity throughout the country and the outlook for business in the summer months is encouraging, says Electrical World. Inquiries for heavy equipment from industrials are numerous and much electric railway business is in sight. Sales of electric refrigerators are gaining, especially in the East and South

San Mateo County Supervisors have approved the formation of a countywide planning commission, after presentation of the need for such an organization by Fred H. Drake, president of the San Mateo County Chamber of Commerce. June 4th is the date set for appointment of commissioners. The commission will make a special study of the proposed organization of a water utility district by San Francisco, which will provide cheap water from Hetch Hetchy to residents of San Mateo county and northern Santa Clara county.

Major R. Y. Stuart, chief of the Forest Service, Department of Agriculture, has been appointed vice-chairman of the National Committee on Wood Utilization of the Department of Commerce by Secretary Hoover. Major Stuart succeeds Colonel Wm. B. Greeley, who recently resigned from both posts to take the secretary-managership of the West Coast Lumber Manufacturers' Association. Colonel Greeley, however, will not be lost to the Committee, for he will retain his membership and will continue to take an active interest in the Committee's program.

In response to inquiries from the Los Angeles City Board of Education, County Counsel Mattoon has submitted an opinion that it is not necessary for the board to secure bids from architects for preparation of plans and specifications for school buildings or to hold any form of architectural competition. Such work is a type of professional service and the provisions of Sec. 1612, Political Code, referring to advertising for bids do not apply to it. The county counsel also reported there has been no change in the laws which would prevent payment of architects' fees from the "special fund."

The eighth annual building permit survey by the U. S. Department of Labor, Bureau of Labor Statistics, appears in the May, 1928, issue of the Monthly Labor Review. The survey discloses the fact of a decrease of 13.9 per cent in the number of new buildings for which permits were issued in 1927 as compared with 1926, the decrease in both the number and cost of residential buildings being greater than the decrease in nonresidential buildings. The trend toward apartment-house living continued during 1927. Of the total families provided for by new dwellings, 48.3 per cent were provided for in multi-family dwellings as compared with 45.4 per cent in 1926 and 24.4 per cent in 1921. The percentage provided for by one-family dwellings was 58.3 in 1921 but decreased to 40.7 in 1926 and to 38.3 in 1927.

TRADE NOTES

Cecil Hockinson and George Purtle will operate from 148 Laguna St., San Francisco, under the firm name of Standard Plastering Company.

Schramm, Inc., has opened a new branch office at 75 Fremont St., San Francisco, to facilitate the Pacific Coast handling of Schramm compressors.

Artistic Lighting Equipment Association will hold a nation wide exposition June 11-16 in the Hotel Sherman, Chicago, Ill.

Mitsui & Co. of Seattle will transport 13,500,000 feet of lumber and logs besides consignment of steel to the far east this month.

Truscon Steel Company, Youngstown, Ohio, has purchased the Hydraulic Pressed Steel Company of Cleveland and will operate it as its pressed steel division.

Rolando Lumber Company of San Francisco, capitalized for \$200,000, has been incorporated. Directors are: Jos. Rolando, F. W. Matthal, R. J. Gehring, Lillian Rolando and C. J. McDonnell.

According to word from Hollister, the plant of the Old Mission Portland Cement Co. at San Juan will resume operations at once and work on an extension of the quarry railway will be started shortly.

H. W., W. E. and V. L. Cullum and Wilfred E. Bell, all of Challenge, Yuba County, Calif., will operate from that point under the firm name of Cullum Mill and Lumber Company.

Cyclone Fence Co. of Waukegan, Ill., has taken over the stock and equipment of the Northwest Fence & Wire Works at East 11th and Flanders Sts., Portland, Ore. The name of the firm, however, will remain and S. H. Palmer will continue as manager. The purchase is in line with the policy of the Cyclone Fence Co. to manufacture more of their products on the Pacific Coast.

The new open hearth furnace at the Columbia Steel Corporation's plant at Pittsburg, Contra Costa County, is to be placed in operation within ten days. The first fires will probably be lighted today. Installation will increase the plant's capacity and provide employment for additional workers, according to officials.

Western Metal Products Company, formerly located at 367 Ninth Street, is occupying larger quarters at 1160 Bryant Street, San Francisco. The company specializes in metal furniture construction manufactured in the San Francisco plant. Products manufactured include steel counters, cages and screens, partitions, omnibuses, vault interiors, shelving, tables, galley cabinets, etc. In marketing their products the company applies the motto—"What California Makes, Makes California," calling attention to the fact that the goods are made at home.

Need for larger office quarters and a more centralized location prompted the moving of the Western Lime and Cement Company and Holmes Lime and Cement Company, from 2 Pine street to the Rialto Building, San Francisco, according to Wm. J. Feary, general manager of the companies. Both concerns are now operating from the new location within one-half block of the Builders' Exchange.

ALONG THE LINE

Chas. J. Colley, veteran San Francisco architect, passed away May 20, at the age of 79 years.

A. F. Harlow, 83, pioneer building contractor of Santa Clara, died in that city May 24. A widow and one son survive.

Swartz and Ryland (Fred L. Swartz and C. J. Ryland), architects and engineers, formerly occupying quarters in the Rowell Building, have moved to larger quarters at Rooms 530-523 Brix Building, Fresno.

Jesse B. Holly, for the past two years city engineer of San Leandro, has submitted his resignation to the city trustees due to the fact that the city has adopted the city manager form of government.

Chas. W. Meehan, 67, for the last fourteen years City Superintendent of Public Buildings for San Francisco, died at his home 816 Scott street, May 28. He had been ill several weeks. He retired from city service several months ago. A widow, two sons and two daughters survive.

Harry Lyons, San Mateo building contractor, is named defendant in a \$50,000 suit filed in the Superior Court at Redwood City by four orphaned children surviving Herman T. Holsher, 43, killed by the defendant's automobile in Beresford last May.

Irving F. Morrow, San Francisco architect, will conduct a course of lectures on "The Understanding of Architecture" for the Extension Division of the University of California. The course is planned for persons interested in art, but without architectural training. It will be given in San Francisco beginning about September 15.

Drury Butler, Sacramento county surveyor, whose statutory salary of \$200 a month was cut to \$10 a month by the county commissioners, has secured from the third district appellate court an alternative writ of mandate against L. P. Williams, county auditor. Williams must appear before the appellate court June 25 to show cause why he should not be required to pay Butler \$3200 alleged to be due the surveyor for unpaid salary between January 3, 1927, and May 2, 1928.

Dr. Perry Byerly "earthquake specialist" of the University of California, will leave Berkeley June 9 on a year's leave of absence to travel and study the science of temblors in Europe under a John Simon Guggenheim fellowship. Dr. Byerly, who holds the official title of assistant professor of seismology, will first visit Cambridge University, England, where he will study mathematical geophysics in order to apply data obtained in California to problems of the earth's structure. Later he will conduct further research at the University of Frankfurt, Germany.

John E. T. Yewdall Co., 401 Beckins Bldg., Vancouver, B. C., established manufacturers' representatives, desire to get in touch with firms who are seeking to expand their markets and who would be willing to appoint them as representatives in British Columbia for the sale of their products to the wholesale and retail trade. The lines in which they are particularly interested are: builders hardware, wrought iron hardware, tools of all kinds, roller skates, sporting goods, bathroom fixtures, plumbers' brass goods, toilet seats, electrical household goods and specialties.

ALLIED CONSTRUCTION INDUSTRIES COMMITTEE ORGANIZED AT RECENT MEET

Striving to correct improper practices and to stabilize credit conditions in the building construction industry, representative sub-contractors and general contractors have joined in the Allied Construction Industries Committee, a new body recently formed at a meeting in Washington, D. C.

Formal organization of the committee followed a series of preliminary conferences held at West Baden, Ind.; Cleveland, and Chicago, under the auspices of the Associated General Contractors of America.

Members of the committee, representing thirteen national associations, are to meet at Detroit next month to advance the work already accomplished and to give a yet more definite form to the program for future activities.

The organization includes members of the executive committee of the Associated General Contractors of America and two representatives of each of the following trade organizations: United Roofing Contractors of America; National Association of Sheet Metal Contractors, Elevator Manufacturers' Association, Heating and Piping Contractors' National Association, International Association of Master Painters and Decorators of America, National Association of Building Trades Employers, Association of Electricians, National Association of Master Plumbers, International Cut Stone Contractors and Quarrymen's Association, National Association of Marble Dealers, Contracting Plasterers' International Association and Tile and Metal Contractors Association of America.

George B. Walbridge, Detroit, former president of the Associated General Contractors of America, and chairman of the committee, presided at the organization meeting, and submitted a report of that session to the full conference.

In addressing the conference, Mr. Walbridge declared "Hundreds of concerns operating in the constructing industry are in a state of perpetual insolvency. They secure materials and equipment un-

der loose credits, reaping their profits by failure to pay their bills and by using inferior materials and workmanship."

Foremost among the measures to be given consideration at the Detroit meeting next month will be formulation of rules of ethical practices to Government relationships between owners, architects, engineers, general contractors, subcontractors, material dealers, and equipment manufacturers. Establishment of a rational credit system also will be undertaken as a primary move.

The Washington meeting, held coincidentally with the sessions of the Building Division of the Associated General Contractors of America, saw broad review given to efforts already made by national associations and by local groups to rectify conditions under which subcontractors and general contractors have for many years been forced to operate.

"The movement to prevent internal affairs of the construction industry from becoming even more chaotic than they now are is not a new one," declared D. A. Garber, veteran New York builder, who was the first president of the contractors' national organization and who now is general manager of the body, with headquarters at Washington.

"Formation of the committee brings sub-contractors and general contractors into close contact for the first time in an effort holding discernable chances of enjoying success," he continued. "This effort has been viewed for at least five years by leaders of various elements of the industry as being absolutely necessary for the protection of the public and of responsible men in the industry against the invasions of 'fly-by-night' operators.

"Within recent months, sub-contractors and general contractors, sitting side by side at council tables, have been devoting intensive thought to their problems. The developments at the Washington meeting indicate the results already obtained as well as those that may be expected in the future."

Religious Problem

"The Mexican people as a whole are very religious and it was distressing to us to see the churches unoccupied by any priests. Since the government edict that no foreign priests could live in Mexico and no Mexican priest could officiate without first registering with the government, which is not permitted by the Pope, Mexico has been without an functioning priesthood. However, in great many of the churches services are conducted by laymen in the nave of the church. At Guadalupe, where the most celebrated church in Mexico is found, we attended a service one Sunday morning. The service was conducted by a woman, and the church was crowded to the doors with Indians kneeling on the stone floors, holding candles, and making the responses as they would in an ordinary service. When one considers how important it is to Mexican Roman Catholic that he receive communion and absolution before he dies, that he be baptized and married by a priest, and all the other religious ceremonies that are necessary for his salvation, it is with a great deal of pity that one considers the privation this law has caused.

"As there are no saving banks in Mexico the chief depository for one's money is in the family stocking. This is perhaps one of the chief contributory reasons for the universal use of the lottery. One has not the incentive to store large amounts of money where it may be so easily stolen. This may also account to some extent for the Indians not being interested in work after they have acquired sufficient funds for their immediate future.

Approve Ambassador

"Ambassador Morrow is meeting with approbation everywhere in Mexico, and both Americans in Mexico and the Mexicans themselves are very pleased with the way he is handling affairs.

"Only 30 per cent of the assets of Mexico are owned by nationals of Mexico and over 40 per cent of the assets are owned by citizens of the United States, and the balance by citizens of Great Britain, France, and Germany. Most of these foreign owners live outside of Mexico and practically none of them has any interest in Mexico outside of their desire to make their investments as profitable as possible. This condition naturally does not make for the greatest prosperity of Mexico. One feels instinctively the tremendous richness of the country which if modern methods of irrigation and agriculture were used would be extraordinarily productive. One sees the wooden plow drawn by oxen in many of the farm distant from the larger cities, and irrigation is carried on by means of bucketing the water from the nearest stream by human labor.

Aztec Ruins

"Archaeological activities to date have not been conducted with any great vigor and the remains of the Aztec civilization and previous civilizations which were so ruthlessly destroyed by the early Spaniards have not been investigated to any very great extent. It is possible for the traveler to find without any great exertion many relics of the Aztec civilization in the plowed fields near the pyramids and other monuments, although it is necessary to obtain a permit from the Mexican government to take these out of the country.

"We had the honor of traveling with General Obregon, who will undoubtedly be the next president of Mexico, from Mexico City to Chihuahua. The train was very well guarded with about 500 armed soldiers and cavalry so that we felt entirely safe during the journey."

W. H. RATCLIFF, BERKELEY ARCHITECT, DESCRIBES HIS RECENT TRIP TO MEXICO

"Mexico has so many picturesque architectural monuments left by the Spaniards and is so beautiful that it is well worth a visit," said W. H. Ratcliff, Berkeley architect, who, with Mrs. Ratcliff, has just returned from a three weeks' visit in this neighboring country. Ratcliff studied the architectural work of the Mexicans with especial interest in Mexico City, Guanajuato and Chihuahua.

He said that Mexico is so primitive and so different from this country that aside from its art value, it interests because of its novelty. "Immediately you cross the Rio Grande you feel yourself to be in a foreign country," he continued. "The railroad train, with its steel armored coach and its 50 armed soldiers who always accompany each train, together with their horses to be used against bandits that might attack the train, takes you back to the very early days of this country."

In an interesting narration of the events of the trip, Ratcliff said:

"My wife and I were the only Americans on the train, although there were perhaps 200 Mexicans in the second class and perhaps 10 Mexicans in the pullman. The American travel in Mexico has been very limited since the exodus in 1912.

Education Lack

"In contrast with the United States, of the 15,000,000 population living in Mex-

ico probably 90 per cent live in the country where there are very meager facilities for education of any kind. As the train stopped at the many small villages the entire population swarmed out to meet the train in their picturesque serapes and sombreros, with bare legs and no shoes, to sell us tortillas and various other strange and unpalatable messes. They would often bring a pig with a string attached to its leg so that it might eat up any refuse that was thrown from the train.

"In the larger cities such as Guanajuato where we first stopped, much of the primitive appearance disappears although they still have the horse-drawn cab and horse-drawn street car, and the buildings are of more or less the same construction as those built by the early Spaniards. It is interesting to see the foodstuffs spread upon the curb exposed to dirt and flies but nevertheless purchased by both Mexicans and foreigners alike. One of these booths interested us perhaps more than any other. It was a native drug store in which you could find cures for all ills. There were several dead birds partly decayed, pigs' hoofs, and other gruesome objects which could be purchased to cure I know not what diseases, together with drugs of less offensive nature, such as the native herbs.

MOOSER, SAN FRANCISCO ARCHITECT, SUES FOR FEE ON COURTHOUSE PROJECT

Wm. Mosser, San Francisco architect, has started suit against Albert T. Eaves, county auditor of Santa Barbara county, for \$16,511.69, alleged to be due as part of his commission on the Santa Barbara county courthouse.

As soon as the suit was filed, Superior Judge S. E. Crow signed an alternate writ of mandate, ordering the auditor to pay the claims or appear in court at 10 A. M. on May 28 to show cause why he should not do so.

The suit sets forth that Mr. Mosser was hired by the board of supervisors on July 9, 1925, to design the new courthouse for a fee of 6 per cent. That on January 4, 1926, a supplementary contract was entered into, allowing an additional 4 per cent for supervision of construction.

When the first claims came into his office for supervision, Mr. Eaves with-

held payment, and District Attorney Clarence C. Ward held they were improper charges.

The board of supervisors, however, continued to approve the claims and the auditor continued to hold them up, while Mr. Mosser conferred with his attorneys. Chas. A. Adams, San Francisco lawyer and member of the state board of education, filed the suit.

Eighteen separate unapproved claims are attached to the complaint as exhibits. They are for the following amounts: \$1780.45, \$254.10, \$2105.19, \$212.10, \$1424.98, \$1393.75, \$2360.92, \$273.20, \$512.90, \$518.09, \$1320.04, \$2003.25, \$5522.48, \$1197.50, \$361.96, \$169.40, \$141.40, \$949.98.

Mr. Mosser declares that these claims represent not only unpaid commissions under the contract for 4 per cent, but also some of the money due him under the original contract.

SPECIAL HIGHWAY FUND FOR ELEVEN WESTERN STATES PASSED

Passage by the Senate and House of the Public Land Bill, providing \$3,500,000 a year for each of the fiscal years of 1929, 1930 and 1931, as a special highway fund for Federal-aid in eleven western states is announced by the American Motorists Association, which, with other motorist organizations, has supported the measure, which now goes to the President for his signature.

Purpose of the special fund, created by the measure, is to permit the construction of the gaps in the Federal-aid highway program which lie within those states largely owned by the Federal government and which under the Federal-aid program could not be completed for lack of funds, due to the inability of the states to match dollar for dollar the Federal government's appropriations.

In the state of Nevada, as an example, it is pointed out that 90 per cent of the entire domain is owned by the Federal government. In that state there are 1,398 miles of federal-aid highways which can be improved with this special fund and which will ultimately mean the link-

ing up of the entire 186,000 miles of Federal approved highway system of the United States. The money is to be apportioned to each of the eleven states in the same ratio as the Federal-aid \$75,000,000 annually appropriated. The measure does not limit the cost per mile which is done under the regular annual Federal-aid appropriation.

"Passage of the measure will mean much to the states and Federal government's highway construction programs and will meet with the unanimous approval of the millions of motorists of the country," J. Borton Weeks, President of the motoring organization, declares. "It will mean the linking up of the East with the West with a continuous highway, thus permitting comfortable, clean and more economical travel from coast to coast."

The states which will benefit under the measure and the Federal-aid highway mileage in each state, are as follows: Nevada, 1,398; Colorado, 3,332; Wyoming, 3,097; Arizona, 1,498; New Mexico, 3,298; Idaho, 2,770; Montana, 4,665; Washington, 2,927; Oregon, 2,840; Utah, 1,677 and California, 4,771 miles.

SURETY COMPANY ADVISES OWNER TO HIRE FIRST CLASS ARCHITECT

Coming out flatfooted on the proposition that the hiring of a good architect and engineer if necessary, is the only way to safeguard the owner's interest and make sure that he gets the sort of a structure he is paying for, the National Surety Company of New York, the World's largest surety company, has advised all its agents to insert in their local publications an advertisement directed towards the home owners and lenders of money on private construction work.

This attitude publicly taken by great surety company is particularly significant and has been widely commented upon by architects and engineers who have seen this copy, which is in part as follows:

"If you are planning to build any sort of a structure, residence, apartment, hotel, business house, factory building, office building, store,—whether you are building for your own use or for investment,—there is nothing more important than to be sure that the structure will be completed as specified, within the time allotted and according to your contract.

"Failure to safeguard yourself on this

point may mean financial loss and delay! There are four steps that will absolutely protect you from annoyance and loss:

"1. Hire a good architect and engineer. It is always the best plan to have a good architect on the job. Also an engineer on the larger structures. The fee you pay the architect is the cheapest investment you can possibly make, since a good architect will save you his fee many times over in the construction of the building.

"2. Have complete plans and specifications drawn up covering every possible detail.

"3. Let a general contract to a reputable contractor, thus guaranteeing you that your building will not cost above specified amount.

"4. Secure performance by a corporate surety contract bond. When a great surety company gives its contract bond it means its approval of the contractor and guarantees you against loss through failure of the contractor to perform the contract.

"If you get a good architect and insist that he specify a surety company contract bond, your interests will be safeguarded all the way."

PATENTS

Granted to Californians as reported
by Munn & Co., Patent Attorneys

Paul T. Frentzen, of Berkeley. HOUSE CORNICE. This invention is an improved type of cornice, long strips of sheet metal, mounted on the outer edge of flat roofed houses, preventing the rain water from running off the roof and dripping down the outer side of the walls of the house.

Arthur E. Anakin, of Long Beach. MAGNETIC KEY. This is a highly magnetized key adapted to operate a lock. It is formed of both magnetized and non-magnetic material, so that the key is in reality a U-shaped or horse-shoe magnet.

Milo A. Baker, of Los Angeles. ELEVATOR. This improved elevator automatically brings the elevator platform to a stop level with a landing, minimizing accompanying vibrations considerably.

Frank Sumner Bunker, of Long Beach. SELF-LOCKING DEVICE FOR COUPLINGS. This provides a secure locking device for pipes and rods, yet permits uncoupling by the use of a suitable key or tool.

John A. Fourney, of Oakland. ELECTRIC EXTENSION PLUG. This plug is quickly connected and disconnected, yet being held firmly in the electric fixture socket even in the case of considerable vibration and rough handling.

Roy S. Cunningham, of Los Angeles. PISTON RING. This invention relates to piston rings used in connection with internal combustion engine pistons, providing an even contact with the cylinder walls and sealing the engine completely by itself, without the help of the usual number of rings spaced upon the piston.

LOS ANGELES ORDINANCE REVISION TO COVER CLASSIFICATION OF BUILDINGS

Classification of buildings will be the first subject considered by the Building and Safety Commission of Los Angeles in its hearing on revision and codification of the city building ordinances, it is indicated by Ralph E. Homann, president of the Los Angeles Builders' Exchange. The first hearing is set for June 6, at 7 p. m., at the exchange headquarters. Concerning classification, Mr. Homann says:

"Building laws are intended to provide for:

"1. The endurance of the structure.
"2. The safety of its occupants and contents.

"3. Desirability to neighbors.
"Among those concerned in any given structure are: (1) owner, (2) encumbrancer, (3) insurer, (4) occupant, (5) visitors, (6) neighbors, (7) the community.

"Custom seems to have classified structures largely with reference to fire, without giving consideration to other important factors: i. e., zoning has recently come to participate, animal life is spasmodically spoken of, appearance always plays a subtle part. Because of lack of ample classification call has often been made upon some law not truly applicable.

"Some of the hazards that confront a structure are: (1) Fire, with its water; (2) earthquake; (3) wind; (4) rain, snow, hail, moisture, heat and cold; (5) flood; (6) animal life, fungus, dry-rot and crystallization; (7) use; (8) obsolescence.

"Taking into consideration all the purposes, all the parties in interest and all the hazards to be met, the classification of any structure permitted should be influenced by its (1) use, (2) location, (3) permanency, (4) justifiable cost, (5) necessity.

HERE — THERE — EVERYWHERE

A plumbing ordinance agreed upon by building inspectors and attorneys, representing all cities of San Mateo county, as a uniform code for adoption has been given final passage by the San Mateo city council. Passage of the ordinance follows several months of study and makes San Mateo the first city in the county to adopt the law, sponsored by the Journeymen Plumbers' Union. Other cities are to follow, according to agreements already entered into at conferences among city officials.

Contra Costa County Builders' Exchange with headquarters at Richmond, has nominated the following for the office of director, seven to be elected at the annual election and seventeenth anniversary of the exchange to be held in the near future: E. H. Higgins, H. J. Capion, A. Nelson, R. J. Eakie, Carl Overaa, P. M. Sanford; R. W. Timmons, Herbert Baker, George Edwards, A. P. Hill, Russel J. Meyer, F. A. Mero, James Walker, E. B. Bull, C. E. Marshall, Ira R. Vaughn, B. L. Spurr, Grant Miner Jr., Fred C. Hosking, Thomas P. Bolger, R. H. Spiersch, Chris Theis, Walter D. Rihn, Charles H. Washabaugh.

The Certified Architects' Association of Beverly Hills is the name of a new organization with W. Asa Hudson, president, and Roy Seldon Price, secretary. Other members enrolled are: Robt. M. Farrington, R. C. Flewelling, P. P. Lewis, H. C. McAfee, I. L. Osgood, J. P. Pedersen, H. H. Whiteley, W. J. Todd, H. L. Booth, E. S. Somers and G. C. McAlister.

Harry M. Hart of the L. H. Prentice Co., Chicago, and President of the Heating and Piping National Association made a spirited talk before the convention of the New York State Association of Heating Contractors at Buffalo, N. Y. He spoke upon co-operation in the heating industry. Among other things he told how certified heat had developed in Chicago and while in its infancy, approximately \$20,000 a year is being spent in collective advertising. He pointed out that competition today is between industries and that our selling efforts must be directed against the auto salesman and not against our fellow heating contractors who are really helping by advocating heating. Real merchandising, selling of jobs, is what is needed in our industry.

Approximately 800 graduates of the apprentice courses in the building trades in New York City took part in the recent graduation exercises. All of the students completed a four year course in one of the building trades.

Structural iron workers in Washington, D. C., have withdrawn the demand that wages be increased from \$1.50 per hour to \$1.75 beginning May 1, and that the 5-day week be inaugurated.

Sheet metal workers of Santa Barbara are said to have arranged to inaugurate the 5-day week in that city on June 1. This places all the building trades unions of that city, except the building laborers on that schedule.

Meetings of the board of directors of the Los Angeles Builders' Exchange will hereafter be held once a month in the evening, it is announced, and meetings of the executive committee will be held once a month at noon. The next meeting of the executive committee is set

for June 5 and the next meeting of the board of directors for June 12.

Lumber consumed in the manufacture of motor cars and trucks last year exceeded 1,095,000,000 feet, according to figures compiled by the National Automobile Chamber of Commerce. This represented an increase of about 15,000,000 feet as compared with the lumber used by the industry in 1926.

Southwestern Engineering Corp. of Los Angeles has a contract with the Siskoe Gold Mines, Ltd., of Canada for the construction of an ore-extraction plant to cost \$220,000. The plant is to be of the all-slime cyanide-mill type, powered by a Diesel engine and will have a daily capacity of 100 tons.

A sufficient number of written acceptances having been received from Simplified Practice Recommendation No. 83, Kalamein Single-Acting Swing Doors, Frames and Trim, the Division of Simplified Practice of the Department of Commerce, announces that the project is now in effect, as of April 1, 1932, subject to annual revision or reaffirmation by the industry. This recommendation which has been accepted by manufacturers, architects, contractors, engineers and other users, provides for a simplified list of stock items.

Negotiations are said to be under way by the Pittsburgh Plate Glass Company with the South San Francisco Land and Improvement Company for a factory site in the South San Francisco district. P. J. Shaw of the land company, however, denies any negotiations. An extensive grading project is now in progress in Linden avenue and it is said to be on this site the glass plant will be erected.

Hoeppel and Muller, G.m.b.h., Schadowstr. 2, Dusseldorf, Germany, wholesale importers and dealers in hydraulic jacks and presses, mechanical jacks, hoists and cranes, catering to a vast clientele of railway companies, motor car manufacturers and dealers and various industries (road building, building, shipbuilding, etc.), are interested in taking up the sole agency of American manufacturers of the lines mentioned, as well as specialties in affiliated lines. References furnished.

British Consulate General, 310 Sansome street, San Francisco, represents a firm in the United Kingdom that is desirous of appointing an agent in this district for the sale of fire bricks.

Industrial Homes Corp., of Reno, Nev., has filed articles of incorporation in Oakland. The company is capitalized for \$200,000. Directors are: W. H. Harris, B. M. Burns and L. G. Wilson, all of Reno.

San Francisco Bay District Council of Carpenters has advised the San Francisco board of supervisors that the council is against the daylight saving proposal. In a communication to the supervisors the Council declares itself against the passage of any ordinance specifying at what hours anybody shall go to work. This is said to be the position of the entire labor movement of San Francisco.

POLISH STEEL COMBINE

Formation of a new steel syndicate, in which considerable German money is invested, has centralized the iron and steel industry in Poland. A number of works in Upper Silesia have been combined by the Oberschlesische Eisenbahn Bedarfs A. G. to form a powerful organization employing 12,000 workmen and controlling iron ore and coal mines, foundries, rolling mills, coke ovens, by-product factories and electric power plants.

ENLARGED PROGRAM OF FOREST RESEARCH WILL BE UNDERTAKEN

The McSweeney-McNary bill, which became a law with the approval of the President May 22, represents the most important piece of fundamental forestry legislation enacted since the Clarke-McNary law of 1924, Secretary of Agriculture Jardine declares.

"Forest research," the Secretary said, "has hitherto failed to keep pace with many other forestry activities, notwithstanding the fact that research is the foundation upon which forestry development should be built. A greatly enlarged research program is called for by this situation, and the comprehensive policy of forestry research provided in the new bill will enable the department to co-operate with other agencies in a definite and far-reaching program of investigations which will form the basis for a permanent system of forest production and utilization for the entire Nation."

The new bill establishes and outlines a ten-year program for forest research. A little more than \$1,000,000 is now being expended by the Federal Government each year for this purpose. Under the terms of the McSweeney-McNary bill this amount may be increased each year by about \$250,000 until the maximum annual expenditure of \$3,500,000 is reached. All classes to forest research are contemplated by the bill, including investigations in growing, managing and utilizing timber, forage and other forest products, watershed protection, fire prevention, insects and disease. The various lines of research contemplated will be conducted by several bureaus of the department, including the Forest Service, the Bureau of Plant Industry, the Bureau of Entomology, the Biological Survey, the Weather Bureau, the Bureau of Chemistry and Soils, and the Bureau of Agricultural Economics.

The McSweeney-McNary bill was backed by a widespread, aggressive public interest from all parts of the United States and representing widely diversified groups, including many chambers of commerce and development associations, the lumber and wood-using industries, nature, outdoor and recreation groups and women's clubs.

WASTE AT SAWMILLS MADE INTO FIBRE BOARDS

A new process for the utilization of waste from sawmills has given a new material to the building industry. It is known as "Masonite" and it is the invention of William H. Mason, vice-president of the Mason Fibre Co., Laurel, Miss., where its plant adjoins that of the Wasau Southern Lumber Company.

Briefly, the process, through the use of saturated steam at high pressure and temperature explodes the wood waste and converts it into wood pulp of long fibres encrusted with the original wood lignins. One of its products is given the trade name of "Presdwood." This is an extremely hard and durable board of great tensile strength in which the lignins are made to serve as a binder to weld the fibres in a compact mass. Presdwood is made in 1/4-in. boards for interior paneling and for use in cabinets, store fixtures, etc.

Another product is Masonite structural insulation made in 1/4-in. boards for sound deadening, exterior sheathing, sub-flooring and general insulation. These boards weigh approximately 700 lbs. per 1000 sq. ft. and come in standard width and varying lengths.

Fletcher & Frambes, Rives-Strong Bldg., Los Angeles, are factory representatives of the Masonite Company in Southern California, Arizona, New Mexico and El Paso, Tex., and its products are distributed through local retail lumber dealers in this territory.

Building News Section

APARTMENTS

Bids In—Contract To Be Awarded Shortly.

APARTMENTS Cost, \$100,000
OAKLAND, Alameda Co., Cal. Telegraph Ave. and Fifty-eighth St.
 Three-story frame and stucco apartment building (90 rooms; all modern conveniences).
 Owner—W. R. Harder.
 Architect—Clay N. Burrell, American Bank Bldg., Berkeley.

Sub-Bids Being Taken.

APARTMENTS Cost, \$36,000
BERKELEY, Alameda Co., Cal. Hilgard St. near Arch.
 Two-story frame and stucco apartment building (5 3-room apts.)
 Owner and Builder—Parsons & Schuster, 2339 Hilgard St., Berkeley.
 Architect—Clay N. Burrell, American Bank Bldg., Berkeley.

Working Drawings Being Prepared.

APARTMENTS Cost, \$300,000
SAN FRANCISCO. Area bounded by NW Irving St., 48th Ave. and La Playa St.
 Two six-story and basement steel and brick apartments and two three-story frame and brick veneer apartments.
 Owner—Unit Constr. Co. (J. E. Raymond).
 Architect—Irvine & Ebbets, Call Bldg., San Francisco.
 Bids will be taken in one week.

GLENDAL, Los Angeles Co., Cal.—V. E. Chadwick, 321 Union League Bldg., Los Angeles, preparing working plans for two 3-story and basement class C apartments on Louise St., for Edward Wallace; each building will contain 9 double and 21 single apartments, 55x154 ft., brick construction. Cost \$200,000.

Structural Steel Contract Awarded.

APARTMENTS Cost, \$150,000
SAN FRANCISCO, NE Leavenworth and Greenwich Sts.
 Six-story Class C apartment building (36 apts.)
 Owner and Builder—J. E. Scully, Phelan Bldg., San Francisco.
 Architect—H. C. Baumann, 251 Kearny St., San Francisco.
Structural Steel—McIntyre-Marshall Co., 2050 Bryant St., San Francisco.

Preliminary Plans Being Prepared.

APT. BLDG. Cost, \$40,000
OAKLAND, Alameda Co., Cal., Oxford and Hearst Sts.

Owner—Harry West, Greenville.

Architect—H. C. Baumann, 251 Kearny

St., San Francisco.

PRATT'S

CONCRETE

MIX

Clarence
by Sand
Pratt

SO MANY men.

GO ABOUT the streets.

WITHOUT HATS.

THAT THE hat manufacturers.

AND THE retail hatters.

ARE BEGINNING to worry.

ABOUT THIS new fad.

BUT CLARENCE (Sandy) Pratt, President.

OF THE Pratt Building Material Co.

SAW THE delivery boy.

OF A well-known hat store.

GOING DOWN Market Street.

WITH HIS arms full.

OF HAT boxes.

BUT NO hat.

ON HIS head.

THIS SEEMED to Sandy.

LIKE THE wrong way.

TO DISCOURAGE the hatless man.

WHAT WOULD you think.

IF SANDY Pratt, producer.

OF CLEAN, sharp sand.

AND CLEAN rock and gravel.

AT SACRAMENTO, Marysville.

PRATTROCK (NEAR Folsom).

PRATTCO (MONTEREY County).

AND MAYHEW (Sacramento County).

CENTRAL OFFICE—San Francisco.

CARRIED A couple of bricks.

IN HIS pockets.

AS HE flipped.

FROM STREET to street.

AND CITY to city.

FOR SANDY advocates the use.

OF CONCRETE buildings and highways.

AND CARRIES a few "rocks."

IN HIS pocket.

AND PLENTY of "sand."

IN HIS craw.

SANDY'S SALESMEN cannot.

CARRY A wooden cane.

OR WEAR a wooden leg.

SANDY SELLS rock and sand.

AND NOT lumber.

"I THANK you."

B. A. Sandab and Miss Rock Candy were married on April 1st, 1869, but both have and wore hats. They do not believe in all these new ideas of hatless men and short-skirted women. Miss Rock Candy made all her wedding underclothes of flour sacks, but show Sandy Pratt, producer of sand, rock and gravel at Sacramento, Marysville, Prattrock (near Folsom) Prattco (Monterey County) and Mayhew (Sacramento County), (Central office—San Francisco) the husband or father of 1928, who has the backbone to even suggest underclothes only of a silkish nature.

SEATTLE, Wash.—Architect E. T. Osborn, Leary Bldg., has completed plans for six-story brick and terra cotta hotel to be erected for the Olive Way Improvement Co., McDowall Bldg., in Olive Way; est. cost \$175,000. CRESCENT CITY, Del Norte Co., Cal.—Kiwanis Club and city trustees plan to establish municipal airport at county fair grounds.

Plans Being Prepared, REC. BLDG. Cost, \$40,000—**SALINAS, Monterey Co., Cal.**, Main and Monterey Sts. One and part two story brick recreational bldg. (bowling alley and billiard room). Owner—Syndicate of Los Angeles men. Architect—Mayo & Bissell, 421 E. Miner St., Stockton.

BERKELEY, Alameda Co., Cal.—Until June 5, 10 A. M., separate bids will be received by Emma M. Hann, city clerk, to fur. (1) rock and screenings; (2) sand; (3) sewer pipe; (4) cement; (5) 2600 gals. lubricating oil. All to be delivered to Corporation Yard, Allston Way and West St. Further information obtainable from clerk.

FRESNO, Fresno Co., Cal.—Geo. A. Swartz, operating "The River" resort, 10 miles north of Fresno on the San Joaquin river near the Herndon bridge, will spend \$18,000 for remodeling and additions. Additions will include dance and assembly hall, 80 by 100 ft., costing \$14,000, the remaining \$4,000 to finance alterations and repairs.

SACRAMENTO, Sacramento Co., Cal.—The Pacific Ice Machine Co., 832 Folsom St., San Francisco, at \$2955 was awarded the contract by State Department of Public Works, Division of Architecture, Forum Bldg., Sacramento, for installing a drinking water cooling system at the Sacramento State Building.

BEVERLY HILLS, Cal.—Until 8 P. M., July 3, bids will be rec. by city to const. incinerator in accordance with plans on file at the office of the city clerk, B. J. Firminger; estimated cost \$7,000. The specifications call for a maximum receiving capacity of 4½ tons an hour with a total capacity of 20 tons in 8 hours. Date previously announced for July 19.

SUISUN, Solano Co., Cal.—Arlington Hotel, Hillborn Grain Company office, a home and other structures were destroyed by fire in the Chinatown district May 27; loss 25,000.

STOCKTON, San Joaquin Co., Cal.—Construction has been started on an ice storage and loading platform on the Southern Pacific right-of-way south of Charter Way for the Pacific Fruit Express Co., 65 Market St., San Francisco. Will have storage capacity of 200 tons; platform will be 1000 ft. long equipped with ice handling equipment.

Contemplated, RAILROAD SHELTERS Cost, \$—**EXTFIELD, Marin Co., Cal.** Railroad shelters. Owner—Northwestern Pacific R. R. Co., 64 Pine St., San Francisco. Architect—Fred H. Meyers, 742 Market St., San Francisco.

Plans Being Prepared, DEPOT Cost, \$10,000—**MILL VALLEY, Marin Co., Cal.** One-story frame and stucco passenger and freight depot. Owner—Northwestern Pacific R. R. Co., 64 Pine St., San Francisco. Architect—Fred H. Meyer, 742 Market St., San Francisco.

HEALDSBURG, Sonoma Co., Cal.—Engineering Department, Northwestern Pacific Railroad, 64 Pine St., San Francisco, completing plans for proposed passenger and freight depot to be erected at Healdsburg. The present quarters will be remodeled. Total cost of construction, \$10,000.

BUSINESS OPPORTUNITIES

Hammer Handles
H. B. Hickory Handle Co., Haverhill, Mass., novelty wood workers and manufacturers of handles for tools and implements, would like to appoint a sales representative to sell their handles in this territory on a commission basis.

Reflection Signs
Awal Specialties, Inc., 109 Lafayette St., New York, N. Y., manufacturers of attractive new reflection signs which are illuminated by a process of reflected light and require no lighting attachment of any description, wish to appoint sole selling agents in this territory.

Water Filter
R. W. Hollenberg (Cool Spring Filter, Inc.), 481 Tehama St., San Francisco, manufacturing an unusually efficient drinking water filter, suitable for office and household use, seeks additional agents for various California territories. A few very good cities available for this opportunity.

Seeks Business Proposition
Mr. Geo. G. Hill, Commercial Club, San Francisco, (a Boston business man) with 30 years of successful business experience and some capital, wishes to get in touch with legitimate business proposition on Pacific Coast where his capital and experience will be useful.

Seek Agency
Hoeppe and Muller, G.m.b.H., Schadowstr. 2, Dusseldorf, Germany, wholesale importers and dealers in hydraulic jacks and presses, mechanical jacks, hoists and cranes, catering to a vast clientele of railway companies, motor car manufacturers and dealers, and various industries (road building, building, shipbuilding, etc.), are interested in taking up the sole agency of American manufactures of the lines mentioned, as well as specialties in affiliated lines. References furnished.

Offers Representation
Henry Norris Schindler, Room 313, 1045 Sansome St., San Francisco, is interested in acquiring as a manufacturer's agent, or other plan, lines of merchandise for San Francisco and Northern California, especially goods that are suitable to a representative having a clientele among the corporations, that is: utilities, oils, steamship, lumber and allied industries.

Household Specialty Lines
B. D. Geroy, sales manager of the Illinois Bottled Gas Co., and Affiliated Companies, 35 West Jackson Blvd., Chicago, Ill., a sales organization covering Illinois, Wisconsin and Indiana, are in a position to add another line to those they now handle. Although they request to be put in touch with San Francisco manufacturers of household specialties, who are interested in representation in the three states mentioned, they are also in a position to handle any specialty that has merit.

Wants Building Materials
Enrique Farre, P. O. Box 2738, Manila, P. I., an established building contractor, accepting the construction of bridges, conduits, tunnels, concrete and wooden frame buildings, is anxious to secure prices and catalogs on second hand construction machinery (commercial tracks and cars, portable hoisting machines, cranes, derricks, dredges, portable excavators, wheelbarrows, concrete mixers, shovels, steel cables, chains, compressed air drills, riveters, pumps, etc.) Also on construction materials, such as: Portland cement bricks, reinforcing steel bars, pipes, galvanized iron sheets, plumbing materials, electrical materials and supplies, galvanized wire, wire fencing, zinc sheets for roofing. He prefers quotations to be c.i.f. Manila, P. I.

Fire Bricks

British Consulate General, 310 Sansome St., San Francisco, represents a firm in the United Kingdom that is desirous of appointing an agent in this district for the sale of fire bricks.

Manufacturers' Agent

John E. T. Yewdall Co., Room 4, 401 Beckins Bldg., Vancouver, B. C., established manufacturers' representatives, desire to get in touch with firms, who are seeking to expand their markets and who would be willing to appoint them as representatives in British Columbia for the sale of their products to the wholesale and retail trade. The lines in which they are particularly interested are: builders' hardware, wrought iron hardware, tools of all kinds, roller skates, sporting goods, bathroom fixtures, plumbers' brass goods, toilet seats, electrical household goods and specialties.

Water Colors Wanted

J. A. Anderzen, Elm Creek, Neb., (merchant) seeks connections with San Francisco importers or jobbers of Japanese or Chinese paintings, etchings, water colors, etc. If possible, he would appreciate receiving catalogs.

SKYSCRAPER ERECTED ON TIME-TABLE SCHEDULE

The precision with which modern builders erect the huge industrial piles of steel and concrete which tower against the skyline of lower Manhattan has just been exemplified in New York in the completion of the 42-story Equitable Trust Company Building.

About a year ago the president of the Equitable made a mark on his calendar. It indicated the precise hour at which the doors of their new building would be opened. The new structure had not then been started. The Mills Building, an old landmark in Broad and Exchange Streets, which it was to replace, was still standing. The Equitable Trust Company has started business operations in the new quarters precisely at the established moment.

Every detail of the construction was outlined in a "time table" as carefully prepared and closely followed as the schedule of an express train.

Sixty-four "key" operations are shown on the schedule. Many of them progress simultaneously. Others must be completed before further departments of the work can progress.

By a glance at this schedule, the superintendent, construction manager and foreman could tell the exact time when any operation was to be begun.

LABOR LARGEST COST

A study of construction made by the United States Department of Labor revealed that 62 per cent of the cost of building the average dwelling house is for labor, while materials constitute 38 per cent. Foundation and masonry work represent 36 per cent of the total cost of the completed job. The foundation is the largest single item of construction expense. The second largest item of cost is 29 per cent and covers carpentry, both labor and material.

Plumbing fixtures plus their installation cost are reported to be 10 per cent of the entire cost, while the heating plant is rated at 9 per cent; hardware is apportioned at 6 per cent. Lighting fixtures and installation constitute 2 per cent of the job.

CONSTRUCTION TIPS—Can be secured through Larsen's Advance Construction Reports. A verified advance information service in your morning mail, containing all the information necessary to the intelligent solicitation of current and future business. Write for sample copies. Larsen's Advance Construction Reports, 547 Mission St., San Francisco, or phone Kearny 1252.

Engineering News Section

BRIDGES

TULARE COUNTY, Cal.—Until June 20, 2 P. M., bids will be rec. by State Highway Comm. to const. three reinf. conc. bridges bet. Tulare and Goshen—one over Cameron Creek about 2½ mi. north of Tulare, an existing bridge consisting of two 12 ft. slab spans to be widened from 26 ft. to 30 ft. rdwy.; another across Packwood Creek about 4½ mi. north of Tulare, an existing bridge consisting of one 30 ft. girder span to be widened from 21 ft. to 30 ft. rdwy.; and a third over Mill Creek about 7½ mi. north of Tulare, a bridge to be constructed consisting of one 30 ft. girder span with 30 ft. rdwy. C. H. Purcell, eng. See call for bids under official proposal section in this issue.

VALLEJO, Solano Co., Cal.—City declares inten. (147) to imp. Quincey alley bet. Napa St. and El Dorado St., involv.

grade; r. w. curbs; 5-in. conc. pave. 1911 Act, Bond Act 1915. Protests June 11. Alf. E. Edgumbe, city clerk. T. D. Kennedy, city engineer.

BERKELEY, Alameda Co., Cal.—City declares inten. (624) to imp. 60th St., bet. Francisco and Virginia Sts., involv. grade; pave; curbs; gutters; walks; lateral sewers. 1911 Act, Bond Act 1915. Protests June 12. Emma M. Hann, city clerk.

U. S. ERECTING EXHIBIT BUILDINGS AT SEVILLE, SPAIN

Forty thousand dollars' worth of building materials are now being exported from this country to Seville, Spain, for use in the construction of the United States government buildings in the coming Ibero-American Exposition.

These materials will include lumber, steel, plumbing and electrical equipment, not available in Spain, where, according to the architect, William Templeton Johnson, the local contractors are now receiving a free object-lesson in American building methods.

One permanent building, after the close of the Exposition, to be used as the U. S. Consulate and two temporary buildings are being erected on the site allocated to the United States Government. In these twenty-three government departments and bureaus will display their exhibits, space for private firms being purchasable in the Spanish buildings.

The Exposition, which is to be known as the Ibero-American, will be opened, by King Alphonso on March 15, 1929. In it will be represented all the republics of South and Central America, Cuba, Mexico, the Philippine Island, Morocco, in short, all countries which Spain helped colonize. It will last throughout the year, and as a result of it Spain hopes to stimulate the cultural and commercial renaissance now in progress under the constructive policy of King Alphonso and Primo de Rivera.

PACIFIC LIME AND U. S. LIME PRODUCTS IN MERGER

The Pacific Lime and Plaster Company of San Francisco, announces its merger with the United States Lime Products Corporation, also of San Francisco. Chas. M. Cadman is now president of the merged companies.

The United States Lime Products Corp. now maintains two plants, one at Sloan, Nevada, the other at Sonora, California, both manufacturing lime products. Warehouses are maintained at Portland, Los Angeles and San Francisco, with the main offices at 58 Sutter St., San Francisco.

The Pacific Lime & Plaster Co., just prior to its merger, had just turned out its millionth bag of hydrated lime.

FOREIGN CEMENT FOR NORTH CAROLINA ROADS

A cargo of 50,000 bags of foreign cement arrived at Wilmington, N. C., recently. This is said to be the largest cargo ever imported through Wilmington. The shipment is consigned to the North Carolina state highway commission and will be used in road construction work throughout the state. It was the third shipment of Belgian cement received within the last two months. The commission now has orders for several other shipments.—Greenboro (S. C.) News.

THE CONTRACTORS' ROOM

BUILDING AND ENGINEERING NEWS maintains a Contractors' Room where plans and specifications may be filed by Architects, Engineers and Owners for the convenience of bidders in San Francisco and the Bay Counties.

Architects, Engineers and Owners are invited to forward plans of their projects to **BUILDING AND ENGINEERING NEWS**. No charge for this service. The plans will be returned in good condition when contract for work is let.

Official Proposals

NOTICE TO CONTRACTORS

Mechanical Work.

Sealed bids will be received by Geo. B. McDougall, State Architect, Chief, Division of Architecture, Forum Building, Sacramento, California, up to 2 o'clock P. M., Friday, June 22, 1928, said bids then and there to be publicly opened and read, for furnishing all plant, materials and labor required for the erection and completion of the Mechanical Work, Home Economics Building, Santa Barbara State Teachers' College, Santa Barbara, California, in accordance with plans and specifications therefor, which are on file in the office of the Division of Architecture, State Department of Public Works, Forum Building, Sacramento, California. Plans and Specifications will be on file for examination at Room 1025 Sun Finance Building, Los Angeles, California, and at the Builders' Exchange at Los Angeles and Santa Barbara.

Mechanical Work includes Plumbing, Heating and Electrical Work. Separate bids will be received for "Electrical Work," and for "Plumbing and Heating." Combined bids will also be received covering all three branches of the work. Bids must be submitted on forms prepared and furnished by the Division of Architecture.

Cash, a bidder's bond made payable to the State of California, or a certified check made payable to the "State Engineer, Department of Public Works," in the sum of at least ten per centum (10%) of the amount of the bid, must be enclosed with each bid.

A deposit of twenty-five (\$25.00) dollars will be required on plans and specifications, the deposit to be returned immediately upon the return of the plans and specifications to the Division of Architecture at Sacramento, California, in good condition.

The Division of Architecture, State Department of Public Works, reserves the right to reject any or all bids and to waive any informality in any bid received.

All bids must be addressed to Geo. B. McDougall, State Architect, Chief, Division of Architecture, Forum Building, Sacramento, California, and plainly marked on the envelope: "Proposal for Mechanical Work, Home Economics Building, Santa Barbara, California." NOTICE TO CONTRACTORS

General Work

Sealed bids will be received by Geo. B. McDougall, State Architect, Chief, Division of Architecture, Forum Building, Sacramento, California, up to 2 o'clock P. M., Friday, June 22, 1928, said bids then and there to be publicly opened and read, for furnishing all plant, materials and labor required for the erection and completion of the General Work of the Home Economics Building, Santa Barbara State Teachers' College, Santa Barbara, California, in accordance with plans and specifications therefor, which are on file in the office of the Division of Architecture, State Department of Public Works, Forum Building, Sacramento, California. Plans and Specifications will be on file also at Room 1025 Sun Finance Building, Los Angeles, and at the Builders' Exchange in Los Angeles and Santa Barbara, and they may be examined at any of these addresses by any interested party.

The Home Economics Building is a two-story and basement reinforced concrete building with concrete and hollow tile partitions, cement and wood floors, wood roof construction and tile roof.

Prospective bidders for the entire work as called for in the Proposal Form may obtain sets of the Plans, Specifications and Proposal Forms upon application and the filing with the Division of Architecture of a deposit of twenty-five (\$25.00) dollars for each set, checks shall be made payable to the Department of Public Works, Division of Architecture. Deposits will be returned immediately upon receipt of the plans and specifications by the Division of Architecture, at Sacramento, California, in good condition, provided same are received within 30 days after date of opening bids, otherwise the deposit will be forfeited to the State.

Bids must be submitted on Proposal Forms prepared and furnished by the Division of Architecture.

Cash, a bidder's bond made payable to the State of California, or a certified check made payable to the "State Engineer, Department of Public Works," in the sum of at least ten per centum (10%) of the amount of the bid, must be enclosed with bid.

The Division of Architecture, State Department of Public Works, reserves the right to reject any or all bids and to waive any informality in any bid received.

All bids must be addressed to Geo. B. McDougall, State Architect, Chief, Division of Architecture, Forum Building, Sacramento, California, and plainly marked on the envelope: "Proposal for Home Economics Building, Santa Barbara State Teachers' College, Santa Barbara, California."

DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the State Highway Engineer, Highway Building Sacramento, California, until 2 o'clock P. M., on June 20, 1928, at which time they will be publicly opened and read for construction in accordance with the specifications therefor, to which special reference is made, of portions of State Highway, as follows:

Placer County, a reinforced concrete girder overhead crossing over the tracks of the Southern Pacific Railroad at Weimar (III-Pla-37-B), consisting of one 47'-6" span, one 46'-1" span, four 30'-0" spans and one 28'-6" span on concrete piers and bents on pile foundations.

Placer County, a reinforced concrete

A call for bids published in this section indicates that bids are desired from other than local bidders. Maximum competition is desired, and this is assured through BUILDING AND ENGINEERING NEWS, which reaches every worth-while contractor and materialman in Central and Northern California who bids on public work.

Rate: 10 cents per line, per insertion.

All official calls for bids of the California State Highway Commission and Nevada State Highway Commission are published in this section.

girder bridge across Truckee River at Tahoe City (III-Pla-38-A) consisting of four 30 foot spans on concrete bents and abutments with wing walls.

San Luis Obispo County, three miles south of San Luis Obispo (V-SLO-2-E), about one (1.0) mile in length, to be graded and paved with Portland cement concrete and waterbound macadam.

Tulare County, the following three reinforced concrete bridges between Tulare and Goshen (VI-Tul-4-F):

Across Cameron Creek about 2½ miles north of Tulare, an existing bridge consisting of two 12-foot slab spans to be widened from 26-foot roadway to 30-foot roadway.

Across Packwood Creek about 4½ miles north of Tulare, an existing bridge consisting of one 30-foot girder span to be widened from 21-foot roadway to 30-foot roadway.

Across Mill Creek about 7¾ miles north of Tulare, a bridge consisting of one 30-foot girder span with a 30-foot roadway to be constructed.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the said office, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, and at the office of the District Engineer of the district in which the work is situated. The District Engineers' offices are located at Eureka, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the District Office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Division of Highways. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the District Office.

No bid will be received unless it is made on a blank form furnished by the State Highway Engineer. The special attention of prospective bidders is called to the "Proposal Requirements and Conditions" annexed to the blank form of proposal, for full directions as to bidding, etc.

The Department of Public Works reserves the right to reject any or all bids or to accept the bid deemed for the interests of the State.

DEPARTMENT OF PUBLIC WORKS, DIVISION OF HIGHWAYS,

C. H. PURCELL,

State Highway Engineer.

Dated: May 23, 1928.

BIDS WANTED

TREASURY DEPARTMENT, Office of the Supervising Architect, Washington, D. C., May 19, 1928. Sealed bids will be opened in this office at 3 p. m., June 15, 1928, for constructing New Additional Storage Vault at the U. S. mint at San Francisco, Calif. Drawings and specifications may be obtained from the custodian, or at this office in the discretion of the Supervising Architect, Jas. A. Wetmore, Acting Supervising Architect. May 24-26-28

NOTICE TO BIDDERS

(School Addition—Merced Union Grammar School District)

The Board of Trustees of the Merced Union Grammar School District, Merced County, California, will receive sealed proposals up until 8 o'clock P. M. of June 6th, 1928, at the John Muir School, Merced, California, at which time and place bids will be considered for the erection of a three-room reinforced concrete addition to the John Muir School and for the extension of the present heating and ventilating system to ac-

commodate the addition.

Bids will be taken separately on the heating and ventilation work.

Each bid must be accompanied by a certified check drawn to the order of Walter Mink, Clerk of the Board of Trustees, as a guarantee of good faith, and check to be in an amount not less than ten (10%) per cent of the bid submitted.

Plans and specifications and bidding forms for the work mentioned may be procured at the office of W. E. Bedesen, Engineer, Shaffer Bldg., Merced, Calif.

The said Board reserves the right to reject any or all bids, to waive any informality in any bid received, or to accept any bid which in their judgment best serves the district's interest.

By order of the Board of Trustees of the Merced Union Grammar School District, Merced County, California.

WALTER MINK, Clerk.

Dated May 21, 1928.

(D) NOTICE TO CONTRACTORS

(West Stanislaus Irrigation District)

Sealed proposals will be received by the Directors of the West Stanislaus Irrigation District, at their office in Westley, Stanislaus County, California, up to two o'clock P. M. (2:00 P. M.) June 16th, 1928, and will at that time be publicly opened, for the construction of approximately two and three-fifths miles of Main Canal, in accordance with the contract, plans and specifications thereof.

CONTRACT NO. 4.—Construct Main Canal from station 125+000 to station 263+000 including approximately 120,000 cu. yds. of earth excavation and 600,000 sta. yds. of haul.

All proposals must be accompanied by a certified check for at least five (5) per cent of the amount of the bid submitted, in favor of the West Stanislaus Irrigation District.

All certified checks accompanying rejected bids will be returned.

Certified check of the successful bidder will be returned when the contract has been executed and the required bonds furnished.

In case of failure to execute contract or furnish the required bonds within the stipulated time, the certified check and the proceeds thereof, will become and remain the property of the West Stanislaus Irrigation District.

Plans, specifications and contract are on file and can be inspected at the District's office at Westley, or at the office of the District's Engineer, W. F. Woolley, at Patterson, California.

A full set of plans, specifications and contract may be obtained at the Engineer's office or at the District's office on deposit of \$10.00 for each set, which sum will be returned on the return of the same in good condition within ten days after the date on which bids are opened.

The contract will be let to the lowest responsible bidder, except that the District reserves the right to reject any and all bids. Bids will be opened at the District's office at Westley, California, Saturday, June 16th, 1928.

By order of the Board of Directors of the West Stanislaus Irrigation District.

ELBRIDGE SMITH,

Secretary of the Board of Directors.

(D) NOTICE TO CONTRACTORS

(Cleveland School Additions—Oakland)

Office of the Secretary of the Board of Education of the City of Oakland.

Notice is hereby given that the Board of Education of the City of Oakland and of the Oakland High School District of Alameda County hereby calls for sealed proposals to be delivered to the Secretary of said Board, Room 211, City Hall, Oakland, California, until Tuesday, the 12th day of June, 1928, at 10:45 A. M., at which time said bids will be opened, for the erection and completion of the Additions to the Cleveland School of the Oakland School District, to be erected on the south side of Cleveland Street between Montclair and Athol Avenues. These bids shall be presented in accordance with the plans and specifications for said building on file in the office of the Secretary of the Board of Education, City Hall, and in the office of the Superintendent of Buildings, 337 17th St., Oakland, California.

On a deposit of Twenty-five (\$25.00) Dollars, complete sets of plans and speci-

fications may be had by any bidder on application to the Superintendent of Buildings at his office hereinbefore mentioned. Plans taken out by bidders on or before June 12, 1928, shall be returned on or before June 13, 1928. If the plans and specifications are not returned within said time, or if mutilated, the said deposit shall be retained by the said School District as agreed and liquidated damages for said mutilation or detention.

Bids must be made on proposals obtained at the office of the Superintendent of Buildings, and be signed by the bidder and accompanied by a certified check, certified to by some responsible bank or banker, and made payable to the Board of Education of the City of Oakland and of Oakland School District, to be retained by said School District, as agreed and liquidated damages should the party or parties to whom the contract should be awarded fail to enter into the contract after the award or to give bonds required for the faithful performance of the contract or any bond required by law. The amount of said check shall not be less than ten (10%) per cent of the amount bid, provided, however, that in no case shall said check be required to be in excess of Five Thousand (\$5000.00) Dollars. Each bidder shall execute the affidavit accompanying the proposal obtained from the Superintendent of Buildings.

Bids will be opened by the Board of said District on Tuesday, the 12th day of June, 1928, at 10:45 A. M., in the Board Room, 211, Second Floor, of said City Hall, in said City of Oakland. The Board reserves the right to reject any and all bids or any or all items of such bids.

JOHN W. EDMOND,
Secretary of the Board of Education of Oakland, California.

(D) NOTICE TO CONTRACTORS

(Physical Education Building—Delano, California)

Notice is hereby given that sealed bids will be received by the Board of Trustees of the Delano Joint Union High School District for the erection and completion of a one-story brick Physical Education Building up to 7:30 P. M. of June 26, 1928. Bids to be opened in public at the Delano High School Building.

Plans and specifications for said building on file with the clerk of the board and open for the inspection of bidders. Copies of same may be obtained at the office of the architect, Charles H. Biggar, 405-6 Bank of Italy Building, Bakersfield, California, upon deposit of \$20.00. Such deposit will be returned upon receipt of the plans and specifications in good order, at time designated by the architect.

All bids must be made out on bid form furnished by the architect and shall be accompanied by a certified check or bidder's bond for 10% of the amount bid. Such check to be made payable to the Board of Trustees, Delano Joint Union High School District, and shall be submitted as evidence of good faith and that the bidder if successful will enter into contract with, and satisfactory to said board, for the erection of said building, and in addition thereto, furnish good and sufficient surety bonds therefor, satisfactory to the Board of Trustees.

The Board of Trustees reserves the right to reject any or all bids, or waive any informality in any bid received.

By order of the Board of Trustees, Delano Joint Union High School District, made May 22, 1928.

HARRY R. DEVENNEY,

President.

O. A. CLASEN, Clerk.

(D) NOTICE TO CONTRACTORS AND BIDDERS

(Salinas Union High School District)

Notice is hereby given that sealed proposals are invited and will be opened by the Board of Trustees of the Salinas Union High School District, Monterey County, State of California, at 7:30 P. M., on the 12th day of June, 1928, in the high school building of said school district in the County of Monterey, State of California, for the erection and completion of a Junior College building in said school district, for the installation of a heating system therein, for the installation of a plumbing system therein, and for alterations and additions to the High School Building, for the above named district, all in accordance with the plans and

specifications made for the same by Ralph Wyckoff, the authorized architect, employed by the Board. Proposals will be received separately with alternate propositions on a general contract, plumbing and heating, including everything specified and shown.

Plans and specifications can be seen at the office of Ralph Wyckoff, Architect, Grower's Bank Building, San Jose, California.

A deposit of twenty (\$20.00) dollars will be required on all plans loaned out as a guarantee of good faith.

All proposals to be made out on blank forms, furnished by the architect and must be accompanied by a check for not less than five per centum of the amount of the bid, made payable to E. L. Van Dellen, Clerk of the Board, and certified to by some responsible banking house. This check is to be forfeited in the event that the successful bidder, after having been awarded the contract, fails within ten (10) days to sign the contract and furnish good and sufficient bonds satisfactory to the Trustees, and as required by law.

Bids will be received up to and including June 12th, 1928, at 7:30 P. M. and must be addressed to Mr. E. L. Van Dellen, Clerk of the Board of Trustees of the Salinas Union High School District, Salinas, California.

The Board reserves the right to reject any or all bids.

By order of the Board of Trustees, dated May 10th, 1928.

E. L. VAN DELLEN,
Clerk, Board of Trustees

(D)

NOTICE TO CONTRACTORS

(Pumping Equipment—Alameda County)

OFFICE OF THE CLERK OF THE BOARD OF SUPERVISORS, ALAMEDA COUNTY, CALIFORNIA.

Sealed Bids will be received by the Clerk of the Board of Supervisors of Alameda County, California, at his office, Monday, the 18th day of June, 1928, at 10:30 A. M. (the day when said bids will be opened and the contract awarded) for the furnishing and installing of the pumping equipment in the Oakland and Alameda Portal Buildings and in Segment "D" of the Estuary Subway, Alameda County, California.

Plans and specifications for said work are on file in the office of the County Clerk of Alameda County, in the Hall of Records Building, in the City of Oakland, County of Alameda, State of California, where copies may be obtained in the following manner, viz:

Contractors may secure complete copies of the specifications by depositing with the County Clerk the sum of Twenty-five (\$25.00) Dollars.

Contractors will be required to return copies of the specifications in good condition to the office of the County Clerk of Alameda County, California, not later than the day upon which bids are to be opened for the above specified equipment.

Deposits of contractors failing to return said specifications on or before the date of opening of bids will immediately become forfeited to the County of Alameda.

Each bid must be accompanied by a certified check of a bank of the State of California, or a National Bank doing business in the State of California, for a sum equal to ten (10) per cent of the total amount bid made payable to Geo. E. Gross, Clerk of the Board of Supervisors of Alameda County, to be forfeited to the County as agreed and liquidated damages should the party or parties to whom the contract shall be awarded, fail to enter into the contract after the award or to give the bond required by law and by the said specifications.

The Board of Supervisors reserves the right to reject any and all bids.

DATED May 21st, 1928.

GEO. E. GROSS,

County Clerk and Ex-Officio Clerk of the Board of Supervisors.

PROTEST FREIGHT RATES

Western Rock Products Company has filed a complaint with the Railroad Commission against The Atchison, Topeka and Santa Fe Railway Company alleging that defendant carrier collected switching charges to the amount of \$421.20 on shipments of sand from Antioch to San Francisco, interchange with Southern Pacific Company at San Francisco, for delivery at Crescent, and asking the Commission to require defendant carrier to refund the amount of the switching charges.

Western Concrete Pipe Company has also filed a complaint against Southern Pacific Company, alleging that defendant carrier collected unlawful demurrage charges from complainant at Los Angeles and other points on several hundred cars of rock, sand and gravel, and asking the Railroad Commission to require defendant to refund said charges, with interest at six per cent.

Russian Peasant Women Placing Straw Around Their Dwelling to Keep the Cold Out

Applying time - proved methods of insula- tion to modern day needs

NO one knows the value of building insulation as do the inhabitants of either extreme cold or extreme hot climates. These natives have realized for hundreds of years the value of insulation—particularly straw insulation. These people, not having a complete scientific knowledge of heat and cold values, made their selection of an insulating material by actual test. After their many crude experiments on different products—straw was finally chosen as their most perfect means of protection against heat and cold.

And today, this time-proved method of insulation is offered in a perfected form—INSO BOARD—manufactured in sturdy panels 7/16" thick, 4 feet wide and any length desired. It has many structural insulation uses such as—(1) Plaster Base, (2) Sheathing under stucco, brick or wood exterior, (3) Roof Insulation, (4) Under Flooring, (5) Wall and Ceiling finishing panels, (6) Sound Deadener, and (7) Insulating inner Walls.

DEALERS will find INSO BOARD a profitable connection, combined with the sales and advertising co-operation which will be WHOLLY AT OUR EXPENSE. Write today for particulars.

MAY BUILDING SUMMARY.

Building construction undertaken in San Francisco during the month of May, 1928, represented an expenditure of \$2,335,116, according to figures compiled by the Bureau of Building Inspection, Department of Public Works. During the month 661 permits were issued as compared with 905 permits in May, 1927, when the total money expenditure was \$4,979,792.

May, 1928, activities included two public projects, one for the municipality costing \$85,000, and one for the State Harbor Commission valued at \$83,000. May, 1927 activities included two projects for the city costing \$168,000 and four structures for the harbor commission costing \$176,328.

The figures for May, 1927, included 35 Class C buildings costing \$1,127,502, and for 347 frame structures costing \$2,510,311.

Following is a complete summary of May, 1928, activities as compiled by the Bureau of Building Inspection:

Class	No. of Permits	Est. Cost
B	1	\$ 150,000
C	19	582,360
Frames	232	1,412,995
Alterations	407	321,761
Harbor Bldgs.	1	85,000
City Bldgs.	1	83,000
Total	661	\$2,625,116

SACRAMENTO BUILDING TOTAL

May building operations in Sacramento rolled up a total money expenditure of \$397,319, according to J. R. Shields, city building inspector. Although a comparatively quiet month, May's business brought the total for the year to \$2,840,506. No large projects of any kind were started during the month, the bulk of the business being represented in home building. One story, single family dwellings contributed nearly \$200,000 of the total. A total of 177 permits were issued during May for all purposes.

SIX-DAY WEEK FOR OIL INDUSTRY TO BE CONSIDERED

The State Department of Industrial Relations has called a conference of the oil companies of California to consider the desirability of introducing the six-day week in lieu of the seven-day week for all employees in the industry. It will be held in Room 109 in the State Building, Civic Center, San Francisco, June 18, at 10 A. M.

On January 1, 1917, the Standard Oil Company adopted the six-day week for all its employees, with the exception of its drilling crews. Beginning with April 15, 1928, this Company extended the six-day week to the drilling crews. This change was made without reduction in pay.

It is believed that other oil companies have been considering action similar to that taken by the Standard Oil Company. A general discussion will be helpful in obtaining uniform conditions for the approximately 10,000 employees concerned.

The California Legislature approved on February 27, 1893 (Stats. 1893, p. 54), "An act to provide for a day of rest from labor." This law covers employees engaged by the day, week, month or year, and whether working in the day or night time. Section 1 of the Act states that "every person employed in any occupation of labor shall be entitled to one day's rest therefrom in seven, and it shall be unlawful for any employer of labor to cause his employees, or any of them, to work more than six days in seven." A proviso excludes "any case of emergency."

Leaving the law out of consideration, there is the highest sanction known to man for the weekly day of rest. Public opinion supports the twenty-four hours cessation from toil each week. Employers are generally committed to the wisdom of the policy, and, as already stated, one of the large oil companies of California has pioneered the way for all of its employees. Hence this invitation to attend the conference is San Francisco on June 18th is sent in the spirit of the larger view of the social and economic values involved.

STATE CIVIL SERVICE EXAMS. TO BE HELD SHORTLY

California Civil Service Commission announces that several examinations will be held in San Francisco, Sacramento, and Los Angeles as soon as practicable after June 16. These examinations will provide for:

Senior Elevator Inspector, Grade 4, Division of Industrial Accidents and Safety, paying from \$200 to \$250 a month.

Assistant Safety Engineer, (Electric), Grade 4, Division of Industrial Accidents and Safety, paying from \$235 to \$280 a month.

Safety Engineer and Inspector, Grade 3, Compensation Insurance Fund, paying from \$150 to \$190 a month.

Assistant Superintendent of Safety Engineering and Inspection, Grade 4, Compensation Insurance Fund, paying from \$200 to \$230 a month.

Further information regarding these examinations together with application forms may be obtained from offices of the commission in the State Building, San Francisco; Forum Building, Sacramento, and Hall of Records Building, Los Angeles.

SOUTHERN PACIFIC R. R. PLANS TO BRIDGE SUISUN BAY

Plans are being considered by the Southern Pacific Railroad Company to construct a steel railroad bridge over Suisun Bay to replace the present train ferry across Carquinez Straits between Port Costa, Contra Costa County and Benicia, Solano County.

The bridge will be a double track, single level structure of silicon steel.

The site of the proposed bridge is six and a half miles east of Crockett. It will extend from Army Point on the north shore to Suisun Point on the south.

From abutment to abutment the new span will be 5,597 feet long with a 70-foot clearance above the water at mean high tide. It will consist of a 750 foot steel girder viaduct, ten 408 foot spans, one 284 foot deck span and one 327 foot lift span, all resting on concrete piers.

The electrically operated lift span will clear 95 per cent of the water traffic without opening the draw. When open this span will be 135 feet above mean water level, and will be directly over the navigation channel maintained in the bay by the army engineering corps, giving clearance equal to that of the Antioch bridge, both vertically and horizontally.

Necessary steps to obtain public authority for construction of the bridge will be taken at once, it was stated, and when such authority is obtained the company will proceed immediately with construction. It will require about two years to complete the bridge.

1927 UNIT COSTS OF OFFICE BUILDING IN CANADA

Unit costs of an average fifteen-story office building in Ontario, Canada, are summarized by Engineering News-Record, New York, in the table following. The percentage figures were based on 1927 construction costs of several large office buildings. Individual variations from these averages naturally occur as a result of different conditions affecting construction methods and varying designs affecting materials used. The detailed percentage costs were:

	Per Cent of Total Cost
General conditions.....	5.25
Structural frame.....	22.00
Brick and masonry.....	15.00
Plumbing, heating and ventilating.....	10.00
Electric wiring and fixtures.....	2.25
Marble tile and terrazzo.....	1.75
Elevators	7.50
Stone	3.00
Ornamental iron.....	2.25
Metal windows.....	2.25
Lathing and plastering.....	4.00
Roofing and sheet-metal work.....	0.75
Metal store-fronts, glass & glazing.....	1.00
Kalamein work and fire doors.....	2.50
Painting	1.75
Mail chutes.....	0.75
Special decoration allowance.....	0.50
Excavations	1.00
Foundations	1.75
Hardware	1.75
Fireproof partitions.....	2.50
Rough and finished carpentry.....	3.00
Vault doors.....	0.50
Linoleum floors.....	1.50
Overhead and profit.....	6.00
Total	100.00

Stockton building in May involved an expenditure of \$207,751 as compared with \$143,833 for the same period in 1927. During May, 1928, City Building Inspector J. E. Duffy issued 78 permits.

SIMPLIFIED PRACTICE ACHIEVEMENTS IN BUILDING FIELD ARE SUMMARIZED

RAY M. HUDSON, ASSISTANT DIRECTOR
Commercial Standards Group, Bureau of Standards

The high standards of living enjoyed by the American people are the results of steadily mounting per capita productivity. Further advances in these standards must be brought about by improving methods and processes, through the elimination of waste in materials and motion in our production and distribution system.

Just as twenty years ago we undertook nation-wide conservation of our natural resources, so today we must even more vigorously sustain this campaign for a better utilization of our industrial resources and effort. Wastes in commerce and industry fall into a number of classes. While they are of immediate concern to the manufacturing concerns, business community, construction engineers, the interests of the general public are involved to an important degree.

In 1921 when the "Hoover Committee on the Elimination of Waste in Industry" made a survey of six of our major industries, it found that the building industry stood in fourth place, with 53 per cent waste. Thirty-four per cent was chargeable to management, and one of the major causes was lack of simplification and standardization in materials, methods, machinery, and so on. When it is remembered that five billions of dollars are spent annually in construction, some conception may be gained of the extent to which this loss reduces the country's income.

Manufacturers and business men are forced to look into their businesses more intensively than ever before for opportunities to cut down costs and yet maintain for themselves a fair profit. They are finding that a prolific source of waste is too much variety. A surprising proportion of this variety is made up of slight dimensional differences, of models and types which are not markedly dissimilar, but which were originated in an effort to be "just a little different."

Variety may be the spice of life, but when carried to excess in some directions it places an unnecessary burden on manufacturers and distributors and their customers as well. As a result of meaningless differences, many of these "different" articles are slow-moving, and often become "frozen investment." Such funds do not serve a useful purpose, and someone has to pay for this idle capital.

The Department of Commerce, through the Division of Simplified Practice, is assisting the building and construction industry to check this waste, through the reduction of unnecessary variety in sizes and dimensions and other immaterial differences in every-day commodities. This cooperation on the part of the Government contains nothing regulatory nor inquisitorial. The service is to help such industrial groups as are interested in reducing waste, to get the facts as to wastes and to put their corrective actions into practice.

Safeguards have been set up to protect the fullest development of individual initiative and invention, as well as care for the changing trends of business. This is done by providing that the simplified practice recommendations, developed under the auspices of the Division of Simplified Practice, shall be subject to review at the end of such period as may be fixed by the industry. The re-survey is conducted by a standing committee representatives of all factors in the industry, or through another general conference of producers, distributors and organized users.

Acceptance by manufacturers, distributors and organized users, representing 80 per cent of the total volume of the industry, is necessary before a program

can be published as part of the elimination of waste series of the Department of Commerce.

At the time a simplification is promulgated by a general conference of all interests, a standing committee is appointed by the conference to insure the promotion and observance of the completed project. The membership of the committee is truly representative of all phases of the industry, since it consists of representative manufacturers, distributors, and organized users of the commodity concerned.

The percentages of reduction in variety have been startling, especially in the application of simplified practice in the building and construction field. They are as follows:

S.P.R.	Items	Reductions	
		From	To %
1	Vitrified Paving Brick	66	5 92
3	Metal Lath	125	24 81
4	Asphalt	102	10 90
6	Files and Rasps	1351	475 65
7	Rough & Smooth Face brick	75	2 97
	Common Brick	44	1 98
8	Range Boilers	130	13 90
12	Hollow Building Tile	36	20 44
13	Struct. Slates for Plumbing & Sanit'y Pur.	827	138 83
14	Roofing Slates (descrip. terms, thick., & sizes)	98	48 51
16	Lumber. Stand. nomenclature grades and sizes for softwood lumber.		
17	Forged Tools (Tool Heads)	665	361 46
	Eye sizes	120	10 91
18	Builders Hardware Items	6948	5120 26
	Finishes	100	29 71
19	Asbestos Mill Board (Sizes, thicknesses)	21	4 81
	Asbestos Paper (Sizes, Widths, & Wts. of rolls)	72	16 78
21	Brass Lavatory and Sink Traps	1114	76 93
25	Hot Water Storage Tanks	120	14 88
26	Steel Reinf. Bars Cross-sectional Areas	32	11 66
28	Sheet Steel	1819	261 85
29	Eaves Trough and Conductor Pipe	21	16 24
30	Terne Plate (Wts.)	9	7 22
32	Conc. Bldg. Units (Length, Width, Height of Blks Tile and Brick)	115	14 88
38	Sand Lime Brick (Length Width and Height)	14	3 79
43	Paint & Varnish Brushes	480	143 70
45	Grinding Wheels	715,200	2,254,400 64
47	Cut Tacks & Small Cut Nails (sizes)	421	182 57
	Packing Weights	423	121 71
48	Shovels, Spades, Scoops	5136	2178 57
49	Sidewalk Lights (Styles)	80	5 94
	Sizes	120	6 95
	Shapes	10	2 80
51	Die Head Chasers		75
52	Staple Vitreous China Plumbing Fixtures	441	58 87
53	Steel Reinf. Spirals	7	4 43
57	Wrought Iron & Wrought Steel Pipe, Valves, Pipe Fittings, Sizes of Valves and Fittings	20,000	19,238 4
	Sizes of Pipe	62	49 21
61	White Glazed Tile and Unglazed Ceramic Mosaic (Shapes, patterns, dimensions, grade nomenclature, grade marks, grade spec. and certifications of grades)		
71	Turnbuckles	248	115 54
72	Solid Section Steel Windows	42,877	2244 95
	Ash Handles (grades)		3 —
77	Hickory Handles (grades)		11 —

82 Hollow Metal Doors Provides for stock items.

83 Kalamein Doors. Provides for stock items.

87 Forms for Concrete Ribbed Fl. Const. (W'd's) 7 2 73

90 Hack Saw Blades 108 52 53

That simplification yields benefits sufficient to attract manufacturers, distributors and organized users alike, is demonstrated in the high degree of adherence shown the completed recommendations. Success or failure of a simplified practice recommendation is shown in the degree of adherence accorded it by its acceptors. Each recommendation is reviewed annually by a standing committee, which conducts a survey to ascertain the average degree of adherence to the particular program. Whenever it is impracticable to make a factual survey, the committee renders an estimated degree of adherence that the program enjoyed during the period of activity. The committee also makes recommendation for any revision or modification that may be considered necessary.

During the first quarter of 1928 there were 8 projects submitted to the respective standing committee for consideration. Of this number two were revised and six reaffirmed. The average degree of adherence to these eight projects was 89.18 per cent, based on factual surveys. Fifteen projects were reviewed during 1927 of which the average degree of adherence was 82.61 per cent.

Further evidence that simplification is proving of real value to manufacturers and purchasers is found in the increased number of Trade Associations accepting the completed recommendations. During the first quarter of 1928 this increased by 5 per cent, bringing the total to 859, while individual acceptances increased 11 per cent, making this total 8,597.

A major contribution to the stability and prosperity of American business is reflected in the savings which industry has gained from simplification. Industrial leaders estimate these aggregate more than \$500,000,000 a year. Typical annual savings due to elimination of unnecessary variety in sizes and dimensions of commonplace commodities are as follows:

Items	Estimated Annual Savings
Paving Bricks	\$1,000,000
Steel Sheets	2,400,000
Reinforcing Bars	4,500,000
Range Boilers	5,500,000

Elimination of 60 per cent of variety in sizes of soft-wood yard lumber is estimated to have reduced inventories formerly carried by four billion board-feet, thus releasing some \$200,000,000 of relatively idle capital. Strict adherence to this lumber simplification assures the home builders of the country, the production and distribution of standard dimension lumber supported by the united interests of the industry. During the past year, the lumber simplification program was given greater impetus through the development of grade-marking for cut lumber.

No city in the United States can expect to build a mythical stone wall around the town and hope to get away with it. If all cities had stone walls and barred contractors and materials except home made, many of them would soon degenerate in the small towns and perhaps be eliminated entirely.—Ex.

GOVERNOR HITS BUILDING PROGRAM AS PROPOSED BY STATE ARCHITECT

That the state's ten-year building program now being worked out is a matter for administration policy and is not to be decided alone by the state architect was the flat statement made by Governor C. C. Young, after members of his council reported that State Architect George B. McDougall had sent various departments their "programs" for erection of new structures.

It was stated that McDougall's "program" showed estimated expenditures of more than \$5,000,000 for the forthcoming biennium, as against approximately \$2,500,000 for the present two-year period.

Must Hold To Budget

"I want this to be clear," the governor declared in reply to these reports. "The budget for new building construction for the next two years is not going to exceed that of the present biennium."

"And the working out of a ten-year program is something to be settled by the administrative policy and not by the state architect."

Disappointments Seen

It means, remarked A. R. Heron, state director of finance, that there will be many bitter disappointments among the officers of the various institutions, for it will be impossible to realize all the work promised in the state architect's "program," which has been sent to these institutional heads.

Governor Young gave strong intimation that 1929-30 budget requests for more building funds than are allowed in the present budget would receive his veto.

Has No Approval

"Any 'program' drafted by the state architect must not be mistaken for

having administration approval," the governor warned. "and the institutional heads or departmental chiefs should not get the mistaken impression that the way is wide open for making wholesale requests for appropriations for new buildings. It is not."

Department directors also complained that the state architect has proceeded to prepare complete plans and specifications for new buildings without consulting them.

Fail Of Approval

They asserted that these plans seldom met with their approval for the special purpose for which the buildings were desired, often exceeded the appropriations and resulted in a needless waste of money.

Earl E. Jensen, state director of institutions, stated that McDougall had not consulted him about plans prepared for special buildings at the institutions.

William John Cooper, director of education, asserted that "there has not been a satisfactory gymnasium built at any of the state teacher colleges."

Held Too Elaborate

It also was claimed that the state architect's plans are too elaborate for the funds available for the buildings under contemplation.

The governor also wanted to know why it is that on highway construction work the contracts are let at a figure from 10 to 25 per cent under the estimates of the engineers of the state division of highways, while with state buildings the cost almost invariably run from 25 to 30 per cent over the estimates of the state division of architecture.

landi has only until July 1st to commence his suit.

\$62,000 In Repairs

The State of California within the past two years has spent a total of \$62,000 in making repairs to the bridge after it had been "delivered" by the contractor.

The Klamath River bridge amounted to a bad inheritance by the Young administration from the regime of former Governor Friend W. Richardson. It has been a constant source of trouble to the present highway officials, and a few months ago the federal government made a demand upon the state to return \$120,000 in federal aid money advanced to the project, because of the structural defects.

Defects "Dedicated"

The bridge, constructed as a memorial to Assemblyman G. H. Douglas, who died during the 1923 legislative session, leaped into prominence in 1926 when American flags were draped over gaping cracks in the structure while Governor Friend W. Richardson presided over dedication exercises.

The 1923 legislature appropriated \$225,000 to the construction of the bridge, and in addition, federal aid in the sum of \$264,809.26 was requested. On the strength of progress reports, the United States Bureau of Public Roads contributed \$120,000 to the project.

\$317,685.74 Paid

The state has paid to Rolandi a total of \$317,685.74. This was all paid during the Richardson administration. Nothing has been paid to Rolandi since Governor C. C. Young took office.

To Divert Funds

Loss of the federal appropriation to the bridge will not mean a loss of that sum to the state highway work, as this will be diverted to other highway jobs in the state.

A complete investigation of the bridge was ordered by Bert B. Meek, state director of public works, in March. This was made by Charles E. Andrew, state bridge engineer, and preliminary reports recently were submitted to Meek.

Contract Protested

During the investigation, it developed that the contract for the structure was let to Rolandi under the protest of R. M. Morton, then state highway engineer.

The state's counter-suit, if filed, Carlton said, will be based upon the claim that Rolandi did not follow the plans and specifications for the structure.

NATIONAL MILLWORK INSTITUTE TO BE ORGANIZED

It was decided at a conference of manufacturers and jobbers of sash, doors and millwork held at Chicago May 15 to form a National Millwork Institute to "develop a standard system of grading, adopt a uniform cost system, establish a trade extension service, organize and maintain a complete statistical service, and do and perform such other acts and functions as may be necessary and proper for such an organization." A committee of five on organization was appointed with authority to select four additional members. It will report in 30 days. S. F. D. Meffley secretary of the Wholesale Sash & Door Association, was appointed secretary. It is planned to operate the National Millwork Institute on an annual budget of about \$100,000 to be raised by assessment and an additional \$100,000 to be raised by subscription. Following are the members of the committee on organization: E. A. Nicholson, of the Millwork Institute of California, Los Angeles; Earl Kenyon, of the Long-Bell Lumber Co., Kansas City, Mo.; George J. Osgood, of the Wheeler, Osgood Co., Tacoma, Wash.; P. A. Richardson, of the Foster-Lothman Mills, Oshkosh, Wis.; and Harry S. Knox, president of the Wholesale Sash & Door Association, Chicago.

ARCHITECT MOOSER WINS SUIT FOR FEES ON SANTA BARBARA COURTHOUSE

A court decision which will give William Mooser, architect for the Santa Barbara county court house a total of from \$125,000 to \$150,000 for his work on the county capitol by the time the building is completed, was handed down by Judge Edward Henderson, of Ventura.

After listening to testimony of members of the board of supervisors and of the architect, as well as three members of the citizens' committee appointed two years ago to make recommendations as to the type of building to erect, Judge Henderson issued a peremptory writ of mandate and the county auditor paid \$17,500 to Mr. Mooser, representing 4 per cent on certain contracts for the court house which have been completed.

The generally estimated cost of the new county building now is \$1,500,000,

which means that Mr. Mooser will receive \$90,000 under the terms of his first contract and \$60,000 under the terms of the second contract entered into, which District Attorney Clarence C. Ward held to be illegal because its provisions were embodied in the first contract.

District Attorney Ward did not appeal the peremptory writ of mandate. A waiver was secured from Mr. Ward by Attorney Charles Albert Adams, of San Francisco, counsel for Mr. Mooser, the writ was served on the auditor, and the architect received his fee.

The county supervisors said in court that it had been their intention to pay the architect 10 per cent of the cost of the building although they admitted they had not studied carefully the contracts providing this payment.

STATE DEPARTMENT OF FINANCE REJECTS ROLANDI CLAIM ON BRIDGE

The State Department of Finance has rejected the claim of F. Rolandi, San Francisco contractor, in the sum of \$228,000 as additional payment for the construction of the Douglas Memorial Bridge spanning the Klamath River in Del Norte County, which the State of California has declined to accept because of structural defects.

C. C. Carlton, head of the legal division of the state department of public works, has filed recommendations with the finance department against the payment of the bill because, he said, "after a complete analysis the claim has failed to convince us it has any merit."

Suit Expected

Rolandi is expected now to proceed with a suit against the State of California in an attempt to force payment of the claim. Formal rejection was necessary before he could institute legal action.

But, Carlton announced further, if Rolandi starts action for the \$228,000, it is altogether probable that the State of California will file a cross-complaint against the contractor, seeking reparations from the \$317,000 already paid him, on the contention that an imperfect structure was delivered.

Under the statute of limitations, Ro-

THE OBSERVER

**What He Hears
and Sees
On His Rounds**

Questions concerning the building program of the University of California are expected to be settled at the June meeting of the Board of Regents to meet next Tuesday afternoon in the office of Governor C. C. Young in the State Bldg., San Francisco, at the last meeting of the Regents. Vice-President Robert G. Sproul was authorized to ask for bids on the Life Science Building and the new Infirmary and it is expected that orders to proceed with these buildings will be given. Plans call for the completion of the Life Science Building by August, 1929. Dr. Robert Legge, University physician, estimates the infirmary will be ready for occupancy fourteen months after ground has been broken.

A new service for contractors, realtors, material dealers and others interested in the building of homes and business structures is announced by the Oakland Chamber of Commerce. It consists of a statistical digest of building operations in the twelve districts comprising Greater Oakland. Through this digest, maintained by the Research Department of the Chamber, it is possible to inform any enquirers regarding the number of dwellings in each district, their value, and the number vacant and to compare these figures with previous ones. By means of this data the builder can determine which of the districts offers best opportunities for profit. The service is free to all enquirers, regardless of their membership in the chamber.

The 1929 convention and road show of the American Road Builders' Association will be held in Cleveland, Ohio, during the week of Jan. 14. Application blanks and other information will be available within the next few weeks, according to Chas. M. Upham, director, American Road Builders' Association, National Press Bldg., Washington, D. C.

Charging violation of sections of the Santa Cruz city charter, John B. Maker, former mayor, has filed suit against Mayor Fred W. Swanton and the city council. Maker seeks a court order declaring void a \$143,000 contract whereby Fairbanks, Morse & Co. of San Francisco were to install a city water pumping and chlorination plant. Maker also asks the return of \$40,000 turned over by the city as the first payment on the installation.

The "Electrical World" index of consumption of electrical energy by the manufacturing industries is 128.4 for April, compared with 115.3 for March and 108.9 for April, 1927. Operations in the electrical industry have been consistently higher this year than last, which is a normal condition; but indications in April and May point to an acceleration in the normal increase.

During the month of May, 1928, the Los Angeles city building department issued 3152 permits with an estimated valuation of \$8,941,735 as compared with 2200 permits with an estimated valuation of \$11,563,303 for the same month a year ago. For April, 1928, the number of permits issued was 2984 and the estimated valuation was \$8,711,040. For the first five months of 1928 Los Angeles' building total was \$42,812,136 as compared with \$48,837,802 for the corresponding period last year.

March, 1928, shipments of floor and wall tile, as reported by the Department of Commerce, by 36 concerns (including in earlier months 2 additional firms now out of business) making nearly 80 per cent of the total volume of floor and wall tile produced in 1925, totaled 5,253,266 square feet, as compared with 4,185,474 in February and 5,188,028 in March, 1927.

G. L. Fox, secretary of the Stockton Chamber of Commerce, is authority for the statement that negotiations are now under way in Stockton on which to locate a plant costing \$100,000. While the nature of the products to be manufactured is not disclosed it is said to be a pottery plant. Stockton, however, has been definitely decided upon as the plant location. Material from Calaveras county will be utilized, according to Fox.

Salt Lake City, Utah, was selected as the 1929 convention city and Walter F. McDowell, Tacoma, Wash., elected president at the close of the thirty-sixth annual convention of the United States League of Local Building and Loan Associations held at Dallas, Texas, according to Edwin M. Einstein, Fresno, president of the California Building-Loan League. California was honored with the naming of R. Horthby Myers, Los Angeles, as vice-president of the National League.

The proceedings of the Seventh Annual meeting of the Highway Research Board (B and 21st Sts., Washington, D. C.), are now ready for publication, and will be offered to those interested in highway research at the nominal price of \$2.00 per copy. The proceedings will include in addition to committee reports, papers by Frank B. Jewett on "Industrial Research," and by Maurice Holland on "The Demonstration and Dramatization of Research," and the report of Director Chas. M. Upham.

They grow 'em big in Washington state—those fir trees. And one of the biggest went crashing to the ground last week when a crew of the Crescent Logging Co. near Twin, Wash., dethroned a giant that not only provided a large amount of lumber but some statistics as well. The forest king when measured and cut totaled 260 feet; weight, 200 tons; diameter, 12 feet. It filled eight flat cars. It scaled 60,000 board feet.

Remarkable stability of building costs is strikingly illustrated by the index numbers compiled by the American Appraisal Company. The general figure covering four types of building construction in nine sections of the country is 202.9 for April, 1928, 202.9 for March, and 203.2 for April, 1927. This checks very closely with the Engineering News-Record Cost Index Number covering construction in general, which now stands at 207, compared with 206.8 a year ago. A general increase of from two to five points is noted for New England, all types participating in the advance. One to two points decline is reported for the Pacific Coast states and for Texas and the Northwestern states.

I. Rodriguez & Co., Apartado 994, San Juna, Porto Rico, importers and exporters, seeks connections with California lumber mills, dealing in wood for export, as they are interested in purchasing some quantities of wood to sell in Spain. Will furnish A-1 banking and commercial references.

State Department of Public Works has placed \$7,715,139.85 in highway work under contract between July 1, 1927 and May 28, 1928, according to Bert B. Meek, state director of public works. Meek reported that the contractors' bids for these jobs totaled \$645,665.24 under the estimates prepared by the state division of highways. The division of architecture, he stated, has completed building with a value of \$1,338,025.19 since the beginning of the present fiscal year.

Charging that the grades and elevations of the grading and surfacing of the Manor-White's hill road construction were changed by Rodney Messner, county engineer, when he took office, Cuffe and White, to whom was awarded the contract for the doing of the work at their bid of \$65,000 during the term of office of J. C. Oglesby, have filed suit against Marin county for \$35,154.10. The contract was awarded in July first, 1926, and was completed March, 1927.

Governor C. C. Young has requested B. B. Meek, state director of public works to supervise the preparation of new bridge legislation to be presented to the 1929 Senate and Assembly. The present law is antiquated and obsolete, he said. He believes the State should have the right to pass upon both the location and type of bridges proposed in California. The instructions were given after the Governor had received from the director a report to the effect that the Appellate Court has held the State has no jurisdiction over proposed bridges across San Francisco and Richardson says.

Fire losses in the United States and Canada during the month of April amounted to \$25,980,000, according to figures compiled by the New York Journal of Commerce. This compares with \$30,377,000 in March, \$41,105,400 in February and \$42,260,800 in January. With the exception of April all other months show sharp increases.

C. C. Gildersleeve, San Francisco contractor, is named defendant in a suit filed in the Superior Court at Martinez by Cecil Delahaye and Margaret Garvey who allege that Gildersleeve is responsible for leaving a large pole across a highway in Contra Costa county with which Delahaye's car collided. Damages totaling \$5,450 is sought.

Business Bulletin of the La Salle Extension University, Chicago, reports lumber activity on a more healthy basis at this time than last year, owing to better regulation of production and stocks on hand. New orders holding up well. Cement output increasing, but less than last year; shipments also greater, but increase in stocks on hand is unfavorable factor. Brightest prospects in building materials field are for companies dealing in specialties.

Completion of the San Francisco Bay bridge from San Mateo to Hayward by June, 1929, is forecast by A. W. Deuel, resident engineer in charge of construction. The seven-mile structure is already one-fourth completed. More than 2000 piles have been driven and 99 concrete sections of roadway are in place. Work on approaches is going ahead so they will be ready for use as soon as the bridge is completed.

Mr. E. R. Cawley, British Vice-Consul, Alaska Commercial Bldg., San Francisco, represents manufacturers of white, uniform shaped paving blocks, made from molten blast furnace slag run into moulds and then annealed, desire to establish a market here for these blocks. Price is about \$5.50 per ton f. o. b. Middlesbrough, England.

Building permits in Seattle of May, 1928, while greater in number, fell off about \$60,000 from the figures of May, 1927. Thus far this year the activities are approximately \$3,000,000 greater than for the corresponding period in 1927. May, 1928, activities totaled \$2,595,630 as compared with \$2,659,555 for May, 1927. There were 939 permits issued last month and 935 during May, 1927.

In the East Bay District, Oakland leads in May building operations with a total of 424 permits issued for improvements involving an expenditure of \$1,272,965. Berkeley reports 182 permits with a total of \$459,351; Alameda with 64 permits totaling \$168,355; Piedmont with 20 permits for \$130,249; San Leandro, 13 permits, \$43,995 and Richmond with 58 permits for improvements costing \$86,800.

is in the market for 1,550 feet of 8-inch to 10-inch tarred, or otherwise protected from the elements, steel pipe, to conduct water from flume to Pelton water wheel and of sufficient gauge to answer the purpose under 700 feet head. Also, 1500 feet of 2-inch boiler tubing, or reconditioned screw casing, to conduct air from air compressor to mine, tar dipped; and 800 feet of 1½-inch similar pipe to serve air drills within tunnel, also dipped in tar. They prefer prices F.O.B. Yreka, also desire shipping weights and catalogs, and wish to know to what pressure the last two items are guaranteed.

To bring together an interesting collection of well-designed school buildings in which common brick has been used for the exteriors is the announced purpose of the third annual common brick competition by the Pacific Northwest Brick and Tile Association. "Skillful design and ingenious disposal of various brick patterns, joints, bonds and textures" probably will determine to considerable extent the rating of the various designs submitted in the contest. A total of \$2100 in prizes is offered. The competition is open to two classes—buildings having (1) more, (2) less than 700,000 cu. ft. Prizes for each class are the same: First prize, \$500; second, \$250; third, \$100; four honorable mentions, \$50 each. A grand prize of \$500 will be given to the best building, regardless of class in which it is entered. Good photographs, floor plans and cubic footage are all that the architect must submit to compete. Entries may be made until November 6, 1928. Details may be obtained from the Association's office in the Arctic Building, Seattle.

Palo Alto building permits in May aggregated an expenditure of \$91,449 as compared with \$141,740 for the corresponding period in 1927. There were 33 permits issued last month as compared with 52 in the same month in 1927. Six residences undertaken last month involved an expenditure of \$48,200.

Reno, Nevada, during May, 1928, reports the issuance of building permits involving an expenditure of \$89,450 bringing the total expenditure for the year to date to \$586,820, as compared with \$385,100 in 1927 and \$350,675 for the corresponding period in 1926.

Building permits issued in Portland, Ore., for May, 1928, totaled \$2,940,977, a decrease of \$1,765,182 against the same period in 1927 when the figure was \$4,706,109. This year 875 permits were issued as against 945 last year.

TRADE NOTES

W. A. Davis, B. Heinrich and C. G. Smith will operate from 463 Harrison st., San Francisco, under the firm name of West Coast Elevator Company.

G. J. Doering Building Co., of San Francisco, has been incorporated with a capital stock of \$20,000. Directors are: G. J. Doering, L. A. Doering and F. J. Doering.

International Wood Preservative Co., of Oakland, capitalized for \$100,000, has been incorporated. Directors are: Geo. E. Sheldon, John W. Brown and Paul A. Brown, all of Oakland.

Efforts to surpass last year's output of 1,000,000 bricks will be made this year by the Table Mountain Clay Products Company of Butte county. It is announced by L. F. Riley, president of the company. The capacity of plant is between 15,000 and 20,000 bricks daily.

The DeGarmo Research Corp., Kingston, N. Y., manufacturers of an automatic fire extinguisher, retailing at \$3.50, wish to appoint several representatives in California to handle exclusive territories.

National Phone Holder Corp. (Mr. R. E. Johns, Manager), 203 South Dearborn St., Chicago, Ill., manufacturing an extremely simple and useful patented phone-holding device wish to appoint a selling agent in this territory.

Mountain Quarries in El Dorado county, near Auburn, will reopen at once with a force of fifty men, according to word from Auburn. The plant is owned by the Pacific Portland Cement Company.

Western Concrete Pipe Co., Los Angeles, has published a 48-page catalog describing its method of manufacturing concrete pipe by the Hume centrifugal method. Many illustrations are given of the manufacturing processes as well as of pipe installations. Hydraulic data in the form of tables and charts are included in the catalog.

Plans for the merger of the Armstrong Manufacturing Company of Huntington, W. Va., manufacturers of electrical appliances, and the New Era Range Corporation, and the formation of a new company to be known as The Armstrong Electric & Manufacturing Corporation, is announced. All of the assets of the old New Era Corporation and the Armstrong Manufacturing Company have been transferred to the new company.

Jay H. Skinner Advertising Agency, (Mr. Clarence W. Payne, vice-president), 728 Chronicle Bldg., Houston, Texas, represents a paint manufacturer who desires to secure a live dealer or distributor in this territory, who will carry a sufficiently large stock to take advantage of promptly filling orders which might accrue from advertising in this locality.

Federal Pipe and Tank Company, Ballard, Wash., has purchased the Cascade Pipe and Flume Company, operating a plant in West Seattle. Both concerns are manufacturing identical lines, consisting of wood pipe of the wire-bound and continuous-stave types and of wood tanks for water storage and fire protection. Their wood pipe, made of Douglas fir, is extensively used throughout the United States and in foreign countries, for city water supply, irrigation systems, mining operations, sewerage systems, etc.

ALONG THE LINE

A. H. Knoll, architect, announces the removal of his offices from 222 Kearny St., to Room 729 Hearst Bldg., San Francisco.

Chas. A. Newhall, consulting chemist of San Francisco and Seattle, Wash., has severed his connection with the Clay Products Association.

The annual convention of the American Water Works Association will be held in San Francisco, June 11-15. Sessions will be held at the Fairmont Hotel. This meeting of the association is the first held west of Denver.

Builders' Exchange of Beaumont, Tex., is looking for an experienced secretary. If you are interested communicate with Herman Weber, 312 Perlstein Bldg., Beaumont, Texas.

Annual family outing of the Modesto Chapter, American Association of Engineers, was held May 27 at the Don Pedro Dam. An inspection of the dam and power house of the Modesto Irrigation District was a feature of the day. Claude Waldo was chairman of the committee in charge of arrangements.

Talk about speed in construction! C. H. Keller, president of the Contractors' Equipment Company of Detroit, uses an airplane for traveling 20,000 miles a year in the conduct of his business. He alternates with his mechanic in piloting the plane.

G. C. Grubb has resigned as chief assistant city engineer of San Jose to accept a position as resident engineer for Canadian Industries, Ltd., at the high explosives plant at James Island, B. C., operated by Canadian Giant, Ltd., a subsidiary of Canadian Industries, Ltd.

Ernest A. Rolison, former city manager of Redding and later occupying a similar position in Santa Barbara, until voters abolished the city manager form of government, has been named city manager of Coronado.

George F. Whittemore, civilian engineer, U. S. Engineer Corps, has been transferred from San Francisco to St. Louis, Mo., detailed to preliminary "scientific studies" on the Mississippi River. Mr. Whittemore has been connected with the Engineer Corps work on the Pacific Coast for many years, particularly in connection with jetties and harbor improvement projects.

C. L. McKesson, material and research engineer for the California State Highway Commission for the past five years, has tendered his resignation, effective June 15. McKesson is to accept a position with the Bituminous Corporation and will engage in technical supervision of the use of emulsified asphalt for road purposes throughout the United States. His office will be in San Francisco.

Members of the Woodland Rotary Club were addressed June 5 by Winfield Scott, director of public relations of the National Lumber Manufacturers' Association. His talk was illustrated with colored slides. The topic was "Forestry and Reforestation of the Pacific Coast."

Fresno building permits during May totaled \$126,710 bringing the total operations of the year to date to \$911,161. May, 1927, operations registered a total of \$178,508.

HERE — THERE — EVERYWHERE

The necessity for revision of the Stockton city building code was stressed at the regular meeting of the Stockton Builders' Exchange, June 4, by Jesse E. Duffy, city building inspector and Wm. A. Curtis, assistant inspector. The code has been altered so many times to meet changing conditions, Duffy said, that complete revision will be necessary to make it satisfactory. Considerable opposition to the proposed uniform building code for the entire state, was expressed.

"Do not overlook the fact that safety of employees and the public must be given first consideration," wrote C. H. Fennell, chief engineer for the Chrysler Corporation, in a letter to all contractors engaged on projects for this automobile manufacturing concern. He suggested that meetings be called with all responsible heads of departments and subcontracting organizations within a short time so that safety matters might be fully planned and carried out.

A questionnaire sent to individuals who had entered trade apprenticeship in the State of Wisconsin previous to 1923 revealed that those who completed apprenticeship training were earning 40 per cent more than those who had started and dropped out. Sixty-five per cent of those who had dropped apprentice training acknowledged that they were earning less than they would have earned had they kept on, while 62 per cent announced that if they had it to do over again, they would have kept on with their apprentice work. Unemployment amongst those who had completed apprentice training was 1 per cent, while it was 5 per cent amongst those who had canceled indentureships.

Concrete Engineering Co., engaged in the sale and fabrication of reinforcing steel with headquarters at 1289 Indiana St., have filed an application for membership in the San Francisco Builders' Exchange. Application for membership has also been filed by the Diamond Springs Lime Co., manufacturers of lime-stone, quicklime and lime hydrate. The company operates a plant at Diamond Springs, El Dorado County.

Holdener Construction Co. of Sacramento, has filed articles of incorporation secured in the State of Nevada with Secretary of State Frank C. Jordan, showing 200,000 shares of no-par stock, and naming Frank A. Holdener, Luke D. Packard and Allen J. Wagner, all of Sacramento. Fontaine Johnson is resident agent of the corporation.

Brinkvalve Corp., (Mr. Harry Smith), 141 Broadway, New York City, N. Y., has placed on the market a new instantaneous water heater with every safety device which has passed every gas test in the East. They are desirous of being represented in this city for their popular priced heater.

May, 1928, building operations in Salinas involved an expenditure of \$182,675, as compared with \$128,795 for the corresponding period in 1927, according to H. F. Butler, city building inspector. Thirty-three new structures were started in Salinas last month.

May, 1928, building permits at Eureka involved an expenditure of \$41,125, as compared with \$34,090 for the corresponding period in 1927.

Trade Literature

National Gypsum Co., with general offices at Buffalo, N. Y., has issued an announcement to over 15,000 dealers telling of the "National Gold Bond Tile Board"—the first gypsum tile ever perfected. The product is now ready for the market. Architects, dealers and contractors are invited to write for decorated samples.

Celite Products Co., 1320 Hope St., Los Angeles, has issued a bulletin on workability, entitled "Designing Concrete for Workability as Well as Strength." In this bulletin information is given on the use of Celite as an admixture in concrete and how additional strength is thus obtained by means of increased workability. The bulletin contains interesting data on this important subject.

National Paving Brick Manufacturers Assn., 830 Engineers Bldg., Cleveland, Ohio, has issued a booklet entitled "Brick Pavements In The Making." The publication is intended to show, by reviewing processes of manufacturing and laying paving brick and the advantages claimed for this type of paving.

American Rolling Co., Middletown, O., has published a 41-page booklet entitled "The Story of Armco." The booklet tells the story of the origin and development of the company, of its pioneering in iron and steel research and its development of a world market for its standard and specialty products and of its policies which are to form the basis for its future growth.

General Electric Co., Schenectady, N. Y., has published a 27-page bulletin GEA-161-B illustrating and describing its various types of "Novalux" floodlighting projectors. Many illustrations are given of important public buildings throughout the United States in connection with which these floodlights are used. Tables of dimensions and capacities are also included. Projectors are shown for such services as railroad yards, searchlights, aviation beacons, airport boundary lights and intermediate aviation field lights.

Gypsum Industries, Chicago, Ill., has made available a new booklet in which is given a discussion of gypsum partition tile by Henry J. Schweim, chief engineer of the Gypsum Industries. The booklet contains a number of illustrations of partition tile in various office buildings and hotels throughout the country. It points out such advantages of the tile as ease of erection, saving in dead load, ease of alteration, and provision of ground insulation and fire protection. Several pages of specifications and drawings are included.

SEA WATER DYNAMO GENERATES POWER

The dream of limitless power from the sea is taking form in a laboratory installation set up by Georges Claude, inventor of liquid air, at Ougree-Marihay, on the Meuse river, near Liege, Belgium. Claude recently reported to the academy of sciences that a dynamo was being driven by utilizing the 46 degrees Fahrenheit difference of temperature between the surface water and that at a considerable depth. A 50-kilowatt generator, he said, was producing 40 kilowatts of power, much more than enough to do the pumping necessary in the process.

PATENTS

Granted to Californians as reported
by Munn & Co., Patent Attorneys

Geo. C. Martin, of Los Angeles. PROCESS OF TREATING AND FORMING PIPE. A pipe made water-resisting in a simple and inexpensive manner with in a minimum of time by applying asphalt, water-proof cement or cement with diatomaceous earth which makes the cement ten times as resistant to percolation of water as ordinary cement.

Dudley Baird, of Berkeley. ROASTING FURNACE CONSTRUCTION. Providing an improved, inexpensive, durable form of rabbie arm and shaft hub, with improved interconnection of the conduits of the arms and shafts.

Herman F. Zimmerman, of Los Angeles. DOWEL. A novel form or a metallic contractible dowel pin securing itself permanently in wood or similar material when driven "home."

Aloysius F. Mantz, of Los Angeles. SPRING SASH BALANCE. Entirely automatic in action, capable of being readily adjusted so as to regulate the tension of the spring in relation to the weights of the sash with which the balance is associated.

Julius G. Lengel, of Los Angeles. LIGHTING FIXTURE. Detaches and interlocks the parts together in a practical and convenient manner.

Frank Wilson, of Los Angeles. RAIL AND TIE CLAMP. An improved device facilitating railroad building, holding a rail securely bound to a tie, while serving as a resting plate for the rail and a protection for the tie, so that the former cannot cut into the latter and induce decay therein.

Claude E. Bowers, of Los Angeles. PIPE HANGER. A device for suspending quickly and in properly adjusted position sewer and waste pipes from the floor joists of buildings when installing the plumbing equipment.

Arthur I. Marcum, of Oakland. DRIVE AXLE. Providing a single reduction gear through-drive axle for use on vehicles having a pair of drive axles arranged in tandem.

William Hallberg, of Los Angeles. FIREPLACE. Effecting a constant circulation of air into and out of the room so as to insure at all times a constant supply of fresh heated air to the room, and having a fire box so correlated with the fireplace as to permit unlimited expansion thereof when heating without bulging or in any distorting the walls of the fireplace.

SUB-CONTRACTOR SUED

Thomas Englehart, doing business as the Englehart Paving and Construction company, Eureka, which has the contract for clearing the right of way for the state highway beyond Orick, has begun suit against F. M. Brown, and the Southern Surety company, bondsmen for Brown, to recover \$20,000 the amount of Brown's bond, as sub-contractor under plaintiff. Englehart in his complaint alleges that Brown failed to carry out his contract, compelling plaintiff to complete the work at an expense of \$11,894.88, besides \$4,981.09 plaintiff was compelled to pay for labor and supplies furnished Brown. Also plaintiff asks for \$4,000 damages. These items total \$20,876.97, but plaintiff sues only for the amount of Brown's bond.

Redwood City building permits during the month of May represented an expenditure of \$68,533 as compared with \$48,525 in May, 1927. April, 1928, activities registered \$96,800.

UPON WHOM DOES THE STRENGTH OF A STRUCTURE DEPEND? - ANSWER

(By D. C. Willett, in Construction News, Official Publication of Sacramento Chapter, A. G. C.)

A chain is no stronger than its weakest link—so it is with a structure.

A well designed structure is one in which the strength of the various units are equal, considering the load carried. In other words, it is a waste to design one unit twice as strong as another carrying corresponding loads.

The structural materials of today can be classed into two general groups:

One is the material which is received at the job as a unit, such as structural steels, etc.

The other—material which must be manufactured at the job, such as concrete, etc.

The strength of a structure in which steel is used is determined generally by the strength of the various connections. For instance, let us consider a steel frame structure. The strength of the members of this structure are known. When steel is manufactured under close inspection, it is a known fact that there is very little difference in the strength of a given grade—the connections of this steel frame will, if properly designed, develop the strength of the members.

Consider using reinforced concrete in a similar structure instead of the steel. A strength of concrete is assumed, the size and placement of the reinforcing steel is figured and, if properly designed, the strength is uniform throughout, considering the loads carried.

If in both instances a balanced design has been figured, does this insure a balanced strength in the structure? No.

In the first structure, the strength of the structure depends upon the accuracy in which the connections are constructed. There is a big tendency on the job to ignore this point, which has resulted in a design of excess strength

in order that a balance might be maintained.

In the second structure, reinforced concrete is used which has become a universal material, and is proving a very durable one, even with the careless methods of construction. What is the matter? Our buildings, bridges, etc., are standing. So they are and many of them in excellent condition, although poorly constructed and with no balance whatsoever in their strength, but what a waste! Was it the highest strength developed in the concrete that was assumed—if it was, most structures would fail. On the other hand, it was the lowest strength. Consider the waste with a portion of a single member twice as strong as the remainder of adjoining members carrying the same load, one twice as strong as the other. This is the actual condition in the average concrete structure. The Portland Cement Association, knowing this condition to exist and believing if the same could be overcome there would be a greater economy in concrete construction, thus increasing its use, has spent vast sums of money in experiments and tests. And through these they have arrived at simple methods of overcoming such conditions. The proper placement of the reinforcing steel is as important as the manufacture of the concrete to the strength of structure and it is not uncommon that the strength of structures is reduced by one-half due to carelessness on the job in placing steel.

Regardless of the type of material used, the strength of a structure depends as much on the method of construction as on the design. Under the present practices, is a balanced design constructed? The answer to this question is: No. Can it be had? Yes. Whose fault is it—the engineer's or the contractor's?

ENGINEERING SOCIETIES EMPLOYMENT SERVICE

Further information regarding positions listed in this column is obtainable from Newton D. Cook, Room 715, 57 Post Street, San Francisco, (Phone Sutter 1684).

K-66-X-4918-C-S WOODWORKING ENGINEER, graduate with several years' experience in manufacture of furniture thoroughly familiar with designing plant layouts and woodworking machinery. Should have general knowledge of manufacturing costs. Apply by letter, giving age, and details of education and experience. Location, Middlewest.

R-1654-S SALESMAN, preferably with some training or experience in combustion of fuels to sell standard lines of oil burner equipment to owners and architects. Commission only. Location, San Mateo Co.

R-1696-S DRAFTSMAN, preferably with C. E. training and some experience on highway plotting and computing. Must have recommendations. Salary \$170-200 month. Location, Northern California.

R-1651-S SALESMAN, acquainted with the local machine shop trade to sell tools and supplies. Drawing acct. and commission. San Francisco.

R-1666-S STRUCTURAL ENGINEER, 32-35, pref. technical grad. with good record of experience on structural steel work for sales promotion to architects and contractors. Sales exper. preferred, but not required. Salary open. Apply by letter. Location, San Francisco.

R-1687-S STRUCTURAL ENGINEER, experienced on design of steel and concrete buildings for position in architect's office. Salary \$300 mo. Permanent. Apply by letter. Location, Northwest.

ONE AND ONLY ONE BID

Every bid tendered or every price quoted to any general contractor, architect or owner should be the lowest and the best first time. Any sub-contractor reducing his bid or any material dealer reducing his original quotation should be barred from the building field because he is a menace to everyone concerned. In short, there should be no shopping by either party concerned.

The practice of price-slashing is general everywhere. It involves the architect, the owner, the general contractor, the sub-contractor, the material dealer and the manufacturer, and unless a definite stand is taken against the practice, it will continue to drag the industry to a non-profit plane.

Price-cutting is nothing more than cut-throat competition between men engaged in a business where competition should be limited to the contractor's ability to submit the lowest possible figure the first time he is called upon to render his bid. His knowledge, however, of the general practice of price-cutting after bids are opened prompts him to take precautionary methods. Necessarily, his first bid is not his best bid. He places it higher because he knows it is expected of him to make a reduction.

This condition in the contracting profession will prevail as long as its members tolerate the unscrupulous practice, which is constantly plunging a great industry into a perilous situation. One contractor, however, has not the power, the prestige or the influence to correct the evil. It remains for all the contractors to arrive at a suitable understanding that will stamp out the menace and prohibit for all time to come price-slashing. Such a step would be in the interest of just and equitable principles of the trade.—(L. A. Journal of Commerce).

GOVERNMENT STATISTICS REFUTE ASSERTIONS OF INSURANCE INTERESTS

United States government statistics refute the assertions of insurance interests that 15,000 lives are lost annually due to fire, according to a survey by engineers of the National Lumber Manufacturers Association. The Bureau of Census reports for 1926, the latest year for which figures are available, show there were but 1,650 lives lost in burning buildings. The Census figures list separately loss of life due to "burns," which includes scaldings from hot water, playing with fire-works and matches and similar accidents resulting from fire. Total deaths from both causes are approximately only one-half of the usual estimate attributed to fire casualties.

Of 60 causes of deaths, for which statistics are collected by the Bureau, casualties due to fires in building rank 55th. Puerperal septicemia, a preventable disease, causes nearly four times as many deaths annually; accidental falls ten times as many and automobile accidents sacrifice more than twelve times as many lives as are lost in burning structures. The currently available Census figures, from which these estimates are deduced, cover 89.8 per cent of the estimated population of the United States.

An independent survey recently reported by the fire casualties committee of the National Fire Waste Council gives the annual loss of life due to fire as 4,972. This survey covered nine states hav-

ing a population of more than 34,000,000. The loss of life due to fire was found to be 56.8 per million population during the winter months and 33.5 during the summer months. The annual death rate was 45.2 per million or less than 5,000.

The U. S. Chamber of Commerce in its 1927 fire prevention contest received reports from 279 cities having a combined population of about 25,000,000. The number of lives lost due to fires was reported as 330. On the basis of this survey, the total number of fire casualties for 1927 for the entire country would approximate 1,650, a number equal to the figure reported for the preceding year by the Department of Commerce. In the light of these three surveys, it would appear, according to the engineers of the National Lumber Manufacturers Association, that the 15,000 estimate is considerably out of line with the facts.

HOW LONG WE LIVE

Dr. J. M. Dodson of the American Medical Association says that bookkeepers win the race from cradle to the grave with an average of 36.5 years; doctors 62 years; railroad trainmen, 37.4; plumbers, 39.8; machinists, 42.9; painters, 48.6; coal miners, 51.3; laborers, 52.8; masons, 55.8; farmers, 58.5. The average American life is 47 years.

CUT THROAT COMPETITION RESULT OF METHODS PRACTICED BY OWNERS

"How price cutting, bid peddling and cut throat competition, initiated by the owner, first practiced on the general contractor and then pursued on down the line through subcontractors and material dealers, is cited by Julius Kahn, president of the Tuscon Steel Company, in a recent article in "The Nation's Business." Extracts from his article follow.

—EDITOR.

"I have seen cases where purchasing agents have deliberately printed letterheads of rival companies, made up fictitious propositions, forged the names of competitors, changed dates, changed figures, anything to deceive the seller, to urge him to lower his figure. I was advised only recently regarding the workings of a certain modern, so-called very successful purchasing agent. It may be interesting to tell the story.

Business of Bid Cutting

"A very important railroad had let a contract to a contracting company. It had asked this company to meet the price quoted by the lowest bidder and thereby reduce its own figures by some \$90,000. It advised him in so doing that if any minor changes were needed in the specifications to reduce the cost the railroad would gladly concede the changes. Thereupon, the contractor employed a purchasing agent with a reputation for shrewdness. One of his very first acts was to set a number of steel bidders against each other. One of his first successes was in inducing an important national steel company to reduce its figure by \$91,000. He took one trade at a time and by the usual methods, legal according to modern society rules, he manipulated the subcontracts until he had made a saving which at the time I write amounted to \$250,000.

"One instance of his methods will illustrate my point, and I am using another trade than that really involved. The original low figure on plumbing and heating combined was \$118,000, which allowed a reasonable amount for material, labor, overhead and profit. The subcontractor was eager to get the job, willing in fact to take the work at cost with only a small amount for overhead and no profit. He was hammered down to \$90,000 under the impression that he was being allowed to meet a competitor's figures and to gratify the railroad's desire that he get the contract. At this point, he was asked to divide the figure into plumbing and heating and he divided them arbitrarily, \$55,000 for one, \$35,000

for the other. The nearest competitive figures which the purchasing agent had for plumbing was \$42,000 and for heating \$57,000.

"He then went to the low man on heating, the \$57,000 bidder, and worked the play in about this fashion.

Bad Ethics or Good Business?

"You, of course, realize that you are not low and that I have many figures that are lower than yours. But the railway wants you to have the job and I am willing to let you meet the low figure. Here is a combined figure on plumbing and heating of \$90,000 (and he shows him the written offer). Here, also, is my lowest bid on plumbing alone (and he shows him the \$42,000 bid). If you will take the heating job for \$48,000, that is your competitor's combined figure of \$90,000, less my figure on plumbing, the job is yours."

"The contractor swallowed the argument, took the contract at \$48,000, cutting his figure \$9,000 bitter at his competitor who was supposed to have put in a figure of \$48,000, which was below cost to a point where a friendly discussion between competitors was absolutely impossible. The purchasing agent then turned to the heating contractor and offered him the heating job at \$35,000, the amount he had allowed in his reduced combined bid. He intended to make the combined purchase for \$48,000 plus \$35,000, or \$82,000, for what was actually worth \$118,000.

"He was not successful with the heating contractor who turned down the offer. I don't know at this moment at what price the purchasing agent actually placed the heating contract.

"But what is the use of the industrialist worrying and heaping all bitterness on the purchasing agent?

How Valuable Is Competition?

"Competition sharpens our wits; it strengthens our mental fibre, it creates the solid substance. Incidentally, however, when misapplied, it also kills. Warfare is competition in its keenest form, and we cannot justify war because it primes a nation to its greatest activity, produces wealth, skill, brings forth our greatest men. The success achieved isn't worth the price."

"Is it necessary because competition sharpens our wits, that one man should crush another, that might should make right, that the strong should hold down the weak? Is there not plenty of room for all?"

packed with specific facts and figures including valuable data obtained from owners on initial costs and upkeep expense. It is written for the busy man and can be read in 20 minutes.

"Plain Talk About Concrete Floors" is published by The Master Builders Company, Cleveland. Copies are supplied gratis to engineers, architects, contractors and building owners and operators.

QUEBEC RETAILERS INCREASE PRICE OF HARD AND SOFT LUMBER

The price of both hard and soft lumber will be increased, it is announced at Montreal, Canada, by Arthur McLaurin, president of the Montreal Retail Lumber Dealers' Association. Lumber today is entirely out of line with prices, compared with other commodities, according to McLaurin. The price of softwoods will be increased, McLaurin says, between four and seven dollars per thousand feet and that of hardwoods between ten and fifteen dollars per thousand feet.

Quoting L. W. Halliday, president of the Province of Quebec Retail Lumber Dealers' Association, on the reason for the increase the "Canada Lumberman" says:

"Dealing with the causes for the increases both in hardwoods and softwoods, Mr. Halliday said that the cut in spruce had decreased during the past season by at least 20 per cent, while he put the decrease in the cut of pine at 25 per cent. Further than that, adverse weather conditions had proved a large factor in the cutting of softwoods, besides which a big proportion of spruce was being used in the pulp and paper industry, the operators finding the outlet of lumber through the pulp and paper trade more profitable than using the wood as sawn lumber. In connection with hardwoods, while the cut had increased the demand had been considerably greater than the supply, at least for some grades. This had been due to a great extent to the fact that practically all American automobile coach builders were again turning to wood in the construction of bodies."

HARDWOOD FLOOR CONTRACTORS ISSUE STATEMENT

The Association of Hardwood Floor Contractors of Oakland in a recent statement says:

"In order to obtain high-grade lumber and to bring about a closer understanding between the original source of supply, and the practical ultimate user, a buying corporation was formed some time ago and financed by members of the Hardwood Floor Contractors Association. This elimination of extra channels brought about a better understanding and caused the production of better hardwood flooring lumber to meet the conditions in this particular territory. And, to further stabilize conditions, members are required to pay cash with order for deliveries from their Corporation stocks. This move alone has made a vast saving to the building public.

"Many other progressive steps have been taken: A study of ventilation, sub-floors, and paper in respect to construction and health conditions was made. Color harmony; public protection against liens and inferior installations; merchandising methods, and many other important subjects have been analyzed.

"The Hardwood Floor Contractors Association of the Eastbay hold regular meetings. Vital points for the advancement of hardwood floors and their relations to the scheme of the entire building are discussed. The public is kept advised on various conditions."

Sawmill of the Nibley Stodard Co., at Cromberg, Plumas county, was destroyed by fire May 29. Planing mill, boiler room and lumber stocks were saved.

Modesto reports May building operations totaling \$93,180 as compared with \$56,035 for the same period in 1927.

MASTER BUILDERS COMPANY GIVES PLAIN FACTS ON CONCRETE FLOORS

That the unsatisfactory service rendered by many concrete floors is the result of a mistaken idea in the minds of their owners, is the theme of a book just published entitled "Plain Talk About Concrete Floors." The idea which is responsible for all the trouble, according to the authors, is the attitude that because concrete floors are inexpensive they are "cheap" and, therefore, the lowest bid is the best bargain.

That the economical floor in the long run is the one which is laid with sound, tested materials by skilled workmanship and that later up-keep is inversely proportional to the initial care, is the book's theme. To prove their conclusions, the authors conducted an extensive survey of actual plant floors of various types and have obtained reports from over one hundred and twenty plant engineers in their experiences with cement floor finishes.

For 20 years engineers and builders have been trying to lay floors that will stand up under modern industrial traffic.

"Plain Talk About Concrete Floors" reviews the principal methods that have been used and sums up their relative efficiencies based on the surveys of actual floors and the reports of engineers mentioned.

The Engineering Laboratories of the Ohio State University have co-operated in supplying the information by reporting extensive abrasion tests of cement floor finishes of different types. It is interesting and important to find that the materials and methods which have rendered the most satisfactory and economical service in actual industrial use are found the most efficient by the laboratory investigators.

The book has approximately 40 pages and carries over 50 illustrations. It is

Hilliard E. Welch, Sacramento banker and past grand president of the Native Sons of the Golden West, will be chairman of the general civic committee in charge of the Days of '49 celebration to be held here in the Summer of 1929.

Arthur S. Dudley, secretary-manager of the Chamber of Commerce and secretary of the celebration committee, announced today that Welch had been offered the chairmanship and he had accepted the position. A general meeting of the celebration committee, scheduled for tomorrow night, has been postponed to June 15th, when the nominating committee is expected to submit its recommendations for chairmen of five sub-committees on publicity, program, finance, music and decorations. These chairmen, together with the general chairman and secretary, will comprise the executive committee.

The general committee, which now is composed of two representatives from each civic and fraternal organization in the city, is to be augmented by representatives from other cities in Superior California. Dudley said an invitation will be extended to the mayor and president of the chamber of commerce of each city in the Sacramento region to become members of the committee, as well as a third member to be designated by each community.—Sacramento Bee.

ICE AND COLD STORAGE PLANTS

SAN LEANDRO, Alameda Co., Calif.
 See Residences this issue.

POWER PLANTS

SAN JOSE, Santa Clara Co., Cal.—Pacific Gas & Electric Co., 245 Market St., San Francisco, has provided \$278,800 to finance erection of a new sub-station adjoining the present sub-station of the Coast Counties Gas & Electric Company. It is announced by J. D. Kuster, division manager of the company at San Jose. Will be equipped with four 11,000 h. p. transformers.

MODESTO, Stanislaus Co., Cal.—Until July 2, 2 P. M., bids will be received by C. S. Abbott, Secty., Modesto Irrigation District, to fur. and del. high voltage power transformers in accordance with Specifications No. E-11. Bids will be received for 4-1667 K.V.A. outdoor type transformers for operation at 66,000-volts Star to 11,500 volts Delta. See call for bids under official proposal section in this issue.

MANTECA, San Joaquin Co., Cal.—Pacific Gas and Electric Co., 245 Market St. San Francisco, has purchased additional property adjoining present substation. Land will be used for expansions.

PUBLIC BUILDINGS

REDWOOD CITY, San Mateo Co., Cal.—City sells \$16,000 bond issue for premium of \$625, proceeds of sale to finance erection of new fire station at Myrtle St. and Jefferson Ave. Plans for the building have been completed by Russell & Duncan. Bids will be asked shortly.

EVERETT, Wash.—County Commissioners contemplate erection of courthouse addition costing \$125,000 or more. Will be of Spanish design, fireproof construction.

CHICO, Butte Co., Cal.—City Library Trustees authorize purchase of eight reading room tables and forty-eight chairs; estimated cost \$800.

PHOENIX, Ariz.—Edwards, Wildey & Dixon, Edwards & Wildey Bldg., Los Angeles, awarded general contract at \$263,400 for erecting Phoenix municipal building at Phoenix, Ariz. The general contract for erecting the courthouse section of the building for Maricopa County was awarded to Edwards, Wildey & Dixon by the Board of Supervisors. The contract price was \$474,900. The award was made on the alternative bids for terra cotta facing. The building will be of reinforced concrete construction. Low bidders on other work to whom con-

tracts will be awarded, were: Elliott Engineering Co. of El Paso on heating for the courthouse at \$52,937, and for the city hall at \$27,300; F. D. Reed Plumbing Co., Los Angeles, on plumbing for the courthouse at \$33,870; Phoenix Plumbing & Heating Co. on plumbing for the city hall at \$22,374; English Electric Co., Los Angeles, on electric wiring for the courthouse at \$10,300, and for the city hall at \$3,650; Southern Prison Co., San Antonio, Texas, on jail equipment for the courthouse at \$71,487, and for the city hall at \$39,980. Edw. F. Neild, Shreveport, La., is the architect for the courthouse and Lescher & Mahoney, Phoenix, are the architects for the city hall.

LODI, San Joaquin Co., Cal.—E. P. Wisner, Lodi, at \$22,649 submitted low bid and was awarded the contract by J. F. Blakely, city clerk, to erect one-story brick addition, 50 by 64-ft., to city library. Est. cost, \$23,000. Davis-Pearce, Inc., architects, Grant and Weber Sts., Stockton.

Following is a complete list of the bids with alternates:

Alt. No. 1, add if special linoleum floors are laid.

MAUSOLEUM, ETC. Cost, \$200,000
SAN JOSE, Santa Clara Co., Cal., Oak Hill Cemetery.
 Reinforced concrete mausoleum and columbarium.
 Owner—Oak Hill Improvement Co., Wm. Veith, director, Commercial Bldg., San Jose.
 Engineer—H. J. Brunner, Sharon Bldg., San Francisco.
 Architect—Roller West Co., First Nat'l Bank Bldg., San Francisco.

OAKLAND, Cal.—Until June 14, 12 noon, bids will be received by Frank C. Merritt to fur and del. during fiscal year ending June 30, 1929, among other items, road oil and emulsified asphalt, brick, saturated paper insulated cable, castings, cement, concrete, copper wire, corr. iron culverts, chairs, dry concrete, hardwood and panels, garden and fire hose, incandescent lamps, paints and varnishes, rock and rock screenings, shovels, Wet concrete mix, white lead in oil, etc. Complete listings obtainable from city clerk.

SEATTLE, Wash.—Bids are being received by Architect Carl Siebrand, North Life Bldg., Seattle, associated with Architect Wallace Hubbert, 110 Sutter St., San Francisco, to erect \$1,000,000 mausoleum in Acacia Memorial Park north of Seattle. Fred Burnaby is president of the Acacia Memorial Park Co., Central Bldg., Seattle. Will be L-shape of stone and marble construction, 292 by 190-ft. Oliver E. Lutz of Seattle, has marble contract.

SAN FRANCISCO.—Until June 6, 2:30 P. M., bids will be received by Veda B. Young, Secty., Playground Commission, 376 City Hall, to fur and install lighting fixtures at North Beach Playground. Cert. check 10% payable to secretary of Commission req. with bid. Specifications obtainable from secretary.

SANTA ROSA, Sonoma Co., Cal.—Northwestern Pacific Railroad, 64 Pine St., San Francisco, will have plans prepared for a \$100,000 freight and passenger depot here. Construction will be started as soon as litigation regarding property possessions is settled.

VISALIA, Tulare Co., Cal.—June 28 is date set to vote bonds of \$50,000 to establish municipal airport.

RENO, Nevada—Regents of the University of Nevada contemplate early construction of public service building on Campus. The plan to house the pure food and drug departments for the State Hygienic Laboratory in the Nevada State Building has been abandoned.

OAKLAND, Alameda Co., Cal.—The Twentieth Century Market, now erecting a large market building on 14th and 30th Sts., Oakland, recently purchased property adjoining the proposed market building and will cement same for parking space.

BAKERSFIELD, Kern Co., Cal.—Currie and Duglar, Bakersfield, at \$9,145 awarded contract by county supervisors to erect Airport administration building. Chas. H. Biggar, architect, Bank of Italy Bldg., Bakersfield. Other bids: Opperman and Kampe, \$9,346; J. J. Becker, \$9,521; Henry Elssler, \$9,600; E. B. Harris, \$10,244; Orndorff Construction Co., \$10,500; P. W. Paynter, \$11,052; all bidders of Bakersfield.

BERKELEY, Alameda Co., Cal.—Until June 12, 10 A. M., bids will be received by Emma M. Hann, city clerk, to fur. electric lamps of a quality fixed by the U. S. Bureau of Standards for commercial, residential and street lighting, to the amount of \$2500 to be delivered during fiscal year commencing July 1, 1928. Further information obtainable from clerk.

LOS ANGELES, Cal.—Byerts & Dunn, 7908 Santa Monica Blvd., awarded contract by county at \$41,000 to construct 3-story brick and concrete incinerator building, using new Otis elevator (Proposal B). The mechanical work is not included. Bids received May 28 for the mechanical work were rejected.

SACRAMENTO, Cal.—American River Beach Co., operating a pleasure resort on the American River at the H street bridge, plans to install flood lights for illumination in night swimming events; lay out auto parking area and construct shower rooms.

OAKLAND, Cal.—Preliminary drawings have been submitted to City Commissioner Wm. H. Parker for proposed swimming tank and bathhouse on Adams Point in Lakeside Park on the shores of Lake Merritt. Tank will cost between \$20,000 and \$25,000 and the bathhouse between \$50,000 and \$75,000. NOTE—This project was previously reported at Bakersfield, Kern Co., Cal., which was in error.

ALAMEDA, Alameda Co., Cal.—Headed by James A. Talbot, millionaire manufacturer, and with Lieut. George O. No-ville, companion of Commander Richard E. Byrd on his north pole and transatlantic flights, as advisor, the San Francisco Bay Airdrome, Inc., has petitioned the Alameda city council to remove a zoning ordinance amendment barring the conversion of the University of California tidelands into a giant airport. The tideland area, on the west side of Webster street, was ruled as unsatisfactory for airport purposes recently by the council, which held that the land should be utilized industrially. The new corporation proposed to make an initial expenditure of between \$100,000 and \$150,000, if it can use the site.

BUSINESS OPPORTUNITIES

Want Agent

NEW YORK, N. Y.—Brinkvalve Corp. (Mr. Harry Smith), 141 Broadway, New York, has placed on the market a new instantaneous water heater with every safety device which has passed every gas test in the East. The company desires representation in this section.

CHICAGO, Ill.—National Phone Holder Corp., (Mr. R. E. Johns, Manager), 203-219 South Dearborn St., Chicago, manufacturing an extremely simple and useful patented phone-holding device, wish to appoint a selling agent in this territory.

HOUSTON, Texas—Jay H. Skinner Advertising Agency, (Mr. Clarence W. Payne, vice-president), 728-730 Chronicle Bldg., Houston, represents a paint manufacturer who desires connections with a live dealer in this territory and who will

carry a sufficiently large stock to take advantage of promptly filling orders which might accrue from advertising in this locality.

KINGSTON, N. Y.—The DeGarmo Research Corp., Kingston, N. Y., manufacturers of an automatic fire extinguisher, retailing at \$3.50, wish to appoint several representatives in California to handle exclusive territories.

MYRTLE POINT, Ore.—Holt-Chase Cannig Co., Inc., (Mr. A. C. Chase, Manager), Myrtle Point, Ore., seeks connections with furniture manufacturers and prospective buyers of alder lumber; also firms interested in purchasing moss for backing purposes, etc.

UNITED KINGDOM—Mr. E. R. Cawley, British Vice-Consul, Alaska Commercial Bldg., 310 Sansome St., San Francisco, represents a manufacturer of white, uniform shaped paving blocks, made from molten blast furnace slag run into moulds and then annealed and who desires to establish a market on the Pacific Coast for these blocks. Price is

about \$5.50 per ton f. o. b. Middlesbrough, England.

SAN JUAN, Porto Rico.—L. Rodriguez & Co., Apartado 9940, San Juan, Porto Rico, importer and exporters, seeks connections with California lumber mills, dealing in wood for export, as they are interested in purchasing some quantities of wood to sell in Spain. Will furnish A-I banking and commercial references.

Frank Scott of Kelso, was elected president of the Association of Master Plumbers of Washington at the closing convention session held in Bellingham, May 26. C. G. Tegenfeldt, Bellingham, formerly director, zone No. 6, was named vice-president. R. M. Westover and B. H. Richards, treasurer and secretary, respectively, were re-elected. The closing business session was featured by the address of G. H. Wilson of the trade extension bureau, Evansville, Ind., on cost accounting and merchandising.

Larsen's Advance Construction Reports

Your silent salesman—issued every business day in the year—featuring work projected, bids wanted, bids opened and contracts awarded for every class of building; bridges, dams and harbor works; irrigation projects; U. S. Government work and supplies, street, highway and sewer improvements; water works; miscellaneous supplies and equipment, etc., etc.

Larsen's Advance Construction Reports are compiled by a staff of trained correspondents located in the more important business centers in Central and Northern California. Each and every correspondent knows his territory thoroughly and the men most concerned in it, namely, the architects, contractors and material dealers—who keep him or her informed of the latest developments in the construction field in his particular territory.

Larsen's Advance Construction Report Service is a special service compiled at a tremendous cost and yet is sold for a price within the reach of all among which the information should circulate. Each and every report is a prospect for business.

Write for sample copies or have our representative call and explain this service.

BRIDGES

TULARE COUNTY, Cal.—As previously reported, bids will be rec. by State Highway Comm., June 20, to const. 3 reinf. conc. bridges bet. Tulare and Goshen. Project involves: Const. timber detour bridge: 160 cu. yds. rdwy. excav. without classification; 285 cu. yds. struct. excav. without classification; 350 lin. ft. detour surf.; 195 cu. yds. Class "A" and 14 cu. yds. Class "E" cem. conc.; 22,600 lbs. reinf. steel; 240 cu. yds. struct. backfill.

PLACER COUNTY, Cal.—As previously reported, bids will be rec. June 20 by State Highway Comm., to const. reinf. conc. girder bridge over Truckee River at Tahoe City, consisting of four 30-ft. spans on conc. bents and abutments with wing walls. Project involves: Const. timber detour bridge; 1150 cu. yds. channel excav. without classification; 450 cu. yds. struct. excav. without classification; 110 tons detour surf.; 435 cu. yds. Class "A" and 15 cu. yds. Class "E" cem. conc.; 72,000 lbs. reinf. steel; 400 cu. yds. struct. backfill. State will fur. corr. metal pipe and the timber for the detour bridge.

PLACER COUNTY, Cal.—As previously reported, bids will be rec. by State Highway Comm., June 20, to const. reinf. conc. girder overhead crossing over tracks of S. P. R. R. at Weimer, consisting of one 47-ft. 6-in. span, one 46-ft. 1-in. span, four 30-ft. spans and one 28-ft. 6-in. span, on conc. piers and bents on pile foundations. Project involves: 600 cu. yds. struct. excav. without classification; 2700 lin. ft. furnish Douglas fir piles; 100 each, driving Douglas fire piles; 165 cu. yds. Class "B," 570 cu. yds. Class "A" and 25 cu. yds. Class "E" cem. conc.; 113,500 lbs. reinf. steel; 420 cu. yds. struct. backfill.

CONTRA COSTA COUNTY, Cal.—Southern Pacific Co., 65 Market St., San Francisco, has definitely decided to const. double track steel bridge over Carquinez straits bet. Port Costa and Benicia to replace present train ferry operations. All be single level structure of silicon steel and will be located 6½ mi. east of Crockett extending from Army Point on the north shore to Suisun Point on the south. From abutment to abutment the new span will be 5597 feet long with 70 ft. clearance above water at mean high tide; will consist of a 750 ft. steel girder viaduct, ten 480 ft. spans, one 384 ft. deck span and one 327 ft. lift span, all resting on conc. piers. Electrically operated lift span will clear water traffic without opening the draw. When open the span will be 135 ft. above mean water level.

NAPA, Napa Co., Cal.—City Eng. H. A. Harrold completes plans for reinf. conc. bridge over Napa river in Third St., involv. 4000 cu. yds. excavation; 3100 cu. yds. conc.; 358,000 lbs. reinf. steel; 6080 lin. ft. Douglas fir piles. Will consist of 3 spans, 150 ft. long; 60 ft. wide.

STANISLAUS COUNTY, Cal.—Until June 18, 2 P. M., bids will be rec. by R. E. Pierce, dist. eng., State Highway Commission, Capitol Extension Bldg., Sacramento, to grade and surface with oil treated crushed gravel or stone and const. timber trestle approach at the south side of Stanislaus River bridge. See call for bids under official proposal section in this issue.

SANTA ROSA, Sonoma Co., Cal.—Until June 28, 12 noon, bids will be rec. by W. S. Coulter, county clerk, to const. reinf. conc. bridge at Walter Elphick ranch in 2nd Sup. Dist., involv. 88.68 cu. yds. class A conc.; est. cost \$2500. Plans obtainable from County Surveyor E. A. Peugh.

SANTA ROSA, Sonoma Co., Cal.—Until June 28, 12 noon, bids will be rec. by W. S. Coulter, county clerk, to const. reinf. conc. culvert at Sta. 821 plus 55 Petaluma-Valley Ford Highway, in 2nd Sup. Dist., involv. 35.56 cu. yds. class A conc.; est. cost \$950. Plans obtainable from County Surveyor E. A. Peugh.

PETALUMA, Sonoma Co., Calif.—A. Schlunegger, Petaluma, at \$853 awarded contract by city to const. conc. culvert in Keokuk street extension.

SANTA ROSA, Sonoma Co., Cal.—A. T. Howe, Santa Rosa, at \$2,125 awarded contract by county to const. reinf. conc. bridge at Sta. 20-65 State Highway to Glen Ellen road in First Sup. Dist., involv. 80 cu. yds. reinforced conc.

SAN MATEO COUNTY, Cal.—W. T. Burke, 290 Davis St., San Francisco, awarded cont. by J. D. Neal, contractor, to fur. Williams Form Clamps for bridge and culvert on Baysore Highway in San Mateo county.

DREDGING, HARBOR WORKS AND EXCAVATIONS

SAN RAFAEL, Marin Co., Cal.—Until June 13, 8 P. M., new bids will be received by Oliver Hartzell, Secty., Board of Education, for approx. 80,000 cu. yds. mud fill on high school grounds, also to construct retaining levees for fill. Cert. check 10% req. with bid. Spec. obtainable from Secty. Bids previously received were rejected.

BERKELEY, Alameda Co., Cal.—City Eng. A. J. Eddy making surveys and will submit estimates of cost to city council to fill in 160 acres of land north of the Golden Gate ferry pier to be used for municipal airport. A bond election will be submitted in November to vote funds to finance the project.

SALINAS, Monterey Co., Cal.—County Surveyor Howard Cozzens making surveys and estimates of cost for control of high waters of the Pajaro river during winter rains. Proposed to dredge river and const. levees.

IRRIGATION PROJECTS

ORANGE COVE, Fresno Co.—Until July 3, 10 A. M., bids will be rec. by L. J. Williams, Secty., Foothill Irrigation District, Sheridan Bldg., Orange Cove, to const. complete system of irrigation works in district. Max W. Enderlein, engineer, Brix Bldg., Fresno. Cert.

CONTRACTOR'S BOND—LIENS

There is a decided relationship between the law governing the establishing of mechanics' or material men's liens and the law fixing liability on the bonds of a contractor engaged in public work, but the statutes have different objects and the bond is not restricted to what would give a lien. Gasoline furnished a sub-contractor used as fuel in highway work created a liability under a bond, whereas it would not have given rise to a lien—Eagle Oil Company vs. Aultman, Oklahoma.

COMBINATION MIXER AND HOIST

Hoist and Mix with Same Outfit

Why not use One Power Plant and save one operator?

The heavy duty hoist can be used independent of mixer for all general hoisting work

Official Proposals

NOTICE TO CONTRACTORS

(Lazear School Addition—Oakland)

OFFICE OF THE SECRETARY OF THE BOARD OF EDUCATION OF THE CITY OF OAKLAND.

Notice is hereby given that the Board of Education of the city of Oakland and of the Oakland School District of Alameda County, hereby calls for sealed proposals to be delivered to the Secretary of said Board, Room 211, City Hall, Oakland, California, until Tuesday, the 19th day of June, 1928, at 11:00 A. M., at which time said bids will be opened for the erection and completion of the Addition to the Lazear School, of the Oakland School District, to be erected on the northeast corner of 29th and Elmwood Avenues. These bids shall be presented in accordance with the plans and specifications for said building on file in the office of the Secretary of the Board of Education, City Hall, and in the office of the Superintendent of Buildings, 337 17th Street, Oakland, California.

Separate bids will be received for:

- (1) General Work.
- (2) Awning Type Window Fixtures.
- (3) Slate Blackboards.
- (4) Linoleum.
- (5) Finish Hardware.

On a deposit of Twenty-five (\$25.00) Dollars, complete sets of plans and specifications may be had by any bidder on application to the Superintendent of Buildings at his office hereinbefore mentioned, and General Contract Plans shall be returned June 20, 1928, and all other plans shall be returned within five (5) days after securing same, to the Superintendent of Buildings. If the plans and specifications are not returned within said time, or if mutilated, the said deposit shall be retained by the said School District as agreed and liquidated damages for said mutilation or detention.

Bids must be made on proposals obtained at the office of the Superintendent of Buildings, and be signed by the bidder and accompanied by a certified check, certified to by some responsible bank or banker, and made payable to the Board of Education of the City of Oakland and of the Oakland School District to be retained by said School District as agreed and liquidated damages should the party or parties to whom the contract should be awarded fail to enter into the contract after the award or to give bonds required for the faithful performance of the contract, or any bond required by law. The amount of said check shall not be less than ten (10%) per cent of the amount bid, provided, however, that in no case shall said check be required to be in excess of Five Thousand (\$5000.00) Dollars. Each bidder shall execute the affidavit accompanying the proposal obtained from the Superintendent of Buildings.

Bids will be opened by the Board of said District on Tuesday, the 19th day of June, 1928, at 11:00 A. M., in the Board Room, 211 Second Floor, of said City Hall, in said City of Oakland. The Board reserves the right to reject any and all bids or any or all items of such bids.

JOHN W. EDGEMOND,
Secretary of the Board of Education of
Oakland, California.

NOTICE TO CONTRACTORS

(Administration Building—Oakland)

OFFICE OF THE SECRETARY OF THE BOARD OF EDUCATION OF THE CITY OF OAKLAND.

Notice is hereby given that the Board of Education of the city of Oakland and of the Oakland School District of Alameda County, hereby calls for sealed proposals to be delivered to the Secretary of said Board, Room 211, City Hall, Oakland, California, until Tuesday, the 19th day of June, 1928, at 10:45 A. M., at

which time said bids will be opened for erection and completion of the Administration Building, of the Oakland School District, to be erected on the west side of Second Avenue, between East Tenth and East Eleventh Streets. These bids shall be presented in accordance with the plans and specifications for said building on file in the office of the Secretary of the Board of Education, City Hall, and in the office of the Superintendent of Buildings, 337 17th Street, Oakland, California.

On a deposit of Twenty-five (\$25.00) Dollars, complete sets of plans and specifications may be had by any bidder on application to the Superintendent of Buildings at his office hereinbefore mentioned. Plans taken out by bidders on or before June 19, 1928, shall be returned on or before June 20, 1928. If the plans and specifications are not returned within said time, or if mutilated, the said deposit shall be retained by the said School District as agreed and liquidated damages for said mutilation or detention.

Bids must be made on proposals obtained at the office of the Superintendent of Buildings, and be signed by the bidder and accompanied by a certified check, certified to by some responsible bank or banker, and made payable to the Board of Education of the City of Oakland and of Oakland School District, to be retained by said School District, as agreed and liquidated damages should the party or parties to whom the contract should be awarded fail to enter into the contract after the award or to give bonds required for the faithful performance of the contract or any bond required by law. The amount of said check shall not be less than ten (10%) per cent of the amount bid, provided, however, that in no case shall said check be required to be in excess of Five Thousand (\$5000.00) Dollars. Each bidder shall execute the affidavit accompanying the proposal obtained from the Superintendent of Buildings.

Bids will be opened by the Board of said District on Tuesday, the 19th day of June, 1928, at 10:45 A. M., in the Board Room, 211 Second Floor, of said City Hall, in said City of Oakland. The Board reserves the right to reject any and all bids or any or all items of such bids.

JOHN W. EDGEMOND,
Secretary of the Board of Education of
Oakland, California.

(D)

NOTICE TO BIDDERS

(Modesto Irrigation District, Stanislaus County, California)

Sealed proposals will be received at the office of the Modesto Irrigation District at Modesto, California, until 2 o'clock P. M., on the second day of July, 1928, for furnishing and delivering to the Modesto Irrigation District High Voltage

Power Transformers in accordance with Specifications No. E-11. Bids will be received for 4-1667 K.V.A. Outdoor Type Transformers for operation at 66,000 volt Star to 11,500 volts Delta.

Proposal blanks and detail specifications to be obtained from the Secretary of the Modesto Irrigation District.

Contract will be let to the lowest responsible bidder, but the Board of Directors reserves the right to reject any and all bids.

Each proposal must be accompanied by a certified check or bidder's bond for 10% of the amount bid, payable to the Modesto Irrigation District as a guarantee that the bidder will, if successful, execute a contract within ten days of notice of award and furnish a satisfactory bond of not less than 25% of the contract price for the faithful performance of the work in accordance with the Specifications No. E-11.

The proposal must be marked as directed in said specifications and addressed to the Secretary of the Modesto Irrigation District, Modesto, California.

Done in pursuance of an order of said Board of Directors of the Modesto Irrigation District this 29th day of May, 1928

MODESTO IRRIGATION DISTRICT

By H. G. JACOBSEN, President

By C. S. ABBOTT, Secretary.

NOTICE TO CONTRACTORS

(Barrack Building Repairs—Fort Miley)

Office Constructing Quartermaster, Ft. Mason, Calif. Sealed proposals will be received here until 11:00 A. M., June 11, 1928, for repairs to slate roofs, gutters, downspouts, etc., on one barrack building and two sets of officers' quarters at Fort Miley, Calif. Information on application.

(D)

NOTICE TO CONTRACTORS

(Pumps, Etc.—West Stanislaus Irrigation District)

Sealed proposals will be received by the Directors of the West Stanislaus Irrigation District, at their office in Westley, Stanislaus County, California, up to two o'clock P. M. (2:00 P. M.) Saturday, July 14th, 1928, and will at that time be publicly opened, for furnishing 1 electrically driven pumping units, eleven (11) discharge pipes and valves for future pumps, six (6) outdoor switch structures and eighteen (18) transformers under any or all of the following schedules:

A. Furnish all pumping and electrical equipment including outdoor switch structures, transformers, switch gear, motors, pumps, discharge pipes and valves including eleven (11) discharge pipes and valves for future pumps, installed and ready to operate.

B. Furnish all pumping and electrical equipment including switch gear, motors, pumps, discharge pipes and valves including eleven (11) discharge pipes and valves for future pumps but exclusive of all conduit and cable compensators to motors, f. o. b. cars Westley, Calif.

C. Furnish all outdoor switch structures and transformers including insulators, bus supports and bus necessary to connect transformers to Station bus; also supply oil with transformers, f. o. b. cars Westley, Calif.

D. Install all equipment furnished under schedule "B" ready to operate including hauling of said equipment from cars to point of installation and furnish conduit from compensators to motors for 28 pumping units and cable from compensators to motors for 17 pumping units.

E. Install and connect up ready to operate all equipment furnished under schedule C including the hauling of said equipment from cars to point of installation and the connecting of the low voltage transformer bus to the station bus.

All proposals must be accompanied by a certified check for at least five (5%)

A call for bids published in this section indicates that bids are desired from other than local bidders. Maximum competition is desired, and this is assured through BUILDING AND ENGINEERING NEWS, which reaches every worth-while contractor and materialman in Central and Northern California who bids on public work.

Rate: 10 cents per line, per insertion.

All official calls for bids of the California State Highway Commission and Nevada State Highway Commission are published in this section.

percent of the amount of the bid submitted, in favor of the West Stanislaus Irrigation District.

All certified checks accompanying rejected bids will be returned.

Certified check of the successful bidder will be returned when the contract has been executed and the required bonds furnished.

In case of failure to execute contract or furnish the required bonds within the stipulated time, the certified check and the proceeds thereof will become and remain the property of the West Stanislaus Irrigation District.

Plans, specifications and contract are on file and can be inspected at the District's office at Westley, California, or at the office of the District's Engineer, W. F. Woolley, at Patterson, California.

A full set of plans, specifications and contract may be obtained at the Engineer's office or at the District's office on deposit of \$10.00 for each set, which sum will be returned on the return of same in good condition within ten days after the date on which the bids are opened.

The contract will be let to the lowest responsible bidder, except that the District reserves the right to reject any and all bids and to waive any irregularities in the bidding. Bids will be opened at the District's office at Westley, California, Saturday, July 14th, 1928.

By order of the Board of Directors of the West Stanislaus Irrigation District.

ELBRIDGE SMITH,
Secretary of the Board of Directors,
Westley, Calif.
June 1, 1928.

(D)

NOTICE TO CONTRACTORS

(Irrigation Works—Foothill Irrigation District)

Notice is hereby given that the Board of Directors of the Foothill Irrigation District will receive bids for the furnishing of the necessary material, and performing the necessary labor required for the installation, construction and completion of a complete system of irrigation works for said district;

That said system of irrigation works is shown and delineated on the plans and specifications therefor, heretofore adopted by said Board of Directors, which said plans and specifications can be seen at the office of the Board, in the Sheridan Building, Orange Cove, California, or at the office of Max W. Enderlein, the Engineer of said District, in the Brix Building, Fresno, California.

Bids will be received by said Board of Directors for the doing of said work up to the hour of 10:00 A. M. of Tuesday, the 3rd day of July, 1928, and said bids or proposals must be submitted on forms to be furnished by the District, and must comply with the general specifications in so far as the same relate to the bids for doing said work, and said bids may be filed with the Secretary of said Board, the office thereof, at any time prior to the hour above named, and that at the time and place named, the Board of Directors will publicly open said proposals, and the contract will be let to the lowest responsible bidder; provided, however, that the Board reserves the right to reject any and all bids.

All bids must be accompanied by a certified check for the sum of ten per cent (10%) of the amount bid, and the bids of said check shall become the property of the District. If the bidder fails or refuses to execute the required contract and bond, as required by said specifications.

The person, firm or corporation to whom the contract may be awarded shall be required to file with the District a surety bond to be approved by the Board of Directors in a sum not less than twenty-five per cent (25%) of the amount of the contract, conditioned for the faithful performance and completion of the work according to the specifications and contract, as provided under Section 53 of the Irrigation District Act, and a surety bond to be approved by the Board of Directors in an amount not less than fifty per cent (50%) of the contract price for the payment in full of all persons, firms, companies or corporations who furnished materials, provisions, provender, or other supplies or teams used in, upon, for, or about the performance of the work, or for any work or labor done thereon, of any kind, as provided in the Act of May 10th, 1919, and acts amendatory there-

of and supplemental thereto.

This notice is given pursuant to a resolution of the Board of Directors of the Foothill Irrigation District.

Dated: May 29, 1928.
FOOTHILL IRRIGATION DISTRICT
By L. J. WILLIAMS, Secretary.

NOTICE TO CONTRACTORS

(Clarksburg High School District—Yolo County)

Notice is hereby given that sealed bids will be received by the Board of Trustees of the Clarksburg High School District for the complete erection of a high school building and gymnasium, in accordance with plans and specifications on file with the Secretary of the Board of Trustees of the Clarksburg High School District in Clarksburg, California, and also in the office of Dean & Dean, Architects, 1406 California State Life Bldg., Sacramento, California.

The said buildings are to be erected on the property owned by the School District, situated in the Town of Clarksburg, State of California.

On a deposit of \$20 with the Secretary of the Board of Trustees, or the Architects, complete sets of plans and specifications may be had by any prospective bidder, and retained for a period of 15 days. The deposit will be returned to the bidder on the return of the plans and specifications in good condition.

Bids must be made on proposals obtained at the office of the Architects, and be signed by the bidder, accompanied by a certified check for at least 10% of the amount of the bid or proposal, certified to by some responsible bank, or banker, and made payable to Mabel H. Heringer, Secretary of the Board of Trustees of the Clarksburg High School District, said check to be forfeited and retained by the School District, should the party or parties to whom the contract shall be awarded fail to enter into the contract after the award, or to furnish bonds as required. Bids must be plainly marked on the exterior "Proposal for construction of Clarksburg High School Buildings."

All bids must be filed with the Secretary of the Board of Trustees of the Clarksburg High School District, Clarksburg, California, not later than June 20, 1928, at the Grammar School Building.

The Board of Trustees of the Clarksburg High School District reserve the right to reject any and all bids received. Board of Trustees, Clarksburg High School District,

MABEL H. HERINGER,
Secretary.

STATE OF CALIFORNIA

DEPARTMENT OF PUBLIC WORKS

DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the State Highway Engineer, Highway Building, Sacramento, California, until 2 o'clock P. M., on June 27, 1928, at which time they will be publicly opened and read, for construction in accordance with the specifications therefor, to which special reference is made, of portions of State Highway, as follows:

Mon County, between Dogtown and Point Ranch (IX-Mno-23-1), about two and one-tenth (2.1) miles in length, to be graded.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the said office, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, and at the office of the District Engineer of the district in which the work is situated. The District Engineers' offices are located at Eureka, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the District Office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Division of Highways. It is requested that arrangements for joint field inspection be made as far in advance as possible.

Detailed information concerning the proposed work may be obtained from the District Office.

No bid will be received unless it is made on a blank form furnished by the State Highway Engineer. The special attention of prospective bidders is called to the "Proposal Requirements and Conditions" annexed to the blank form of proposal, for full directions as to bidding, etc.

The Department of Public Works reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

(Arvin School District—Kern County)

Notice is hereby given that sealed bids will be received by the Board of Trustees of the Arvin School District, Kern County, California, up to 4 o'clock P. M., on Friday, June 15, 1928, for the furnishing of all labor and material for the construction of a two classroom masonry school building, in accordance with the plans and specifications prepared by Symmes & Cullimore, Architects, 215 Haberfelde Building, Bakersfield, California. Bids will be received at the office of said Architects, and will be opened at 8 P. M. on Friday, June 15, 1928 at the Arvin School, Kern County, California.

Plans and specifications for the same may be obtained at the office of the Architects upon deposit of Ten Dollars (\$10.00), which will be returned upon receipt of said plans and specifications

in good order at the time designated by the Architects.

A certified check or bidder's bond in the amount of 10 per cent of the amount bid is to be furnished with the bid, and to the order of the Clerk of the Board of Trustees, as evidence of good faith, and that the bidder, if successful, will enter into a contract satisfactory to said Board of Trustees, and in addition thereto will furnish surety bond therefor in the amount of 50 per cent of the bid, covering labor and material, according to law. All bids are to be made on the blank forms furnished by the Architects.

The Board reserves the right to reject any and all bids or alternate bids deemed not advantageous to the District, and to waive any informality in any bid received.

By order of the Board of Trustees of the Arvin School District of the County of Kern, State of California, adopted May 14, 1928.

E. O. MITCHELL, Clerk.
ALEX T. NELSON,
J. W. KRAUTER, Trustees.

NOTICE TO CONTRACTORS
(Oil Macadam Floors—Benicia Arsenal)

Office of Constructing Quartermaster, Fort Mason, Calif. Sealed proposals will be received here until 10:00 A. M., June 14, 1928, for laying oiled macadam floors in Artillery Storehouse No 71 at Benicia Arsenal, Calif. Information on application.

(D)

NOTICE TO CONTRACTORS
(Electric Lighting Fixtures—Alameda County)

Office of the Clerk of the Board of Supervisors, Alameda County, California.

Sealed bids will be received by the Clerk of the Board of Supervisors of Alameda County, at his office, until Monday, June 25th, 1928, at 10:30 o'clock A. M. (the day when said bids will be opened and the contract awarded), for the erection and completion of lighting fixtures in the Veterans' Memorial Building at Adams Park, Oakland, Alameda County, California.

Complete plans and specifications for said work are on file in the office of the County Clerk, in the Hall of Records Building, Oakland, California, where copies may be obtained by depositing with County Clerk the sum of Twenty-five (\$25.00) Dollars. Contractors will be restricted as to the length of time they may retain these plans and specifications to fifteen (15) days.

Contractors failing to return said plans and specifications within said time limit will forfeit their deposit. The entire amount of the deposit will be returned to contractors returning plans and specifications in good condition within said time limit.

Each bid must be accompanied by a check for at least ten per cent of the amount of the bid of proposal, certified to by some responsible bank, and made payable to Geo. E. Gross, Clerk of the Board, to be forfeited to the County of Alameda as agreed and liquidated damages should the party or parties to whom the contract shall be awarded fail to enter into the contract after the award or to give the bond required by the Board for the faithful performance of the contract.

The Board of Supervisors reserves the right to reject any and all bids.

GEO. E. GROSS,
County Clerk and Ex-officio Clerk of the Board of Supervisors.
Dated: May 28, 1928.

(D)

STATE OF CALIFORNIA
DEPARTMENT OF PUBLIC WORKS
DIVISION OF HIGHWAYS
NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the State Highway Engineer, Highway Building Sacramento, California, until 2 o'clock P. M., on June 20, 1928, at which time they will be publicly opened and read for construction in accordance with the specifications therefor, to which special

special reference is made, of portions of State Highway, as follows:

Placer County, a reinforced concrete girder overhead crossing over the tracks of the Southern Pacific Railroad at Weimar (III-Pla-37-B), consisting of one 47'-6" span, one 46'-1" span, four 30'-0" spans and one 28'-6" span on concrete piers and bents on pile foundations.

Placer County, a reinforced concrete girder bridge across Truckee River at Tahoe City (III-Pla-38-A) consisting of four 30 foot spans on concrete bents and abutments with wing walls.

San Luis Obispo County, three miles south of San Luis Obispo (V-SLO-2-E), about one (1.0) mile in length, to be graded and paved with Portland cement concrete and waterbound macadam.

Tulare County, the following three reinforced concrete bridges between Tulare and Goshen (VI-Tul-4-F):

Across Cameron Creek about 2 1/2 miles north of Tulare, an existing bridge consisting of two 12-foot slab spans to be widened from 26-foot roadway to 30-foot roadway.

Across Packwood Creek about 4 1/2 miles north of Tulare, an existing bridge consisting of one 30-foot girder span to be widened from 21-foot roadway to 30-foot roadway.

Across Mill Creek about 7 3/4 miles north of Tulare, a bridge consisting of one 30-foot girder span with a 30-foot roadway to be constructed.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the said office, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, and at the office of the District Engineer of the district in which the work is situated. The District Engineers' offices are located at Eureka, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the District Office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Division of Highways. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the District Office.

No bid will be received unless it is made on a blank form furnished by the State Highway Engineer. The special attention of prospective bidders is called to the "Proposal Requirements and Conditions" annexed to the blank form of proposal, for full directions as to bidding, etc.

The Department of Public Works reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

DEPARTMENT OF PUBLIC WORKS,
DIVISION OF HIGHWAYS,
C. H. PURCELL,
State Highway Engineer.
Dated: May 23, 1928.

NOTICE TO CONTRACTORS
(Roof Repairs—Benicia Arsenal)

Office of Constructing Quartermaster, Fort Mason, Calif. Sealed proposals will be received here until 10:30 A. M., June 14, 1928, for roof repairs to Artillery Storehouse No. 71, at Benicia Arsenal, Calif. Information on application.

MEDUSA

White Portland Cement

(WATERPROOFED)

ONE of the real beauties about Medusa White Portland Cement is the fact that it is the perfect base for color stucco work. Colored aggregates or mineral oxides can be used. The Medusa White Stucco home in a properly-landscaped setting is a picture that grows more beautiful through the years—a lasting tribute to you, its builder.

CALIFORNIA WATER-CHLORINATION SURVEY SHOWS STEADY GROWTH

(By C. G. Gillespie, Chief, Bureau of Sanitary Engineering, State Department of Health, Berkeley, Calif.)

Chlorination in California began in 1915 with installations at seven water-works plants having a total average water consumption of 41 m.g.d. A chlorination survey as of Jan. 1, 1928, showed 68 water-works with chlorination plants, supplying 107 communities. The 68 works have 110 chlorine installations, of which eight treat well water and the remainder surface water taken either directly from streams or else from reservoirs. All or nearly all of the water supplied by the 68 water-works to an aggregate of 3,185,000 consumers is chlorinated, the total volume treated being 470 m.g.d. The total number of works in the state is 662, supplying 4,340,000 people.

The increase in chlorination has been steady, but with more rapid advance in the last few years. Starting with seven works in 1915, the number of works adopting chlorination averaged 4.7 for the eleven years 1915-25, eight for the three years 1924-27, but in 1927 alone sixteen began chlorination. The volume of water coming under chlorination in 1915 was 41 m.g.d. The largest yearly additions were 125 m. g.d. in 1924 and 151 m.g.d. in 1927.

Scarcely any of the early installations were in the southern part of the state. Since 1924, the distribution was about the same, north and south, but in 1927 the southern part led.

Classified by populations which the 68 water-works supply, fourteen supply

from less than 500 to 1000, nineteen 100 to 5000, fourteen 5000 to 10,000, twelve 10,000 to 50,000, five 50,000 to 100,000 and four more than 1,000,000 each. By owner ship, 37 of the works are privately and 3 publicly owned.

Of the 68 works, 29 have a bacteria laboratory of their own, and of these thirteen make B. coli tests and sixteen stop with an agar count before and after chlorination. Frequency of sampling ranges from several time a day to once a week. For works not having a laboratory, bacterial control is through state or local laboratories and is infrequent.

LUMBER SALES GAIN OVER PRODUCTION

The output of the organized lumber industry as represented by reports from 858 mills, as against 839 for the week before, increased ten million feet during the week ended May 26. Shipments by the same mills increased 14,000,000 feet and orders 19,000,000 feet. The apparent increases in the various factors are accounted for mainly by the larger number of reporting mills on the softwood side of the industry, but the 428 hardwood mills, while having less output, increased shipments 4,000,000 feet and order 9,000,000 feet over the figures for 427 mills the week before. Statistical comparisons with last year are worthless because of the change in the number of reporting mills, but there is no doubt that new business is well ahead of last year, says the National Lumber Manufacturers Association in publishing the figures of production, shipments and orders. Taking the figures as they stand, the volume of new business would appear to be considerably ahead of last year for the first five months of 1928. Production of the industry as a whole is believed to be somewhat less. Total lumber shipments as reflected in car loadings are less than last year by about 5 per cent.

Larsen Construction Reports

Issued every business day of the year. Furnishes advance information on work projected and contracts awarded for all classes of building, street, sewer and highway projects, bridges, dams and harbor works, machinery, etc. Send for rates in your territory, advising class of work in which you are interested.

TIMPIE HYDRATED LIME

(a true dolomite lime)

for Brick Mortar, White Coat and Sand Float Finish, and for inducing plasticity in and water proofing Portland Cement Concrete.

Used in approximately \$70,000,000 High Class Pacific Coast construction in last 3 years.

EXAMPLES:—

New Standard Oil Building, San Francisco	Central Bank, Oakland
Oakland Savings Bank	New Subway Terminal Building, Los Angeles
New Mark Hopkins Hotel, San Francisco	Federal Reserve Bank, San Francisco
New Hunter-Doolin Building, San Francisco	New Russ Building, San Francisco
Pacific Telephone and Telegraph Building, San Francisco	

Sold by most progressive dealers throughout Pacific Coast.

Russian Peasant Women Placing Straw
Around Their Dwelling to Keep the
Cold Out

Applying time - proved methods of insula- tion to modern day needs

NO one knows the value of building insulation as do the inhabitants of either extreme cold or extreme hot climates. These natives have realized for hundreds of years the value of insulation—particularly straw insulation. These people, not having a complete scientific knowledge of heat and cold values, made their selection of an insulating material by actual test. After their many crude experiments on different products—straw was finally chosen as their most perfect means of protection against heat and cold.

And today, this time-proved method of insulation is offered in a perfected form—INSO BOARD—manufactured in sturdy panels 7/16" thick, 4 feet wide and any length desired. It has many structural insulation uses such as—(1) Plaster Base, (2) Sheathing under stucco, brick or wood exterior, (3) Roof Insulation, (4) Under Flooring, (5) Wall and Ceiling finishing panels, (6) Sound Deadener, and (7) Insulating inner Walls.

DEALERS will find INSO BOARD a profitable connection, combined with the sales and advertising co-operation which will be WHOLLY AT OUR EXPENSE. Write today for particulars.

MICHIGAN EMPLOYERS COOPERATE
TO ESTABLISH OWN CODES
AND STANDARDS

Several important developments have followed the adoption of a Standard Specification Outline by the Building Employers of Michigan in convention at Grand Rapids last February. The purpose of the outline, as related in a previous issue, is to group all labor and material items under specific heads in a manner that will standardize the writing of specifications, and leave no doubt in the minds of the various sub-tradesmen regarding the work that their contracts cover. Among the new developments is the enthusiastic support given the move by the Michigan Society of Architects and the general contractor and sub-contractor organizations in the state.

Immediately following the meeting in Grand Rapids, and due in a large measure to the fact that a number of tradesmen were unable to agree on definitions of their own trade terms that affected the writing and interpretation of specifications, these trades were urged to formulate their own codes and standards. According to Lancelot Sukert, president of the Michigan Society of Architects, this suggestion has resulted in the appointment of a large number of committees consisting of general contractors, architects, and representatives of the subtrades. The committees have gone to work with a will, and several have completed their work, while others will submit reports that will very shortly bring the move to a workable head.

One of the earliest reports to be submitted and adopted was that of the Michigan Sheet Metal and Roofing Contractors. It has been published in a 42 page booklet embodying complete specifications and standards of material and labor for all types of built-up roofing. Plasterers, steel welders, and all other trades are working on similar documents. The joint representative committee on lumber is preparing a report clarifying types, grades, sizes and uses.

FIVE-DAY WEEK WINS IN ST. LOUIS TRADES

With the adoption of the five-day week by the District Painters' Council and the Plumbers' Union, the city of St. Louis joins the list of cities that have practically all building trades working on the short week schedule. The bricklayers, stone masons and steamfitters are the only trades still working on the five and one-half day schedule, and these trades are seriously hampered in building operations because of the absence of other trades on the extra half day.

The Bricklayers' Union is strictly opposed to the five-day week, advancing the argument that inclement weather conditions affect their operations seriously and cut in on their working time to a very great degree. They claim, therefore, that cutting a half day from their present schedule would be directly injurious to their members.

The St. Louis stone masons recently attempted to establish the five-day week in their branch of the trade, and did not work on Saturday mornings for two weeks. The Bricklayers' International office, however, ordered them back to work, not being willing to have any branch of the trade on this short time schedule.

The St. Louis Building Laborers' district Council has not adopted any rule in regard to the five-day week, but these men will not be able to work with the trades absent from the jobs. It is the intention of the contractors of the city to employ building laborers as much as possible on Saturday mornings for the purpose of cleaning up on the various construction jobs.

Most of the general contractors and subcontractors in St. Louis are opposed to the five-day week. Some of them believe that the introduction of this schedule will mean still more employment of non-union men in the building industry. That this situation is becoming a serious one can be seen from the bombing troubles that have recently occurred in that city.

JAMES GUILFOY, VETERAN SHEET METAL MANUFACTURER, DEAD

James Guilfoy, founder of the Guilfoy Cornice Works of San Francisco, passed away last Sunday evening. Death was due to a paralytic stroke.

Mr. Guilfoy was engaged in the sheet metal business since 1867 and only recently retired from active business life. During the past year the business has been conducted by his two sons, Thos. J. and John A. Guilfoy. Mr. Guilfoy served as a messenger in the Civil War. He was an old time member of the San Francisco Builders' Exchange and during his business career took an active part in the activities of that organization.

STATE LEADS IN BUILDINGS DURING MONTH

Building permits issued during May in 102 cities on the Pacific Coast totaled 12,185 buildings, to cost \$35,482,934, according to the National Monthly Building Survey of S. W. Straus & Co. For California the permits totaled 7800 in number and \$23,629,447 in value, leading the list. Washington was next with 2027 permits totaling \$5,285,072, and Oregon third with 1080 permits valued at \$3,612,390. British Columbia placed fourth with 796 permits for a value of \$1,777,218.

THE BRICK INDUSTRY

The current issue of the Monthly Digest issued by the Common Brick Manufacturers' Association of America, says:

Our whole country seems to be experiencing an awakened consciousness of the fact that our older materials and methods are more often the better ones even though the newer ones clamor loudly for recognition. There are many who think that just because a thing is new it must be better. It is this erroneous belief which multiplies the serial numbers in our Patent Office, which dissipates much of our energies and our money and which oftentimes brings disappointment and even tragedy. We are beginning to realize that finding better substitutes for the staple things of life is a problem of no small magnitude, one perhaps impossible of accomplishment.

Wheat still makes as good bread as it did in Pharaoh's time. Wool clothing is just as good as ever. And so we find a growing recognition of the fact that nature's raw materials, the vast deposits of clay and shale, are easily and simply fabricated into our best ceramic products, from the most beautiful pottery to common building brick.

The technique of manufacture and use of brick and more lately the technology of brick masonry have been the subjects of profound study and laboratory investigation. Our knowledge is being reduced to a more precise basis. Some of the highest engineering bodies in our country are concerning themselves with codifying our information and preparing codes of good practice.

The reports of production and distribution listed below give evidence of this growing interest and use of an important natural building material—common brick. A healthy betterment over April conditions is easily apparent.

The smaller number of burned brick on hand and the greater number of orders on the books would indicate a more rapid turnover of stock and an increasing volume of business, and of potential business.

RED BUILDINGS FLOODLIGHTED PRODUCE UNUSUAL EFFECT

That buildings need not be white or of light color material to be floodlighted has just been demonstrated by engineers of the General Electric Company in the illumination of a group of red brick factory building comprising the Johnson & Johnson plant at New Brunswick, N. J.

As red is a very poor reflector of white light, more than 100 floodlights equipped with red lenses were used. The effect is unusual and spectacular, attracting wide attention from persons traveling on nearby highways and on the main line of the Pennsylvania railroad between New York and Washington, which passes near the plant.

When the matter of floodlighting this plant was first suggested by the General Electric Co. tests were made by W. D. A. Ryan in the illuminating engineering laboratory at Schenectady with projectors using various colored lenses. White floodlights showed up the mortar between bricks and other defects prominently, but when the red was substituted this is the first time that a group of red brick buildings has been floodlighted by the General Electric Co.

BUILDING ACTIVITIES REPRESENT NEW NORMAL LEVEL IN THIS COUNTRY

(By Virgil Jordan, Chief Economist of National Industrial Conference Board. Address before Credit Association of the Building Trades of New York.)

The general level of building activity that has prevailed during the past three years probably represents the new standard or normal level for the industry in this country, and there is no reason to expect any material recession from this level in the future.

The immediate outlook for building depends chiefly upon general business and credit conditions in the next few months, and in these respects there is nothing to worry about, even though money may be temporarily tighter and business a little hesitant during the summer. It is far more reasonable to expect that after the stock market has had some of its speculative enthusiasm knocked out of it, easier money and rising prices will stimulate speculation in commodity markets and lead to a rapid and general expansion of business which will carry building along with it to still higher levels next year.

In the building industry as in all other fields of business, it is high time that we throw overboard some of our traditional ideas of what is normal and proper and recognize that we live on a radically different plane of public demand and industrial accomplishment than before the war. There has never been a time in which there has been so much uncertainty and misgiving and so little fresh and sensible thought about business as now; and the reason why we are all at sea is we are trying to apply old formulas and old prejudices to conditions that are new and rapidly changing.

Economists and statisticians like to fit all the ups and downs of business into regular cycles and to make its development conform over long periods to a smooth curve of growth. These formulas may be true enough as a historical record of our brief past, but there is no reason to suppose that we are chained to them for the future. Business is no mere machine following purely mechanical laws; it is determined fundamentally by changes in human psychology, but these the statistician has no means of taking into account. We must seek the origin and determinants of all major economic movements in the psychology of the public rather than in any mechanical laws of economic behavior.

This is particularly true in its application to the building industry. During the past five years statisticians have been wrangling about the length of time before the wartime "shortage" in building will be made up and the probable return to some "normal" of building activity. Invariably these calculations have been upset by the facts, because the future growth of any fundamental type of consumption demand, such as building, cannot be measured by any purely statistical means.

At the end of 1924, for instance, when the so-called building boom was just about to begin, we had the following expert estimates of the amount of the so-called business shortage: The United States Bureau of Labor statistics asserted that at the end of 1924 construction not only had made up for the war shortage, but was actually about four-tenths ahead of current needs; the National Bank of Commerce estimated that the building shortage of over \$3,000,000,000 still remained at the end of 1924; at the beginning of 1924 Prof. King maintained that most of the estimates of building shortage had been exaggerated and that there was no conclusive evidence that anything in the nature of an unsatisfied demand for building existed at that time; at the

end of 1924, however, both Prof. King and Col. Leonard P. Ayres estimated the building shortage at over \$7,000,000,000, while Dr. Clark estimated the accumulated shortage at over \$11,000,000,000.

When you consider that in the three following years over \$25,000,000,000 of building was done in the United States it becomes clear that, as Dr. Clark then pointed out, the question of shortage was meaningless as a basis for estimating the future demand for building. We were not during those years, nor are we at the present time, engaged merely in making up a wartime shortage in building. The deficit in building during the war has very little if anything to do with the level of building activity in the past few years or at the present time. The level of building, like that of industrial and trade activity, is not determined by what happened in the past, but by the way we feel and the things we want now and in the future. The demand for building depends not merely on the growth of population nor even upon the size of the existing population, but upon the current ideas, habits and customs of the public in respect to building accommodations and services and upon their general purchasing power or effective demand for such services.

It is far more accurate, therefore, to say that the level of building activity today depends upon general business conditions and rational prosperity than to say, as we used to, that business activity and prosperity depend upon the amount of building that is done. Vast as the building industry is, our business activity has grown more rapidly in extent and variety so that business is relatively less affected by building construction than the building industry is by business, and the relation between the tail and the dog has become more normal. Building is affected now no longer by minimum needs, but by the operation of powerful economic and social forces which grow out of the general business situation and its effect upon standards of living. Building activity consequently has become an index of the improved standard of living of the American public. Instead of talking about building shortages as a result of the war or about the building "boom" during the past three years we should rather consider that throughout the entire past the United States has been underbuilt from the point of view of current standards of living. The greater part of this country has been living and working and still is in a frontier or pioneer fashion.

From a construction point of view most of the United States still looks like the devil and is 50 years behind the times, even as compared with most of the impoverished countries of Europe. We may, therefore, expect to be occupied with the enormous task of reconstructing and improving our national building equipment for years to come; and by the time we have caught up generally with even the current standards, these in turn will have shifted to a still higher level.

Cautious and conservative people will ask where the money for all this is coming from, whether continued expansion in building will not invite speculative excesses and raise building costs to prohibitive levels. There may be some reason for feeling that building in some of the larger cities has run ahead of existing standards and effective demand, but I doubt whether this is true even in New York, where large portions of the population still live under conditions that are

inexcusable from either an economic or social point of view.

So far as the question of disposal capital for building purposes goes, there is no ground for fearing any stringency in the long run. The constant flow of capital abroad and the outburst of speculation in the security markets all testify to the fact that even now the United States is saving a larger part of its national income than it should and is investing it in ways far more questionable than even the most speculative forms of building investment can be considered to be. The intensity of competition and improvements in industrial methods are putting limits upon domestic investments in the expansion of industrial plant and equipment. Changes in our financial system and banking conditions at home and abroad are releasing increasing credit resources which can be drawn upon for building purposes. If they are not used for such purposes they will be used for other types of speculation and investment far less sound from an economic or social point of view.

Nor does the possibility of speculative excesses in building construction justify an exaggerated fears or restraints. Business men and most other people like to speculate. If they cannot do it in building and real estate, they will do it in securities or in commodities; and it is far better in the long run to speculate in such tangible social assets as homes and land than in perishable and imaginary assets like commodities and foreign securities. Likewise, though at any particular time prices and costs in the building field are very important to individuals, in the long run they do not matter very much. Prices merely express the relationship between things and services and in the long run they adjust themselves to the real demand and to the improvements in productive methods, which are going on at all times.

These considerations, however, do not in the least diminish the constant need for the building industry, like every other industry, to exercise to the full its intelligence, initiative and self-control from year to year. The industry will have its ups and downs, its losses and its gains. Waste, extravagance and downright dishonesty or graft can be curbed only by constant watchfulness and effective organization within the industry itself. The building industry as a whole, it must be admitted, is still far behind other industries in respect to its internal organization, particularly of labor relationships, and in improvements in the efficiency of its methods.

Much can be done by such organization and by careful planning to diminish the excessive fluctuations in building activities, and to co-ordinate it more closely with business conditions. The Federal, state and local governments, which are today together the largest single buyer of building construction, can materially assist in this process, and are doing so to a much larger extent year by year. But we must not get the idea that stability is in itself a desirable thing for which everything else should be sacrificed. Prosperity in the building industry, like that in all other aspects of our business life, depends upon constant growth, and growth means constant change. In this country there is still far too great a tendency to think of the present situation in business as something fixed or normal, and to make every effort to keep things where they are; but this means a sacrifice of progress.

THE OBSERVER

**What He Hears
and Sees
On His Rounds**

Nation-wide competition by architects to obtain a plan for a \$2,000,000 municipal auditorium has been decided upon by the Long Beach City Council. A prize fund of \$10,000 will be provided.

Harry C. Gardner, assistant secretary of the Monolith Portland Midwest Company, after an inspection of the new cement plant at Laramie, Wyo., reports that production will soon be inaugurated.

Geo. R. Drever & Co., Marion Bldg., Seattle, Wash., exporters and manufacturers' agents have connections with a firm in the Orient that desires to purchase 1000 tons or more of scrap steel (Japan specifications). They wish to hear from San Francisco shippers who would be interested.

Standard Steel Corp., capitalized for \$100,000, has filed articles of incorporation in Oakland. Directors are: G. M. Rudebeck and G. Duke of Oakland and G. H. Noble, E. T. Waldner and J. Colenberg of Alameda.

Seattle reports orders at the lumber mills picking up and some business placed at an advance of \$2 per thousand and over old prices. Shipments to the Atlantic coast are heavy. Portland reports curtailment of production has created a better feeling in the fir industry.

California White & Sugar Pine Assn. has protested the action of the central committee of lumber standards in dropping from the nomenclature the name "California white pine" and substituting therefore "Pondosa pine."

A new retail lumber list issued by the Lumbermen's Association of Los Angeles reflects an advance of \$2 to \$5 per thousand feet in the wholesale prices of Douglas fir. The advance is due to curtailment of production at the fir mills in the north. Local lumbermen are looking for further advances.

Strength of the trade situation at the West Coast mills is indicated by the reports to the National Lumber Mfrs. Assn. for 20 weeks of the current year. These show new business nearly a billion feet ahead of the same period last year and production more than 200,000,000 ft. behind orders. The cut for 20 weeks totaled 2,319,590,000 ft., shipments 2,332,910,000 ft. and orders 2,548,760,000 ft. California redwood mills report a cut of 160,880,000 ft. for 20 weeks against orders for 153,389,000 ft. Shipments were 148,752,000 ft. Production was about 23,500,000 ft. ahead of the same period last year and orders were about 34,400,000 ft. behind the first 20 weeks of last year.

With the idea of bringing about closer harmony of all the elements that go to make up the building construction industry of Indianapolis, about 200 representatives of these interests met at the Chamber of Commerce and took the necessary steps to form a building congress modeled on the lines of similar organizations in Boston and New York City. The organization meeting was aided by a number of architects experienced in the activities of the building congresses of their own cities. A constitution was adopted and the men elected to guide the destinies of the organization for the first year.

The five-day week and stimulation of building all over the nation were advocated for America's periodical unemployment by Frank J. McDonald, San Francisco labor leader and president of the California State Building Trades Council, at a meeting in the Stockton Labor Temple, June 8. The meeting was held under the auspices of the Stockton Building Trades Council. From coast to coast there are "millions of shacks that should be torn down and replaced with substantial buildings," McDonald declared. He also urged the construction of more roads and bridges in addition to extensive repairs to both.

Societe Francaise de L'Everite, 11-15 Ave. du Pres. Wilson, Plaine St. Denis (Seine), France, manufacturers of asbestos cement, shingles and corrugated asbestos cement roofing sheets, is anxious to appoint a San Francisco representative for the sale of such products in this district.

Architects, builders and architectural students, together with all those interested in constructional development, with particular reference to brickwork, are finding much of interest in the exhibit of medieval and modern brick architecture in Germany, which opened at the Toronto Art Gallery on May 24. It is probably the most complete presentation of architecture in any one material that has ever been held in Canada.

The vote in favor of the proposed \$29.-400,000 school bond issue in the Los Angeles city school district fell over 6000 short of the necessary two-thirds majority and the board of education is confronted with the necessity of resubmitting the bonds of the November election or levying a tax to raise the funds required to erect needed school buildings. It is expected the policy to be pursued by the board will be decided at once. Following is the vote on the bonds at the special election June 5: Elementary school bond issue (\$12,440,000)—Yes, 80,539; No, 49,169. High school bond issue (\$16,960,000)—Yes, 80,764; No, 50,043.

C. H. Purcell, California State Highway Engineer, has issued a warning to contractors that certified checks submitted with proposals on state highway contracts must cover the full 10 per cent of amount of bid as required by specifications. Mr. Purcell points out that recently several bidders submitted checks insufficient of 10 per cent of the total bid, two of whom would have been low and no doubt would have been awarded the contracts.

Hayes Equipment Manufacturing Co., Wichita, Kansas, (attention Mr. E. P. Hayes, general manager), manufacturers and distributors of visible gasoline pumps, air compressors and filling station equipment of all kinds, is anxious to get in touch with a San Francisco firm that would handle their products as factory distributors.

Unfilled tonnage of the U. S. Steel Corporation decreased 455,311 tons in May, according to the monthly report just issued. Forward tonnage on May 31 aggregated 3,416,822 tons against 3,872,133 on April 30. On March 31 of this year tonnage was 4,335,206 and on May 31 of last year the aggregate of advance business was 3,050,941 tons.

Societe Co-operative pour le Commerce Extérieur, 6 Grand Place, Brussels, Belgium, specializing in the export of building materials, wall and floor tiling, natural and artificial slates, ferrous metals, glassware, crockery, marble and kindred articles, are interested in selling to foreign markets and are open to quote c.i. f. prices to any desired destination.

The U. S. Circuit court of appeals in New York City has affirmed the ruling of the Federal Trade Commission that Philippine mahogany cannot be described, advertised or sold as "mahogany." In a dissenting opinion Judge Swan said he did not consider interference with commercial use of the name, Philippine mahogany as justifiable but held that in view of the commission's findings the court was powerless.

California building and loan associations stand third among those of the United States in the rate of increase in number of people served by these institutions, first in percentage growth of resources among the leading states and eighth in total resources, according to Edwin M. Einstein, Fresno, president of the California Building-Loan League. Statistics compiled by H. F. Cellarius, secretary of the national body, shows 220 California building and loan associations are serving about 400,000 either as borrowers, shareholders or investors. These institutions have total resources of approximately \$325,000,000. Ohio ranks first in the number of people served while Pennsylvania leads in total resources. Both states have assets exceeding a billion dollars.

California's 10-year building program, now being drafted by the administration, will not include allowances for new hospitals for the insane, as relief from present overcrowded conditions, Alexander R. Heron, director of finance, announces. The situation will be remedied, he said, by expansion of institution already established, with the exception of those at Patton, Stockton and Napa, which will be improved, but not enlarged.

The waste in cross-hauling steel products was emphasized by Charles M. Schwab at the 33rd meeting of the American Iron & Steel Institute in New York on May 25. Mr. Schwab pointed to the low return on the five billions invested in the steel industry and proposed elimination of distribution waste as an alternative to further reduction of production costs or price raising. He recommended the appointment of a committee "to study this problem with a view frankly to recommend to the public and to the proper public authorities a constructive plan which may result in such modification of existing law as will enable the factors in the steel industry, and indeed possibly in other industries, to achieve those economies which are so important."

The Federal Trade Commission has authorized the holding of a trade practice conference with the glass distributors' industry. Among unfair practices suggested by the industry for discussion are price discrimination, breach of contract, misbranding, and secret rebates. Commissioner Abram F. Myers was named to preside at the conference but no time or place was set for this meeting.

ENGINEERING SOCIETIES EMPLOYMENT SERVICE

Further information regarding positions listed in this column is obtainable from Newton D. Cook, Room 715, 57 Post Street, San Francisco, (Phone Sutter 1684).

R-1702-S SALES ENGINEER, preferably electrical graduate about 3-5 years out for sales work in the Orient. Must be single, well built and have pleasing personality. Salary about \$250 gold and travelling expenses. Apply by wire or in person before June 13th. Headquarters, San Francisco.

K-66-X-4918-C-S WOODWORKING ENGINEER, graduate with several years' experience in manufacture of furniture thoroughly familiar with designing plant layout and woodworking machinery. Should have general knowledge of manufacturing costs. Apply by letter, giving age, and details of education and experience. Location, Middlewest.

K-69-X-5090-S SALES ENGINEER, to promote the sale of a special valve in Latin America. Must be mature, speak Spanish well, have a fair knowledge of chemistry and be able to hit the ball when on his own initiative. Salary about \$300 month and expenses to start. Permanent opportunity. Headquarters, San Francisco.

R-1706-S SALES ENGINEER, college Graduate, young, with sales personality and local acquaintances. Will have to begin detailing and estimating reinforcing steel. Salary open. Headquarters, San Francisco.

R-1654-S SALESMAN, preferably with some training or experience in combustion of fuels to sell standard lines of oil burner equipment to owners and architects. Commission only. Location, San Mateo County.

ELECTRICAL TRADE IN CALIFORNIA REPORTED GOOD

"Electrical World," New York, reports the following prevailing conditions for the first part of this week in the electrical industry: Active buying in the eastern district, with an increase of inquiries in New England, reasonably satisfactory conditions in the Middle West, including the territory served largely from St. Louis, where the refrigerator demand is especially good, as it is also in the Southeast, and a big program of construction in California, with somewhat less cheerful reports from the Puget Sound region—this about summarizes market conditions as reported for the first part of the current week.

BERKELEY PLUMBERS' LICENSE LAW TO UNDERGO TEST

R. B. Darby, 1836 Francisco St., Berkeley, entered a plea of not guilty before Police Judge Oliver Youngs Jr., when arranged on a charge of violating the Berkeley city ordinance requiring all plumbers to post a \$500 bond and obtain a plumber's license. The charge was filed by Sanitary Inspector George Grimshaw following the inspection of a building in which Darby is alleged to have installed plumbing without first posting the bond and obtaining a license. The trial will be held on June 20 before a jury. A special venire of 35 was ordered called by Judge Youngs.

REINCORPORATION

The American Road Builders' Association has been recently reincorporated under the laws of the District of Columbia. Before the removal of the Association headquarters to Washington the charter was under the jurisdiction of the State of New York.

FURTHER REDUCTION SHOWN IN PACIFIC COAST BUILDING IN MAY

Building activity in the Pacific Coast cities shows a further reduction for the immediate future, as projected by building permits issued during May in 102 cities of this area. The aggregate May total, 12,185 permits for buildings to cost \$35,482,934, is 2% below the comparable figure for April and is 22% below that of last May, as shown by the June first number of the National Monthly Building Survey of S. W. Straus & Co.

Every month this year, except February, has shown a reduction from comparable totals of 1927, amounting to 14% in January, 11% in March and 22% in April. February registered a 5% increase over February of last year.

All of the major cities report reductions from the May totals of last year and all report May totals lower than the April totals of this year except Portland, San Diego and Los Angeles. Of the 102 cities comprised in the Straus survey, 47 show increases over the April figures and 50 report gains over last May.

Los Angeles, issuing 2,954 permits for buildings to cost \$8,941,735, during May shows a 2% increase over the April figure, but a 22% reduction from the May total of 1927.

Portland issued 875 May permits for \$2,940,940 in new construction. This is 85% above the April total but 37% below that of May of last year.

San Francisco's May total of 661 permits aggregating \$2,635,116 in building costs, is 28% below the April total and 47% below that of last May.

Seattle, reporting 939 permits issued during May totalling \$2,595,630 in building costs, shows reductions of 25% from April's total and 2% from that of last May.

Oakland's May total of 424 permits for \$1,272,965 in new buildings, is 14% below the April total and 28% below that of last May.

Salt Lake, issuing 96 permits for \$260,863 in new buildings, shows reductions of 21% from April's total and 42% from that of last May.

Stockton's May total, 78 permits for \$207,751 in new buildings, is 20% below that of April but is 44% above the May figure of 1927.

San Jose reports a 77% increase over last May but a 37% reduction from April, with a May total of 72 permits issued for \$209,300 in construction costs.

Sacramento, issuing 177 permits for \$297,318 of new construction, shows a 47% reduction from April's total and an 85% reduction from that of May, 1927.

Following are the official May, 1928, construction cost figures as reported to us by building department executives from 102 cities comprised in the Pacific Coast Section:

CALIFORNIA

May, 1928

CONSIDERABLE REDUCTION IN EARTHQUAKE INSURANCE RATES

Effective May 10, 1928, a considerable reduction in earthquake insurance rates, together with a new classification of buildings and structures, has been published by the Board of Fire Underwriters of the Pacific.

The basic rate in Zone 1, which territory includes Los Angeles, San Francisco, Santa Barbara and coast territory, compared with the old rates in effect for the past few years, are shown as follows:

Class No.	New Rate	Old Rate
1	20c	25c
2	30c	50c
3	40c	1.50
4	50c	80c
5	50c	60c
6	70c	1.50
7	1.50	2.75
8	3.50	2.50

The above comparison of rates has been compiled and furnished by J. E. Shield, engineer, Board of Fire Underwriters of the Pacific, Los Angeles, Calif., and is based on the classification of buildings outlined below. Mr. Shield further states that "rates in the inland territory, such as San Joaquin and Sacramento Counties have a 25% reduction in the above rates (those effective May 10). Buildings in Imperial Valley take an increase of 50% over the above rates, and buildings in

the counties of Riverside and San Bernardino have rates 25% in excess of the above rates."

The new classification of buildings on which the above new rates are based is as follows:

Class I. Frame dwellings and other frame buildings, excluding all buildings with masonry veneer (not stucco), located on firm natural ground, and not exceeding three stories in height. Ground floor area not to exceed 3000 sq. ft.

Class II. Buildings located on firm natural ground, with structural steel frame, with monolithic reinforced concrete walls and floors, with all loads carried by the frame. Excluding buildings with metal lumber, strip steel joist, or trussed steel joist floors. Ratio of least width to height above ground not to exceed one to four. Excluding all buildings containing auditoriums, swimming pools (above the first floor) and similar assembly rooms, such as churches, theaters, public halls; also buildings in which the wall in any side or story consists of the frame only.

Steel and reinforced concrete tanks on firm natural ground (tanks on saddles excluded) in which ratio of diameter or width to height is not over one to two.

Outdoor electric sub-stations.

Class III. Buildings located on firm natural ground, of monolithic reinforced concrete construction, wherein the loads are carried by reinforced concrete columns, with reinforced concrete walls, all tied together by reinforced concrete floors. Excluding buildings with metal lumber, strip steel joist or trussed steel joist floors. Ratio of least width to height above ground not to exceed one to three. Excluding the following: Buildings of typical floor plan other than triangular, square or rectangular; also buildings containing auditoriums, swimming pools (above the first floor) and similar assembly rooms, such as churches, theaters, public halls; also buildings in which the wall of any side or story consists of the frame only, or where any exterior wall is broken by openings for light wells for more than 33 1-3% of the height of the wall above ground.

Class IV. Frame buildings on firm natural ground, not qualifying under Class I, and excluding all buildings with masonry veneer (not stucco).

Class V. Buildings located on firm natural ground, with structural steel frames, with monolithic reinforced concrete floors, with walls of tile, brick, stone, concrete block or similar material, with all loads carried on the frame, including eligible risks of this type but which do not qualify in Class II. Excluding buildings with strip steel joist, metal lumber or trussed steel joist floors.

Class VI. Buildings located on firm natural ground, wherein the loads are carried by reinforced concrete columns tied together by reinforced concrete floors with walls of tile, brick, stone, concrete block or similar material, including eligible risks of this type but which do not qualify in Class III. Excluding buildings with strip steel joist, metal lumber or trussed steel joist floors.

Class VII. Buildings having brick, stone or plain concrete walls (excluding those specified elsewhere), where the loads are carried in whole or in part by the walls and partitions (excluding buildings constructed of tile, concrete block, masonry veneer on wood frame, and adobe).

Buildings located on firm natural ground, with structural steel or reinforced concrete frame, with any kind of floor such as wood joist, metal joist, trussed steel joist, etc., any kind of walls other than wood and any kind of partitions, with all loads carried on the frame.

Class VIII. Buildings of tile, concrete block, or above bearing walls; masonry veneer of any building not covered by any other class. Bridges, reservoirs, dams, steel and concrete stacks.

Penalty. Buildings located on other than firm natural ground will take their otherwise classification with a 25% increase in rate.

It is also understood that buildings designed to resist a heavy lateral force (such as produced by ground accelerations of two to three feet per second) may be granted a special rate; this rate to be granted only after design, supervision and construction have been approved by the Board's engineers.

BAD ROADS TAX IS HIGH

Motorists pay a bad road's tax equivalent to 22.3 cents on every gallon of gas consumed on a poor highway. The California State Automobile Association reports that this conclusion was drawn from experiments recently conducted in Washington, Iowa and North Carolina. The figures were based on the premise of a car making 10 miles to the gallon on a rough highway. On a basis of a speed of 33 miles per hour, the test showed the cost of gasoline and tires per one thousand miles over rough roads used in the experiments was \$35.10 for an average four cylinder, car weighing 3500 pounds loaded. The cost for the same car at the same speed over a very smooth improved road was only \$12.80, according to the tests.

TRADE NOTES

Pacific Piling & Construction Company of Los Angeles has leased three acres of land from the Ellis Landing & Dock Company at Richmond, Contra Costa County, and will spend \$50,000 in the erection of a plant for the manufacture of treated concrete piles.

Superior Tile & Products Co., formerly located at 2725 Shattuck Ave., Berkeley, has moved to larger quarters at 3743 Broadway, Oakland.

Concrete Engineering Co. of Omaha, Neb., in keeping with its growth and expansion has acquired the Steel Service Company of San Francisco and is now ready to serve the construction field from ample warehouse stocks. F. E. Jennings will be district sales manager in San Francisco. In addition to reinforcing bars and spirals the company will carry a complete line of Meyer & Ceco products.

Simpson Screen Co. of Oakland, has been incorporated with a capital stock of \$50,000. Directors are: L. B. Rainford of Oakland; B. W. McManus and Chas. Simon of Los Angeles.

Joe Vargas, John M. Goulart and John Munir, all of Decoto and John Silva of Niles, will operate at Decoto, Alameda County, under the firm name of Decoto Tile Company.

Ray Ruggeri will operate from 179 Thirteenth St., San Francisco, under the firm name of Western Artificial Stone Works.

Weir Electric Appliance Co. of Oakland, capitalized for \$200,000 has filed articles of incorporation in Oakland. Directors are: H. A. Starks, W. W. Weir, Delia I. Starks, Isabella Weir and Clarence De Lancey.

W. S. Sneath, formerly assistant manager of the Standard Fence Company, is now manager of the Page Chain Link Fence & Wire Departments of the Michel & Pfeffer Iron Works of San Francisco. The Michel & Pfeffer interests maintain experienced fence erecting crews and are in a position to give prompt and efficient service on fence and wire work installation.

ALONG THE LINE

A. M. McCray has been appointed county surveyor of San Benito County, succeeding the late W. A. Winn.

After an illness of six weeks, Henry Wilson, 79, wealthy San Francisco lumber and shipping man, died at his home in Piedmont, June 5. A native of Sweden, Wilson came to California in 1890 and was for many years president of Wilson Brothers & Co. Surviving him are the widow, Mrs. Mary Wilson, and two sons, Winfred and Francis, both members of the firm.

The graduate course in Fuel Engineering at the University of Pennsylvania has been sufficiently successful to warrant its continuation for the year 1928-29, it is announced by Robert H. Fernald, director, Department of Mechanical Engineering of that institution.

Joseph A. Mann, 75, retired contractor of Oroville, died in that city June 11. Mann lived in Oroville for 25 years and had been a resident of California for 43 years. He was born September 8, 1852, at Council Bluff, Iowa. His widow, three daughters and one son survive.

Robert Emory Rogers, secretary of the Union Rock Company of Los Angeles, died suddenly at his home, 522 S. Kingsley Drive, June 4, of heart disease. He had worked at his office until about 7 P. M. and was apparently in normal health when he retired. He was stricken about midnight and died within ten minutes.

C. E. Griggs has been appointed city manager of Phoenix, Ariz. He was at one time city manager of Tulsa, Okla., and was for fourteen years with the Santa Fe Railway system. He was also chief engineer of the Beardsley & Maricopa County Water Conservation District.

A district group meeting of the State Association of California Architects was held June 7 in San Jose at which Ralph Wyckoff of San Jose was elected district councillor. The district comprises Santa Clara and San Benito counties.

The Portland Cement Association, Chicago, Ill., is now issuing a 60-page book entitled "Concrete in Architecture," which seems to be a timely treatise on the subject. Much has been written on the structural possibilities of concrete, but to judge from external appearances, the decorative possibilities have been grossly neglected. The photographic color plates contained in the book will be of interest to the architect in showing the possibility of design and decoration. But of great importance to the contractor is the section devoted to instructions for carrying out these designs.

HERE — THERE — EVERYWHERE

Plans for a Ladies' Night banquet will be held in San Jose shortly by the Peninsula Master Painters' Association. At a recent meeting of the association, when plans for the banquet were discussed, Walter McGhinley, president of the San Jose Association, was the principal speaker.

P. N. Downing of San Francisco was elected president of the Pacific Coast Electrical Association at the 4-day convention held in Pasadena. Nearly 800 leaders in the electrical industry of California, Arizona and New Mexico attended the opening meeting.

A general meeting of the Santa Barbara Builders' Exchange is set for June 29. Members of the Industrial Relations Committee and the Building Code Committee of the California State Builders' Exchange, meeting in Santa Barbara June 30, will attend the meeting. A dinner and entertainment program will be features of the meeting, according to A. J. Nolder, secretary-manager of the exchange.

The American Institute of Quantity Surveyors will hold its third annual convention at the Hotel Pennsylvania in New York City on June 25, 26 and 27. Among the topics on which addresses will be made and discussed are—Methods of surveying Concrete, Cut Stone, Marble, Tiling, Carpentry, Millwork, Plastering and Painting. Estimating Companies, Pricing, Quantities, Preliminary Estimates, Appraisals, Uninvited Bidders, Unfair Competition, etc.

LeRoy H. Stanton of E. J. Stanton & Son, Los Angeles, was elected president of the Pacific Coast Hardwood Assn. at the recent convention at Victoria, B. C. Other officers chosen were: Jerry Sullivan, Jr., Sullivan Hardwood Lumber Co., San Diego, vice-president, and C. M. Cooper, W. C. Cooper Lumber Co., Los Angeles, secretary-treasurer; J. E. Higgins Jr., J. E. Higgins Lumber Co., San Francisco; D. A. Johnson, D. A. Johnson & Son, Seattle; E. E. Hall, Emerson Hardwood Co., Portland; B. E. Bryan, Strable Hardwood Co., Oakland; Henry Swafford, E. J. Stanton & Son, Los Angeles, and Jerry Sullivan Jr., Sullivan Hardwood Lumber Co., San Diego. The next convention will be held at Del Monte, Calif., in May, 1929.

Trade Literature

The Oil Heating Institute of New York, composed of the leading manufacturers of oil burning equipment and major oil companies, has just issued a new booklet designed primarily for the information of architects, but also of interest to every one interested in oil heating. (The Institute serves as a central bureau of information on a non-commercial basis and works with international authorities on oil and oil combustion and specialists on the design of oil heating equipment). The contents of the booklet covers the relative cost of oil fuel as compared with coal based upon the studies of the United States Bureau of Standards. It discusses the principles of combustion, how the selection of an oil burner is governed by various types of boilers, furnaces and chimneys, safety devices and automatic control, and pays particular attention to the need of having the work done by a competent dealer.

Caterpillar Tractor Co., San Leandro, has issued a number of new publications showing the work of Caterpillars in the oil fields, in snow removal work, in the construction of air ports, in quarry work, in making fire breaks through the forests, and a separate publication shows these machines doing all sorts of odd jobs throughout the world.

Truscon Steel Co., Youngstown, Ohio, has issued a booklet describing the recently announced Model No. 5 Truscon Standard Casement. Close-up views of various architectural treatments with their accompanying scaled construction details, are features of the booklet which also shows the various sizes and types of Truscon standard casements and a complete specification for them. Copies of the booklet are available for architects and contractors.

The American Institute of Steel Construction, Inc., 285 Madison Ave., New York City, has issued a folder showing the effect of flood waters on steel bridges. This folder shows several steel spans that were washed out by floods, or that were let down when piers or abutments were undermined, and that were found in condition to be easily salvaged after the water subsided. Another folder gives a complete directory of members of the institute.

General Electric Co., Schenectady, N. Y., in its new bulletin, G. E. A.-742-A, give complete information on their Novalex traffic signal control systems, describing the mechanical and electrical features of these devices and telling about the systems of control that may be effected through their use. Wiring diagrams are shown.

Building News Section

Pratt

NOTE:—Sandy reprints his "spring was good, many more said Sandy was a than writer.

poetry vintage of 1927." Some said it better sand, rock and gravel producer

AS MISS Spring is gone.

AND MR. Summer is here.

CLARENCE (SANDY) Pratt, President.

OF THE Pratt Building Material Co.

AND PRODUCER of clean sand.

AND HARD, crushed rock.

AND CLEAN gravel.

AT SACRAMENTO, Marysville.

PRATTROCK (NEAR Folsom.)

PRATTCO (Monterey County).

AND MAYHEW (Sacramento County).

WOULD LIKE to.

DESCRIBE SANDY'S clean materials.

AND "SAY it with flowers."

"SWEET WILLIAM" is the Superintendent.

AT SANDY'S Marysville plant.

AND "VIOLET" is the office girl.

"DAISY" LOST the job.

BECAUSE SHE went home.

AT "FOUR o'clock."

OUR SALESMEN wear "Bachelor Buttons."

AND OUR sand and rock washers.

ALL WEAR "Foxgloves."

TO KEEP our materials clean.

WHEN IT'S hot.

THEY ALSO wear "Sunflowers."

AND EAT "Ice Plant."

THEY FEED their children "Candy Tuft."

THE PASSWORD is "Morning Glory."

AND THE engineer at noon.

RINGS THE "Canterbury Bells."

AND "PANSY" serves SANDWiches.

AND "JY" clings.

SHE IS a Sutter County "Peach."

SHE WAS born in "Roseville."

EDUCATED IN "Larkspur."

AND "MARIGOLD" — married Gold (Smith).

"I THANK you."

Mr. Rabbit, greatest mathematician in the world, examining "Blackeyed Susan" at Prattrock, home of Sandy Pratt's crushed rock, washed gravel and sand producing plant. The Pratt Building Material Company's central office is at 518 Hearst Building, San Francisco.

Official Proposals

NOTICE TO CONTRACTORS

(School Addition—Emeryville)

Notice is hereby given that the Board of Trustees of the Emeryville School District of Alameda County, hereby calls for sealed proposals to be delivered to the Clerk of said Board at the office of said Board, located in the main school building, 4th and San Pablo Ave., Emeryville, California, until June 26, 1928, at 4 o'clock P. M., at which time and place bids will be opened for the furnishing of all labor, materials and mechanical workmanship necessary for the erection and completion of a one-story addition to the school building located on the north side of 41st street 272.37 feet east of San Pablo Ave., Emeryville, California, consisting of three classrooms and kindergarten and assembly rooms. These bids shall be presented in accordance with the specifications on file at the office of the Board located as hereinabove described. Copies of said specifications may be obtained at said place.

Proposals shall be made upon forms which may be obtained from the Clerk of said Board at the office of the Board as hereinabove described. Each bid must be signed by the bidder and accompanied by a certified check for at least ten per cent (10%) of the amount of the bid, certified by some responsible bank or banker and made payable to Emeryville School District of Alameda County, to be retained by said School District as agreed and liquidated damages should the party or parties to whom the contract should be awarded fail to enter into the contract after the award or to give the bonds required. The Board reserves the right to reject any and all bids or any or all items of such bids.

R. S. HAWLEY,

Clerk of the Board of Trustees of Emeryville School District of Alameda County, State of California.

M., at the office of the High School Board.

Obtain bid forms and plans and specifications from Peter Sala, architect, 2130 North Commerce St., Stockton, Calif.

Award will be made to the lowest responsible bidder. The High School Board reserves the right to reject any or all bids.

A certified check of 10 per cent of the total amount bid on the main propositions plus all additions to the same must accompany said bid. (The certified check must cover the highest possible total bid.) A bidder's bond will not be accepted.

Dated: Stockton, Calif., June 7, 1928.

By order of the High School Board.

By ANSEL S. WILLIAMS, Clerk.

(D)

NOTICE TO CONTRACTORS

(Painting Fair Buildings, Stockton)

Notice is hereby given that sealed bids will be received by the Clerk of the Board of Supervisors of the County of San Joaquin, State of California, at the office of said Board in the City of Stockton, until 11 o'clock A. M., Monday, June 25, 1928, for furnishing all labor and material for painting certain buildings at the San Joaquin County Fair Grounds, in accordance with specifications adopted and filed by said Board, June 4, 1928, and to which bidders are particularly referred.

All bids must be made on forms to be obtained at the office of the Board of Supervisors and presented in sealed envelopes marked to show the contents. A deposit of \$10 is required on all specifications taken out to insure the prompt return of the same before the expiration of seven days.

All proposals must be accompanied by United States Currency, Cashier's Check or certified check made payable to the Chairman of the Board of Supervisors in the sum of 10% of the amount of the bid. A bond of 50% of the contract price will be required of the successful bidder to guarantee the faithful performance of said contract and a like bond to guarantee the faithful payment and satisfaction of the lawful claims of all persons for labor and materials furnished in the prosecution of said contract.

The Board reserves the right to reject any and all bids.

By order of said Board of Supervisors made, June 4, 1928.

EUGENE D. GRAHAM, Clerk.

By F. L. STRONG, Deputy Clerk.

DEPARTMENT OF PUBLIC WORKS

DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the State Highway Engineer, Highway Building, Sacramento, California, until 2 o'clock P. M., July 5, 1928, at which time they will be publicly opened and read, for construction in accordance with the specifications therefor, to which special reference is made, of portions of State Highway, as follows:

Placer County, three reinforced concrete girder bridges across the South Fork of Yuba River at points about 2 1/4, 3, and 5 1/2 miles east of Cisco (III-Plas-37-F), each bridge consisting of two 33-foot spans on a concrete bent and abutments with wing walls.

San Diego County, between Viejas Creek and Guatay Creek (VII-SD-12-D), about seven and two-tenths (7.2) miles in length, to be graded.

Ventura County, between Hueneme Road and Little Sycamore Creek (VII-Ven-60-A), about eleven and six-tenths (11.6) miles in length to be graded and paved with Portland cement concrete.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the said office, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, and at the office of the District Engineer of the district in which the work is situated. The District Engineers' offices are located at Eureka, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the District Office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Division of Highways. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the District Office.

No bid will be received unless it is made on a blank form furnished by the State Highway Engineer. The special attention of prospective bidders is called to the "Proposal Requirements and Conditions" annexed to the blank form of proposal, for full directions as to bidding, etc.

The Department of Public Works reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

DEPARTMENT OF PUBLIC WORKS,
DIVISION OF HIGHWAYS.

C. H. PURCELL,

State Highway Engineer,

Dated: June 6, 1928.

NOTICE TO CONTRACTORS

(Beardsley School District—Kern County)

Notice is hereby given that sealed bids will be received by the Board of Trustees of the Beardsley School District, Kern County, California, up to 4 o'clock P. M. on Tuesday, June 26, 1928 for the furnishing of all labor and material for the construction of a ten-room and auditorium masonry school building, in accordance with the plans and specifications prepared by Symmes & Cullimore, Architects, 215 Haberfelde Bldg., Bakersfield, California. Separate bids will be received for the general work comprising all work except electric wiring and heating, and on

the electric wiring, and on a low-pressure steam heating plant. Contractors may bid upon any or all of this work. Bids will be received at the offices of said Architects, and will be opened at 8 A. M. on Tuesday, June 26, 1928, at the Beardsley School, Kern County, California.

Plans and specifications for the same may be obtained at the offices of the Architect upon deposit of twenty-five Dollars (\$25.00) which will be returned upon receipt of said plans and specifications in good order at the time designated by the Architect.

A certified check or bidder's bond in the amount of ten per cent of the amount bid is to be furnished with the bid, and to the order of the Clerk of the Board of Trustees, as evidence of good faith, and that the bidder, if successful, will enter into a contract satisfactory to said Board of Trustees, and in addition thereto will furnish surety bond therefor in the amount of fifty per cent of the bid, covering labor and material, according to law. All bids are to be made on the blank forms furnished by the Architect.

The board reserves the right to reject any and all bids, or alternate bids deemed not advantageous to the district and to waive any informality in any bid received.

By order of the Board of Trustees of the Beardsley School District of the County of Kern, State of California, adopted June 6, 1928.

A. B. THECK, Clerk.

J. M. MCINTOSH, Trustee.

CHAS. ZUERCHER, Trustee.

NOTICE TO CONTRACTORS

(Dredging at Naval Base, San Diego)

SAN DIEGO, Cal.—Until 11 A. M. June 18, bids will be received by Public Works Office, 11th Naval District, Foot of Broadway, for dredging at Naval Operating Base, Naval Air Station, for dredging under specification No. 5592. The contract work includes the dredging of approximately 7000 cu. yds. in the vicinity way on north beach and three seaplane of and adjacent to one seaplane runways on east beach of the Naval Air Station, San Diego. If bidding date is desired, there should be forwarded to the Public Works Officer, Eleventh Naval District, Foot of Broadway, San Diego, Calif., a check or postal money order for \$10 payable to the Chief of the Bureau of Yards and Docks, as security for the safe return of drawings and specifications. Geo. A. McKay, Captain (CEC), U.S.N., Public Works Officer.

(D)

NOTICE TO INSURANCE COMPANIES

The Council of the City of Berkeley invites and the undersigned will receive at her office in the City Hall, Berkeley, California, up to 10:00 A. M., Tuesday, June 12, 1928, bids for furnishing Fleet insurance covering public liability, fire and property damage on automobiles and trucks belonging to the City of Berkeley, a list of which is on file in the office of the City Clerk. Bids must be on forms to be obtained from the office of the City Clerk.

EMMA M. HANN,
City Clerk.

NOTICE TO CONTRACTORS

(Four Room Concrete School—Chico)

Pursuant to a resolution of the Board of Education of the City of Chico, in and for the Chico School District, adopted in regular session June 5, 1928, notice is hereby given that the said Board will receive sealed bids until the hour of 5 o'clock P. M. of Wednesday, June 27, 1928, for the construction of a concrete school building in Chico, California, in accordance with the plans and specifications prepared therefor by Chester Cole, architect, of Chico, and Louis Brouhond, associate. This proposal shall be made upon a form prepared for the same. Said plans, specifications and proposals may be had in the office of the Clerk of the Board of Education, Municipal Building, Fifth and Main Streets, Chico, California.

The above referred to construction work is for a four classroom unit, with office, storeroom, toilets and heating system and other items, as delineated or described in the plans and specifications for the same.

A deposit of \$10.00 will be required for each set of plans and specifications furnished the bidder, said deposit to be

returned to the bidder upon the return to the office of the plans and specifications.

Said bid shall be signed by the bidder, and be accompanied by a certified check for at least five per cent of the amount of the bid or proposal, certified to by some responsible bank or banker, and made payable to the President of the Board of Education of the Chico School District, or order; said certified check to be forfeited to and retained by the Chico School District should the party or parties to whom the contract shall be awarded fail to enter into the contract after award has been made, or to give bonds as required. Bids must be plainly marked on the exterior as to content.

The successful bidder will be required, upon the signing of the contract, to furnish all necessary bonds in the amount of fifty per cent of the contract for compliance with the laws of the State, both in the matter of guaranteeing the execution of the contract and in the matter of protection to material, men and labor, also will be required to furnish all necessary compensation protection.

The Board of Education of the Chico School Dist. reserves the right to reject any or all bids.

BOARD OF EDUCATION OF THE
CHICO SCHOOL DISTRICT.

CHAS. H. CAMPER, Secretary.

(D)

NOTICE TO CONTRACTORS

Sealed proposals will be received by the Directors of the West Stanislaus Irrigation District, at their office in Westley, Stanislaus County, California, up to two o'clock P. M. (2:00 P. M.), Saturday, July 14, 1928, and will at that time be publicly opened, for furnishing seventeen (17) electrically driven pumping units, 11 discharge pipes and valves for future pumps, six outdoor switch structures and 18 transformers under any or all of the following schedules:

A. Furnish all pumping and electrical equipment, including outdoor switch structures, transformers, switch gear, motors, pumps, discharge pipes and valves including 11 discharge pipes and valves for future pumps, installed and ready to operate.

B. Furnish all pumping and electrical equipment including switch gear, motors, pumps, discharge pipes and valves including 11 discharge pipes and valves for future pumps but exclusive of all conduit and cable from compensators to motors, f.o.b. cars Westley, California.

C. Furnish all outdoor switch structures and transformers including insulators, bus supports and bus necessary to connect transformers to station bus; also supply oil with transformers, f.o.b. cars, Westley, California.

D. Install all equipment furnished under Schedule B ready to operate including hauling of said equipment from cars to point of installation and furnish conduit from compensators to motors for 28 pumping units and cable from compensators to motors for 17 pumping units.

E. Install and connect up ready to operate all equipment furnished under Schedule C including the hauling of said equipment from cars to point of installation and the connecting of the low voltage transformer bus to the station bus.

All proposals must be accompanied by a certified check for at least five (5%) per cent of the amount of the bid submitted, in favor of the West Stanislaus Irrigation District.

All certified checks accompanying rejected bids will be returned.

Certified check of the successful bidder will be returned when the contract has been executed and the required bond furnished.

In case of failure to execute contract or furnish the required bonds within the stipulated time, the certified check and the proceeds thereof will become and remain the property of the West Stanislaus Irrigation District.

Plans, specifications and contract are on file and can be inspected at the District's office at Westley, California, or at the office of the District's Engineer, W. F. Woolley, at Patterson, California.

A full set of plans, specifications and contract may be obtained at the Engineer's office or at the District's office on deposit of \$10.00 for each set, which sum will be returned on the return of same in good condition within ten days after the date on which the bids are opened.

The contract will be let to the lowest responsible bidder, except that the Dis-

trict reserves the right to reject any and all bids and to waive any irregularities in the bidding. Bids will be opened at the District's office at Westley, California, Saturday, July 14, 1928.

By order of the Board of Directors of the West Stanislaus Irrigation District.

ELBRIDGE SMITH,

Secretary of the Board of Directors
Westley, California.

June 1, 1928.

TIMPIE HYDRATED LIME

(a true dolomite lime)

for Brick Mortar, White Coat and Sand Float Finish, and for inducing plasticity in and water proofing Portland Cement Concrete.

Used in approximately \$70,000,000 High Class Pacific Coast construction in last 3 years.

EXAMPLES:—

New Standard Oil Building, San Francisco	Central Bank, Oakland
Oakland Savings Bank	New Subway Terminal Building, Los Angeles
New Mark Hopkins Hotel, San Francisco	Federal Reserve Bank, San Francisco
New Hunter-Doolin Building, San Francisco	New Russ Building, San Francisco
Pacific Telephone and Telegraph Building, San Francisco	

Sold by most progressive dealers throughout Pacific Coast.

Russian Peasant Women Placing Straw
Around Their Dwelling to Keep the
Cold Out

Applying time - proved methods of insula- tion to modern day needs

NO one knows the value of building insulation as do the inhabitants of either extreme cold or extreme hot climates. These natives have realized for hundreds of years the value of insulation—particularly straw insulation. These people, not having a complete scientific knowledge of heat and cold values, made their selection of an insulating material by actual test. After their many crude experiments on different products—straw was finally chosen as their most perfect means of protection against heat and cold.

And today, this time-proved method of insulation is offered in a perfected form—INSO BOARD—manufactured in sturdy panels 7/16" thick, 4 feet wide and any length desired. It has many structural insulation uses such as—(1) Plaster Base, (2) Sheathing under stucco, brick or wood exterior, (3) Roof Insulation, (4) Under Flooring, (5) Wall and Ceiling finishing panels, (6) Sound Deadener, and (7) Insulating inner Walls.

DEALERS will find INSO BOARD a profitable connection, combined with the sales and advertising co-operation which will be WHOLLY AT OUR EXPENSE. Write today for particulars.

S. F. HOME BUILDERS' ASSN. ELECTS OFFICERS

Jas. A. Arnott was elected president of the San Francisco Home Builders' Association at the seventh annual birthday meeting held at Marquard's Cafe, June 14. Other officers elected were: H. C. Mangels, first vice-president; St. Geo. Holden, second vice-president; J. Prout, third vice-president and Grace Perego, secretary-treasurer.

Eleven directors were elected as follows: C. S. Allred, Jas. A. Arnott, J. V. Campbell, R. H. Stevenson, St. George Holden, H. C. Mangels, Theo. Meyer, J. Prout, G. Berego, L. V. Riddle, A. M. Samuelson.

A large number of builders were present at the meeting. Entertainment was furnished by Marquard's clever show. A feature of the evening was a 4-reel motion picture exhibited by the Hoffman Specialty Company on heat control.

President Allred outlined some constructive plans for the home builders during his term. His first efforts, he stated, would be directed toward reducing the cost of building fees.

FRANCE'S STEEL OUTPUT SHOWS DECLINE

France's output of pig iron totaled 834,000 metric tons in April. This, according to figures transmitted to the Bankers Trust Company of New York by its French Information service, is a decrease of 23,000 metric tons over the previous month. Of this total 763,000 metric tons were phosphoric pig iron and 71,000 metric tons hematite pig iron. Steel output in April reached 738,000 metric tons, or 38,000 less than in March. Of this April output 724,000 tons were ingot steel and 14,000 cast steel, as against 791,000 and 15,000 respectively, in March. During April there were 150 blast furnaces in operation, 28 more were ready for use and 42 being built or repaired.

BUZZ--BUZZ

(By Eldee in Engineering News-Record)

While bent above our drafting board
With empty pouch and weary gourd
One chilly day not long ago
In vain attempts to rightly show
A contour wriggling 'round a hill,
A fly lit on the window sill,
Which was about a foot away
From where we carry on each day.

It was a common household fly
With legs and daubre, bulbous eye
And bloated fuselage and wings
And cushioned feet—disgusting things—
That somehow, strang to say, 'd hung on
When all its comrades long had gone
Unto that bourne whence Bobby Burns
Says in his book, "No fly returns."

As at its loathsome form we geyed,
Toward us it began to slide,
Anon and ever marking time
To scrub and polish at the grime
Which caked upon its front feet, stuck—
No doubt germ-laden truck and muck—
Repulsive—dangerous, in fact;
And we resolved it should be smacked!

And, too, some "fly egg engineer"
Once said, while mooning o'er a beer,
That one lone fly—if left intact—
If by the swatter'd not been cracked—
Until the dandelions again
Bloomed joyously o'er vale and fen,
Would lay five million eggs—then some—
To hatch and broadcast filth and scum!

And so we slipped down from our stool
Noiselessly as an army mule
And from the drawer beneath our board—
Where for six weeks it had been stored—
Snaked out our swatter, raised it high
And swung it at the ding-danged fly,
A muttered cuss upon our lips
And in our trousers two new rips!
Bang!--All went black—upon our
board!--

As over it the "Higgins" poured;
While on the floor the bottle crashed—
And, strange to say, somehow was
smashed!--
The map on which we'd spent long hours
Installing contours, roads and flowers,
Was ruined!--And we shed a tear—
As something buzz-buzzed past our ear!

QUICK HARDENING CEMENT

The International Cement Corporation, 342 Madison Ave., New York City, has developed a new improved Portland cement that gains 28 day strength in 24 hours, yet the time of initial and final set are the same as before. This cement is based upon recently gained knowledge resulting from years of careful research, pointing to the fact that a cement higher in tri-calcium silicate and ground a little finer than was formerly the practice would afford the properties required and yet be usable under the same general specifications for manipulation that have recently governed the use of ordinary Portland cement. This cement has been perfected and put on a quantity basis under the direction of D. A. Abrams, director of research of the International. It is known as Incor, and differs from other high early strength cements insofar as it contains no admixtures. This new cement is described in a bulletin recently issued by the company.

LICENSE ORDINANCE EFFECTIVE IN PORTLAND JULY 1

H. E. Plummer, chief of the Bureau of Buildings for the city of Portland, Ore., has given notice to building contractors and the building public that the general contractors license ordinance is to take effect July 1.

The new law, as Plummer points out, will apply only to contractors in erecting and repairing buildings and will not effect owners doing work on dwellings or sub-contractors working on large jobs in charge of a licensed contractor.

The full text of the notice follows:

The General Contractors License Ordinance (Ordinance No. 54528) is to take effect July 1, 1928. This ordinance applies only to contractors who erect, alter or repair walls and structural parts of buildings. It does not apply to an owner doing work on a single-family dwelling or a duplex which he is occupying in whole or in part, or to a sub-contractor doing work on a building when the permit for the building has been taken out by a licensed building contractor.

This ordinance requires any one who desires to do business as a general building contractor first to make out an application, submit a surety bond for \$2500 and then take out a license. For the purpose of avoiding confusion and delay it is suggested that all building contractors who want to be licensed should file with the Bureau of Licenses their applications and a surety bond on or before June 15th. This will give the License Bureau some time to have the bonds checked over and to be ready to issue the licenses on July 1. At the time the license is issued a fee must be paid which will be \$5 for the half year (the annual license fee being \$10.)

No permit will be issued on or after July 1, 1928, for a building or structural alterations or repairs to a building, to a contractor unless he has been licensed and then only for the class of work covered by the license.

If a license is not secured by August 1st applicants will be required to take an examination conducted by the Board of Examiners before a license can be issued.

The attention of the contractors is particularly called to Section 6 of this ordinance which divided the work done by contractors into three classes and groups the contractors accordingly. The license covers the kind of work that the contractor is licensed to perform and to take out permits for.

EXPORT OF BATHTUBS DECLINES IN BOTH NUMBER AND VALUE

During 1927 this country exported 17,522 bathtubs valued at \$586,226, of which Argentina took 4,501; Cuba, 4,274, and Mexico, 1,772, according to a statement made public June 13 by the Iron and Steel Division, Department of Commerce. The full text of the statement follows:

Total exports of enameled plumbing fixtures from the United States last year amounted to 74,165 pieces valued at \$1,237,465, a slight increase compared with the previous year when shipments amounted to 70,997 pieces valued at \$1,236,415.

Exports of bathtubs during 1926 numbered 18,718 valued at \$634,710, while during 1925 they amounted to 19,638 valued at \$587,619.

Other countries numbered among the purchasers of American bathtubs last year were Canada, Newfoundland, China, Japan, Philippine Islands, Spain, United Kingdom, Colombia, Venezuela, Australia and New Zealand.

APPRENTICESHIP PROBLEMS IN BUILDING TRADES FOUND TO VARY WIDELY—LABOR SURVEY DISCLOSES

Apprenticeship problems in building construction and methods of dealing with them vary widely in different localities and crafts, and in the various crafts in the same locality, although a few craft organizations have definite programs which are of fairly wide application, according to the Bureau of Labor Statistics, Department of Labor, based upon a recent survey of it.

The purpose of the inquiry, which was carried on in 19 cities, was to determine to what extent apprenticeship is a factor in the building industry and what effect the growing agitation for a revival of the apprenticeship system is having.

The Bureau of Labor statistics finds that apprentice systems function most effectively as a whole where union organization is strongest. "Local unions," it says, "were found here and there which definitely oppose apprenticeship, but more instances occur in which the unions are doing all that is being done to provide new mechanics."

Pointing out that although it is generally admitted that an apprentice is a best a financial liability for the first year, and often longer than that, the Bureau states that it is not that phase of the problem which is objected to so much as it is the added difficulties on the job when an apprentice is taken on.—EDITOR.

Training on Job Said To Be Unprofitable
"The expression most frequently used by contractors," it is said, "is that they 'can't be bothered with boys.' Rapid building makes training on the job not only unprofitable but even night impossible. Employers and journeymen agree that it is simply not possible to carry out any real program of teaching on the job."

A summary of the Bureau's study, which is embodied in Bulletin No. 459, follows:

The recent building activity throughout the country has emphasized some unwholesome and unprofitable conditions in the building industry growing out of the war-time practice of making mechanics overnight, and has led to a renewed interest in the subject of apprentice training. To determine to what extent apprenticeship is a factor in the industry, and what effect the agitation for a revival of the apprentice system is having, the Bureau of Labor Statistics of the United States Department of Labor has made an investigation in 19 cities which are considered representative.

Some of these cities were known to have organized movements for training apprentices in accordance with provisions of the Federal vocational education law, and these were studied to determine the operation of the system and the effect of the movement on the supply of mechanics. The other cities were visited to determine whether or not anything was being done in the way of apprentice training by any of the parties at interest.

The Bureau limited its study to actual apprenticeship; that is, actual contract or some equivalent obligation extending over a stipulated period of years, by which a boy is to learn and his employer is to teach one of the building crafts. Helpers, who are hired and dismissed according to the needs at the time, were not considered, even when they were boys of apprentice age who might eventually become journeymen.

Sources on which the Bureau drew for information were local building trades unions, trade associations of employers, builders' exchanges, school authorities, and representative individual employers.

Among the individual employers visited were union and openshop men, and contractors who do and those who do not employ apprentices.

Trends in Training Mechanics Studied

The primary purpose of the investigation was to find out what is the present trend in producing new mechanics for the building industry, what machinery for training apprentices exists, and how it functions. Systematic school training was encountered in several localities, since to a marked degree the Federal vocational education law has been the stimulus for renewed interest in craft training and has indicated the course which training is following. The bureau did not, however, attempt a detailed study of school work.

Material covering courses of study, specimen lesson sheets, and the like was readily available in some cases, and, as it is suggestive of the type of work the apprentice schools are doing, it is presented as appendices to the report. School instruction must, in the nature of the problem, be wholly individual, since apprentice classes are made up of boys with varying degrees of basic education, the boys varying frequently from recent immigrants—who must be sent to the Americanization classes to learn English in addition to their trade-school work to high-school graduates and perhaps to technical-school graduates.

The apprentice problem is a local one, and the methods of meeting it vary widely not only as between cities but also as between different crafts in the same city. Even in cities where the problem is treated from the standpoint of the industry as a whole, as in Cleveland, certain crafts in the industry may be acting independent of the general plan or may be doing nothing whatever. Any attempt to generalize must be complicated with exceptions and variations.

Each city covered in the bureau's survey has its own problems and its own ways of meeting them, or, perhaps, of letting them alone. Because each city is a story in itself this report will present separately and in detail the situation as it was found in each of the localities visited, summarizing only such systems and such training programs as have a definite bearing on the subject of apprenticeship in general.

While apprenticeship by formal indenture between employer and boy is not widely practiced, there is coming into use a system which amounts to the same thing. That is the joint apprenticeship committee system. These committees are composed of representatives of employers and journeymen and, in some cases, of the city school boards. Apprentices are under agreement with the committee to serve their time and to abide by the laws of the committees, which on its part takes the responsibility of seeing that the boy has employment and proper opportunities for training throughout his apprenticeship.

Where joint committees do not operate, the union may serve the same purpose, the apprenticeship being in effect indentured to the local union and governed by the terms of the working agreement between the union and the employers, with the union acting as placement agent to keep the boy employed.

Apprentice training has more vitality, is more closely organized, and is affecting the building situation more definitely in those centers in which the division of vocational education of the local school board, usually acting under the Smith-Hughes law, is cooperating than in the

cities in which the contractors or the unions are trying to work out the problem alone.

Union May Serve Similar Purpose

Probably this condition is not primarily the result of the actual number of hours spent by the boys in the apprentice classes, since that is only four hours a week as a rule. More likely it is the result of the organization and cooperation of the employers and the journeymen, which is the machinery demanded by the school boards through which training shall be carried on.

The various organized systems for promoting and controlling apprenticeship are set forth in the detailed reports by cities, but a comparative analysis of the different types may serve to show strength and weakness in the systems followed. It must be emphasized, however, that the following analysis is intended as a comparison of plans and methods. There are instances of indifferent results and definite failures under the most favorable plans, but they can usually be traced to factors other than the plan itself.

Apprenticeship systems designed and organized to encompass the entire building industry are found only in four cities: Cleveland, Detroit, New York City, and Niagara Falls. In none of them does the plan actually include all of the building crafts but the organization is such that it can be expanded to cover any additional craft when the craft itself takes the necessary steps. Joint apprentice committees for individual trades are effective agents in several cities, where they operate successfully without any centralized machinery. Cleveland is the outstanding instance of successful operation under the former plan, while Chicago illustrates the method of uncorrected craft actions.

Systematic Training Provided in Cleveland.

Because the Cleveland method contains all the elements of systematic apprentice training which the bureau's investigation has found in any city visited, it will, for purposes of analysis and comparison, be treated as a standard, deviations from which in other cities will be pointed out. As already noted, Cleveland has a system structurally so devised as to cover the building industry, but the foundation of the system is the separate crafts, each functioning through a joint committee of organized workers and organized employers. Cooperating with these committees, but not actually members of them, are the trade teachers and officials of the division of vocational education of the Cleveland public-school system. The joint apprentice committees are active working bodies, which meet regularly, monthly or oftener, and which are the controlling agency of their respective crafts in all matters pertaining to apprenticeship.

Upon action by the committees a formal indenture is made which binds employer and apprentice for the full term of apprenticeship. After the expiration of a probationary period an employer may not discharge an apprentice and a boy may not change employers without the consent of the committee after a hearing.

One of the fundamental doctrines of the system is continuous employment throughout the apprentice period, in order to keep the boy in the trade. If the contractor to whom a boy is indentured runs so short of work that he can not keep him busy, a transfer to another contractor is effected through the trade committee until such time as the origi-

employer can resume his obligation. Responsibility for carrying the boy through his apprenticeship remains with original employer.

To facilitate transfer from an idle to a busy contractor when necessary to insure continuity of employment, the Building Trades Employers' Association, which is a federation of various craft organizations of contractors, employs a director of apprentices. Additional duties of the director, who gives his full time to the work, are to act as truant officer for the contractors, to keep informed of all his operations, and, on behalf of the contractor, to assist in many ways in the early working out of the apprenticeship program.

An important factor in that program is the part-time school work. All apprentices in the trades coming under the Cleveland plan must attend school four hours one day a week, or one day of eight hours any other week, at the time set by the division of vocational education. Cleveland is the only city studied by the bureau which has an apprentice school; that is an institution distinctively for apprentices as such. In other cities apprentice classes are held in the continuation or manual training schools, or apprentices attend the regular night schools.

While the division of vocational education is only one component element in the organized apprentice training system in Cleveland, it enforces certain regulations which are in fact the principal cohesive factor in holding the entire scheme together, and it is largely instrumental in keeping the "real, wholehearted cooperation" which Doctor Mays refers to as being the prime essential in any successful system.

Niagara Falls and Detroit are the only other cities covered which show the same relation between the public schools and the industry in the training of apprentices. In each of these cities the director of vocational education is a member of each trade committee and is in direct contact with the head of the apprentice system. The plan used in Niagara Falls is very much the same as Cleveland's, the only important difference, beside the one just mentioned, being the amount of time spent in school. First and second year students must attend school eight hours a day—four hours in evening school on their own time and four hours Saturday morning on the employer's time; but pay-day-school work is contingent upon night-school attendance. Third and fourth year boys must attend night school four days a week.

The system in both Cleveland and Niagara Falls depends for successful operation upon the cooperation of unions, employers and upon the active participation of the joint apprentice committees. A Cleveland school official declared in a recent address that none of the results that have so far been accomplished under the Cleveland plan "would have been possible without the untiring efforts of the members of the joint apprentice committee." In Detroit the trade committees are neither so active nor so interested, and formal indenture is made only a few trades.

Apprenticeship in the building trades in Chicago depends solely on the initiative and diligence of the craft committees representing organized workers and organized employers. The school system is receptive, not an active agent in apprentice training. Contact between the apprentice classes and the trade is chiefly through coordinators employed by the committees and through the trade teachers.

Formal indenture is practiced in all cases and in most trades control and regulation of apprenticeship through joint committees are provided for in the joint working agreements and include compulsory part-time school work. In most cases uniform control is assured by the provision that only those contractors who are members of their trade associations,

and hence parties to the joint agreements, may have apprentices.

This is not true of carpentry, in which trade there is neither a trade agreement nor a joint apprentice committee. In the plastering trade a once active apprentice committee has become moribund and part-time school training for plastering apprentices has been discontinued because of a general lack of interest.

Under the systems thus far discussed, when a craft participates at all it does so wholly. That is to say, all the apprentices in a given trade, with possibly an occasional exception in an open shop, are included in and regulated by whatever system is followed by that trade. Only a small percentage of the contractors may be involved, but such apprenticeship as exists comes under the unified control of the organized agency.

This situation does not exist in New York City, in which an apprenticeship commission, founded and fostered by the New York Building Congress, is the medium of promoting apprenticeship in the industry. The commission is composed of representatives of the Building Congress, the Building Trades Employers' Association, and those building trades unions which are identified with it.

Participation in the work of the commission on the part of the unions, is, however, determined by each local union of each craft. No craft in the city is identified with the commission plan to the extent of having all its local unions cooperating. The Painters' District Council of Manhattan and the Bronx, for example, is cooperating and observing the regulations of the commission with regard to the apprentices under its control.

On the other hand, local unions of painters in Greater New York, while having apprentices duly indentured, have no connection with the commission.

Structurally the New York Apprenticeship Commission is composed of apprentice committees of the component trades. Functionally the trade committees are weak and inactive, and the vital agency is not the craft organization but the superstructure representing the industry. The commission has no power and the trade committees exercise none.

Indentures Confined to Printers' Trades

There is no formal indenture except in painting, no provision for continuous employment and no machinery for assuring it, and no part-time school training. The commission is the point of contact between the school system and those apprentices coming under the jurisdiction of the commission who are attending the night-school classes provided, either voluntarily or because of whatever pressure may be brought to bear upon them. Further than that, and its efforts to promote and encourage apprenticeship, the organized machinery in New York does not go.

One craft which is not a part of the apprenticeship commission has a joint apprenticeship commission composed of two representatives of the union and two of the contractors' association and exercises complete control over apprenticeship in trade, that of sheetmetal work. Apprentices are formally indentured, continuous employment is assured, and attendance at night school four hours a week is compulsory.

The cry that "boys won't go into the trades" is not borne out by the investigation. On the contrary, it is quite apparent that the dearth of apprentices in the building trades is not due to a dearth of boys interested in entering those trades. The unions everywhere reported long waiting lists of applicants for apprenticeships, and joint committees agree that the problem does not lie in finding material to train.

The experience of the commission on apprenticeship in one large city illustrates this vividly. In an effort to arouse interest among contractors and the general public in the program and the work of the commission, its secretary broad-

cast an address through a local radio station.

"The result," he said, "were illuminating and disappointing. We were flooded with requests from boys and parents for more information, and with applications for apprenticeships, but not one contractor came forward with a request either for the details of the system or for an apprentice."

Because of the limited opportunities for placing boys with contractors as apprentices, some unions, where they are sufficiently in control, make a practice of confining apprenticeships to the sons and other relatives of the men in the trade. This is especially true in brick-laying and plastering.

It is frequently asserted that a boy has no chance to become a bricklayer unless his father is in the trade either as contractor or journeyman, and in a number of cases that is quite true. It has been true also in plumbing in some localities.

The Chicago master plumbers have broken up the practice, followed there for years, of granting apprenticeships only to sons of the men in the trade. The apprenticeship agreement in Chicago stipulates that the master plumbers shall make their own selection of boys to become apprentices, and the union therefore no longer serves as the recruiting agency.

In Pittsburgh the working agreement in the electrical trade provides that the employer shall select the apprentices one year and the union the next year, and it is tacitly understood that the union may select sons of journeymen if it chooses to do so.

The building trades unions in St. Louis have a very definite policy of "keeping the trade in the family" and enforce it to such an extent that one contractor declared that "a boy has as good a chance to get into West Point as into the building trades unless his father or his uncle is a building craftsman."

An officer of a local union in St. Louis reported that the name of his 14-year-old son has already been placed on the union's apprentice waiting list, and that it is quite certain would not be reached before the boy becomes of apprentice age.

In practical application, union regulations governing the ratio of apprentices to journeymen prove to be far less a deterring factor in apprentice training than is commonly assumed. Where the highly developed systems prevail union regulations are apt to be abrogated entirely and the whole question of quota is handled by the joint committee on the basis of the number of apprentices the trade can support in continuous employment.

Where the method is more desultory the union quota is not an issue for the reason that relatively few contractors have any apprentices at all, and certainly have no disposition to take on more than the union agreement permits.

If union regulations were in fact responsible for restricting opportunities for apprentices, one would expect to find greater development in open-shop centers. Actually, however, it is much harder to find an apprentice in an open than in a closed shop. Only three open-shop contractors were encountered in the course of the investigation who had more apprentices than they would have been granted under union agreement.

Those most closely in touch with the situation—school authorities, members of apprenticeship committees, and contractors who are cooperating in the effort to the limit of their ability—do not hesitate to declare that the individual contractor is chiefly responsible for the shortage of apprentices and the absence of a training system. Shortsightedness, indifference, and selfishness are the charges brought against their colleagues by the contractors who are carrying the load of apprentice training for the industry.

It is conceded that the provision for continuous employment, the one element

which is vitally necessary to keep the boy, is the greatest stumblingblock in the path of the contractor doing a small, or even a moderately large, business. Accordingly it is the opinion of some of the men in the industry that the problem of seasonal building will have to be met before an effective apprentice system can be evolved.

Apprentice System Best Under Union Rule

As a rule trade organizations, both of employers and of journeymen, have at least an appreciation of the needs of their respective trades in regard to apprentice training, even though they may be doing nothing constructive to promote it. And while there are exceptions, taken as a whole it is where union organization is strongest that apprentice systems function most effectively.

Local unions were found here and there which definitely oppose apprenticeship, but more instances occur in which the unions are doing all that is being done to provide new mechanics. In one "closed-shop" center, on the other hand, not only strict limitations as to the number of apprentices, but dictation as to who may become apprenticed are enforced by unions strong enough to impose them upon employers.

Instances of wage scales so high that few contractors can afford to pay them to learners suggest restriction by a method more indirect and probably more effective than the ratio system.

While it is generally admitted that an apprentice is at best a financial liability for the first year, and often longer than that, it is not that phase of the problem which is objected to so much as it is the added difficulties on the job when an apprentice is taken on. The expression most frequently used by contractors is that they "can't be bothered with boys."

Rapid building makes training on the job not only unprofitable but well-nigh impossible. Employers and journeymen agree that it is simply not possible to carry out any real program of teaching on the job.

To this school authorities and lay opinion, equally interested but not so directly involved, added that whether possible or not, there certainly is no training on the job. The boy merely "ruhs off" what he can while he is working with journeymen, and where school work is part of his training the school is expected to supply, in a few hours a week, the technical and mechanical knowledge which the job cannot, or at any rate does not, provide.

Training Defective In Building Trades

One authority made the unequivocal declaration that "there simply is no such thing as training apprentices on the building." Professor Mays explains that:

"The character of construction work discourages the use of inexperienced labor for skilled operations. The building mechanic does not make a small part of the whole which later will be placed in the finished product, as does the factory tradesman, but his work is performed, in the first instance, on the building itself. If a plasterer's apprentice or a tile setter's apprentice makes a mistake, it is made on the finished product and can be corrected only by the expensive process of tearing out materials from the building. This characteristic of building work makes teaching on the job a very expensive procedure and explains, in part, the reluctance of contractors to employ any but journeymen mechanics."

As already stated, apprentice problems and methods of dealing with them vary widely in different localities and crafts, and in the various crafts in the same locality. At the same time a few craft organizations have definite national programs which are of fairly wide application.

CONCRETE FOR ARCH DAMS

By Joseph A. Kitts, Consulting Concrete Technologist, Kitts and Tuthill San Francisco.

This article treats of plain concrete suitable for thin section arch dams of the cylindrical, variable radius and constant angle types. It does not apply in every respect to arched dams of the gravity type nor to reinforced concrete.

The general requirements of concrete for thin section arch dams are:

- (1) Economy
- (2) Durability
 - (a) Strength
 - (b) Density
 - (c) Impermeability
 - (d) Uniformity
 - (e) Low expansion and contraction
- (3) Workability, flowability and cohesion of the fresh mix.

These qualities depend upon the following items of the composition and manufacture:

- Cement quality and content;
- Water-cement ratio;
- Quality, shape, maximum and minimum size, and coarseness modulus of the mixed aggregate;
- Uniformity and character of grading of the mixed aggregate;
- Cement to voids in the fine and in the mixed aggregate;
- Sand and mortar to voids in the coarse aggregate;
- Accuracy of measurement of aggregates, cement and water;
- Mixing time and efficiency of mixer;
- Moisture and temperature of curing;
- Efficiency of placing plant; and,
- Workmanship in mixing, placing and curing.

Economy

Economical mixtures of the required quality depend upon the utilization, to the fullest possible extent, of those conditions listed which economically benefit that quality. This means thorough, constant and understanding technical and practical control of aggregate and concrete production,—proportioning, mixing, placing and curing, in co-ordination with and supported by, cement, aggregate and concrete testing as a daily routine part of such control.

An excess of cement allowed in lieu of thorough technological control does not insure the quality in any respect, will not give uniform results and is more costly to the owner and to the contractor than thorough control. The physical characteristics of the materials vary from day to day, therefore the cement content alone is not an indication of the strength, density, impermeability and durability of a concrete. It may be adulterated by silt, vitiated by organic matter, diluted by an excess of water and dissipated by a fine, small maximum size and poorly graded aggregate. The results are correspondingly not economical for the cement expenditure.

It is not economical to design for concrete of 2,000 lbs. per sq. in. compressive strength with a safety factor of four or more and then produce a concrete varying in strength from 2,000 to 4,000. It is not economical to reduce the cement and water content if this reduction is adverse to the workability, flowability and cohesion of the fresh mix to such an extent that the additional cost of placing is greater than the saving in cement.

Economy is controlled largely by the mixture (of essential workability) having the greatest strength in proportion to cost and upon the use of this strength as the basis of structural design.

Durability

Measures for durability should consider the exposure, the probable usable life of the structure, the climatic conditions, whether always full or alternately full and empty, whether subject to wear by overflow, etc.

Resistance to wear and stress is proportional to the strength. Resistance to chemical disintegration depends upon proportion of stable solids in the mass, high density, low porosity.

Durability depends largely upon permeability. Impermeability is necessary to prevent flow of fluids through mass, the consequent leaching of the cement, and to minimize the expansion contraction by variation of moisture content. Highly dense and impermeable concrete is essential where the structure is subjected to sustained temperature below freezing.

Uniformity of mix is a measure of durability as it means uniformity of strength, density, shrinkage, of modulus of elasticity, and of expansion and contraction by moisture variation.

Expansion and contraction due to moisture variation should be minimized to insure durability.

Strength

The greatest strength in proportion to cost of materials in the mix should be the basis of design, assuming a safety factor of 3 to 6,—the factor depending upon conditions under which the dam being built, required life, exposure, special requirements of site, conditions of site, availability of competent practice and technical labor, etc.

This maximum strength-economy factor must be based on the cost of materials at the site. It can be determined only by comprehensive concrete tests of the materials economically available with reference to the site) in which coarseness of grading of aggregates, the cement contents are varied while maintaining the essential workability and cohesion of the fresh mix.

In determining the compressive strength of concrete, the established adverse effects of compression tests should be taken into consideration.

The use of the strength at age of days constitutes a safety factor of 1.25, less than 1.25, if the structure is subjected to full load before an age of three months.

The relation of strength at 7 days S_7 to strength at 28 days S_{28} should be $S_{28} = S_7 \times \sqrt{4}$ in which (X) may vary from 28 to 36. Having established the strength at a two ages, that at any other age should follow the formula $S = K \log a + c$, in which (S) is the strength, (a) is the age and (K) and (c) are constants.

Uniformity

A concrete of varying quality has varying strength, elasticity, density, permeability, shrinkage in sitting, and a varying expansion and contraction by moisture content. Conditions of work of an unbalanced stress may be caused by lack of uniformity.

The moduli of elasticity are proportional to the square roots of the compressive strengths.

A uniform concrete should have throughout the mass of each monolith the same uniform gradation of rock particles, water-cement ratio and absolute volume of cement to unit volume of concrete. This constitutes an exact basis of mixture.

Density

"Density" is the proportion of solids in the mass and includes the increment of solids due to the combination of water with cement. It is a physical measure of the chemical stability of the combination, of the strength, impermeability and durability. Maximum density means maximum

um shrinkage, economical strength, permeability, low expansion and contraction by moisture, and the mixture is near as possible in chemical stability solid rock.

Strength may be as accurately predetermined from the density as from the water-cement ratio.

Density is easily measured by the concrete physicist while permeability of concrete is very difficult to measure.

Expansion and Contraction

When a reservoir is alternately full and empty, it is important that the difference swelling by moisture and contraction drying of the dam concrete be minimized as a measure for permanence.

Given the same mixed aggregate and varying the cement content, the expansion and contraction of the concrete, by setting and drying, decreases with increase of density as the mix is changed from lean to fat and increases with decrease of density as the mix is changed from fat to rich in cement content.

Impermeable Concrete

No standards of permeability and of impermeability tests have been established though this question has been the subject of research for more than half a century. Impermeability may be defined as resistance to free flow of fluids through the mass. Absorption by capillary attraction is not an indication of impermeability. Density and impermeability are not synonymous. However, where conditions are equal, the impermeability increases with the density.

Permeability on a unit area decreases generally with increase of thickness, cement content, age, density, and strength of the mortar or concrete; with the maximum size of the aggregate and the fineness of the cement; and, increases with silt content, fineness of grading of the aggregate, and with the pressure.

The medium consistency of mix is the most permeable; the dry consistency is the most impermeable; and the wet consistency is between the two.

The permeability of a 1:2 mortar having a density of 0.70 is greater than that of a concrete with a density of 0.85 is permeable than the mortar of lower density with which it is made.

It is not difficult to produce concrete impermeable to pressure of 450 lbs. per in. (1,000 ft. head) or less. The causes of impermeable concrete are deficient materials, proportions, mixing, placing, curing, workmanship, and laboratory control.

Impermeable concrete, for the most rigorous conditions and with fundamental economy, is provided for by the following specifications:

Cement:
Supplied by the owner;
Standard quality Portland cement;
and 85% or more passing the No. 200 sieve.

Aggregates:
Standard quality;

Total silt content of mixed aggregate not more than 1% by weight;
Maximum size, 4" to 12";
Separated into 3 to 6 sizes;

Fineness modulus of sand under No. 10 sieve, 2.9 to 3.4;

Fineness modulus of mixed aggregate not less than 7.0; and

Mixed aggregate uniformly graded to the Talbot-Richard equation $p = (d/D)^n$ or the Kitts-Peugh equation $p = 1 - (d/D)^m$ in which (p) and (r)

Barrels of cement per cubic yard of concrete, 0.7 to 1.5;

Water-cement ratio not greater than 1.2;

Cement to voids in mixed aggregate, 0.6 to 1.2;

Cement to voids in sand, 0.85 to 2.0;

Sand to voids in coarse aggregate, 1.05 to 1.20;

Mortar to voids in coarse aggregate, 1.3 to 1.5;

Slump (with particles over 1½" excluded) not less than 3" nor more than 7"; and

The mix to be that grading, cement and water content giving the greatest strength in proportion to cost of materials at mixer, with essential workability, flowability, and cohesion in the fresh mix.

Workmanship:

Mixing time not less than one minute at circumferential speed of 200 feet per minute while all materials are in the mixer;

Competent labor of placing not less than one man-hour for every 10 cubic yards;

Concrete placed in horizontal layers 3 to 6 times the maximum size of aggregate in depth;

Fresh concrete deposited on fresh concrete after starting pour; and

Concrete kept continuously wet for ten days after placing and at a temperature not less than 40°F.

Plant:

Approved modern batch mixers, cement weighing batchers, aggregate batchers, water measuring devices and concrete transporting equipment;

Self-cleaning aggregate bins; and
Slope of chutes not less than 1 vertical on 2½ horizontal.

Production Control:

Direction of inspection, testing, material measurement, mixing, placing and curing to be under an experienced concrete technologist; and

One man-hour of efficient laboratory control for every 50 cubic yards or less.

Efficient Mixtures

The following table (based on comprehensive tests by Lewis H. Tuthill) gives the most efficient mixtures for the particular cement content using ¾ inch maximum size gravel aggregate and a consistency as indicated by a 5" slump. The equation $p = (d/D)^n$ is the basis of grading of the aggregates.

B = bbl. of cement per cu. yd. of concrete;
W/C = cubic feet of water to one cubic foot (94 lbs.) of cement;
S/C = cubic feet of sand (dry-rodded) to 94 lbs. of cement;
C/Sv = cubic feet of cement to voids in dry-rodded sand;
C/Av = cement to voids in dry-rodded mixed aggregate;

B B	n	W/C	S/C	C/Sv	C/Av	S/Rv	M/Rv	Kd	Ks28	Kc	Kse
.6	.49	1.400	3.795	.742	.529	1.190	1.36	.890	1340	\$3.52	381
.7	.498	1.180	3.188	.882	.607	1.155	1.35	.899	1900	3.81	499
.8	.506	1.025	2.715	1.036	.689	1.125	1.35	.907	2430	4.10	593
.9	.512	.896	2.342	1.200	.773	1.090	1.35	.914	2900	4.40	658
1.0	.517	.796	2.049	1.374	.863	1.070	1.36	.917	3300	4.69	703
1.1	.519	.718	1.845	1.525	.954	1.065	1.38	.918	3595	4.95	727
1.15	.52	.684	1.759	1.592	1.000	1.060	1.29	.918	3700	5.10	726
1.2	.52	.651	1.675	1.680	1.050	1.060	1.40	.917	3800	5.24	725
1.3	.52	.590	1.500	1.875	1.150	1.060	1.43	.915	4000	5.52	724

S/Rv = sand to voids in dry-rodded coarse aggregate;

M/Rv = mortar to voids in coarse aggregate;

Kd = density of concrete;

Ks28 = compressive strength at 28 days;

Kc = dollars cost of materials in concrete; and

Kse = strength-economy factor (lbs. strength per dollar).

Cost of concrete and strength economy factor are based on aggregates at \$1.00 per ton and cement at \$3.00 per barrel at the site.

The mix of 1.1 bbl. and grading n = .519 meets fully the foregoing specifications for impermeable concrete of economical strength. It has the following desirable characteristics: (See table at bottom).

High strength, 3595 lbs. per sq. in.;

High strength economy factor, 727 lbs. per dollar;

High density, 0.918;

Low water cement ratio, 0.718; and

Very satisfactory filler to voids relations for low shrinkage, for impermeability, for minimum expansion and for workability, flowability and cohesion of the fresh mix.

With aggregates of this character, the use of more than 1.1 bbl. of cement increases the cost, shrinkage, expansion and contraction, decreases the density, economy factor, and perhaps the chemical stability. The use of 25% more cement is advisable, however, where skilled laboratory and production control are not available.

Workability

The concrete should have good workability, flowability and cohesion in the fresh mix whatever the method of placing.

Given the same slump,—workability and cohesion increases with the cement content and fineness of grading; flowability increases with the cement content and coarseness of grading; the water-cement ratio decreases with the cement content and coarseness of grading; and strength (and density to a certain extent) increases with cement content, coarseness of grading, and with decrease of the water-cement ratio. This shows that a balance must be struck between several opposing effects for the most efficient results.

The medium consistency (3"—7" slump) is preferable for impermeability and economy of placing.

Most methods of placing concrete involve chuting to a certain extent and chuting is often the most practical method of placing concrete in dams. By varying the coarseness of grading (while maintaining uniformity of grading) and the cement content, it is possible to chute concrete, without separation, with water-cement ratios of 0.5 to 1.3 and with cement contents of 0.6 or more barrels per cubic yard of concrete, the chutes being maintained on 40% gradient.

THE CONTRACTORS' ROOM

BUILDING AND ENGINEERING NEWS maintains a Contractors' Room where plans and specifications may be filed by Architects, Engineers and Owners for the convenience of bidders in San Francisco and the Bay Counties.

Architects, Engineers and Owners are invited to forward plans of their projects to BUILDING AND ENGINEERING NEWS. No charge for this service. The plans will be returned in good condition when contract for work is let.

1-(a/D)m

re proportions by absolute volume passing and retained, respectively, on even openings of (d) inches, D and (a) the maximum and minimum diameters of the aggregate, and (m) and (n) are coarseness exponents.

Concrete:
Compressive strength at 28 days, 1,000 lbs. per sq. in. or more;
Density not less than 0.89;

UNIONS AND BUILDING INDUSTRY AT SEATTLE END LONG CONTROVERSY

(Special Correspondence to Daily Pacific Builder)

The agreement providing for three years peace in the Seattle building field was officially signed June 5 by officials of the building trades unions and of the Seattle chapter, Associated General Contractors of America. The signing of the new pact marks the end of a series of conferences and hearings beginning shortly after the first of the present year and which at times threatened to bring building to a standstill in Seattle.

The two major points of difference between employers and employees were on the question of the five-day week for the carpenters and the recognition of the common labor union.

Under the agreement, the carpenters' unions are granted the five-day week during the months of May, June, July and August.

The question of recognition of the common labor union is put up to a fact-finding commission, to be composed of three to five members, appointed by the Citizens' Industrial Adjustment board and representatives of the contractors and their employees.

This commission will make a study of the five-day week and also of the common labor union situation in Pacific coast cities, and report back not later than December 1, 1928.

It is agreed that if the commission recommends to the Industrial Adjustment board the extension of the five-day week to unions not now enjoying it, or the recognition of the common labor union, that the agreement be modified to comply with the recommendations.

The agreement was signed by James Murdock, president, and H. V. Bogert, of the Associated General Contractors, Roland Watson, president, and George Early, secretary, of the Seattle Buildings Trades Council, and approved by Frank Waterhouse, chairman of the Citizens' Industrial Adjustment board.

Should there be a general rise or fall in wages in construction work along the coast, the question of wages may be reopened and mutual adjustments made.

Provision is made for an adjustment board, to consist of six members of em-

ployers and employees, their decision to be binding on both parties. Contractors agree to give preference to building tradesmen in hiring employees, and employees in turn, agree to give those in the agreement preference in furnishing men during shortages of labor.

The agreement between the Seattle Building Trades Council and the Seattle chapter, Associated General Contractors of America, provides for the following local wage scale, effective as of May 1:

Asbestos workers.....	\$ 9.00
Building laborers.....	5.60
Concrete and carpenters' helpers.....	5.60
Plasterers' hod carriers.....	8.60
Bricklayers' mortar men.....	6.60
Chimney and veneer work.....	7.00
Bridge and structural workers:	
Structural and ornamental iron men	10.00
Rod men.....	9.00
Foreman (\$1 over scale) ornamental	
shop men.....	7.20
Carpenters.....	9.00
Pile drivers.....	9.00
Boom men.....	9.50
Foremen.....	11.00
Mill men.....	7.00
Floor layers.....	10.00
Electrical workers.....	10.00
Foremen.....	11.00
Helpers.....	6.00
Elevator constructors.....	10.00
Helpers.....	7.00
Glaziers.....	8.50
Hoisting and portable engineers.....	10.00
Marble, tile and terrazzo helpers.....	5.60
Paste machine men.....	6.00
Floor machine men.....	6.00
Electric material hoist.....	9.00
Steam shovel men.....	12.00
Firemen.....	8.60
Crane men.....	8.50
Dinky runner.....	8.00
Lathers:	
Wood.....	10.00
Metal.....	11.00
Plasterers.....	12.00
Casters.....	8.00
Cement finishers.....	9.00
Composition workers.....	10.00
Plumbers.....	11.00
Painters.....	9.00
Sign painters:	
Commercial.....	12.00
Bulletin men.....	12.00
Roofers.....	9.00
Foremen.....	10.00
Sheet metal workers.....	10.00
Steam fitters.....	11.00

GENERAL CONTRACTOR AND SUB-BIDS

(A Discussion By Fred R. Comb in the Northwest Associated General Contractors News.)

Quite frequently during the last few years the Associated General Contractors of America, Northwest Branch, has been requested to investigate charges of unethical treatment of sub-contractors by general contractors. Investigations have been made by earnest committees. Reports have been read, considered and reconsidered, but no solution of the problem has developed.

A Few Complaints.—On the one hand, general contractors are complaining of receiving sub-bids too late for use in preparing their estimates. They complain further of the difficulty experienced at times in getting sub-bids in sufficient number to afford proper competition on the item in question. Then under these circumstances they do not like the arrogance of some sub-contractors in making accusations of bad faith on the slightest provocation.

On the other hand, sub-contractors complain that general contractors are only rarely honest in the handling of sub-bids. They defend their action in giving their figures late by stating that when they give them earlier, the low bids always leak out to their "scalping" com-

petitors. They claim that often they are victims of the general contractor, who says, "I would like to buy from you, but your price is high," whereas actually his price is already the lowest received.

What Is the Solution?—And so the strife persists, to what end no one knows, but it does persist.

What is the solution? Should we set up machinery whereby the general contractor will be compelled to "go straight" by having sub-bids opened by a neutral agency immediately after the general bids are filed, etc., and some more machinery whereby the sub-contractor will have to get his bid in on time, respond to all calls for sub-bids and refrain from tempting the general contractor with lower figures after finding out that his original bid is out of line? Or must we scrap the present system completely and start all over again or go back to methods in vogue a few years ago when sub-bidding and sub-letting with the attending evils were not so much in the foreground?

In those days the general contractor estimated more of the work in his own office, and after getting the work did more of it with his own forces. If he

needed a little help in estimating that of some of the more special lines, he was able to get it without submitting to a lot of rules and obligating himself to sub-contractors were willing to help this way, and they do not lose by it.

I am inclined to favor the latter out of our trouble. We all feel the need these days of too many laws, and a feeling does not encourage us to a lot more of our own making. We know that laws are made for some to keep some to break. As soon as a law is up, someone sets out to find a way around it, and usually succeeds.

Some Anticipations.—Then, even plan were workable, whereby the general contractor would always get plenty of sub-bids on time and the sub-contractor making the lowest bid would always be the order and all would know how bids ran, what would be accomplished? Would not low price then be the thing even more so than now? Should sub-contractors wish such competition? I believe they really do not want it.

The general contractor has that kind of competition in many instances, an example, in city school lettings, in city school lettings and other public work and does not always like it. Contractors who have succeeded sufficiently in establishing themselves otherwise in the kind of business in which they are not so completely accentuated. If sub-contractors likewise would shun projects on which their bids would be opened with others less worthy and given only equal consideration.

Reversion to the older system, where few, if any, sub-bids are taken until after the general contractor has landed a contract, seems to offer promise of improvement over the present wasteful system of exhaustive sub-bids, made by the general contractor estimate is prepared. The American Contractor, April 2, in its editorial column suggests this revision as a means of combating the letting of separate contracts and aid to the general contractor who wishes to establish himself on a basis of merit rather than on a basis of low price.

It says in part: "Why should not architects lean to letting separate contracts when the general contractor is the same thing themselves, providing they get the job?" It points out by our habit of sub-letting, we are undermining our business instead of perpetuating it. It predicts that the contractor organization that equips itself so that it can put its own bid for the whole project and go ahead and build the whole project with only a minimum of sub-letting awarded the contract will offer a service which can be sold on its merits and at a price which will make less well-organized firms weep with envy.

Whether one goes all the way or a part way in this matter, it seems to me all should see the evil of accentuating further the sub-contract idea and join in a movement to prevent general contracting from becoming a business in which the proprietor is merely a broker, and a builder. General contractors should be fair in the handling of sub-bids but let them go slow in the matter of making rules which, at best, will only secure for sub-contractor fierce competition.

A Contractors' Convention is usually a forum for the construction industry where the man who does not consider it worth his while to attend in certainly misses a lot of common sense which is usually expressed at such gatherings. It will give any contractor to be regular in attendance at the conventions of his trade. It will get a new slant on the ethics of the industry, be educated on many things he is not informed on and be greatly benefited and enlightened by his participation in the functions of the industry makes his living at.—Exchange.

CONSTRUCTION OPERATIONS INCREASED DURING MAY, A. G. C. SURVEY REVEALS

Construction operations increased in volume during May, according to statistics just compiled by the Associated General Contractors of America. The rise last month, however, was not sufficiently great to bring the May total up to the mark recorded for the corresponding month one year ago, when a new record for that period of the year was set. The statistics are based upon actual shipments of basic construction materials.

The total amount of construction work of all types handled during the first five months of this year is less than the volume recorded for the first five months of 1927, the figures indicate. The present total is so close to the figure established during the record-breaking months of last year, however, that no significance is attached to the latest development.

Indication that the slight deficiency

will be wiped out during the mid-summer months is found in the large volume of contracts awarded for future work. The volume of contracts awarded during April was the greatest ever registered for a single month, exceeding the March total of 8.5 per cent. The total volume of contracts awarded during the first four months of 1928 is more than eight per cent greater than the corresponding figure for 1927.

A scale which places the 1913 average at 100 as its basis, shows the index number representative of construction work actually under way during May to be 185. Index numbers for other months of the current year are: January, 125; February, 124; March, 137, and April, 164. Figures covering the corresponding months of 1927 are: January, 129; February, 121; March, 135; April, 166, and May, 197.

VOLUME OF CONSTRUCTION

BENEFITS DERIVED BY HOME MANAGERS THROUGH WASTE ELIMINATION PROGRAM

Ray M. Hudson, Assistant Director, Commercial Standards Group, Bureau of Standards, U. S. Department of Commerce

Usually we think of the Government as associated with the enactment of laws and their enforcements; the collection of taxes, the administration of natural resources and negotiations with foreign powers. There is one activity of the Federal Government, which is so recent that many individual citizens know very little about it, but which is nevertheless of vital concern to everyone, for it is designed to increase the purchasing power of his dollar.

In the Department of Commerce there is a Division of Simplified Practice which is concerned with the elimination of avoidable waste in industry. In a restricted sense, the word "waste" means something perishable or something that cannot be utilized. There are, however, other wastes in industry, among them, those caused by too great diversity in manufacture. Because of this overdiversity, a part of every dollar we spend these days pays for waste.

The desire of certain manufacturers to produce something different from their competitors often results in flooding the market with a surprising variety of articles which show only slight and immaterial differences in size and form. This practice has clogged avenues of distribution, congested the shelves of re-

tailors, and the warehouses of wholesalers. This condition has gone on until the disposal of such goods has been possible only at a loss. "Bargain sales," "special manufacturers' sales," "bankruptcy sales," and the like have been the answer.

I wonder how many readers have any conception of the enormous variety in which the most commonplace commodities are offered to the buying public. For example, most amateur carpenters sooner or later invest in a grinding wheel to keep their tools in good condition. Suppose that in 1925 some local hardware dealer had decided to carry a full line and therefore stocked his store with one of each size, grade and type of wheel. How many would the prospective purchaser find from which to make his selection? One hundred would probably be enough to satisfy the most exacting. Five hundred surely would. Yet, our local hardware dealer in 1925 would have shown us more than 715,000 different grinding wheels! Similarly, before simplification, he would have had to carry 1,350 styles of commercial files and rasps, nearly 7,000 items of builders' hardware, over 5,000 varieties of shovels and spades, etc. Of course, no one retailer ever stocked such a variety. He merely tried

to select those styles and sizes which he felt would best satisfy the local tastes.

The Federal Government, through the Division of Simplified Practice of the Department of Commerce is co-operating with the producers, distributors and consumers in doing away with "too much variety." The Division's experience with many commodities has indicated that 80 per cent of the business is done with 20 per cent of the variety offered. The producer, distributor and consumer held a joint conference under the auspices of the Division to decide what and how many items can be eliminated because of being "seldom-called for." This weeding out movement is called "simplified practice" and must be accepted by 80 per cent by volume of sales, of producers, distributors and consumers, before it is effective.

Let us assume that you are planning to build a house. The advantages you will derive from simplified practice will be many, whether or not you realize it. For example, previous to the adoption of a simplified practice recommendation, lumber was cut in a great variety of thicknesses. Approximately 90 per cent of the soft wood lumber marketed last year was in accordance with the standards shown in Simplified Practice Recommendation No. 16. Similarly the face and common brick industries have simplified the varieties in their products from 39 and 44, respectively, to one standard size.

Whatever type of construction is selected, the home-builder will find that simplified practice recommendations have been adopted covering a number of important items. All of these represent efforts to do away with wastes, and to make the dollars spent in home-building buy the greatest possible values. Altogether 80 simplified practice recommendations have been adopted by various industries under auspices of the Division of Simplified Practice.

Such reductions as these are of immense value to the consumer, but if the same plan is put into effect by all of the concerns engaged in making the same class of commodities, it is reasonable to suppose that the effect will be cumulative, and the benefits to the consumer multiplied. Economies which are gained by the manufacturer and distributor must be passed on to the consumer in any competitive business, either in reduced price, more goods for the money, or better values.

From the standpoint of the home-maker, simplification is a step in the direction of thrift, the prudent expenditure of the family funds is made easier. Support of simplified practice and a further influence as a consumer for an extension of the simplification program is a matter worthy of the home-maker's best efforts.

As we help through our daily purchases to encourage the elimination of unnecessary variety in the goods that satisfy our wants, we hasten the elimination of waste in industry. And as these wastes decrease, the purchasing power of our dollars increases, and our cost of living will consequently be lowered.

Wages of building trades mechanics are undoubtedly at the peak in most cities throughout the United States. The public and contractors are willing to pay the rates and help workmen reap the harvest of a successful construction campaign in any community, but will not hesitate to draw the line when the five-day week advocates try and increase wage rates and cost of construction by the subterfuge of the application of the supply and demand theory.—Exchange.

If contractors in the building industry would pay more attention to their own organization and less to that of their employees they could reasonably hope to get somewhere and reap the benefits of concerted action and cooperation.—Exchange.

THE OBSERVER

**What He Hears
and Sees
On His Rounds**

Charging that school students of the vocational classes and vocational instructors were being employed on salaries for the construction for a four-room structure on the high school grounds, a delegation of carpenters, headed by Charles R. Gurney, secretary-treasurer of the Alameda County Building Trades Council, appeared before the Berkeley Board of Education. It was charged that this procedure was taking rightful employment from legitimate carpenters and was effecting no saving for the board. Following a lengthy discussion, during which it was explained that it had been the original idea to have the work completed by the vocational students during the school year as a class training project, the board voted to conduct a thorough investigation and report at the next meeting as to what should be done in the matter.

The Division of Simplified Practice of the Department of Commerce has announced that Simplified Practice Recommendation No. 57, Wrought Iron and Wrought Steel Pipe, has been reaffirmed, without change, for the year beginning June 1, 1928. The Standing Committee for the recommendation reported to the Division of Simplified Practice that a survey conducted prior to the revision conference held by the committee, indicated that the average degree of adherence to the recommendation was 95 per cent. This recommendation reduced the variety in sizes of valves and pipe fittings from over 20,000 to 19,238, and sizes of pipe from 62 to 49.

Stockton took another step nearer to municipal ownership of its power distribution systems when the city council authorized \$1,000 appropriation to compile technical data for presentation to the State Railroad Commission.

An increase of 30 per cent in real estate and construction financing is reported by the S. W. Strauss Company for the month of April, 1928, as compared with the corresponding month in 1927. The large increase in savings deposits as reported by the Federal Reserve Banks seems to indicate that there is still plenty of money for construction financing and not all of it is going to stock market speculation.

No decision has as yet been made concerning rebuilding the Feather River Pine Mills, Inc., destroyed by fire last October with a loss of more than \$2,000,000, it is announced by A. H. Land, president of the company. Land recently returned from a trip to Chicago and Detroit where he was on business connected with the corporation. "Whether the mills will be rebuilt is most uncertain. There is nothing definite at all," the president said. He declared, however, that eastern lumber men are of the opinion that the lumber market probably will be a long time in returning.

Important standardization activities in many American industries during the past twelve months are described in the Year Book of the American Engineering Standards Committee just issued. Forty-nine new standards and 40 new projects are listed for numerous branches of industry and engineering, including mechanical, civil, electrical, mining, wood, textiles and safety. Offices of the Committee are located at 29 West 39th St., New York, N. Y.

Sebastopol Chamber of Commerce will recommend to the Sonoma county supervisors a long term program of permanent highway construction throughout the county. It is recommended that provision be made for an \$8,000,000 expenditure during the next ten years.

Structural engineers in New York City have just formed a professional society, the "Structural Engineers Society of New York," intended to create a better understanding and bond among individuals engaged in the profession, eliminate injurious practices and promote sound professional practices, and in general aid in the maintenance of proper standards and sound relations with other building interests and with the general public. F. A. Burdett has been elected president of the society, and L. A. Ball and N. A. Richards, vice-presidents. Elwyn E. Seelye is secretary and H. R. Burroughs is treasurer of the new organization.

Although the adjournment of Congress has eliminated any possibility of action on the Swing-Johnson Boulder dam bill until December, a joint resolution passed just before adjournment provides for a thorough investigation of both the economic and the engineering features of the proposed dam. This will be made by a board of five engineers and geologists to be selected by the Secretary of the Interior, with the approval of President Coolidge.

Johns - Manville Corporation reports consolidated net profit of \$772,705 for the first quarter, equal after 7 per cent preferred dividend requirements, to 85 cents a share on the common. Sales were \$10,144,156. Expenses, \$9,264,532, and federal taxes \$106,918.

The Missouri Supreme Court, by a recent decision, has confirmed the right of a city to assess the cost of engineering and inspection service on street, alley and sewer improvements upon the benefitted property owner. Heretofore the property owners have been assessed for material and labor costs only.

California Water Service Company of San Francisco seeks authorization of State Department of Public Works, Division of Water Rights, to appropriate waters from the Lower Sacramento Valley near Rio Vista to provide for extensions to its water system in the Port Costa district in Contra Costa county. The water would be pumped a distance of 32 miles. Construction involved will represent an expenditure of \$5,500,000.

Average production per man in blast furnaces in the United States increased from 25 tons in 1850 to 1,257 tons in 1923, according to statistics compiled by Ethelbert Stewart, Commissioner of Labor Statistics, Department of Labor, based on a study of the subject made by him. This increase, he states, has been almost continuous except for the years immediately affected by war conditions. During the period from 1850 to 1925 the number of employees in the blast furnace industry increased only 44 per cent, while the output increased more than 7,000 per cent.

Manufacturers of a resilient floor tile, located in Chicago Heights, Ill., wish to appoint a suitable distributor in San Francisco to handle their product. (If interested write, phone or call on "The Observer").

The ratio of the operations to the capacity of the American portland cement industry during the month of May was 86.6 per cent, according to figures released by the Bureau of Mines of the Department of Commerce. During the month 17,280,000 barrels were produced, 18,386,000 barrels were shipped, and there were in stocks on hand at the end of the month 25,921,000 barrels. Production in May, 1928 was 3.5 per cent more, shipments about 12.6 per cent more, than in May, 1927. Stocks at the mills were 10.3 per cent higher than a year ago.

Beach sites are being inspected with the viewpoint in mind of finding an appropriate site for a steel manufacturing plant to be constructed and operate along the beach near Watsonville. The scheme is being considered by L. O. Treadway, H. B. Meade, Charley Meyer and J. H. Whitney, all of Los Angeles, who recently arrived in Watsonville. The beach sand is said to contain unlimited quantities of steel and other minerals.

Under the provisions of the McSweeney-McNary bill which passed the last session of Congress increases the present annual expenditure of \$1,000,000 for forest research by about \$250,000 a year until the maximum annual expenditure of \$2,500,000 is reached.

The Long Bell Lumber Company of Kansas City and the Pacific Northwest was upheld in its activities in promoting the town of Longview, Wash., in a report filed with the State Supreme Court at Jefferson City, Mo., by Fred L. Williams, St. Louis, who has been conducting an investigation since 1926. Suit to oust the Long-Bell Company from its Missouri charter was filed in the Supreme Court by Mr. and Mrs. F. J. Bannisher, who held 1 per cent of the stock of the company in 1926. The suit attacked the company's promotion of the town site of Longview, Wash., then being built on the site of a 90,000-acre timber tract held by the company. It was alleged that the company's charter did not provide for such promotion.

Sixteen mills in the California Redwood Association cut 7,017,000 ft. during the week ended June 2 as compared with normal production of 10,092,000 ft.; shipments were 7,319,000 ft. and orders received totaled 7,045,000 ft. The cut for 21 weeks of the current year was 169,001,000 ft., as compared with 145,878,000 ft. for the corresponding period last year; shipments were 156,239,000 ft. as compared with 174,179,000 ft. and orders received were for 164,771,000 ft. as compared with 139,518,000 ft. last year.

Wilson Compton in the National Lumber Bulletin says "the favorable balance between lumber supply and demand consistently developed during the past several months in showing results. Fundamentally the supply and demand relationship in the lumber industry as a whole is more favorable than at any time during the last five years."

Seaboard Lumber Sales, Ltd., is an organization formed by a number of tide water mills in British Columbia to sell their output. F. R. Pendleton is president and C. H. Grinnell is manager. The mills produce about 80 per cent of the lumber shipped from that district to the Atlantic coast.

One of California's very important and growing nonmetallic industries is that involving the development and use of her clay resources, Lloyd Root, State Mineralogist, reports. Ceramic plants are being established in increasing numbers, existing plans are being enlarged, and a wide variety of products is being put on the market. Our natural deposits of clays in this state form the basis upon which these industries are founded.

Since 1920 a total of 16,733 persons have been killed in grade crossing accidents, according to the American Road Builders' Association. In California, since 1920, the association points out, 118 deaths occurred with injuries totaling 330. California is reported to have 6234 unprotected crossings. The year 1927 was marked by a noteworthy decrease for the first time since 1900. During 1927, a total of 2371 persons were killed and 6613 were injured in grade crossing accidents.

Mr. Marshall Dill, 216 Pine St., San Francisco, wants samples, prices and complete information on the subject of volcanic ash, similar to California Pumice. Will purchase in carload lots if material and price are satisfactory.

Six hundred thousand tons of rock lifted when an electric spark detonated sixty tons of explosive in the quarry of the Coast Rock & Gravel Company at Piedra, June 17. The amount of rock moved is declared to be the largest ever moved by a blast in the history of the San Joaquin valley. The blast provided sufficient loose material, it is believed, to supply the jaws of the rock crushing machines for the next year and a half.

Street improvement projects in San Francisco, to be carried out under the new budget this coming year will aggregate \$1,500,000. Of this sum, \$300,000 will go for resurfacing, reconstruction and maintenance; \$20,000 for street widening; \$100,000 toward assisting outside counties in highway projects. Other proposals are \$65,000 for a permanent road through Golden Gate Park, \$250,000 for special projects and \$100,000 for the purchase of new street work equipment.

The need for widening, straightening and improving existing highways is indicated in the rapid increase in the number of automobiles in use, according to records of the California State Automobile Association. In 1918 there were only seventeen cars in service for every mile of improved highway. Last year there were forty cars for each mile, which means that the motor vehicles are increasing at a faster rate than improved roads are being developed. There is plenty of road to be improved, according to the Association, since there are approximately 3,000,000 miles of roads of all sorts in the United States, and of this total less than 600,000 miles can lay claim to the title "improved." The mileage of really first class thoroughfares is estimated at only 78,000 miles, so that there is still a large amount of roadway for the rapidly increasing motorists.

A contract for regulating the main tributaries of the Magdalena river in Colombia, South America, has been granted to Julius Berger A. G., Berlin. This firm in 1926 was given a contract by the Colombian government for the regulation of the main Magdalena river. It is planned that all of the work will be finished in 1932.

A grain elevator, said to be the largest in the world, is under erection at Port Arthur, Ont. It will have a capacity of 900,000 bushels. Equipment will include eleven 150,000-lb. scales, twenty receiving cleaners, 32 other cleaners and 22 belt conveyors with a total length of more than 34,000 ft. The trackage will provide space for 225 loaded cars at one time.

TRADE NOTES

Acting on a complaint of the Atlas Fence Company, of Newark, N. J., that Government standard specifications for fences are a discrimination against independent manufacturers, Senator Edwards (Dem.), of New Jersey, in a letter has just asked the Bureau of Standards for a report on its metallurgical tests with respect to fences. This action follows correspondence among the company, the Secretary of Commerce, the Bureau of Standards, and the New Jersey Senator. The company, in a letter of May 22 to Secretary Hoover, protested the effort to obtain general acceptance of the tentative standard specifications (corrected as of January 15, 1928), for chain link fence and chain link fabric, galvanized after weaving.

Yosemite Portland Cement Company formerly located on the sixth floor of the Standard Oil Bldg., San Francisco, has moved to larger quarters on the fifth floor of the same structure.

J. A. Hart, announces the purchase of the business of — & Burmeister and will hereafter operate under the firm name of J. A. Hart Mill & Lumber Company. The concern will continue in the manufacture of architectural wood work, sash, doors, frame and mouldings at the same plant location, Jerrold and Napoleon streets, San Francisco.

Santa Cruz Portland Cement Co. on June 19 declared its regular quarterly dividend of \$1 per share, payable July 1 to stock of record June 21. This is the sixty-second dividend declared by the company.

Circle Equipment & Construction Co. of San Francisco, capitalized for \$5000, has filed articles of incorporation in Oakland. Directors are: Hilmer Dickey, Owen B. Smith and John Currie, all of San Francisco.

Plant of Diamond Hardwood Co. in Southwestern Ave., Los Angeles, suffered a \$150,000 fire loss on June 19.

General Fibre Products Co., Inc. of Berkeley, capitalized for \$200,000 has been incorporated. Directors are: Justin K. Toles, Geo. C. Pittcock, Chas. J. Cox, Justin B. Toles and Kenneth L. Williams, all of Berkeley.

W. Lloyd Conover of Saratoga, new owner of the B. B. Bailey Lumber Company at Los Altos, has already started on his expansion program with the construction of a new office building, 16 by 12-ft. A fleet of motor trucks will deliver the company's products.

W. A. Davis, B. Heinrich and C. G. Smith will operate from 463 Harrison St., San Francisco, under the firm name of West Coast Elevator Company.

Meyer Leson and Jacob Leson will operate from 2940 West street, Oakland, under the firm name of Oakland Sheet Metal Supply Company.

S. T. Johnson Company, manufacturers of oil burning equipment, has opened a direct factory branch at 230 North Sutter St., Stockton, with C. R. Sanborn, as branch manager. In addition to rotary burners, the company manufactures low pressure oil burners and pumping equipment, steam atomizing, natural draft and whirlwind burners, crude oil pumps; also electric or steam-driven oil pumping and pre-heating equipment.

ALONG THE LINE

Frederick V. Carleton, Berkeley engineer, has been named by George Posey, Alameda county surveyor, as superintendent of the Oakland-Alameda Estuary tube now being completed. The position carries a salary of \$235 a month.

D. C. Birch, formerly assistant manager of the Madera Sugar Pine Company at Madera, has resigned to accept a similar position with the Sugar Pine Lumber Company at Pinedale, Fresno county. He will assume his new duties July 1.

Kern county supervisors are considering a proposal advanced by Ira M. Williams, chairman of the board, providing for a \$6,000,000 expenditure to finance construction of a county highway system. Some members of the board favor a bond issue while others favor direct taxation.

Ralph Naas, city engineer of Antioch, is suffering from serious knife wounds about the chest. On June 16 he was attacked by several Mexicans in the S. P. depot at Antioch who are thought to have robbed him.

Oakland City Planning Commission seeks \$30,000 for the employment of Harland Bartholomew, traffic and city planning expert, in the preparation of a comprehensive city plan. Included in a \$56,252 budget demand, the commission also seeks \$15,000 for an aerial survey of the city.

Robert Duncan, San Jose gravel dealer, addressed the San Jose Engineers' Club at the regular weekly luncheon meeting in the Commercial Club, San Jose, June 18. His topic was "Gravel Aggregates."

Trade Literature

A four-page folder issued by the Renzor Manufacturing Co. of Mercer, Penn., describes the use and construction of the Renzor warm air gas heater and cover. Copies will be furnished on request.

Dayton Sure-Grip and Shore Co., Dayton, Ohio, has published a new booklet in which are described adjustable shores, form ties and spreaders, furring clips and its concrete inserts capable of carrying a 4-ton load. Diagrams showing the method of application of the various products form a part of the information.

Alpha Portland Cement Co., Easton, Pa., has published a 112-page handbook, entitled "Alpha Cement—How to Use It." The handbook gives much practical and valuable information in regard to the construction of concrete structures. Typical sections of the handbook consider the following: Forms and reinforcement for concrete; concreting in cold weather; cement houses; cement posts; walks and floors; curves and driveways. The handbook is planned for the builder of small structures.

Interflash Signal Corporation, 120 Broadway, New York City, has issued a new bulletin on their Interflash Traffic Beacons. This bulletin presents an interesting discussion on the location of traffic beacons of this type, and ends with data on the Interflash.

CONSTRUCTION OF GIANNINI HALL TO START AT U. OF C.

Plans for Giannini Hall, the building to be erected at the University of California to house the work of the Giannini Foundation, are being prepared and work on the structure will be started within a short time, according to announcement by the Regents of the University. Five hundred thousand dollars was given by A. P. Giannini and the Bank of Italy for the building, and one million dollars was given at the same time as a Foundation for research in agricultural economics.

Acting on the request of the donors, W. C. Hays of San Francisco has been retained as architect for the building; and the P. J. Walker Company has been employed as contractor. Owing to the fact that Giannini Hall is to be practically a duplicate of Hilgard Hall, in the agricultural college group, the preparation of the plans will not require as much time as for a building of new design. Some differences will be necessary, due to the contour of the site.

The Giannini gift was made for the purpose of studying the problems of the California farmer, both as to production and disposal of crops. The Foundation is to establish a permanent institution, only the interest to be expended in the work of the research group to be gathered for the work.

PROTEST FREIGHT RATES

Santa Cruz Portland Cement Company has filed a complaint with the Railroad Commission against Southern Pacific Company alleging that defendant carrier has published rates for the transportation of cement in carloads between points in California which are unreasonable and discriminatory insofar as they involve the movement from Davenport, the location of complainant's plant, in Santa Cruz County, to all points, Franklin to Valley Springs, and asking the Railroad Commission to suspend said rates for a period of 120 days pending an investigation into the reasonableness thereof.

Blue Diamond Company of Los Angeles has filed a complaint with the Commission against Southern Pacific Company, Holton Interurban Railway Company, Los Angeles & Salt Lake Railroad Company, The Atchison, Topeka and Santa Fe Railway Company, San Diego and Arizona Railway Company and Los Angeles Junction Railway Company, alleging that defendant carriers have published rates for the transportation of plaster and plaster products from Plaster City to other points in California on the lines of defendant carriers, which rates will be unjust, unreasonable and discriminatory to complainant, and the Railroad Commission is requested to suspend such rates and to conduct a hearing for the purpose of establishing just and reasonable rates in place thereof.

MUNICIPAL OWNERSHIP IN LODI PROVES SUCCESSFUL

If you want to attack publicly owned utilities in Lodi, be sure and do it in a whisper!

Here are a few things the city has done, according to Mayor W. A. Spooner: Reduced its bonded debt to \$300,000; erected a new \$69,500 city hall and bought two \$13,000 fire trucks, improved public park and built municipal swimming pool at cost of \$13,000. Bought a new eight-acre park at a cost of \$18,000. Added \$54,000 worth of storm and sanitary sewers.

All this, mind you, while the tax rate was being reduced from \$1.70 to \$1.50. This year it may be still further lowered to \$1.40.

These improvements were made from profits of the Lodi municipally owned light and power system, at a rate 65 per cent of that of private companies.

ASHES TO ASHES AND DUST TO DUST

(By C. W. Brooding Engineer, Bethlehem Handbook Hatchery, in Engineering News-Record)

THE VOICE OF THE PROPHET:

Bricks will break, and rocks will fall,
Paint will peel, and concrete spall,
Wood will rot, and steel will rust,
Ashes to ashes, dust to dust.

THE CONCRETE CROWD:

Ashes to ashes and dust to dust,
Wood will rot, and steel will rust,
Bricks will break, and rocks will fall,
For permanence you need a concrete wall.

THE FELLOWSHIP OF FABRICATORS:

For permanence specify structural steel;
Timber will rot and concrete peel,
Clay bricks will fall when mortars grow faint,
Steel lasts forever with two coats of paint.

THE LADDIES OF THE LUMBER LEGION:

Wood lasts forever with two coats of paint,
And it's cheaper than steel; we'll be warped, if it ain't!
Concrete will crumble, and bricks are no good,
Ask dad how to build, and he'll say it with wood.

THE KLAY KILN KLAN:

Ask dad how to build, and he'll say it with bricks!
They'll be standing the gaff when all others are nix;
When timber and concrete and steel have gone bust,
Ashes to ashes and dust to dust.

THE PAINT PEOPLE:

Ashes to ashes and dust to dust,
Timber will rot, and steel will rust,
Bricks will break, and concrete will spall,
Save the surface and you save it all!

PROPHET AND CHORUS:

Bricks will break, and rocks will fall,
Paint will peel, and concrete spall,
Wood will rot, and steel will rust,
Ashes to ashes and dust to dust.

UNIVERSITY REGENTS ASK SALE OF BUILDING BONDS

Asking the State Building Finance Board to direct the State Treasurer at once to sell \$2,000,000 of the \$6,000,000 bonds authorized by the people of California at the November election in 1926, the Regents of the University at their last meeting adopted a resolution declaring that the progress of the building program has been such that this sum is now needed.

One million dollars of the bond issue already has been sold, and the present request will bring the sales to half the amount of the issue.

Four buildings are under way on the new campus of the University of California at Los Angeles, for which \$3,000,000 was provided. Two of these structures, the Library and Administration Building, and Royce Hall, the auditorium and classroom building, are nearing completion.

At the University of California, Berkeley, plans are nearing completion for the Life Science Building, to cost more than \$1,500,000, and the infirmary. The Regents have authorized Comptroller R. G. Sproul to ask for bids as soon as the plans are ready.

CLEVELAND CONTRACTORS GIVE 5-YEAR GUARANTEE

An important step forward in business service was announced when the H. K. Ferguson Company of Cleveland, international construction engineers, recently adopted a policy of guaranteeing buildings for five years.

Beginning June 1, every lump sum contract undertaken by Ferguson engineers on plans and specifications which they have prepared or approved for guarantee will include this clause: "The builder guarantees the work against defective workmanship and material for a period of five years after date of completion."

No organization has ever guaranteed complete building projects for so long a period as a regular policy, according to Harold K. Ferguson, president of the company.

"We are able to make such a guarantee because we assume complete responsibility for layout and design as well as for the actual construction," Ferguson said.

When our engineers design a building, put the right materials into it and see that it is constructed soundly, we can be pretty sure it will stand up well."

Regular inspections at least once a year are included in the guarantee. Any defects found within the five year period are to be adjusted by the contractors.

Authorizing the guarantee and backing it are the officers of the company: Harold K. Ferguson, president and treasurer; Joseph S. Ruble, vice-president and construction manager; H. S. Jacoby, secretary and chief engineer, and R. E. J. Summers, chief contract engineer.

ST. PAUL-TACOMA GOES ON PERPETUALLY PRODUCTIVE BASIS

The St. Paul and Tacoma Lumber Company, Tacoma, Wash., has joined the ever increasing number of large timber land owners that are handling their forests on a sustained yield basis, according to the National Lumber Manufacturers Association.

In marking its fortieth anniversary in the lumber producing field, this company, which owns large timber areas in Washington state, has announced the adoption of a definite program for keeping its forest lands continuously productive, pay-rolls permanent and its service to consumers dependable.

Within the last few weeks, Everett G. Grizes, president of the company, and other officials have conferred with forest research and management specialists of the Western Forestry and Conservation Association (a timber owner's co-operative service association) who have made a thorough survey of the company's cut-over lands in various stages of reforestation. Plans have been drawn for effective handling of the fire problem, prompt restocking of logged lands and the development of a fixed forestry policy. It is expected some experimental planting will be done this Fall. The enlistment of neighboring community interest in forestry will be a feature of the program.

A recent survey of privately owned timber lands revealed the fact that more than 21,000,000 acres, mostly owned by large lumber and paper companies, were being managed with a view to reforestation. Many of these companies are already operating on a sustained yield basis.

SPAIN LETS CONTRACT FOR ROAD WORK COSTING \$40,000,000

Fox Brothers International Corporation of New York has signed a preliminary contract for the construction of a new national highway in Spain at an estimated cost of \$40,000,000. The highway will be of concrete from Madrid to Iron, through the Pyrenees, and will enable tourists to motor from Paris to Madrid by way of Biarritz.

DETROIT COMMISSIONER PROPOSES CONTRACTORS' LICENSE LAW

Contractors in Detroit and those wishing to do building construction in that city will have to post a bond of \$2000 and obtain a license if the license ordinance proposed by John M. Bischoff, Commissioner of Buildings, is passed by the City Council. The proposed ordinance makes the bond a guarantee that the building contractor would be more closely observed by contractors and that the agreements of such contractors would be fulfilled. The ordinance provides for an examining committee composed of one architect, one engineer, two building contractors and one building owner who would have the authority to issue contractors' licenses. The ordinance will require two readings before the council before the vote is taken.

FRANK V. MAYO NAMED STOCKTON DISTRICT REPRESENTATIVE BY ASSOCIATION

In response to a circular letter issued from the newly organized State Association of Architects, a group of Stockton architects met at the office of Mayo, Bischoff & Co., in Stockton, June 6, for the purpose of selecting a district representative from the Stockton district, which consists of the counties of San Joaquin, Stanislaus, Tuolumne and Mariposa. The purpose of the association is in general to advance the profession of architecture in the State of California through proper publicity, legislation and the cooperation of its members which is confined to the certified architects of the State of California.

Frank V. Mayo was nominated by M. Jorgensen, chairman of the association, to act as the local member of the advisory council and his nomination was affirmed at the meeting last night, which was attended by Howard G. Bissell, Upton Cloudsley, Victor Galbraith, Joseph Losekann, Frank V. Mayo, Ralph Morrell, Peter L. Sala and Ivan C.atterlee.

GET WAGE INCREASE

The Los Angeles City Council has voted increases in salaries to 800 technical men in the city engineering department. At the same time 69 positions in a department will be abolished so that, according to the budget director, the payroll of the department will be \$74,000 less at present. It is hoped by the city engineer that the increased salaries will permit the department to retain the men which are trained in it instead of making merely a school for engineers. An increase from \$4.75 to \$5 per day for unskilled labor was also voted by the city council.

STEAM PLAN CONTRACT AWARDED LOCAL FIRM

C. C. Moore & Company of San Francisco have been awarded a contract by the British Columbia Electric Railway Company with headquarters at Vancouver, B. C., to construct the first unit of what is known as the Hastings steam unit, the estimated cost of which is \$500,000.

The contract is for the first 20,000 k. w. turbo-generating units of a station which is contemplated will ultimately contain four similar units, with a total capacity of 80,000 k. w., or 105,000 horsepower. The normal fuel supply will probably be coal, which will be pulverized before being fed to the boilers. Structural provision will, however, be made for the possible future use of oil fuel.

Surveys and test borings at the site have been under way for some time and are now practically completed. Engineers are starting work immediately on the detailed design of the new plant, and it is expected that the completion of the contract will take place by September 1, 1930.

COURT SCORES SURETY PRACTICE

In its decision in the case of the American Surety vs. a Douglas county (Neb.) school district, revising a judgment of a lower court and dismissing an action, the Nebraska Supreme Court expressed extreme disapproval of the practice of surety companies of demanding that the obligee retain 10 per cent of the contract price of a building for the protection of workmen and material men. Almost all surety companies write into contractor's bonds the 10 per cent retention clause. The school district in question had failed to withhold 10 per cent of the price on a school building erected at a cost of slightly more than \$10,000.

In its opinion the Nebraska Supreme Court said that a 10 per cent retention clause is not authorized by the section of the state law that provides for the taking of such bonds by political subdivisions, including school districts. In the case in question the surety interpolated into the printed bond form some matter embodying the provisions of the section of the state law that governs. However, the court ruled that the bond can govern and impose no such liability as was contended by the surety.

The court said in addition that the conditions of the bond are separable and that the applying rule is identical with the rule that applies to common law bonds that are partly good and partly bad. Unless the law declares such a bond to be void in its entirety the good parts shall hold and the bad parts shall be considered surplusage.—American Contractor.

STEEL CASTINGS

New orders for steel castings in April, as reported by the principal manufacturers, were 57 per cent of shop capacity, as against 57 per cent in March and 56 per cent a year ago. The production of steel castings was 53 per cent of capacity in April, as against 64 per cent in March and 66 per cent a year ago. The 128 reporting concerns have a present monthly capacity of 144,800 tons and represent over four-fifths of the commercial castings capacity of the United States, of which 67,300 tons are usually devoted to railway specialties and 77,500 tons to

SALE OF LIMESTONE IN INDIANA STATE IN 1927

The sales of stone for construction from the quarries of the Bedford-Bloomington oolitic limestone district, Lawrence and Monroe Counties, Indiana, in 1927, as reported to the United States Bureau of Mines, Department of Commerce, by the producers, amounted to 13,572,950 cubic feet, valued at \$16,407,170. This was a decrease of 4 per cent in quantity compared with 1926. These figures include 5,445,970 cubic feet of rough blocks, valued at \$3,461,369; 5,268,060 cubic feet of sawed and semfinished stone, valued at \$4,685,844, and 2,858,920 cubic feet of cut stone, valued at \$8,259,957.

Besides the high grade stone quarried chiefly for construction, considerable stone (amounting to 423,720 tons, valued at \$381,455 in 1927) used for concrete, road metal, flux, riprap, rubble, glass making, agriculture, etc., is produced in these counties. This grade of stone showed an increase of 4 per cent in quantity over 1926.

Stone sold by quarry operators to the finishing mills of the district and dressed and resold by them in 1927 amounted to 1,670,470 cubic feet, valued at \$3,646,445, an increase of 11 per cent in quantity over 1926. The total sales by these plants included sawed stone, 728,000 cubic feet, valued at \$704,732; semfinished stone, 35,030 cubic feet, valued at \$58,056; cut stone 907,440 cubic feet, valued at \$2,883,657, and represent a considerable increase in sawed stone, a small increase in semfinished stone, and a decrease in cut stone.

FREIGHT RATE ADJUSTMENT IS ORDERED

Pomona Title Manufacturing Company, having filed a complaint with the Railroad Commission against the Southern Pacific Company, alleging that the rate charged on 17 carloads of crude clay shipped from Lincoln to lone to Pomona between February 16, 1926, and September 22, 1927, was unjust and unreasonable, the Railroad Commission has directed defendant company to refund to complainant all charges collected in excess of 28½ cents per 100 pounds of said shipment.

CONSTRUCTIVE UNEMPLOYMENT

Unemployment, far from being a symptom of industrial illness, might be, in the view of Donaldson Brown, Vice President of the General Motors Corporation, evidence of industrial vigor and abundant vitality.

"While regularization of employment in industry depends upon the correct adjustment of supply to consumer demand," he said in an address at the manufacturing session of the Chamber of Commerce of the United States, "the growth of employment and wages depend upon continuing increase in efficiency and diversification of production as well as upon growth of consuming power.

"There has been a tendency evident in the daily press recently to raise the question of the benefits of efficiency, on the ground that our progress in this direction is resulting in unemployment. Unemployment which progressively and in temporary stages may result from efficiency is of constructive benefit in itself. It results adversely only when industry fails to grasp the opportunity thus presented of increasing and diversifying production and building additional consuming power by the employment of the labor thus rendered available. There is another kind of unemployment that is an unmixed evil from the economic standpoint. It is that which results from a temporary curtailment of production."

The difference appears to be, in other words, that between doing a job more efficiently than usual and not doing it at all. In the first instance it means that industry will not in the long run do less work but create more jobs.

GYPSUM OFF FREE LIST

Instructions directing collectors of customs to begin assessment of duty upon imports of gypsum, crushed after being quarried, have been issued by the Bureau of Customs according to an announcement by the Commissioner of Customs, E. W. Camp. It has been the practice to admit gypsum free because of the claim that crushed gypsum was not comparable under the Tariff Act of 1922 to the material classified as ground gypsum. Mr. Camp, in a letter addressed to the collector of customs at New York and circularized to all collectors, explained that the classification should be under paragraph 205 of the Act rather than under the duty free sections.

COURAGEOUS CONTRACTORS ARE NOT DROWNED IN RED INK

"There is only one way to make money in the construction business. That way is sell construction service at a profit. The fact that there are contractors today who are making a profit proves that knowledge and self-restraint are not without their rewards," says the Mulletin of the National Association of Building Trades Employers. "It takes courage to resist the temptation to shade a nickel or a dime on the job that is slipping away. Nevertheless, there are contractors who have displayed that courage year in and year out. True, they may not be flooded with jobs, but on the other hand they are not drowned in red ink."

STATE IRRIGATION AND POWER DEVELOPMENT UNDER CONSIDERATION

Four definite proposals for harnessing California's tremendous water resources under the so-called Bailey "co-ordinated plan," transcending even the great Boulder Canyon Dam project in magnitude, are under consideration by the state legislative water investigating committee.

Full utilization of the state's surplus waters is contemplated under the gigantic \$200,000,000 project, with irrigation of thousands of acres of arid land, salt water control, flood control, and development of hydro-electric power as important units in the ambitious program.

To launch the big project, one unit of which embraces storage of Sacramento Valley flood waters by a great impounding dam either at Kennett or Iron Canyon and the probable construction of a salt water barrier at Carquinez Straits, the following proposals have been laid before the state committee:

1. That the state loan its credit to build the storage dams, distribute the water and develop and distribute the hydro-electric power generated.

2. Granting by the state of a franchise

to private corporations to build the necessary works, and generate and distribute the hydro-electric power, operation to be under the supervision of the State Railroad Commission and ownership to vest in the state government.

3. That the state and federal governments build and operate a main transmission power line down the Sacramento and San Joaquin Valleys, selling power to cities, counties, and irrigation districts.

4. Formation of local water and power districts to launch individual units of the project, the state government to extend its credit to such districts. This plan is generally conceded to be the one backed by the Irrigation Districts' Association.

The legislative water committee, headed by Assemblyman Bradford S. Crittenenden of Tracy, has practically completed its field survey work, according to Assemblyman Van Bernard, Butte City member, and it is expected will start shortly on drawing up the committee's recommendations. The report is expected to recommend one proposal.

MALHEUR NAT'L. FOREST TIMBER CONTRACT AWARDED TO HINES GROUP

The U. S. Forest Service has confirmed the report that it has accepted the bid of the Edward Hines Associated Lumber Interests of Chicago for lumbering 890,000,000 feet of mature commercial timber in the Malheur National Forest in Northwest Oregon. The Hines interests succeed Fred Herrick and Associates, whose bid was accepted in 1922, but has not been satisfactorily fulfilled.

The Hines bid was \$2.85 per thousand for the pine timber; \$1.10 per thousand for fir; and 60 cents per thousand for other species. In accordance with the Forest Service practice, the tract will be lumbered selectively, the productivity of the forest being maintained. The Government will receive \$2,194,500 for the pine alone. The timber may be all taken out within thirteen years, and twenty years is the limit. Other Government timber will be available when the present contract is completed. The extent of the Malheur Forest is such that lumbering operations will be perpetual at the rate of cutting permitted—growth off-

setting cutting. The total stand of Government timber is 7,000,000,000 feet, besides several hundred million feet of privately owned timber. The Hines interests have until August 1 to consummate the contract.

The Herrick Interests were also bidders but on account of failure to make a deposit, submit a financial statement, and also because of the stipulation of certain changes in the contract, their bid could not be considered.

It is reported that Mr. Herrick and his associates have spent more than \$1,500,000 in preliminary work during the period that their contract was effective. This money was spent principally on the construction of a standard railroad from Crane to Burns, Oregon, thence northward to Seneca, and the erection of a sawmill near Burns. The mill building is practically complete, but the machinery has not been installed. What disposition will be made of the railway and mill building is not known, but it is known that they are not involved in the Hines contract.

Certified Building Construction Advocated In Chicago—Advantages Seen

Rating new buildings by the quality of their construction and equipment is being advocated by the Certified Building Registry, Chicago, as a means of securing good first-mortgage bonds and of obtaining well-built, safe and comfortable structures that will require minimum operating cost for heating, maintenance and repairs. Firms which lend money on buildings often find the construction below desirable standards, while investors in first mortgage real estate bonds have no check on the quality of the buildings they have helped to finance. The registry code includes ratings for walls, roofs, chimneys, heating plants and other features, these ratings being comparisons with a given standard and based upon inspections made during the construction as well as on examination of the plans.

This system, which is said to have the approval of important real estate, investment and insurance interests, is claimed to have advantages in several ways: (1) it would enable contractors to borrow a

higher proportion of the cost on structures built and certified according to the registry code; (2) it would protect purchasers and provide them with durable buildings, economical in fuel and repairs; (3) it would protect investment interests; (4) rated or certified buildings would command higher values for loans and sales; (5) firms supplying building materials and equipment would benefit by the elimination of skimmed construction. The first rating of buildings on this system was done at Flint, Mich., about two years ago, when a large number of small homes were being built to accommodate the rapidly increasing industrial population. At present the registry system is being applied to the smaller class of residences and apartment buildings, but it is proposed to extend it eventually to more important structures such as hotels, offices and large apartment buildings. Clyde A. Mann is director of the Certified Building Registry, 11 South La Salle St., Chicago.

HERE — THERE — EVERYWHERE

Preparations are being made by Santa Barbara Builders' Exchange for the annual meeting of the California State Builders' Exchange to be held that city in August. The exact date the meeting has not been set. H. Sweeney has been named general chairman of the committee in charge of arrangements.

Granite cutters on strike in Toronto have returned to work under the terms of a new agreement, which has just been signed. The contract which terminated the walk-out runs for two years.

"The contractor of today has got to name his price and if he cannot meet competition, he better pass out of picture," said W. A. Betchel, of San Francisco, president of the Associated General Contractors of America, in addressing the Portland, Ore., chapter of that organization.

Steel house building, started in Germany in 1926, is rapidly progressing. C. firm, a subsidiary of the United States Works, is reported to be unable to accept all orders in spite of the fact that production has been increased 600 per cent within the year.

Employees of the United States Steel Corporation subscribed for only 95,000 shares of the 100,000 shares of common stock offered to them at \$145 a share. Subscriptions were received from 50,000 employees. When the offering was made in 1927 at \$122 a share, 62,145 employees took 132,846 shares, while in 1926 when the price was \$136 a share, 74,351 shares were subscribed for.

Unless the heavy foreign buying of copper soon tapers off, it is felt that prices will be advanced again, says Engineering and Mining Journal. Most sellers are opposed to an additional price advance, but the situation appears to be one over which they have little control. Exceptionally active buying of copper for export was largely responsible for maintaining prices on a firm basis.

Frank K. Runyan, secretary of the Retail Furniture Association of California, was the principal speaker at a luncheon of the Gas Appliance Society in the Hotel, San Francisco, June 14. Roy Ohmhus, president of the San Francisco union of the society, presided.

An electrical shop will be installed in the vocational department of the San Joaquin high school for the school year 1928-29, it is announced by the Board of Education of that city. Electrical training will be made available to high school students as the result of a request by the San Joaquin Electrical Union, No. 332.

Plumbing contractors of Twin Falls, Idaho, want the city to appoint a board of examiners for plumbers similar to that in force covering electricians.

T. P. Kaiser announces his withdrawal from the partnership of Prentice Kaiser, cement contractor, with office in the Builders' Exchange, Oakland.

San Francisco Board of Supervisors has approved assessment district for Islais Creek reclamation project, involving an expenditure of \$1,600,000. The project will reclaim 288 acres of industrial land to the city's area and will require from two to three years to complete.

3,500,000 FEDERAL MONEY IS AVAILABLE FOR CALIFORNIA STATE AND NATIONAL FOREST ROADS

Assurance of continued Federal assistance in the construction of roads throughout the United States has been secured through recent action of Congress in authorizing the Secretary of Agriculture to allocate more than \$82,000,000 for improving roads on the Federal Aid System, and within the National Forests. The authorization is for the fiscal year 1929, and is composed of \$75,000,000 Federal Aid, and \$7,500,000 for National Forest Roads and Trails. Similar amounts were also approved to be later authorized for fiscal years 1930 and 1931.

California's share of the \$82,000,000 authorized for the fiscal year 1929, will approximate \$3,500,000, of which \$1,112,115 is apportioned for improving National Forest roads, and the remainder, about

\$2,500,000, is apportioned to the State for expenditure on the Federal Aid System. Of the forest road money, \$671,088 will be expended on major roads within or serving the national forests and of primary importance to the state, counties or communities. The remaining forest road money, \$441,067, will be expended on minor roads and trails of primary importance for protection and administration of forest resources. In addition, 10% or approximately \$115,000, of the receipts from the national forests of California will be apportioned for improvement of forest roads and trails.

Some of the more important projects expected to be placed under construction with National Forest road money during the season of 1928 are:

Project	Forest Highways Projects	County	Federal Cooperation
Paynes Creek-Susanville.			
12-mile section from Morgan Springs westerly through Deer Creek Meadows.		Tehama	\$150,000 \$122,000
Blairstown-Quincy.			
3.4-mile section between Cromberg and Blairstown.		Plumas	50,000 75,000
Truckee-Meyers.			
Continuation of work formerly approved at Placerville-Lake Tahoe.		Placer	80,000
4.0-mile section between Strawberry and Phillips.		Eldorado	75,000 75,000
Vawona-Auberry.			
Improvement of 16-mile section between Fish Camp and Oakhurst.		Mariposa-	
San Marcos.		Madera	50,000
Surfacing 11.85-mile section now under construction.		Santa Barbara	50,000 50,000
ft. Lassen.			
6-mile section between Park Boundary and Morgan Summit.		Tehama	75,000 25,000
Pyramidwild.			
3.0-mile section between Strawberry Creek and North Fork San Jacinto river		Riverside	50,000 40,000
	Forest Development Projects

ugar Loaf.—10 miles.		Kern-Tulare	32,000
ak Knoll-Dry Lake.—5 miles.		Siskiyou	16,000
ameusa.—13 miles.		Santa Barbara	25,000
each Ranch-Wildwood.—3½ miles.		Trinity	15,000

CONTRACTORS' LICENSE LAW IN SOUTH CAROLINA AS SUMMARIZED

The following is a resume of the new contractors' license tax of South Carolina:

Every person, firm or corporation who enters into a contract for a fixed price, commission, fee or wage, or who bids to construct or to superintend the construction, within the State of South Carolina of any building, etc., excavation, etc., or other reimprovements of structures, or any part thereof, the cost of which exceeds the sum of \$10,000, shall pay an annual license tax of \$100, which tax shall be due and payable on the 1st of each year, or prior to offering to submit any bid for any of the above-mentioned projects.

In addition said person "shall before entering into a contract pay a license tax on each contract, as follows:

Contract cost or estimated cost more than	But not more than	Shall pay a tax of
10,000	\$ 50,000	\$ 100
50,000	100,000	200
100,000	250,000	300
250,000	500,000	500
500,000	750,000	750
750,000	up	1,000

These licenses shall apply to each individual contract and shall remain in force until such contract is completed."

Application for license shall be made to the South Carolina Tax Commission,

accompanied by affidavit of applicant, stating contract or estimated price, of all or part of work.

Application shall be accompanied by affidavit from architect or engineer as to his estimate of cost of work.

In the event two or more contracts are let to the same person on one project, the several contracts shall be considered as one for the purpose of this act.

* * *Penalty for failure to secure license to submit bids as provided shall be, upon conviction, a fine of not less than \$20—or more than \$100—or imprisonment for not less than 10 or more than 30 days.

Penalty for failure to secure additional license, same as above, and for each day that such business is conducted without a license shall constitute a separate offense.

Architects and engineers shall report to Tax Commission all projects, name of owner, estimated cost and names of parties submitting bids in excess of \$10,000.

Building inspectors and/or officials issuing permits shall report permits issued for work coming under this law.

Penalties, same as paragraph marked (*) above.

The provisions of this section shall be retroactive and effective on and after July 1, 1927, etc.

EMPLOYMENT SERVICE ENGINEERING SOCIETIES

Further information regarding positions listed in this column is obtainable from Newton D. Cook, Room 715, 57 Post Street, San Francisco, (Phone Sutter 1684).

R-1709-S DRAFTSMAN, first class topographic and map draftsman with sufficient technical training to make all calculations from field notes. Salary \$200-\$225 month. Location, San Francisco.

R-1714-S FIELD DRAFTSMAN, experienced on highway or R.R. location work to plot notes and make field maps. Must have several years' experience and be good computer. Salary \$175 and board. Apply by letter with references. Location, Northern California.

R-1565-S ESTIMATOR, for automatic sprinkler work. Must be experienced and thoroughly familiar with all factors making up the job. Salary about \$250. Location, San Francisco.

R-1707-S STRUCTURAL DESIGNER, for reinforced concrete structures in connection with hydro-electric power projects. Experience of similar nature required. Must be citizen and preferably under 40. Salary \$250 a month. Temporary. Location, San Francisco.

K-66-X - 4918 - C - S WOODWORKING

ENGINEER, graduate with several years' experience in manufacture of furniture thoroughly familiar with designing plant layouts and woodworking machinery. Should have general knowledge of manufacturing costs. Apply by letter, giving age, and details of education and experience. Location, Middlewest.

PATENTS

Granted to Californians as reported by Munn & Co., Patent Attorneys

David S. Garcia, of Oakland. WATER HEATER. This is for use in laundries and other industrial plants where large quantities of hot water are wanted continuously and instantaneously. When the water reaches a predetermined temperature it is automatically cut off.

Arthur J. Kercher, of Berkeley. TEM-

PERATURE-CONTROL SYSTEM. A controlling device which automatically opens and closes the circuit to the heating element. It keeps the temperature of the medium to be heated constant by minimizing sudden temperature fluctuations.

William H. Tangeman, of Ontario. INTERNAL COMBUSTION ENGINE. This provides an automatic thermostatic regulating device for thermal pumps, automatically controlling the thermal condition of the pumps, regardless of the amount of heat applied to the device. Patent assigned to James V. Baldwin and Harry G. Moore.

Arthur J. Kercher, of Berkeley. ELECTRICAL WATER HEATER. An inexpensive, highly efficient and durable device. The heating elements, mounted on a single header, are readily applied to a shell through which the fluid to be heated circulates.

The California Sewage Works Association, recently formed at a meeting in San Francisco attended by those interested in the problem of sewage disposal, will hold its next meeting in San Bernardino, October 8th, according to Dr. Walter M. Dickle, director of the state department of public health.

Building News Section

APARTMENTS

Ready To Take Sub-Bids This Week.
APARTMENTS Cost, \$200,000
SAN FRANCISCO. N Pacific Ave. E Webster St.
 Seven-story class A apartment building. Owner and Builder—Jesse D. Hannah, 825 Sansome St.
 Architect—Edward E. Young, 2002 California St., San Francisco.

To Award Segregated Contracts in a Few Days
APARTMENTS Cost, \$60,000
SAN FRANCISCO. E Central Ave., 100 N Page St.
 Three-story and basement frame apartment bldg. (24 2 and 3-room apts.) Owner—R. J. Mullin, 228 17th Ave.
 Architect—David C. Coleman, 110 Sutter.

SEATTLE, Wash.—John S. Hudson, American Bank Bldg., will have plans prepared for a twenty-five story fireproof apartment building at the southeast double corner of Terry avenue and Seneca street; estimated cost \$1,000,000. Proposal to rezone the district to permit erection of the structure is now being considered by the City Council.

Contract Awarded.
APARTMENTS Cost, \$150,000
WILLOWS, Glenn Co., Cal.
 Three-story reinforced concrete store, office and apartment building.
 Owner—W. M. Kirkpatrick, Willows.
 Architect—Coffman, Sahlberg & Stafford, Plaza Bldg., Sacramento.
 Contractor—Barton & Handlin, 619 J St., Sacramento.

Contract Awarded
APARTMENTS Cost, \$32,500
ALAMEDA, Alameda Co., Cal. 743 Santa Clara Ave.
 Three-story 33-room frame and stucco apartment house.
 Owner—Annie K. Theobald, 1226 Sherman St., Alameda.
 Architect—Gerald W. McPherson, 319 14th St., Oakland.
 Contractor—Stephen J. Williams, 3616 Richmond Blvd., Oakland.

Contract Awarded
APARTMENTS Cost, \$35,000
ALAMEDA, Alameda Co., Cal. 757 Santa Clara Ave.
 Three-story frame and stucco apartment house.
 Owner—F. Frank Jones, 310 Henshaw Bldg., Oakland.
 Architect—Gerald W. McPherson, 319 14th St., Oakland.
 Contractor—Stephen J. Williams, 3616 Richmond Blvd., Oakland.

LOS ANGELES, Cal.—Architect John M. Cooper, 322 Rives-Strong Bldg., has completed working plans and has the contract for the erection of a 7-story class A apartment bldg. on Valencia St. near 9th St. Cost, \$175,000.

LOS ANGELES, Cal.—Architect Raphael Nicolais, 686½ S Vermont Ave., has prepared sketch plans for a 6-story and basement apartment bldg. to be erected at NW cor. of 8th St. and Plymouth for Joseph A. Rosenkranz and associates. It will contain 12 three-room, 12 four-room, and 12 five-room apartments, garage, 125 x 114 ft., Italian type, reinforced concrete construction, plaster exterior, tile and composition roofing. Cost, \$190,000. The project will probably mature this fall.

Plans Being Prepared.
ALTERATIONS Cost, \$—
SAN FRANCISCO. Fulton St. near Fillmore St.
 Alter three-story frame flat building into apartments.
 Owner—Withheld.
 Architect—Fabre & Hildebrand, 110 Sutter St., San Francisco.

Preliminary Plans Being Prepared
APARTMENTS Cost, \$240,000
SAN FRANCISCO. Nob Hill.
 Ten-story steel frame and concrete apartment house.
 Architect—Clay N. Burrell, American Bank Bldg., Oakland.

June 18, 1928
 Construction Started
APARTMENTS Cost, \$80,000
ALAMEDA, Alameda Co., Cal. 2521 Central Ave.
 Three-story frame and stucco apartment house (81 rooms).
 Owner—R. J. Bianco, 218 Howden Bldg., Oakland.
 Architect—J. F. Keenan, Jr., Oakland.

Completing Plans
APARTMENTS Cost, \$350,000
SAN FRANCISCO. Geary and Jones Sts.
 Thirteen-story class A apartment bldg., 150 rooms and baths; all modern conveniences.
 Owner and Builder—Marian Realty Co., 110 Sutter St., San Francisco.
 Architect—H. C. Baumann, 251 Kearny St., San Francisco.

LOS ANGELES, Cal.—Michael A. Weller, 406 Security Bldg., will build a 4-story apartment building at the n e cor. of 5th St. and Wilton for the Chateau Laurier Holding Corp.; plans by L. A. GOVERNMENT WORK AND SUPPLIES

PEARL HARBOR, T. H.—E. K. Sugihara, 656 N School St., Honolulu, T. H., at \$13,450, under Specification No. 5609, awarded contract by Bureau of Yards and Docks, Navy Department, to paint buildings at Pearl Harbor.

Ernest Hopkins, Editor,
 "The Californian,"
 The Examiner.
 Dear Ernest:

SANDY PRATT reads your stuff.

IN THE Examiner each day.

AND YOU write.

ABOUT SACRAMENTO Valley.

AND THE natives.

OF THIS great valley.

YOU TELL about the "peaches."

OF SUTTER County.

AND THE Loomis "plums."

AND ALL the bachelors.

OF MARYSVILLE.

BUT ERNEST.

YOU TELL nothing.

ABOUT THE sand plants.

AND THE rock plants.

OF CLARENCE (Sandy) Pratt, President.

OF THE Pratt Building Material Co.

WITH PRODUCING plants at.

SACRAMENTO, MARYSVILLE.

PRATTROCK (NEAR Folsom).

PRATTCO (MONTEREY County).

AND MAYHEW (Sacramento County).

CENTRAL OFFICE—San Francisco.

AND ERNEST.

YOU DO not even mention.

OUR FAMOUS sign at Prattrock.

IT HAS done more.

TO ADVERTISE us.

THAN ANYTHING else.

THE PICTURE of which.

IS JUST below this story.

"I THANK you."

This and similar signs greet the motorist that tours California. Sandy Pratt, President of the Pratt Building Material Co. and the Pratt Rock & Gravel Co., has erected these "Guide Posts" at his sand, rock and gravel plants at Sacramento, Prattrock (near Folsom), Marysville and Prattco (2 miles from Hotel Del Monte, Monterey County); all in California. NOTE:—A windshield sticker of this California highway scene can be had free by writing to Sandy at any of the above offices or at Sandy's central office, 518 Hearst Building, San Francisco—Douglas 300—"Easy to remember."

LONG BEACH, Los Angeles Co., Cal.—Plans for the new horseshoe pier have been completed by City Engineer A. H. Adams and will be presented to Col. Charles Leeds for approval before Director of Public Service Walter R. Fleming submits them to the council. The plans show all detail of the pier and the fill. The pier itself is to be thirty-six feet in width, with two 19-foot, four-inch driveways provided for the two-way traffic, according to the plans. It will join the beach at Pine Ave. and at Linden Ave., and will measure 1400 feet from the center of the horseshoe at sea to the beach. Crossties piles with sixteen-inch butt minimum placed five feet, six inches apart and well braced will support the pier. The driveway is to be of five-inch asphaltic concrete paving. The fill will be eight acres in area, 500 feet in width east and west and running 690 feet to sea. The ordinance authorizing sale of the \$2,800,000 auditorium and pier bonds, voted May 1, and the ordinance covering sales of the \$2,700,000 harbor bond issue, were adopted at a recent meeting of the city council.

SAN FRANCISCO.—Following bids rec. June 20 by State Harbor Commission, Ferry Bldg., to furnish and install steel rolling doors in building on connecting wharf between Piers 26 and 28. Frank G. White Chief Engineer.

BUSINESS OPPORTUNITIES

Wants Distributor
Manufacturers of a resilient floor tile, located in Chicago Heights, Ill., wish to appoint a suitable distributor in San Francisco to handle their product. (Name on request to Larsen Advance Construction Reports, Kearny 1252).

Wants Volcanic Ash
Mr. Marshall Dill, 216 Pine St., San Francisco, wants samples, prices and full information on the subject of volcanic ash, similar to California Pumice. Will purchase in carload lots if material and price are satisfactory.

Wants Tin Cuttings
Herman Black, El Paso, Texas, desires to purchase tin cuttings.

Wants Agent
Wold Safety Lamp Co. of America, Inc. (G. A. Creutzburg, president), 68 Emerson Lane, Brooklyn, N. Y., manufacturers of mining lamps, desires to appoint exclusive agent or distributors for Northern California.

Wants Dealer
Sanitary Scale Co., (Arthur F. Priebe, assistant sales manager), Belvidere, Ill., manufacturers of porcelain finish computing scales, wish to locate established dealer to handle the distribution of their product in this territory.

Representation Available
H. O. Gentry Co., Central Bldg., Seattle, Wash., established merchandise brokers, are open to handle another line or two in addition to those which they now carry. They would appreciate hearing from manufacturers who are considering an agent or representative to handle their products in the Seattle territory. References available.

D. Barker, 2705 West Tenth St., Los Angeles, Calif., wants a man to take over exclusive agency for Northern California to sell a new small motor-driven knife sharpener (weight 6 lbs.), a product that sells to restaurants, hotels, clubs, butchers, etc. This sharpener will sharpen knives and cleavers of all kinds, leaves no scratches, makes a perfect edge. Product has been successful in the East. A capable man with selling ability and accustomed to earning big money is desired. Commission basis.

Seeks Connection
Neue Glasindustrie Gesellschaft m.b.H., Weisswasser, O. L., Germany, seeks connection with importers of ultra-violet window glass.

Seek to Export
Cia. Mexicana de Productos Nacionales, Edificio Rule, Mexico, D. F., exporters of mahogany offers same for sale to foreign markets and would appreciate hearing from interested San Francisco houses.

Seeks Representation
Mr. N. D. Anderson, P. O. Box 1198, San Francisco, (Phone Walnut 3661), who makes Hawaiian Islands twice yearly, will undertake introduction or expansion of San Francisco-made products. References.

Will Establish Market
Mr. Chas. W. Gould, 181 Lytton St., Palo Alto, Calif., is leaving for Australia and New Zealand shortly and would like to represent American concerns desiring to market products there.

A bird in the hand is worth two in the bush. And so it is in the construction game. Larsen's Advance Construction Report is an aviary of birds in your office every morning waiting to be fed by your sales force. Send for sample copies. Larsen Advance Construction Reports, 547 Mission St., San Francisco. No charge. No obligation.

FOR MORE PAY

Approximately 600 ironworkers walked out on strike in Boston last week following the failure of the employers to grant an increase in wages from \$1.25 to \$1.50 per hour. The strike ties up a number of large building projects in Boston and vicinity. John F. Walsh, Secretary of the Building Trades Employers Association, states that not more than 200 workers are out on jobs which are being done by members of the Association, while James J. Murphy, Business Agent of Local 7 of the Iron-workers places the number of strikers at 600.

The strike action was taken at a meeting of the union after the employers' association had been notified of the demands of the workers and in spite of the fact that the employers' association had asked for a conference the following day. Union leaders have accepted the invitation to meet with the employers but, according to Secretary Walsh, the employers refuse to discuss any agreement until the strikers return to work.

The ornamental iron Employers' Association have voted to support the Building Trades Association in refusing the demands of the workers and they have notified all contractors that they do not intend to pay the increase demanded. It is claimed by Business Agent Murphy that many independent contractors are paying the higher scale and he further intimated that other trades will be called on to support the ironworkers' demands.

Engineering News Section

BRIDGES

PLACERVILLE, El Dorado Co., Cal.—Until July 11, 2 P. M., bids will be rec. by State Highway Comm., Highway Bldg. Sacramento, to const. two overhead crossings, one at Sta. 109 plus 92, a reinf. conc. girder bridge consisting of one 46-ft. 6-in. span and two 39-ft. 9-in. spans on conc. piers and abutments with wing walls; also at Sta. 114 plus 65, a reinf. conc. girder bridge consisting of one 45-ft. 6½-in. span and one 28-ft. span and one 28-ft. 6-in. span on conc. piers and abutments with wing walls. Official Proposals

ADVERTISEMENT

Sealed bids, in triplicate, subject to the conditions contained herein, will be received until 11 A. M., July 17, 1928, and then publicly opened for furnishing all labor and materials and performing all work for Construction of Additional Buildings and Utilities, including roads, walks, and drainage at U. S. Veterans' Hospital, Tucson, Arizona. This work will include excavating, reinforced concrete construction, hollow tile, gypsum blocks, brickwork, cast stone, marble work, floor and wall tile, iron work, steel sash, steel stairs with slate treads, tile, metal and built-up roofing, roof ventilators, metal lathing, plastering, carpentry, insect screens, awnings, painting, glazing, hardware, plumbing, heating and electrical work. Bids will be considered only from individuals, firms or corporations possessing satisfactory financial and technical ability, equipment and organization to insure speedy completion of the contract and in making award, the records of bidders for expedition and satisfactory performance on contracts of similar character and magnitude will be carefully considered. At the discretion of the Director, drawings and specifications may be obtained upon application to the Construction Division, Room 764, Arlington Building, Washington, D. C. Deposit with application of a check or postal money order for \$50,000 payable to the TREASURER OF THE UNITED STATES is required as security for safe return of the drawings and specifications within ten days after date of opening bids.

FRANK T. HINES,
Director.
June 15, 1928.

June 16-18-19.

STATE OF CALIFORNIA DEPARTMENT OF PUBLIC WORKS DIVISION OF HIGHWAYS NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the State Highway Engineer, 1111 Sun Finance Building, Los Angeles, California, until 11 A. M. on July 10, 1928, at which time they will be publicly opened and read, for construction in accordance with the specifications therefor, to which special reference is made, of portions of State Highway as follows:

Orange county, from Anaheim to Fullerton (VII-Or-2-E), about eight-tenths (0.8) mile in length to be graded and paved with Portland cement concrete.

SEALED PROPOSALS will be received at the office of the State Highway Engineer, Highway Building, Sacramento, California, until 2 o'clock P. M. on July 11, 1928, at which time they will be publicly opened and read, for construction in accordance with the specifications therefor, to which special reference is made, of portions of State Highway as follows:

Placer County, at Bowman (III-Pla-37-A) the two following overhead crossings:

Station 109+92, a reinforced concrete girder bridge consisting of one 46'-6" span and two 39'-9" spans on concrete piers and abutments with wing walls.

Station 114+65, a reinforced concrete girder bridge consisting of one 45'-6 1/2" span, one 38'-0" span and one 28'-6" span on concrete piers and abutments with wing walls.

Imperial County, (VIII-Imp-27-B), an undergrade crossing under the tracks of the Inter-California Railroad near Araz Junction, consisting of two concrete abutments with wing walls, a timber bridge near said crossing consisting of three 19-foot spans on creosoted pile bents and bulkheads with wings, grading and surfacing about 1/2 mile of roadway with oil treated crushed gravel or stone.

Plans may be seen, and forms of pro-

posal, bonds, contract and specifications may be obtained at the said office, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, and at the office of the District Engineer of the district in which the work is situated. The District Engineers' offices are located at Eureka, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the District Office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Division of Highways. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the District Office.

No bid will be received unless it is made on a blank form furnished by the State Highway Engineer. The special attention of prospective bidders is called to the "Proposal Requirements and Conditions" annexed to the blank form of proposal, for full directions as to bidding, etc.

The Department of Public Works reserves the right to reject any or all bids or to accept the bid deemed for the best interest of the State.

DEPARTMENT OF PUBLIC WORKS,
DIVISION OF HIGHWAYS.

C. H. PURCELL,
State Highway Engineer.

Dated: June 13, 1928.

ADVERTISEMENT FOR BIDS

Sealed bids will be received at the Office of the Comptroller, 220 California Hall, University of California, Berkeley, California, at or before 11:00 A. M., Friday, June 29, 1928, for the construction of a Laboratory Building at the Deciduous Fruit Experiment Station located on the Woman's Relief Corps Home Site near San Jose, Santa Clara County, California.

Drawings and Specifications may be obtained from Room 218 California Hall upon a deposit of \$25.00 for each set of Drawings and Specifications. Deposit will be refunded only on submission of a regular bid and on return of the Drawings and Specifications in good condition.

No bids will be considered unless accompanied by a certified check or bid bond of an acceptable Surety Company in favor of the undersigned, equal to ten per cent of the bid to secure the execution of the contract by the successful bidder.

The right is reserved to reject any or all bids.

THE REGENTS OF THE UNIVERSITY
OF CALIFORNIA.

A call for bids published in this section indicates that bids are desired from other than local bidders. Maximum competition is desired, and this is assured through BUILDING AND ENGINEERING NEWS, which reaches every worth-while contractor and materialman in Central and Northern California who bids on public work.

Rate: 10 cents per line, per insertion.

All official calls for bids of the California State Highway Commission and Nevada State Highway Commission are published in this section.

NOTICE TO CONTRACTORS

(Fort Bragg Union High School District—
Junior High School)

Notice is hereby given by the Board of Trustees of the Fort Bragg Union High School District that bids will be received by said Board of Trustees for the erection and construction of a new Junior High School Building at Fort Bragg, Mendocino County, California. Plans and specifications may be obtained from the Clerk of the Board at Fort Bragg, or from Norman R. Coulter, the architect, at 46 Kearny St., San Francisco, California. A deposit of ten dollars (\$10) will be required for each set of plans. All bids will be opened by the said Board of Trustees at 1 o'clock P. M., on the 28th day of June, 1928, at the office of the present high school building. All bids must be delivered to M. D. Gray, Clerk of said Board, before that hour enclosed in sealed envelope and marked on the outside "Bids for construction of new Junior High School Building at Fort Bragg, Mendocino County, California." All bids must be accompanied by a certified check, cash, certificate of deposit, or Surety Company bid bond, equal to ten per cent of the amount bid—to be made payable to the Board of Trustees and to be returned to the party or parties whose bid or bids are not accepted, and to the party whose bid is accepted upon his entering into a contract with the said School District and giving such bond as may be required by law and said Board. The Board of Trustees reserve the right to reject any and all bids.

M. D. GRAY,
Clerk, Board of Trustees, Fort Bragg Union High School District, Fort Bragg, Mendocino County, Calif.

NOTICE TO CONTRACTORS

(Gymnasium — Courtland Union High School District)

Notice is hereby given that the Board of Trustees of the Courtland Joint Union High School District will receive sealed bids at the office of the Clerk of said Board at the Courtland Joint Union High School Building at Courtland, California, for the construction of a gymnasium, in accordance with the plans and specifications approved by the Board of Trustees of said school district.

Said bids to be received up to 1 o'clock P. M. on the 30th day of June, 1928. Each bidder must submit a proposal to the clerk of said Board on standard forms, which may be obtained from the office of the architects for said district, said proposal to be accompanied by certified check for ten (10%) per cent of the amount of bids submitted, check to be made payable to the Courtland Joint Union High School District.

Plans and specifications are now on file in the office of Coffman-Sahlgren-Stafford, architects for said district, at Room No. 602, Plaza Bldg., Sacramento, Calif., to whom all prospective bidders are hereto referred.

The Board of Trustees reserves the right to reject any and all bids received. By order of the Board of Trustees of the Courtland Joint Union High School District.

Dated June 15th, 1928.

S. MERCER RYNNON,
Secretary of the Board of Trustees of the Courtland Joint Union High School District.

NOTICE TO CONTRACTORS

(Elementary School—Fort Bragg Union School District)

Notice is hereby given by the Board of Trustees of the Fort Bragg Union School District, that bids will be received by said Board of Trustees for the erection and construction of a new Elementary School at Ocean Site, Fort Bragg Union School District, Mendocino County, California.

Plans and specifications may be obtained from the Clerk of the Board at Fort Bragg, or from Norman R. Coulter, the architect, at 46 Kearny St., San Francisco, California. A deposit of Ten Dollars (\$10) will be required for each set of plans. All bids will be opened by the said Board of Trustees at one o'clock P. M., on the 28th day of June 1928, at the office of the present school building. All bids must be delivered to Wm. G. Burger, Clerk of said Board before that hour, enclosed in sealed envelope and marked on the outside, "Bids for construction of school building at Ocean Site, Fort Bragg Union School District, Mendocino County." All bids must be accompanied by a certified check, cash, certificate of deposit, or surety company bid bond, equal to ten per cent (10%) of the amount bid—to be made payable to the Board of Trustees and to be returned to the party or parties whose bid or bids are not accepted, and to the party whose bid is accepted upon his entering into a contract with the said School District and giving such bonds as may be required by law and said Board. The Board of Trustees reserves the right to reject any and all bids.

WM. G. BURGER,
Clerk of the Board of Trustees, Fort Bragg Union School District, Mendocino County, California.

NOTICE TO CONTRACTORS

(Structures—National Guard Camp—San Luis Obispo).

Bids For Construction.—Office of the United States Property and Disbursing Officer for California, Room 1021, Forum Bldg., Sacramento, Cal. Sealed proposals in triplicate will be received here until 11 A. M., June 27, 1928, and then opened, for furnishing all materials and labor required for construction of rifle range, 2 warehouses and 4 bath houses and latrines at the National Guard Training Camp, San Luis Obispo, Cal. Further information on application.

NOTICE TO CONTRACTORS

(Building Materials—Woodbridge Irrigation District)

Notice is hereby given that sealed proposals for furnishing the material described in the schedules hereinafter set forth, or in any of said schedules, will be received by the Board of Directors of Woodbridge Irrigation District at its office near the corner of Main and Indiana Streets, Woodbridge, California, at any time up to 10:00 o'clock A. M. of Tuesday, July 3, 1928, at which time and place all proposals so received will be opened in public by said Board and a contract or contracts for the purchase of said materials will be awarded to the lowest responsible bidder or bidders, but said Board reserves the right to reject any or all bids. The materials to be furnished are described generally under the following schedules, to-wit:

SCHEDULE NO. 1: One carload (approximately 10,000 board feet) of assorted Redwood lumber.

SCHEDULE NO. 2: One carload (approximately 12,000 board feet of assorted Pine lumber.

SCHEDULE NO. 3: One carload of sand and rock mixed for concrete aggregate.

SCHEDULE NO. 4: Approximately 60 bbls. of Portland cement, to be warehoused in Lodi or Woodbridge to be delivered to the District in such quantities and at such times as may be requested, but all delivery to be made not later than September 1, 1928.

SCHEDULE NO. 5: Approximately 4000 pounds of corrugated square reinforcing steel in assorted sizes.

Said materials are more particularly described in the specification therefor, which may be seen or obtained at the office of said District.

Any bidder may submit a proposal for furnishing the materials described in any or all of said schedules.

A bidder to whom a contract for furnishing any of said materials may be awarded must furnish a bond, as required by law, in the sum of not less than 25% of the amount of the contract price, conditioned for the faithful performance of the contract.

Bids must be on the proposal forms attached to the specifications and must be in sealed envelopes addressed to the Board of Directors of Woodbridge Irriga-

tion District and marked to indicate that each is a proposal for furnishing materials to said District.

Dated, Woodbridge, Cal., June 12, 1928.
OLLA L. STROTHER,
Secretary of Board of Directors, Woodbridge Irrigation District.

ELECTRICAL BODY ELECTS

The Pacific Coast Electrical Association in annual convention at Pasadena, attended by more than 800 delegates and representatives, elected Paul M. Downing, manager of the Pacific Gas and Electric Company of San Francisco, president to serve for the ensuing year. Other officers elected were: First vice-president, E. B. Criddle, Southern Sierras Power Company, Riverside; second vice-president, A. M. Frost, commercial manager for the San Joaquin Light and Power Company at Fresno; secretary S. H. Taylor, and R. N. Sutherland, treasurer, the latter two being re-elected.

Long distance gas distribution is making progress in Germany despite opposition against the concentration of gas production in the three centers—the Ruhr, and the Saxonian and the Upper Silesian coal districts. Recently the Province of Hannover (2½ million inhabitants) signed a contract for the supply of gas from the Ruhr, which is 250 to 350 miles distant.

BUILDING PERMITS GRANTED AT SAN ANSELMO

Following building permits were granted by the city trustees of San Anselmo, during the month of May, 1928:
Cecelia Fitzgerald; dwelling; lot 4, block 2, Cordone Tract; Est. cost \$3500.
F. Maxwell; garage; lot 11, block 2, Morningside Court; Est. cost \$175.
Mrs. F. R. Eule; garage; portion lot 135 Ross Valley Park, San Anselmo Ave.; Est. cost \$200.
R. Gheffoli; garage; Butterfield Road; Est. cost \$500.
C. Poli; addition to dwelling; portion lot 4 Davidson Tract, Olive Ave.; Est. cost \$200.
L. Cordone; repairs to dwelling; lot 400 Short Ranch, San Francisco Blvd.; Est. cost \$1000.
Mrs. N. Redmond; garage; portion of lots 21B and 21C Bush Tract, Medway Road; Est. cost \$300.
Leach & Wallace; dwelling; portion lot 19A Bush Tract, Medway Road; Est. cost \$4000.
T. M. Shea; alterations to dwelling and erect garage; portion lot 5 Davidson Tct., Olive Ave.; Est. cost \$500.
E. J. Conlan; dwelling; lot J Sub. Lots 14 and 14A Bush Tract, San Anselmo Ave.; Est. cost \$3500.
E. J. Knowlton; garage; lot 49 Short Ranch, Sub. 1, Butterfield Road; Est. cost \$125.
C. H. Witham; dwelling; lot 13, block 3, Morningside Court (Morningside Drive); Est. cost \$4000.

A national wide credit survey is being undertaken by the Department of Commerce and the National Retail Credit Association. If this were to extend to the construction industry no doubt some startling facts would be revealed. There is hardly an industry that does a greater amount of credit business with such poor credit facilities.—American Contractor.

ERECT 25-STORY STEEL BUILDING IN 36 DAYS

Steel erection on the Lawyers Building, 100 LaSalle St., Chicago, is said to have been completed in less time than for any other building of the same height and with an equal tonnage of steel. This office building is 91 ft. 2 in. x 36 ft. 6 in. in plan and about 290 ft. high, with 25 stories and basement, requiring 1956 tons of structural steel. All the steel consisted of columns and beams, no girders or trusses being involved.

Delivery of steel began on Feb. 24 and the final delivery was made on April 13, the erection being completed shortly afterward in the record time of seven weeks, or 36 working days. Three days are deducted for bad weather when the erecting gangs could not work, while Saturdays are figured as half days, since the erectors quit work at noon. This entire erection was done on a straight time basis, without any overtime. The erection forces consisted of 50 men. One guyed derrick was used of 15 tons hoisting capacity, with an 85-ft. boom and 100-hp. electric hoist. Material was handled by motor trucks from the local plant of the steel company to the site.

Rapid erection was made practicable largely by prompt delivery of steel and the ability of the erectors to take advantage of this in pushing the work faster than had been scheduled. For their original schedule, the erectors required complete delivery of an entire tier of columns, with two floors of beams and spandrels, in two days, at the rate of three tiers every two weeks. But after the first tier was delivered, the steel company gave each entire tier with corresponding floor beams, in 1½ days up to the tenth floor and then each entire tier in one day. From the first tier upward, the delivery was two tiers or stories each week, instead of three tiers

every two weeks, while in one week three entire tiers were delivered. There were practically no corrections in the field, owing to accurate fabrication at the shop.

The architects are Graven & Mayger, with Lieberman & Hein as structural engineers. The general contractor was the Lundoff-Bicknell Company. The Gage Structural Steel Company furnished the steel, and the Overland Construction Company was contractor for steel erection. All these are Chicago firms.

PACIFIC MINERALS COMPANY TAKES OVER ROCK PLANTS

Formation of a new company to take over the holding of two firms engaged in the rock quarry and crushing business was announced with the filing of articles of incorporation in Martinez by the Pacific Minerals Company of Richmond, with a capitalization of \$500,000.

The new company will acquire a rock quarry at Angels Camp, operated in the past by the Angeles Greenstone Company, and a slate crushing plant at Placerville that has been operated by the Western Slate Products Company. Chas. S. Renwick of Richmond becomes president and manager of the amalgamated company, with interests of both firms represented in the Board of Directors. Renwick has been managing the quarry at Angels Camp for some time.

Other officers and directors of the company are Kenneth A. Williams at Altadena, vice president; T. H. DeLap of Richmond, secretary; Larkin J. Younce of Richmond and Malcolm Stewart of Burlingame.

The firm will engage in the business of crushing slate and greenstone for use in the manufacture of various types of roofing materials. It will maintain its offices in Richmond in the American Trust Building.

SCHUMACHER WALLBOARD CORP. EARNINGS GREATER

Earnings of the Schumacher Wall Board Corporation for the second quarter of the year should run approximately 1 per cent higher than for the corresponding quarter of last year, officials of the company state. Sales at this time are 15 per cent higher as compared with the second quarter of 1927 and plants of the company are operating at about 30 per cent of capacity on a 24-hour-a-day basis.

Schumacher Wall Board Corporation is one of the largest manufacturers of wall board and plaster lath, and recently placed on the market an improved wall board which is sold under the name of Schumite.

The company also inaugurated a program of expansion including national distribution of the products and the expansion of the factory capacities. Estimated monthly capacity is running at about 7,000,000 square feet, compared with 4,000,000 square feet prior to the factory expansion.

Preferred stock is listed on the San Francisco Curb Exchange and the common was recently placed on the Los Angeles Stock Exchange.

SIBERIAN LUMBER SHIPPED TO JAPAN DURING YEAR 1927

During 1927, 372,000 M board feet of timber from Hokkaido, 1,140,000 M board feet from Saghalien, and 180,000 M board feet from Siberia, a total of 1,692,000 M board feet of timber, were shipped to Japan proper and China, with only small quantities going to China, it is reported, according to advices from Assistant Trade Commissioner Howard B. Titus, Tokyo.

Russian Peasant Women Placing Straw Around Their Dwelling to Keep the Cold Out

Applying time - proved methods of insula- tion to modern day needs

NO one knows the value of building insulation as do the inhabitants of either extreme cold or extreme hot climates. These natives have realized for hundreds of years the value of insulation—particularly straw insulation. These people, not having a complete scientific knowledge of heat and cold values, made their selection of an insulating material by actual test. After their many crude experiments on different products—straw was finally chosen as their most perfect means of protection against heat and cold.

And today, this time-proved method of insulation is offered in a perfected form—INSO BOARD—manufactured in sturdy panels 7/16" thick, 4 feet wide and any length desired. It has many structural insulation uses such as—(1) Plaster Base, (2) Sheathing under stucco, brick or wood exterior, (3) Roof Insulation, (4) Under Flooring, (5) Wall and Ceiling finishing panels, (6) Sound Deadener, and (7) Insulating inner Walls.

DEALERS will find INSO BOARD a profitable connection, combined with the sales and advertising co-operation which will be WHOLLY AT OUR EXPENSE. Write today for particulars.

N. Y. SENATOR SEEKS TO PROHIBIT SPRAY PAINTING

Senator Copeland, of New York City, has introduced a bill in the Senate to prohibit the use of spray painting machines in the United States and District of Columbia. The bill has been referred to the Senate Committee on Education and Labor and is as follows:

That it shall be unlawful for any person to use or cause to be used any spray painting compressed-air machine or other device for spraying paint by means of air pressure in any Territory or possession of the United States or in the District of Columbia.

Section 2. It shall be unlawful for any officer of the United States or of any Territory or possession, or of the District of Columbia, or any contractor, or subcontractor whose duty it is to employ, direct, or control any laborer or mechanic upon any of the public works of the United States or of any Territory or possession, or of the District of Columbia, to require or permit the use of any such machine or device upon any of such public works, or in the performance of any contract to which the United States, or any Territory or possession, or the District of Columbia is a party, or which is made for or on behalf of the United States, or any Territory or possession, or said District.

Sec. 3. Any person who violates any of the provisions of this Act shall be guilty of a misdemeanor, and shall, upon conviction, be punished by a fine of not more than \$1,000, or by imprisonment for not more than six months, or both. Each day or part of a day on which any machine or device is used, or caused or required or permitted to be used, contrary to the provisions of this Act, shall constitute a separate offense.

Sec. 4. As used in this Act, the term "person" includes individual, partnership, corporation, and association.

Sec. 5. This Act shall take effect on the thirtieth day after its passage.

S. P. PLANS TO ELECTRIFY LINES OVER SIERRA

Statements that negotiations are under way between the American River Water & Power Company and the Southern Pacific Railway Company whereby the former would supply power to the railroad for the electrification of its lines over the Sierra were made at a hearing before the State Division of Water Rights June 25 by Walter Martin of San Francisco, representing the financial interests which would underwrite the power company's bond issues.

The hearing was held on the application of the American River Company to divert 200 second feet of water from the north and middle forks of the American river in El Dorado County. The matter was taken under advisement by Harold Conkling, chief of the division.

Martin testified that the company has two plans under consideration, one to construct a reservoir in French Meadows to store 100,000 acre feet at a cost of \$10,000,000, and the other to construct a 200,000 acre foot reservoir, at a cost of \$12,500,000.

Martin stated that the company is dickering with three prospective markets for the sale of the power to be developed. One is to wholesale to the Pacific Gas & Electric Company, the other to the City of Sacramento and the third to the Southern Pacific Company.

Three protestants appeared. These were Stephen E. Kieffer, representing the American River Hydro-Electric Company, which is seeking a State franchise to construct a power dam at Folsom; the California-Hawaiian Development Company of San Francisco were represented by C. G. Bockus, secretary, which has mining interests near French Meadows, and Harold T. Power, president of the Power Timber Company, holders of 11,000 acres of timber land in and near the reservoir site.

All were provisional protests to protect the interests of the protestants.

ROLANDI, BRIDGE CONTRACTOR, SUES STATE FOR \$336,273

Suit against the State Highway Commission for \$236,273, alleged to be due for the building of the Douglas Memorial Bridge over the Klamath River in Del Norte County has been filed in superior court, San Francisco, by Fred S. Rolandi, contractor who built the bridge.

The state refused to accept the bridge and the United States Bureau of Public Roads refused to share the expense on the ground that the structure is imperfect.

Roland set forth that he contracted to build the bridge in 1924, and that the state's refusal to approve the work was announced last February 16th, after the structure had been formally dedicated.

The complaint charged that false representations were made to Rolandi when he took the contract; that specifications were incorrect, and that when work started state engineers took control and were "unfair and unreasonable" in their attitude. The contractor alleged he also was damaged to the amount of \$200,832, but asked only the amount he alleged remained due.

State officials said Rolandi had received \$317,000 on the contract price and that \$69,000 in state funds had been paid to repair reported defects.

CRAFTSMANSHIP EXHIBITION AIM OF ARCHITECTS

The Northern California Chapter of the American Institute of Architects assisted by the San Francisco Chamber of Commerce is organizing an exhibition of fine craftsmanship in all materials and articles connected with building in San Francisco. Certificates of Award will be issued to those firms or individuals whose work is selected by a jury of architects as displaying particular merit.

The exact dates during which the exhibition will be held have not been fixed, but it will occur sometime during August or September. All firms desiring to enter the exhibition, however, should address the Committee of Awards of the Northern California Chapter of the American Institute of Architects in care of the San Francisco Chamber of Commerce before July 15, next.

The Committee will circularize, as far as possible, all firms in the city within the next few days, but any firm whose name and address has not been secured will be sent detailed information upon application. The only restrictions are that the article or workmanship must have been manufactured or executed in Northern California since January 1, 1926, for installation in San Francisco buildings by firms actively engaged in business here.

In 1927, the local chapter of the American Institute of Architects successfully held an exhibition of the work of Northern California architects in the De Young Museum in Golden Gate Park. This exhibition will be held every alternate year, and it is proposed to hold the honor awards for craftsmanship on the intervening years, of which the present exhibition will be the first.

The idea behind the exhibition is to stimulate fine craftsmanship and to let the architects and the community in general known about and see the best work being produced in this community. Members of the committee said recently that they hope that in succeeding years the awards will be given a wider scope and will include the whole of the northern part of the state.

BUILDING CODE REVISION UNDER WAY IN LOS ANGELES

An organization of the various interests concerned in the proposed revision and codification of the Los Angeles city building ordinance was formed at a meeting held at the Builders' Exchange, Los Angeles, June 6. David J. Witmer, representing the American Institute of Architects, was elected temporary chairman, and Mano Zan, general manager of the Builders' Exchange, acted as secretary. It was decided to appoint a committee composed of representatives of the American Institute of Architects, Associated General Contractors, Builders' Exchange, Chamber of Commerce and Realty Board to select a permanent chairman and also a committee to discuss a method of procedure. The meeting was preliminary to a series of public hearings to be held by the Los Angeles Building and Safety Commission as the work progresses. The board, which consists of J. W. Toms, president; Frank McGinley, Ralph E. Homann, W. H. Antram and C. E. Noerenberg, sat in banc with its secretary, F. A. Munice; J. J. Backus, general manager; C. V. Welch, chief of the building division; Clyde Makutchan, research engineer; H. N. Beecher, chief of the electrical division, and A. B. Wicks, heating and ventilating engineer.

SAN DIEGO ADOPTS ORDINANCE LICENSING ROOFING CONTRACTORS

"Leak-proof" roofs are the aim of an ordinance (No. 11718) which went into effect last week in the city of San Diego. It was drafted and presented to the city council by Oscar Knecht, chief building inspector, and embodies complete minimum specifications for all kinds of roofing to insure compliance with which it is required that all roofing contractors must be licensed and bonded.

The San Diego ordinance is rated as the most comprehensive and drastic dealing with roofing alone that has been adopted to date by any California municipality. It is designed to "assist in the protection of buildings against fire, against the elements, prevents leaks or dampness from jeopardizing the strength and stability of walls and footings and add to the healthful, sanitary, and safe environment of occupants of buildings." Its enforcement is vested in the city building inspector, who will have under his direct control a corps of assistants appointed by the "manager of operations," subject to civil service examination and regulations.

Standards for materials are to be the equivalent of the specifications recommended by the American Society for Testing Materials "insofar as such specifications can be made to consistently apply." Tests of any materials may be required by inspectors without any expense to the city.

Principal Objects of Ordinance

Under the heading of general provisions, the following paragraphs indicate the scope of the law:

"One of the principal purposes of this ordinance is to require roofing and flashings methods which will prevent leaks and dampness from penetrating the building or walls. Any application, method, roofing, or flashing which will not accomplish this purpose will be deemed a violation of this ordinance, and shall be rejected by the inspector.

"Blocks, slabs, shakes, plastic or semi-plastic applications, imitations, and/or texture or decorated roof effects which do not insure lasting leak-proof conditions, shall have a complete built up, properly flashed, water-tight roofing beneath same.

"It shall be the duty of the roofer to refuse to apply his roofing, and so notify the inspector, when the construction, sheathing, parapets, surface, reglets, etc., are in such a condition that the roofer cannot apply his roofing or flashing and live up to the intent and purpose of this ordinance. Said unsuitable or defective construction shall be immediately remedied by the person responsible for same.

"All vents, pipes, sumps, parapets, reglets, curbs, crickets, and other construction which forms an important part in connection with the roofing, flashing, etc., shall be fully taken care of as per ordinance requirements before the work can be inspected and accepted by the inspector."

Classification of Roofing

For the grading of roofing the following classifications are adopted:

(a) Fire Retardant:

Type 1-F: Not less than two layers of 32-pound prepared roofing, with a gravel, slag, or equal incombustible surfacing material.

Type 2-F: Not less than four layers of 14-pound saturated felt, with a gravel slag or equal incombustible surfacing material.

Type 3-F: Not less than two layers of 14-pound saturated felt, with a gravel

slag or equal sheet of mineral surfaced 82-pound prepared roofing or a smooth finish 72 pounds prepared roofing.

Type 4-F: Not less than two layers of asphalt impregnated asbestos prepared roofing felt, the combined weight of the felt being not less than 74 pounds per 108 sq. ft.

Type 5-F: Not less than one layer of 42-pound prepared roofing, over which lay two layers of asphalt impregnated asbestos felt, each layer weighing not less than 14 pounds per 108 sq. ft., or one layer of 72-pound prepared roofing, over which lay one layer of impregnated asbestos felt weighing not less than 14 pounds per 108 sq. ft.

Type 6-F: Hydraulic compressed rigid asbestos shingles laid over a layer of 14-pound saturated felt; or hydraulic compressed rigid asbestos sheets at least 7-32 of an inch in thickness, laid over a layer of 14-pound saturated felt.

Type 7-F: Asphalt saturated mineral surfaced prepared shingles, laid so that there will be no less than two thicknesses at all places, and combined weight of such shingles shall not be less than 190 pounds per 100 sq. ft. of completed roof area.

Type 8-F: Concrete masonry, tile, slate or sheet metal.

(b) Semi-Fire Retardant:

Type 1-S: Not less than two layers of 14-pound saturated felt, and a cap sheet of 52-pound prepared roofing. (One layer of 32-pound prepared roofing or one layer of 30-pound saturated felt may be used in lieu of the above mentioned double layer of 14-pound felt.)

Type 2-S: Asphalt saturated mineral surfaced prepared shingles, manufactured from not less than an 82-pound mineral surfaced prepared roofing. The combined weight of such shingles shall not be less than 150 pounds per 100 sq. ft. of completed roof area.

Type 3-S: Not less than two layers of 14-pound saturated felt protected with one 62-pound asphalt impregnated asbestos roofing.

(c) Ordinary Roofing:

Type 1-O: Not less than two layers of 14-pound saturated felt protected with any one of the following cap sheets: 42-pound prepared roofing or 42-pound asphalt impregnated asbestos roofing.

Type 2-O: Approved "five-to-two" wooden shingles.

The weight of prepared roofing refers to the net weight of each layer per 108 sq. ft. The weight for saturated or impregnated roofing refers to the net weight of each ply or layer per 100 sq. ft. All layers shall be thoroughly mopped between with roofing cement.

Powers of Inspectors

All roofing must be inspected during application and on final completion. Inspectors are vested with the following powers:

"If, in the opinion of the inspector, the roofing has not been properly applied or does not come up to the requirements of this ordinance, an area of 4 sq. ft. of the roofing may be torn out for the purposes of inspection, excepting that in the case of prepared or built-up roofing a slit about 36 in. long may be cut entirely through the roofing, for inspection. One such torn-out or cut section may be made in each area of 2500 sq. ft. or fraction thereof of roof surface. Said torn-out and cut sections shall be patched and replaced and made water-tight in an approved manner by the roofer at his own expense.

"When the inspector finds that the

roofing or flashing and construction connected therewith does not comply with the regulations, requirements, intents and purpose of this ordinance, said roofing, flashing, etc., shall be rejected, and the roofer shall remedy the defects and violations within five days after rejection.

"The roofer shall be held responsible for the use of suitable approved materials and for the correct construction and application of the roofing, flashing, counterflashing, surfacing material, dry sheets, mastic, cementing, etc., as required by this ordinance."

Manufacturers' specifications may be followed provided they do not lower requirements of the ordinance. Approved authorities for specifications designated are: Copper and Brass Research Association, National Slate Association, National Association of Sheet Metal Contractors and U. S. Federal Specification Board.

Spirit and Intent of Law

The ordinance declares: "The full spirit and intent of this ordinance shall be carried out to a logical conclusion. The building inspector shall consistently rule as to the meaning of the various provisions of this ordinance. Nothing in this ordinance shall be construed to prevent other construction, roofing methods and kinds of material from being used when same can be shown by approved tests to be, or it is self-evident that same is equally as good or better than the requirements of this ordinance and provided same are approved by recognized authorities. Roofing materials tested and labeled by the Underwriters' Laboratories Inc., will be sufficient evidence that said materials comply with the requirements of this ordinance."

Fire retardant roofing may be used on any building and must be used on all buildings exceeding 60 ft. or four stories.

Semi-fire retardant roofing may be used on any building not exceeding 60 ft. or four stories outside the "inner fire limits," and must not be used on buildings over 30 ft., two stories, in the "inner fire limits."

Ordinary roofing may be used on any building outside the "inner fire limits" not over two stories. Shingle roofs are prohibited on all buildings except dwellings and duplex residences not over two stories, and cannot be used in "inner fire limits."

Provision is made for condemning leaky and faulty roofs and requiring owners to repair same in 48 hours after written notice.

Permits and Licenses

Permits issued under the ordinance are good for 30 days only after issuance and may be obtained only by licensed bonded roofing contractors, except that an owner may secure a permit to "permanently apply or repair a roof covering on his own home in which he personally resides." Any person may make temporary emergency repairs during inclement weather.

Every person, firm or corporation engaged in the roofing contracting business must obtain a license from the city license department at a fee of \$5 per year and must furnish a corporate surety bond of \$3000 payable to the city of San Diego, or a personal bond for the same amount with two approved sureties. This bond shall inure to the benefit of the city of San Diego and to and for the benefit of all persons who may suffer damage by reason of the breach of any of the conditions thereof, any person so damaged may bring suit under said bond in his own name. Violation of the ordinance

is a misdemeanor punishable by a fine of \$10 to \$500 or 10 days to 6 months in jail, or both. This penalty clause applies to owner, builder, roofer, worker or other person failing to comply with the provisions of the ordinance or any order made thereunder. No person shall occupy or use in any manner any building roofed or repaired in violation of the provisions of the ordinance.

—(S. W. Builder and Contractor).

PACIFIC COAST STEEL TO BUILD AT SOUTH SAN FRANCISCO

Immediate construction of a bolt and nut plant in South San Francisco at a cost of \$600,000 has been authorized by the Pacific Coast Steel Company. The plant will be erected adjacent to the company's steel plant. It will be of steel construction, 450 feet in length with a depth of 100 feet. A portion of the building will be three stories in height. A machine shop and electric tool heating department, 150 feet by 80 feet will be provided.

Construction of the plant and its operation will be directed by John Stetter, recognized authority on such manufacturing. He sold recently the Muncie Cap and Set Screw Company, of which he was owner and managing operator, and his services were immediately obtained by the Pacific Coast Steel Company which had been casting about for someone to take charge of its new enterprise. Stetter was connected in a consulting capacity with the Southern California Iron and Steel Company, an affiliated concern of the Pacific Coast Steel, during an expansion program there.

In the new plant steel manufactured in South San Francisco will be used for the output of the bolt, nut and rivet plant, which will be equipped with the most modern machinery.

CONSUMERS ROCK AND GRAVEL COMPANY ORGANIZED

Consumers Rock and Gravel Company and California Materials, Inc., are joining hands through the organization of Consumers Rock and Gravel Company, Inc.

The unified business materially strengthens the already entrenched position occupied by its constituents in the Southern California field covering the counties of Santa Barbara, Ventura, Los Angeles, Riverside, San Bernardino, Orange and Imperial, with a population of 2,000,000 included in the territory served.

Fully 30 per cent of the rock, gravel and sand requirements of this area are supplied by the company, it is estimated, from its nine rock-crushing plants, which have a combined capacity in excess of 21,000 tons of material per 10-hour day. Its bunkers are advantageously located in Hollywood, Vernon, Whittier and Santa Barbara, in addition to those operated in connection with the various plants. Another bunker is under construction at Long Beach. A fleet of 150 heavy-duty trucks owned and operated by the company, together with trackage facilities on the Southern Pacific and Pacific Electric lines, take care of the transportation needs.

Conservative estimates indicate that fully 50 years' supply of raw material is contained in the reserves in the 1400 acres of producing lands held by the company, about a quarter of which are owned in fee. Its holdings include a tract of more than 14 acres in the heart of the Los Angeles industrial district.

The company is reputed to be in an enviable position from an earnings standpoint.

A structure well built withstands the ravages of time. One poorly constructed deteriorates rapidly. This same principle can be applied in a money sense to investing and spending wisely. Enduring fortunes are built upon solid foundations and not on flimsy scaffolds of speculation.—Exchange.

ENGINEERING SOCIETIES EMPLOYMENT SERVICE

Further information regarding positions listed in this column is obtainable from Newton D. Cook, Room 715, 57 Post Street, San Francisco, (Phone Sutter 1684).

R-1428-S INDUSTRIAL ENGINEER, not over 35, with experience involving labor problems and rate setting for employment with consulting engineer. Must have organizing ability, initiative, tact and energy. Apply by letter, giving experience in detail, education and general qualifications, with photo. Salary open. Permanent. Location, Pacific Coast.

R-1724-S ENGINEER, mechanical or civil, about 30 years old, with steel construction experience and preferably some knowledge of steel plate work. Will start in the drafting room and later be assigned to estimating, sales or productions. Salary open. Headquarters, San Francisco.

R-1727-S STRUCTURAL DESIGNER, and steel detailer, with experience on highway bridges for temporary position in government office. Salary about \$250-\$275 month. Location, Montana.

X-5152 SECRETARY TO MANUFACTURING ASSOCIATION, must be able to organize, etc. Only those who have held a similar position will be considered. Apply by letter. Salary \$6000 a year. Location, East.

X-5083 CONSTRUCTION FOREMAN, for transmission line. Must speak Spanish. Salary \$300 a month. Hdqtrs., New York Cit. Location, South America.

EMBRITTELEMENT OF BOILER PLATE IS SUBJECT OF BULLETIN

With the modern operation of steam boilers at high ratings and increased pressures there has come into use a type of boiler which has been under suspicion for some time as the possible cause for embrittlement and cracking of the plates. The evident increase in the number of cases of such embrittlement emphasized the need of making a further study of the problem beyond that covered in Bulletin No. 94 of Engineering Experiment Station of the University of Illinois, published in 1917. In 1924, therefore, the investigation was resumed and the results of the first eighteen months' study were published in Bulletin No. 155.

Bulletin No. 177, just published, contains a record of the data secured since the publication of Bulletin No. 155, as well as a resume of the entire three years' work on embrittlement. The work performed in connection with this investigation consisted of the collection of information concerning failures, apparently due to embrittlement, from boiler manufacturers, boiler users, and the steam boiler insurance companies; and conducting tests either in the laboratory or at plants where embrittlement of boilers had occurred.

Some of the results obtained were as follows: In the cases of embrittlement investigated neither the design nor the workmanship of the boilers was responsible for the trouble; no fault could be found with the material of the boiler plate; apart from the nature of the feed water used the operation of the boilers was satisfactory; an alkaline condition of the boiler water, with a low sulphate content, was found in all cases of embrittled boilers; the only material found in these boilers which has been shown to have the effect of embrittling stressed steel was sodium hydroxide; increasing the sulphate content was found to be effective in stopping or inhibiting embrittlement; and new embrittlement inhibiting agents were developed.

Copies of Bulletin No. 177 may be obtained without charge by addressing the Engineering Experiment Station, Urbana, Illinois.

PATENTS

Granted to Californians as reported by Munn & Co., Patent Attorneys

Andrew Lochhead, of Oakland. DOOR SECURER. This device is so compact that it may be carried in the pocket and may be readily inserted between the edge of the door and the door-jamb.

Edward C. Shafer, of Santa Monica. TABLE. This table is positioned astride the limbs or body of a person sitting or reclining on a bed or couch and may be used as a support or carrier for trays.

George F. Nelson, of Berkeley. PUMP. A vacuum blast or pressure pump especially designed for laboratory purposes, producing a high vacuum without the employment of "backing-up" pumps.

Aladar Hollander, of Berkeley. VERTICAL-PUMP MECHANISM. This device sectionalizes the driving shaft so that when the column parts are telescoped, a section of the driving shaft may be removed to facilitate access to and the handling of the parts herebelow. Patent assigned to Byron Jackson Pump Mfg. Co.

Claude H. Kelper, of Oakland. WIRE-THREADING LEADER AND COUPLER. A device for the removable attachment of wires or cables thereto and which serves as a coupling between a leading and a following wire or cable section.

Arthur Engelberg, of Oakland. TELEPHONE-CALL RECORDER. Duplicates messages may be automatically recorded by mechanisms upon the sending of a message between stations.

Leroy V. Crow, of Cloverdale. VALVE. This device provides a valve body for medical irrigation apparatus, which when used for certain purposes will be operated by muscular reaction of the patient to automatically control the valve operation thereof.

John L. Davie, of Oakland. FIRE-PLACE. This invention prevents filling the room with smoke and also an excess of air being drawn from the room and carried up a chimney, thereby wasting the heat in the room.

Charles V. North, of San Gabriel. ROTARY JAR. With this jar water may be carried to the tool at the bottom of the well. The construction enables it to effectively resist the blows in jarring and impart the rotary movement from the rotary device at the mouth of the well to the tool at the bottom.

NEW YORK PLANNING CHANGES IN BUILDING CODE

There is now pending before the Board of Aldermen an amendment to the building code of the city of New York which, according to builders and engineers, will affect a saving of millions of dollars a year in the cost of local construction if adopted.

The proposed amendment relates to the structure steel used in the construction of all large buildings. The code now provides that the basic working stresses permissible in the use of structural steel for building, shall be 16,000 pounds per square inch.

It is proposed to increase the basic working stresses to 18,000 pounds, thereby decreasing by about one-eighth the amount of steel necessary for the erection of a modern building.

Comprehensive evidence has been collected by the Merchant's Association of New York that such a saving can be made while continuing to maintain an ample margin of safety, and after a careful study of the matter the association has approved the proposed amendment.

THE OBSERVER

What He Hears and Sees On His Rounds

The growing practice of arbitrary discharge of workers when they reach a certain age, no matter what their skill and their value to the industry, is unsocial and, from an economic standpoint, unsound according to an article by the Secretary of Labor in the June issue of the Monthly Labor Review. The age limit beyond which a worker may not retain his employment is set in some plants at 50 and in other cases the limit is even lower. While there might have been some reason for this practice in former years when many occupations required great physical strength, with the present mechanization of industry and the consequent lightening of the physical tasks there seems to be no justification for the arbitrary discharge of workers at an age when through their acquired skill and experience they should be of most value to their employer. "With the infinite number of industrial operations coming to be done by machinery ever more automatic and easier for human hands to run," Secretary Davis said, "the reasons for firing the older workers fade to almost nothing. Where machines do so much and the worker so little, the worker of 60 becomes as able as the one of 20, with the added value of a tendency to stick to the job."

Trade associations were described as effective stabilizing agencies in business in an address last month by Abram F. Myers, member of the Federal Trade Commission, before the Interstate Cotton Seed Crushers Association at New Orleans. Industries possessing strong trade associations, said Commissioner Myers, are "equipped for self-regulation in a degree which, if wisely directed, will effectively preclude governmental interference by rendering it unnecessary."

Manufacturers, distributors and organized users of forms for concrete ribbed floor construction, are being circularized by the Division of Simplified Practice for written acceptance of the recommendation covering forms for Concrete Ribbed Floor Construction, approved by a general conference held March 21, at Biolli, Miss. Manufacturers, distributors and users representing at least 80 per cent of the total volume of annual production must have accepted this recommendation in writing before it will be published by the Department of Commerce. The recommendation thereafter will be periodically reviewed by a standing committee of the industry for possible revision, or reaffirmation.

Claiming assets of \$133,900 and liabilities of \$133,724 the A. Haidlen Company, contractors working in the Mount Shasta district, has filed a petition in bankruptcy in Federal Court at San Francisco. The firm lists 90 creditors, including three San Francisco firms. Adolph Haidlen and Fred Fracaro are heads of the company.

E. A. Rolison, consulting engineer, and former city manager of Redding and of Santa Barbara, has been employed by the Stockton city council to survey the Stockton power situation preliminary to asking the state railroad commission for permission to enter the field of municipal ownership. Rolison assisted in putting municipal power into operation in Redding, Napa and other cities. He is now handling situations similar to Stockton's for several cities, including Hayward and San Leandro.

A central "tenement property agency" is to be established in the offices of the Amoskeag Manufacturing Company, Manchester, N. Y. It is to be not only for the benefit of employees seeking tenements, but is to be placed at the disposal of the public. This move is intended to help the 11,000 Amoskeag operatives to secure proper living quarters at the lowest possible cost.

The rate of wages in the building trades as a whole in the United States increased from \$1.278 an hour in May, 1926, to \$1.323 in May, 1927. Bricklayers went from an average of \$1.565 to \$1.603, carpenters from \$1.267 to \$1.311, painters from \$1.305 to \$1.349, plasterers from \$1.5895 to \$1.628, and plumbers from \$1.381 to \$1.409. These figures are taken from Bulletin 457, published by the Bureau of Labor Statistics of the United States Department of Labor, and recently off the press. The bulletin includes reports from 862,308 trade union members employed at time rates in sixty-six leading cities.

With a view to promoting service and maintaining constant public relations, the Plumbing and Heating Industries Bureau has established San Francisco offices in the Sharon Building at 55 New Montgomery St. This branch is in charge of John C. Keene, who will control the work of the bureau for the entire West Coast. Besides the San Francisco office there are branches at Tacoma, Wash., and Los Angeles. Keene is now conducting a campaign with the slogan "Make a health examination of your home." The present offices will continue the work formally done by the California Sanitation Development League, which in March of this year was merged with the Plumbing and Heating Industries Bureau.

Formation of a general State committee of experts to aid county governments in drawing up model plans for hospitals, detention homes and jails is proposed by Mrs. Anna L. Saylor, State director of social welfare. The State, through such an arrangement, can and should assist county authorities in providing public institutions which will assure proper care, social welfare and safety of inmates, Mrs. Saylor contends. The proposed general advisory committee, she says, will include architects, sheriffs, judges, engineers, and physicians.

An investigation by the Bureau of Labor Statistics of the extent to which apprenticeship is a factor in the building industry shows that while apprenticeship by formal indenture between employer and boy is not widely practiced, practically the same end is achieved in a number of cities through joint apprentice committees composed of employers and workers cooperating with local school boards under the Smith-Hughes Vocational Education Act. The bureau study covered 19 representative cities in which 12,190 trainees were actually indentured or under some form of contractual obligation to learn one of the building crafts.

Alameda County Supervisors have officially approved franchise granted to Breed Realty Co., et al, for a toll tunnel through the Contra Costa hills from Shepherd's Canyon in Alameda county to Redwood Canyon in Contra Costa county. The bore will be 2410 feet long and will cost \$1,500,000.

Contractors who are in favor of license laws for the construction business will be interested in the results of a similar law in a kindred field. The National Association of Real Estate Boards, from reports of officials administering their license laws, report that over \$2,261,910.32 has been refunded to victims of unscrupulous real estate agents through the operation of the real estate license laws in the twelve states which have kept records of such refunds since the laws were into effect.

A deposit of limestone said to be 98.99 per cent pure calcium carbonate has been discovered in Bautiste Canyon, ninety miles from Hemet, Riverside county. Geologists reported 10,000,000 tons of limestone are available and it is believed that the deposit will have a commercial value.

A recent survey of privately owned timber lands revealed the fact that more than 21,000,000 acres, mostly owned by large lumber and paper companies, were being managed with a view to reforestation.

Marin county supervisors have passed a ruling against accepting personal bonds in future and will accept only cashiers' checks or certified checks for bidders for faithful performance of contracts to be undertaken by them.

Earthquake movements in California earthquake regions will soon be accurately measured. A surveying party engaged in measuring Mt. Whitney has passed the 10,360-foot level, according to the Coast and Geodetic Survey, and will reach the summit next month. Metal tablets set in rock at frequent intervals along the line of levels, giving the elevation, will now furnish a basis for detecting the direction and amount of change in elevation in case of earthquakes in that region. The present leveling is part of a five-year Coast and Geodetic Survey study of California earthquake regions.

Three turbines claimed to be the largest yet installed in Europe will be placed in the new plant of Ryburg-Schorstedt on the Rhein, Switzerland. These are Kaplan turbines with an effective power transformation of 1,000 h. p. for each meter fall of the water. It is said that the largest turbines heretofore installed were in Sweden in the Lilla Edet plant, each of which produces 676 h. p. for every meter fall of the water.

Three large waterway projects are under construction at the present time in Germany. The first is the Rhine-Danube canal, three-quarters of which is completed and open to traffic. The second is the so-called Midland Canal joining the Rhenanian-Westfalian industrial district with central Germany; it is predicted this canal will be completely in service in two years. The third is the Hansakanal, from the Ruhr to Hamburg, which is expected to be completed in about eight years.

All the activities of the West Coast Lumbermen's Association are to be centered at Seattle. Col. W. B. Greeley, the new manager, has proposed a budget of \$700,000 a year for the association, subject to ratification by supporting lumber, logging and allied woodworking companies, half of which would be expended to promote trade and developing markets.

ALONG THE LINE

William Rutherrord Mead, New York architect and president of the American Academy in Rome, died in Paris, June 20.

Extension of the harbor breakwater and the port facilities of Los Angeles has been approved by the city council. The cost of the improvement is estimated at \$18,000,000, part of which will be paid by the federal government. The plan calls for consolidating railroad facilities and unification with Long Beach harbor for operating purposes.

Francis Bates, of Los Angeles, announces association with his brother, Bennett R. Bates, in the formation of Bates Company, engineers, to carry on the practice of consulting and general engineering, with office in Los Angeles. The company will specialize, among other things, in city planning and traffic studies, storm drains, sub-division development, grade separations, sanitation and water treatment.

O. H. Buckman, county surveyor of Napa County, died at Napa June 19 as the result of a heart attack. He was 81 years of age and was said to be the oldest county official in point of service in the state.

Public Ownership League of America will meet in Seattle, Wash., July 23-26 inclusive. The cities of Seattle and Tacoma are co-operating to make it a joint affair and will include one day inspecting the Skagit River project and one day at the Lake Cushman project. Headquarters will be maintained at the Frye Hotel, Seattle.

Colonel Jno. H. Skeggs, district engineer at San Francisco, for the California State Highway Commission, was recently honored by being elected a national director of the Society of American Military Engineers, for the three-year term beginning January 16, 1928.

San Diego city council has reappointed H. N. Savage as hydraulic engineer of the city to take full charge of its water supply problems. Mr. Savage while in the employ of the city built the Lower Otay dam and Barret dam, repaired the Sweetwater dam and raised the Morena dam. He is at present in London, but has consented to return to his old position at a salary of \$10,000 a year, the city council was informed.

Fifty members of the Society of Safety Engineers of Northern California inspected the plant of the Columbia Steel Corporation at Pittsburgh, Contra Costa County, June 26, as guests of the company's safety committee. A banquet was held in the evening with Y. L. Harvill, an official of the plant, presiding.

Carl Kingsley Lawrence, 5321 Lawton Ave., Oakland, has been granted a certificate to practice architecture in California by the State Board of Architecture, Northern District.

Chas. H. Miller of Vallejo has purchased the Perry Lumber Company at Maline and Sonoma Sts., Vallejo, for a price said to be in the neighborhood of \$25,000.

Two steel companies in Czecho-slovakia are beginning the construction of large steel sheet mills in North Moravia, these mills to utilize the continuous process for rolling sheets and strips, which has recently been developed in the United States.

TRADE NOTES

Milo S. Farwell, formerly sales engineer for the Steelform Contracting Company, has joined the engineering staff of the Bethlehem Steel Company and will be engaged in the promotion of Bethlehem structural steel in the San Francisco Bay territory.

Gladding, McBean & Co., will retire all outstanding funded debt July 1 and on that date also will be entirely free of indebtedness including bank loans leaving only common stock outstanding, it is learned by Dow Jones & Co. Company's business is reported to be best in its history, and earnings stated to be twice dividend requirements on 207,689 shares no par common out of total authorized of 500,000 shares—dividend requirements and \$3 annually, payable 25 cents first day of each month. While company does not make public detailed income account, earnings last year were said to be around \$6 per share. The company is one of the largest manufacturers of terra cotta products, roof tile, pottery and brick in the West. While the stock is not listed, it is rated highly in conservative investment circles and officers and directors include leading bankers and financiers of the West.

An additional issue of 5000 shares of first preferred stock is indicated by a permit granted by the State Corporation Department to the Riverside Cement Company, which concern recently took over the old established Riverside Portland Cement Company. Under authority of this permit, the company is permitted to sell to Blyth Witter & Co. 5000 shares of its first preferred, and in addition to issue to John Treanor 104,990 shares of its class A stock. Statement of the company filed as of May 1, 1928, gives assets at \$12,106,342, of which \$3,078,831 are current, against liabilities of \$1,452,645.

Directors of the Pacific Portland Cement Company on June 22 declared the regular \$1.62½ second quarter dividend on the company's stock. The dividend is payable July 5 to stockholders of record June 30.

Johnson and Raymond Pottery Co., a closed corporation, capitalized at \$100,000 and controlled by Dan Raymond, of San Jose, and Fred P. Johnson, of Los Angeles, will establish a plant in Stockton, on a site yet to be selected, for the manufacture of garden and ornamental pottery, household stoneware and acid-proof wares for chemical laboratories. It will be the only plant on the Pacific Coast turning out the latter product.

H. P. Usher, president of Smith Booth Usher Co., Los Angeles, in an announcement states that "Effective May 1, 1928, Jenison Machinery Co. of San Francisco acquire the good will, stocks of machinery and equipment of our San Francisco division, operating in Northern California." In 1925 Mr. E. S. Jenison became vice-president in charge of San Francisco division. Officers of the Jenison Machinery Co. are: E. S. Jenison, president; T. F. Pimper, vice-president; H. L. Davis, secretary; H. J. Schiefer, treasurer.

F. P. Baugh, who recently sold his interest in the F. P. Baugh Hardwood Co. to Pacific Southwest Hardwood Co., Los Angeles, is now interested in Rock Creek Lodge, a mountain resort in Inyo county. L. P. Black, formerly with Mr. Baugh in the hardwood business, is manager of the resort.

HERE — THERE —
EVERYWHERE

E. H. Higgins was re-elected president of the Richmond Builders' Exchange at the annual banquet-meeting held June 21. Other officers, re-elected were: F. A. Mero, first vice-president; J. L. Eakle, second vice president; James Walker, treasurer, and Carl Overaa, secretary of the board. These together with P. M. Sanford and Andrew Nelson, comprise the board of directors.

George F. Schlesinger, director of highways of the State of Ohio, has resigned his position, effective June 15, to become chief engineer and managing director of the National Paving Brick Manufacturers Association. The headquarters of the latter association, which are now in Chicago, will be moved to Washington, D. C.

New Orleans was chosen as the scene of the Seventh annual Asphalt Paving Conference at a recent meeting of the board of directors held in Chicago. It is estimated that from 1000 to 1500 interested persons will be present at the conference, which will take place the week of December 10. The American Association of Asphalt Paving Technologists and the Asphalt Association, as well as other organizations, will hold their annual meetings in connection with the conference.

Preparations are being made by the Master Painters' Association of Seattle, for entertainment of visitors at the third annual convention to be held in that city Nov. 15-17. Consideration is being given to affiliation of the Victoria and Vancouver, B. C., painting contractors with the Seattle organization.

Carpenters' Union of Mill Valley, Marin county, has unanimously endorsed the five-day week and will put the plan into effect at once. It is hoped to more evenly divide the work and reduce unemployment among the carpenters in that section.

Peninsula Master Painters' and Decorators' Association, meeting in Palo Alto, June 26, elected the following officers: President, M. M. Sorrells; first vice-president, Otto Herbig; second vice-president, A. Jensen; secretary-treasurer, Eugene F. Pfafflin; sergeant-at-arms, — Sivertsen. Installation ceremonies will be held at a banquet July 9 in Redwood City.

During the month of May 825 men were placed by the Free Employment Bureau of the East Bay Industrial Association, according to L. E. Crawford, secretary. The May placements are a gain of ten per cent over April but a slight decrease under May 1927. The association also reports thirty-one new industries located in the East Bay district during the sixty day period ending April 30, an increase of 46 per cent over the corresponding period of 1927.

At the annual meeting of the Schumacher Wall Board Co., in Los Angeles, R. H. Shainwall was elected director and president, succeeding R. S. Shainwall, resigned. All other directors and officers were re-elected.

A. M. Hardy, San Francisco contractor, has filed a voluntary petition in bankruptcy in the U. S. District Court at San Francisco, scheduling liabilities at \$23,199 and assets at \$200.

CONSTRUCTION COSTS CONTINUE TO RETAIN STABILITY, A. G. C. SURVEY SHOWS

Construction costs continue to retain the stability they have possessed since the opening of this year, according to statistics just compiled by the Associated General Contractors of America. No change in the average of these costs was indicated during May.

A single level has been held since March, with only one change being noted since November. This condition stands contrasted against the records for corresponding periods during the majority of recent years.

Comparative figures, showing the number of fluctuations during the first five months of each year since 1920, follow: 1921, four; 1922, four; 1923, four; 1924, three; 1925, one; 1926, four; 1927, three.

The average of construction costs for the first five months of the current year is slightly below the average for the corresponding period of 1927, when a mark exactly twice as high as that registered for the year 1913 was recorded.

The average of wages paid in the principal construction centers of the country has remained unchanged since December. A scale which places the 1913 average of wages at 100 as its basis, shows the index figure for each month of the present year to be 226.

The prices of basic construction materials now are showing much less inclination to rise or fall than in preceding years. Only one change in the average of these prices has occurred since January.

CONSTRUCTION COSTS

MINERALOGIST ROOT REPORTS ON CALIFORNIA'S CLAY RESOURCES

One of California's very important and growing nonmetallic industries is that involving the development and use of her clay resources. Ceramic plants are being established in increasing numbers, existing plants are being enlarged, and a wide variety of products is being put on the market. Our natural deposits of clays in this state form the basis upon which these industries are founded.

The search for high-grade clays on the Pacific coast has received new impetus in recent years on account of the phenomenal increase in population in the region and the consequent increased demand for structural and decorative clay products. There seems little doubt that this is but the beginning of one of the greatest periods of expansion that the world has seen. If this view of the future is correct, California is destined to become one of the great ceramic centers of the United States. That new clay deposits will be discovered is almost a foregone conclusion. Thus far, only the obvious deposits have been found, and only those that can be cheaply mined and that can be used without beneficiation have been exploited. Prospectors and local residents away from existing clay producing regions are on the whole not familiar with the nature of clays, but their knowledge will improve by contact with trained men who are on the lookout for new discoveries. With the increasing demand for new types of clays, either to displace those varieties now being imported from outside of the state, or to make improved products, the incentive

to clay prospecting will be entirely adequate.

The State Division of Mines and Mining under the direction of Lloyd L. Root, State Mineralogist, has published a report on the "Clay Resources and Ceramic Industry of California," entitled Bulletin No. 99 of the division's series. The scope of the report is confined to a study of the raw materials and manufacturing practice including a brief technical description of most of the clay-working plants and known clay deposits in California, together with the results of laboratory tests of the important clays of the state. The principal emphasis in the present report is upon the economic and technologic phases of the clay-working industry of California, rather than upon its geologic aspects. The author is Waldemar Fenn Dietrich, associate professor of mining engineering at Stanford University, and the report is the result of over two years' field and laboratory investigations, the latter having been handled in the university's laboratory on a co-operative basis with the State Division of Mines and Mining.

Bulletin No. 99, consisting of 283 pages, and illustrated with seventy photographic half-tones and twelve line cuts including maps, may be had at \$1.50 per copy, postpaid, from the State Division of Mines and Mining, Ferry Bldg., San Francisco, or from any of the following district offices: Sacramento, (Capitol Extension Bldg.), Los Angeles, (New Orpheum Bldg.), Redding, Bakersfield, Taft, Coalinga, Santa Maria, Santa Paula.

INSPECTION PROVISION FOR LUMBER PROPOSED

The opinion of the heads of all departments and establishments of the Federal government who purchase lumber in carload lots or more, as to the advisability of including in every government contract involving lumber purchases a clause requiring a certificate of inspection by lumber association inspectors to ascertain the quality, is asked by the Chief Coordinator, Brig. Gen. H. C. Smith, in a letter made public June 20. The letter reads in full text:

The following proposal was submitted to the Federal Purchasing Board at its meeting of April 28, 1928, by the reinspection of lumber by licensed of Commerce: "That a clause be added to every Government contract involving lumber purchases, to the effect that a bid should include necessary standard charges for the reinspection of lumber by licensed lumber association inspectors in case of any doubt in regard to quality."

The proposal was referred by the Board to its committee on operations for study and report and, at the meeting on May 31, 1928, the committee's recommendation was adopted by the Board, to the following effect:

"The committee sees no objection to the inclusion of a clause requiring a certificate of inspection by lumber association inspectors in contracts for carloads and over of lumber when in the opinion of the head of the department concerned such inspection is legal and the most efficient available method of protecting the interests of the Government."

In view of the recommendation, it is requested that each department or establishment, making purchases of lumber in the quantities stated, advise this office of its opinion as to the feasibility and desirability of including the proposed clause in its contracts for lumber.

STEEL MEN VOTE TO BACK PROGRESSIVE MEASURES

At a meeting of representatives of the iron and steel industry of California with the iron and steel executive committee of the California Development Association at the Alexandria Hotel in Los Angeles, presided over by Waller Taylor, vice-president and general manager for the advancement of industries were endorsed. These include the standardization of production in the iron and steel factories, and gradual elimination of unprofitable lines; extension of marketing territory by obtaining more favorable railroad rates to eastern points; closer contact with purchasing agents, architects, engineers, contractors and municipalities to impress upon them the importance of buying local products; adoption of standard specifications in connection with purchases for all branches of the State Department of Public Works, and the establishment of a State laboratory for testing building materials in Southern California.

Six of the leading groups of the Southern California Iron, Steel and Allied Industries held separate meetings in charge of the following chairmen: Steel mills, Harvey Hewitt, Southern California Iron and Steel Company; structural shops, E. F. Gohl, McClintic-Marshall Company; reinforcing steel dealers, N. E. Dawson, Soule Steel Company; merchants' steel dealers, J. E. Webster, Ducommun Corporation; foundries, C. H. Shattuck, C. F. Braun & Co.

ONLY JAP ARCHITECT

The building which will house the Japanese exhibit at the Pacific Southwest Exposition which will be held in Long Beach, California, from July 27 to September 3, was designed by R. K. Tsakamoto, said to be the only Japanese architect practicing his profession in the United States.

MERCED, Merced Co., Cal.—L. J. C. Wegner, Merced, at \$3000 awarded contract by Merced County Growers, Inc., to erect assembling and packing shed on Graham Ice plant property.

PORTLAND, Ore.—Gilpin Construction Co., Worcester Bldg., Portland, at approx. \$100,000 awarded contract to remodel old Portland Flouring Mill property adjoining Swan Island for Union Pacific Company. Will have capacity of 500,000 bushels of bulk grain and 600,000 bushels in sacks. Plans prepared by Engineering Department of owners.

Contract Awarded
PACKING PLANT Cost, \$30,000
SAN JOSE, Santa Clara Co., Cal. Montecrey Road.
Frame and galvanized iron fruit packing plant.
Owner—Bisciglia Bros., Monterey Road, San Jose.
Architect—Herman Krause, Bank of San Jose Bldg., San Jose.
Contractor—Henry Bolvin, 1041 Garland Ave., San Jose.

STOCKTON, San Joaquin Co., Cal.—Johnson and Raymond Pottery Co., a closed corporation capitalized at \$100,000 and controlled by Dan Raymond of San Jose and Fred P. Johnson of Los Angeles, are looking over sites on which to erect a plant for the manufacture of garden and ornamental pottery, household stoneware and acid proof wares for chemical laboratories. The announcement is made by G. L. Fox, industrial engineer of the Stockton Chamber of Commerce.

Preliminary Plans Being Prepared
MILL BLDG. Cost, \$100,000
SAN FRANCISCO. South of Market District.
Four-story and basement mill construction industrial building.
Owner—Withheld.
Architect—Irvine & Ebbets, Call Bldg.
Further information will be given in about a week.

Award
PLANT Cost, \$40,000
(including equipment)
OAKLAND, Alameda Co., Cal. E 29th Ave. and S. P. right-of-way.
Two-story reinforced concrete plant.
Owner—California Packing Corp. 101 California St., San Francisco.
Engineer—Phillip Bush, 101 California St., San Francisco.
Contractor—Henry J. Christensen, Ray Bldg., Oakland.

Planned.
NEW PLANT Cost, \$500,000
EMERYVILLE, Alameda Co., Cal.
New plant.
Owner—Western Electric Co., 680 Folsom St., San Francisco.
Architect—Eng. Dept. of Owner.
Further details later.

SAN PEDRO, Los Angeles Co., Cal.—William P. Neil Co., Inc., 4814 Loma Vista St., Los Angeles, has been awarded the general contract at \$150,000 for the erection of a one-story reinforced concrete cotton warehouse at Berth 56, Los Angeles outer harbor, San Pedro, for the Los Angeles Compress & Warehouse Co., Cotton Exchange Bldg., Los Angeles. The building will be one-story, 13 ft. high, 220x750 ft., reinforced concrete walls, wood roof construction, building designed for one additional story which will be of mill construction. The entire building completed will cost \$225,000. Other contracts awarded were: Sprinkler system to the Automatic Sprinkler Corp., 610 S. Broadway, Los Angeles; 100,000-gallon steel tank to the Chicago Bridge & Iron Works, Chicago. The contract for the asphaltic concrete floor was awarded to the Griffith Co. last year. Work will be started at once. The compress building and a large power plant were erected last year on this site. Robert J. Cummins, 543 Cotton Exchange Bldg., Los Angeles, engineer.

VANCOUVER, Wash.—Union Bag and Paper Co., Woolworth Bldg., New York, N. Y., has bids under advisement and will shortly award contracts in connection with a \$200,000 plant. Construction will be of brick, steel and concrete.

WATSONVILLE, Santa Cruz Co., Cal.—A. L. Short, Santa Cruz Road, Watsonville, at approx. \$15,000 has contract to erect peeling building and work rooms adjoining present packing plant, recently purchased by Charley Chin Goon; concrete construction.

Plumbing and Electric Work—Scott Plumbing & Electric Co., 1900 M St. Sacramento, \$1425.

A complete list of bids available from this office today. Contracts are to be awarded to low bidders.

NOTE:—This "advice to fathers" appeared in these columns before, but some of them (fathers not these columns) are so dumb that Sandy is reprinting the story.

IN THIS age.

OF WOMAN'S equality.

WITH THE men folks.

SANDY PRATT, producer.

OF CLEAN, sharp sand.

HARD, CRUSHED rock.

AND WASHED gravel.

DESIRES TO tell father.

"HOW TO care.

FOR THE baby."

WHILE MOTHER attends clubs.

AND EVERYTHING.

FIRST, NEVER feed goat's milk.

TO THE baby.

IF YOUR darling.

IS A girl.

IT MIGHT.

WHEN SHE grows up.

MAKE HER a "social climber."

IF FATHER bathes the child.

AND BABY turns blue.

THEN THE water.

IS TOO cold.

ADD STEAM, not ice.

IF YOUR offspring.

TURNS RED or scarlet.

THE WATER is too hot.

ADD COLD water immediately.

IF MOTHER is detained.

AT THE club.

AND IT is necessary.

TO CHANGE baby's clothing.

THAT IS buttoned on.

WITH SAFETY pins.

FATHER CAN tell.

IF THE safety pins.

ARE FASTENED to the flesh.

FOR BABY will immediately cry.

NOW, SOME of Sandy's readers.

MAY WONDER why.

SANDY PRINTS this stuff.

BUT HOW many fathers.

COULD WALK into a hospital.

AND PASS an examination.

FOR A trained nurse.

AND NOW that the ladies.

ARE SERVING as mayors.

GOVERNORS OF States.

IN CONGRESS and elsewhere.

SOMEONE MUST start.

TO TEACH men.

TO CARE for babies.

AND SANDY Pratt.

HAS THE "Sand."

TO START the movement.

SANDY OFFERS a million "rocks."

TO BUILD a college.

TO TEACH father.

TO CARE for the baby.

"I THANK you."

This picture explains, in a way, Sandy's above story. Mother was detained at the club, baby is crying and father is getting nervous. Why doesn't he give the baby a SANDWICH or a piece of ROCK-cod, produced by Sandy Pratt at Marysville, Prattrock (near Folsom), Sacramento, Prattco (Monterey County) and Mayhew (Sacramento County)—Central office—San Francisco.

SANTA BARBARA, Santa Barbara Co., Cal.—Following bids received June 22 of State Department of Public Works, Division of Architecture, Forum Bldg., Sacramento, for general work in connection with Home Economics Building for the Santa Barbara State Teachers' College. Official Proposals

STATE OF CALIFORNIA
DEPARTMENT OF PUBLIC WORKS
DIVISION OF HIGHWAYS
NOTICE TO CONTRACTORS

Sealed proposals will be received by the Department of Public Works, Division of Highways, at the office of the District Engineer, Room 212, Bank of Italy Bldg., Eureka, California, until 10:00 A. M., on July 5, 1928, at which time they will be publicly opened and read, for performing work as follows:

Constructing a portion of the State Highway approximately .2-mile in length, in Humboldt County, at the southerly approach to the North Scotia Bridge, near the Town of Scotia, road I-Hum-1-B, to be graded and surfaced.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the above address.

No bid will be received unless it is made on a proposal form furnished by the District Engineer. Each bid must be accompanied by cash, or a certified check made payable to the Director of Public Works, for an amount equal to ten (10) per cent of the amount bid, such guaranty to be forfeited should the bidder to whom the contract is awarded fail to enter into the contract.

The Department of Public Works reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

DEPARTMENT OF PUBLIC WORKS,
DIVISION OF HIGHWAYS,
C. H. PURCELL,
 State Highway Engineer.
 By I. G. THOMAS,
 Asst. District Engineer, Dist. 1.
 Dated: June 21, 1928.

June 22, 1928
STATE OF CALIFORNIA
DEPARTMENT OF PUBLIC WORKS
DIVISION OF HIGHWAYS
NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the State Highway Engineer, Highway Building, Sacramento, California, until 2 o'clock P. M. on July 18, 1928, at which time they will be publicly opened and read, for construction in accordance with the specifications therefor, to which special reference is made, of portions of State Highway, as follows:

Humboldt County, between Fortuna and Fernbridge (I-Hum-1-G), about two and one-tenth (2.1) miles in length; to be graded and surfaced with standard road surfacing composed gravel or stone.

Lassen and Modoc Counties, between Bieber and Adin (II-Las-Mod-28-B-A), about twelve and five-tenths (12.5) miles in length, to be graded and surfaced with screened gravel.

Placer and Nevada Counties, between Indian Springs and Soda Springs (III-Pla-Nev-37-A,F,B), about ten and six-tenths (10.6) miles in length, to be graded.

San Joaquin County, between Cherokee Station and Live Oak (X-SJ-4-C), about five and one-tenth (5.1) miles in length, the roadbed to be widened.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the said office, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, and at the office of the District Engineer of the district in which the work is situated. The District Engineers' offices are located at Eureka, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the District Office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors

are urged to investigate the location, character and quantity of work to be done, with a representative of the Division of Highways. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the District Office.

No bid will be received unless it is made on a blank form furnished by the State Highway Engineer. The special attention of prospective bidders is called to the "Proposal Requirements and Conditions" annexed to the blank form of proposal, for full direction as to bidding, etc.

The Department of Public Works reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

DEPARTMENT OF PUBLIC WORKS,
DIVISION OF HIGHWAYS,
C. H. PURCELL,
 State Highway Engineer.

STATE OF CALIFORNIA
DEPARTMENT OF PUBLIC WORKS

Deposit will be refunded only on submission of a regular bid and on return of the Drawings and Specifications in good condition.

No bids will be considered unless accompanied by a certified check or bid bond of an acceptable Surety Company in favor of the undersigned, equal to ten per cent of the bid to secure the execution of the contract by the successful bidder.

The right is reserved to reject any or all bids.
THE REGENTS OF THE UNIVERSITY OF CALIFORNIA.

ADVERTISEMENT FOR BIDS

Sealed bids will be received at the Office of the Comptroller, 220 California Hall, University of California, Berkeley, California, on or before 11:00 A. M., Friday, July 13, 1928, for the general construction of The Development of a Portion of the West Campus, University of California, Berkeley, California.

Drawings and Specifications may be obtained from Room 304 California Hall, upon a deposit of \$100.00 for each set of Drawings and Specifications. Deposit will be refunded only on submission of a regular bid and on return of the Drawings and Specifications in good condition.

No bids will be considered unless accompanied by a certified check or bid bond of an acceptable Surety Company in favor of the undersigned, equal to ten (10) per cent of the bid to secure the execution of the contract by the successful bidder.

The right is reserved to reject any or all bids.
THE REGENTS OF THE UNIVERSITY OF CALIFORNIA.

NOTICE TO CONTRACTORS

OFFICE OF THE CLERK OF THE BOARD OF SUPERVISORS, ALAMEDA COUNTY, CALIFORNIA.

Sealed bids will be received by the Clerk of the Board of Supervisors of Alameda County at his office until Monday, July 23, 1928, at 10:30 o'clock A. M., (the day when said bids will be opened and the contract awarded) for the erection and completion of lighting fixtures in the Veterans' Memorial Building at Berkeley, Alameda County, California.

Complete plans and specifications for said work are on file in the office of the County Clerk, in the Hall of Records Building, Oakland, California, where copies may be obtained by depositing with the County Clerk the sum of Twenty-five (\$25.00) Dollars. Contractors will be restricted as to the length of time they may retain these plans and specifications to fifteen (15) days.

Contractors failing to return said plans and specifications within said time limit will forfeit their deposit. The entire amount of the deposit will be returned to contractor returning plans and specifications in good condition within said time limit.

Each bid must be accompanied by a check for at least ten per cent of the amount of the bid or proposal, certified to by some responsible bank, and made payable to Geo. E. Gross, Clerk of the Board, to be forfeited to the County of Alameda as agreed and liquidated damages should the party or parties to whom the contract shall be awarded fail to enter into the contract after the award or to give the bond required by the Board for the faithful performance of the contract.

The Board of Supervisors reserves the right to reject any and all bids.

GEO. E. GROSS,
 County Clerk and Ex-Officio Clerk of the Board of Supervisors.
 Dated: June 25, 1928.

ADVERTISEMENT FOR BIDS

Sealed bids will be received at the Office of the Comptroller, 220 California Hall, University of California, Berkeley, California, at or before 11:00 A. M., Wednesday, July 11, 1928, for the construction of Poultry Buildings, Yards and Fences for the University of California in Strawberry Canyon, Oakland, California.

Drawings and Specifications may be obtained from Room 304 California Hall, upon a deposit of \$25.00 for each set of Drawings and Specifications. Deposit will be refunded only on submission of a regular bid and on return of the Drawings and Specifications in good condition.

No bids will be considered unless accompanied by a certified check or bid bond of an acceptable Surety Company in favor of the undersigned, equal to ten per cent of the bid to secure the execution of the contract by the successful bidder.

The right is reserved to reject any of all bids.

THE REGENTS OF THE UNIVERSITY OF CALIFORNIA.

NOTICE TO CONTRACTORS

(68 Miles Lateral Canals—West Stanislaus Irrigation District)

Sealed proposals will be received by the Directors of the West Stanislaus Irrigation District, at their office in Westley, Stanislaus County, California, up to three o'clock P. M. (3:00 P. M.) July 14th, 1928, and will at that time be publicly opened, for the construction of approximately sixty-eight (68) miles of lateral canals, in accordance with the contract, plans and specifications thereon.

CONTRACT NO. 6.—Construct Lateral Canals including approximately 400,000 cubic yards of earth excavation and 100,000 station yards of haul.

All proposals must be accompanied by a certified check for at least five (5) per cent of the amount of the bid submitted, in favor of the West Stanislaus Irrigation District.

All certified checks accompanying rejected bids will be returned.

Certified check of successful bidder will be returned when the contract has been executed and the required bonds furnished.

In case of failure to execute contract or furnish the required bonds within the stipulated time, the certified check and the proceeds thereof, will become and remain the property of the West Stanislaus Irrigation District.

Plans, specifications and contract are in file and can be inspected at the District's office at Westley, California, or at the office of the District's Engineer, W. F. Woolley, at Patterson, California.

A full set of plans, specifications and contract may be obtained at the Engineer's office or at the District's office, on deposit of \$10.00 for each set, which sum will be returned on the return of the same in good condition within ten days after the date on which the bids are opened.

The contract will be let to the lowest, responsible bidder, except that the District reserves the right to reject any and all bids. Bids will be opened at the District's office at Westley, California, Saturday, July 14th, 1928, at three o'clock (3:00 P. M.) P. M.

By order of the Board of Directors of the West Stanislaus Irrigation District.

ELBRIDGE SMITH,

Secretary for the Board of Directors.
Westley, California, June 22, 1928.

NOTICE TO CONTRACTORS

(High School—El Dorado County High School District)

Office of the Clerk of the Board of Trustees of the El Dorado County High School District of the County of El Dorado, State of California.

Pursuant to an order of the Board of Trustees of the El Dorado County High School District of the County of El Dorado, State of California, made and entered of record on the 31st day of May, 1928, and in accordance with the law in such case made and provided.

Notice is hereby given that sealed bids will be received by the undersigned up to and not later than the hour of two o'clock P. M. on the 12th day of July, A. D. 1928, at the office of the said Board of Trustees in Room Six (Board of Education Rooms) in the Court House in the City of Placerville, County of El Dorado, State of California, for the construction of a high school building in the City of Placerville, County of El Dorado, State of California, for the clearing of the ground for the reception of said building, for the construction thereof, and for the furnishing of all labor and materials and mechanical workmanship for the building and constructing of the said high school building, in accordance with the plans and specifications heretofore made and adopted by the said high school board of trustees, which said plans may be seen and examined during office hours at the office of the Clerk of said Board

of Trustees in said Room Six of the Court House in the City of Placerville, County of El Dorado, State of California, and also at the office of the architects, Davis-Pearce Co., in the Builders' Bldg., Stockton, California.

All bids must be submitted on blank forms furnished by the Clerk of the said Board and must be accompanied by a certified check on some solvent bank in a sum equal to 10% of the amount of the bid, conditioned that if the contract is awarded, the party submitting the accepted bid will enter into a contract as may be required; the owners reserves the right to have the bonds required under said contract placed with some local agent or agents in the County of El Dorado, State of California, and also reserves the right to pay the premium thereon; said contract, as may be required, to be signed within ten days after notice of award, on failing so to do the amount of such check to be forfeited as liquidated damages for such failure. All checks to be made payable to the order of the Chairman of the Board of High School Trustees of the County of El Dorado, State of California.

The said Board reserves the right to reject any and all bids and to waive any informality in any bid received, or to re-advertise or to abandon the project entirely and build no building, or to build a building of a different kind.

A deposit of twenty-five dollars will be required for each set of plans and specifications and will be refunded to the bidder upon return of same in good condition.

By order of the Board of High School Trustees of the County of El Dorado, State of California.

W. A. RANTZ,
Clerk of the Board of Trustees of El Dorado County High School District,
County of El Dorado, State of Calif.

NOTICE TO CONTRACTORS

(One Story Brick School—Fair Oaks School District)

Notice is hereby given that the Board of Trustees of the Fair Oaks School District will receive sealed bids at the office of the Clerk of said Board at the Fair Oaks School Building at Fair Oaks, Sacramento County, California, for the construction of a school building, in accordance with the plans and specifications approved by the Board of Trustees of said school district; said bids to be received up to 8:00 o'clock p. m. on the 9th day of July, 1928, at which time and place they will be publicly opened and read.

Each bidder must submit a proposal to the Clerk of said Board, on standard forms, which may be obtained from the office of the architects for said district. Said proposal to be accompanied by a certified check for ten (10%) per cent of the amount of bids submitted; check to be made payable to the Fair Oaks School District.

Plans and specifications are now on file in the office of Coffman-Sahlgren-Stafford, architects for said district, at Room No. 602 Plaza Building, Sacramento, California, to whom all prospective bidders are hereto referred.

The Board of Trustees reserves the right to reject any or all bids received.

By order of the Board of Trustees of the Fair Oaks School District.

Dated June 22, 1928.

J. E. HOLST,
Clerk of the Board of Trustees of Fair Oaks School District.

NOTICE TO CONTRACTORS

(Two Branch High Schools—Kern County Union High School District)

Notice is hereby given that sealed bids will be received by the Board of Trustees of the Kern County Union High School District, Kern County, California, up to 4 o'clock P. M. on Monday, July 2, 1928, for the furnishing of all labor and material for the construction of two Branch High School Buildings, one to be built at McFarland, California, and one to be built at Shafter, California, in accordance with the plans and specifications prepared by Symmes & Cullimore, architects, 215 Heberfelde Bldg., Bakersfield, Calif. Bids will be received at the office of said Architects, and will be opened at 8 P. M. on Monday, July 2, 1928, at the Kern County Union High School, Bakersfield, Kern County, California.

Plans and specifications for the same

may be obtained at the office of the Architects upon deposit of Twenty-five Dollars (\$25.00) which will be returned on receipt of said plans and specifications in good order at the time designated by the architects.

Separate figures will be taken on the general work, the heating, and on the electric wiring of each building. Contractors may figure on any or all of this work.

A certified check or bidder's bond in the amount of ten per cent of the amount bid is to be furnished with the bid, and to the order of the Clerk of the Board of Trustees, as evidence of good faith, and that the bidder, if successful, will enter into a contract satisfactory to said Board of Trustees, and in addition thereto, will furnish surety bond therefor in the amount of fifty per cent of the bid, covering labor and material, according to law. All bids are to be made on the blank forms furnished by the Architects.

The Board reserves the right to reject any and all bids, or alternate bids deemed not advantageous to the District, and to waive any informality in any bid received.

By order of the Board of Trustees of the Kern County Union High School District of the County of Kern, State of California, adopted June 11, 1928.

BOYCE R. FITZGERALD,

President.

D. E. URNER,

Clerk.

NOTICE TO CONTRACTORS

(Cement—West Stanislaus Irrigation District)

Sealed proposals will be received by the Directors of the West Stanislaus Irrigation District, at Westley, Stanislaus County, California, up to two o'clock P. M. (2:00 P. M.) Saturday, July 14, 1928, and will at that time be publicly opened, for furnishing 14,000 barrels of Portland

Cement, according to contract and specifications, f. o. b. Westley, California, as required by the District during a period of one year from the contract date.

CONTRACT NO. 7. Furnish Cement. All proposals must be accompanied by a certified check for at least five (5%) per cent of the amount of the bid submitted, in favor of the West Stanislaus Irrigation District.

All certified checks accompanying rejected bids will be returned.

Certified check of the successful bidder will be returned when the contract has been executed and the required bond furnished.

In case of failure to execute contract or furnish the required bonds within the stipulated time, the certified check and the proceeds thereof will become and remain the property of the West Stanislaus Irrigation District.

Specifications and contract are on file and can be inspected at the District's office at Westley, California, or at the office of the District's Engineer, W. F. Woolley, at Patterson, California.

Specifications and contract may be obtained at the Engineer's office or at the District's office upon request.

The contract will be let to the lowest, responsible bidder, except that the District reserves the right to reject any and all bids and to waive any irregularities in the bidding. Guaranteed compression strength and fineness of grind will be considered in determining the low bid. Bids will be opened at the District's office at Westley, California, Saturday, July 14, 1928, at two o'clock P. M. (2:00 P. M.)

By order of the Board of Directors of the West Stanislaus Irrigation District.

ELBRIDGE SMITH,

Secretary of the Board of Directors,
Westley, California, June 22, 1928.
